(4) A permit holder shall access only the facility or location authorized by the permit. If the permit authorizes more than one facility or location, then on any single trip by an LVC from the designated Interstate System the permit holder may access only one facility or location before returning to the designated Interstate System.

LEGAL CITATIONS: Vehicles must comply with all applicable statutes, such as C.R.S. 42–4–402(1), 42–4–404(1), 42–4–407(1)(c)(III)(A), 42–4–409(11)(a)(II) (A), (B) or (C). All LVC's must comply with the Extra-Legal Vehicles and Loads Rules and the Longer Vehicle Combination Rules. However, when the rules address the same subject, the LVC, since it is operating at greater than 80,000 pounds, must comply with the Extra-Legal Vehicles and Loads Rules. Such rules are: 4–1–2 and 4–1–3 concerning holiday travel restrictions, 4–1–5 concerning hours of operation restrictions, 4–8 concerning minimum distance between vehicles and 4–15 concerning maximum allowable gross weight.

STATE: COLORADO

COMBINATION: Truck tractor and 3 trailing units—LCV

LENGTH OF THE CARGO-CARRYING UNITS: 115.5 feet

MAXIMUM ALLOWABLE GROSS WEIGHT: 110,000 pounds

OPERATIONAL CONDITIONS: Same as the CO–TT2 combination.

ROUTES: Same as the CO–TT2 combination.

LEGAL CITATIONS: Same as the CO–TT2 combination.

STATE: COLORADO

COMBINATION: Truck-trailer

LENGTH OF THE CARGO-CARRYING UNITS: 78 feet

OPERATIONAL CONDITIONS:

WEIGHT: This combination must operate in compliance with State laws and regulations. Because it is not an LCV, it is not subject to the ISTEA freeze as it applies to maximum weight.

DRIVER, VEHICLE, PERMIT, and ACCESS: Same as the CO–TT2 combination.

ROUTES: Same as the CO–TT2 combination.

LEGAL CITATIONS: Same as the CO–TT2 combination.

STATE: FLORIDA

COMBINATION: Truck tractor and 2 trailing units

LENGTH OF THE CARGO-CARRYING UNITS: 106 feet

OPERATIONAL CONDITIONS: All overdimensional and weight regulations of the Florida Turnpike Authority shall apply to such units unless specifically excluded under the terms of the Tandem Trailer Permit or these regulations.

WEIGHT: This combination must operate in compliance with State laws and regulations. Because it is not an LCV, it is not subject to the ISTEA freeze as it applies to maximum weight.

DRIVER: The driver must have a commercial driver's license with the appropriate endorsement. Proposed drivers of tandem-trailer units shall be registered by the Florida Turnpike Authority prior to driving such equipment on the turnpike system. For further information, see Rule 14–62.016 FAC.

VEHICLE: A complete tandem-trailer combination shall consist of a truck tractor, first semitrailer, fifth-wheel converter dolly, and a second semitrailer. The converter dolly may be either a separate unit or an integral component of the first semitrailer. The width shall not exceed 102 inches and the height shall not exceed 13 feet 6 inches. A tractor used in the tandem-trailer operations shall be capable of hauling the maximum gross load to be transported by a permittee at a speed of not less than 40 miles per hour on all portions of the turnpike system excepting that portion of the roadway, as posted in 1988, between mileposts 234 and 238 where a minimum speed of 30 miles per hour will be permitted.

Every tandem-trailer combination shall be equipped with full air brakes or air-activated hydraulic brakes on the tractor and either air or electric brakes on the dolly and trailers.

A tractor, which will be used to haul a complete tandem-trailer combination with a total gross weight of 110,000 pounds or more, shall be equipped with tandem rear axles and driving power shall be applied to all wheels on both axles. When the above tandem-axle tractor is required, a tandem-axle dolly converter must be used.

Every tandem-trailer combination shall be equipped with emergency equipment that equals or exceeds both the equipment requirements and the performance standards cited in Chapter 316, Florida Statutes and subpart H "Emergency Equipment" of 49 CFR 393.95.

A converter (fifth-wheel) dolly used in the tandem-trailer operations may have either single or tandem axles, according to its total gross weight. In addition to the primary towbar(s), the dolly vehicle must be equipped with safety chains or cables for connecting the dolly to the lead semitrailer and must be adequate to prevent breakaway.

Lamps and Reflectors. Each tractor, trailer, and converter dolly in a tandem-trailer combination shall be equipped with electric lamps and reflectors mounted on the vehicle in accordance with Chapter 316, Florida Statutes, and subpart B "Lighting Devices, Reflectors and Electrical Equipment," of 49 CFR 393.9 through 49 CFR 393.33.

Coupling Devices. Coupling devices shall be so designed, constructed, and installed and the vehicles in a tandem-trailer combination shall equal or exceed both the equipment requirements and the performance standards established on 49 CFR 393.70, except that such devices shall be so designed and constructed as to ensure that any such combination traveling on a level, smooth paved surface will follow in the path of the towing vehicle without shifting or swerving from side to side over 2 inches to each side of the path of the vehicle when it is moving in a straight line. (For further information see Rule 14–62.002; 14–62.005; 14–62.006; 14–62.007; 14–62.008; 14–62.009; 14–62.010; 14–62.011; 14–62.012; 14–62.013; and 14–62.015, FAC)

PERMIT: Tandem-trailer units may operate on the turnpike system under a Tandem Trailer Permit issued by the Florida Turnpike Authority upon application, except as provided in subparagraph (2) below.

(1) The Florida Turnpike Authority shall provide a copy of each such permit to the Motor Carrier Compliance Office.

(2) Tandem-trailer trucks of the dimensions mandated by the STAA of 1982 and operating in compliance with Rule Chapter 14–54, FAC, and under the provisions of section 316.515, Florida Statutes shall be exempt from the provisions of this rule chapter to the extent provided in Rule 14–54.0011, FAC.

(For further information see Rules 14–62.001; 14–62.022; 14–62.023; 14–62.024; 14–62.026; 14–62.027, FAC)

ACCESS: Staging. Tandem-trailer combinations shall be made up and broken up only in special assembly (staging) areas as designated for this purpose. For further information, see Rule 14–62.017, FAC. Make-up and break-up of tandem-trailer combinations shall not be allowed on a public right-of-way unless the area is designated for such use or unless an emergency exists.

ROUTES

	From	To
Florida's Turnpike.	South end Homestead Extension at US 1.	Exit 304 Wildwood.

LEGAL CITATIONS: Chapter 14–62, "Regulations Governing Tandem Combinations of Florida's Turnpike," Florida Administrative Code.

STATE: HAWAII

COMBINATION: Truck tractor and 2 trailing units

LENGTH OF CARGO CARRYING UNITS: 65 feet

OPERATIONAL CONDITIONS:

WEIGHT: This combination must operate in compliance with State laws and regulations.

DRIVER: The driver must have a commercial driver's license with the appropriate endorsement.

VEHICLE: No load may exceed the carrying capacity of the axles specified by the manufacturer and no combination vehicle shall have a total weight in excess of its designed gross combination weight limit.

PERMITS: No permits are required.

ACCESS: Designated routes off the NN.

ROUTES: All NN routes except HI–95 from H–1 to Barbers Point Harbor.

LEGAL CITATIONS: Chapter 291, Section 34, Hawaii Revised Statutes and Chapter 104 of Title 19, Administrative Rules.

STATE: IDAHO

COMBINATION: Truck tractor and 2 trailing units—LCV

LENGTH OF THE CARGO-CARRYING UNITS: 95 feet

MAXIMUM ALLOWABLE GROSS WEIGHT: 105,500 pounds

OPERATIONAL CONDITIONS:

WEIGHT: Single axle: 20,000 pounds, tandem axle: 34,000 pounds, and gross vehicle weight up to 105,500 pounds.

Axle spacing: must comply with Idaho Code 49–1001.

Trailer weights: The respective loading of any trailer shall not be substantially greater than the weight of any trailer located ahead of it in the vehicle combination. Substantially greater shall be defined as more than 4,000 pounds heavier.

DRIVER: The driver must have a commercial driver's license with the appropriate endorsement.

VEHICLE: The rules provide that all CMV's with two or more cargo-carrying units (except for truck-trailer combinations which are limited to an 85-foot combination length) are subject to calculated maximum off-tracking (CMOT) limits. The CMOT formula is:

$CMOT = R - [R^2 - (A^2 + B^2 + C^2 + D^2 + E^2)]^{1/2}$

$R = 161$

A, B, C, D, E, etc.=measurements between points of articulation or pivot. Squared dimensions to stinger steer points of articulation are negative.

The power unit of LCV's and extra-length combinations shall have adequate power and traction to maintain a speed of 15 miles per hour under normal operating conditions on any upgrade over which the combination is operated.

Fifth-wheel, drawbar, and other coupling devices shall be as specified by Federal Motor Carrier Safety Regulations, section 393.70.

Every combination operated under special permit authority shall be covered by insurance meeting State and Federal requirements. Evidence of this insurance must be carried in the permitted vehicle.

PERMIT: Permits are required. Permit duration is for 1 year from the date of issuance.

ACCESS: Combinations with a CMOT limit of less than 6.5 feet may use any Interstate or designated highway system interchange for access. Combinations with a CMOT of 6.5 to 8.75 feet may use only the following Interstate System interchanges:

I–15 Exits 58 and 119.

I–84 Exits 3, 49, 50, 52, 54, 57, 95, 168, 173, 182, 208, and 211.

I–86 Exits 36, 40, 56, and 58.

ROUTES: All NN routes.

LEGAL CITATIONS: Other regulations and restrictions that must be complied with are:

Idaho Code 49–1001, –1002, –1004, –1010, and –1011.

Idaho Transportation Department Rules 39.C.01, .06, .08, .09, .10, .11, .15, and .19–.23.

STATE: INDIANA

COMBINATION: Truck tractor and 2 trailing units—LCV

LENGTH OF THE CARGO-CARRYING UNITS: 106 feet

MAXIMUM ALLOWABLE GROSS WEIGHT: 127,400 pounds

OPERATIONAL CONDITIONS:

WEIGHT: Single axle=22,400 pounds. Axles spaced less than 40 inches between centers are considered to be single axles.

Tandem axle=36,000 pounds. Axles spaced more than 40 inches but less than 9 feet between centers are considered to be tandem axles.

Gross vehicle weight=90,000 pounds plus 1,070 pounds per foot for each foot of total vehicle length in excess of 60 feet with a maximum gross weight not to exceed 127,400 pounds.

DRIVER: The driver must have a commercial driver's license with the appropriate endorsement, and a Toll Road identification card. Drivers must be at least 26 years old, in good health, and with 5 years of experience driving tractor-semitrailers or tandem-trailer combinations. Experience must include driving in all four seasons.

VEHICLE: Lightest trailer to the rear. Distance between coupled trailers shall not exceed 9 feet. The combination vehicle, including coupling devices, shall be designed and constructed so as to ensure that while traveling on a level, smooth paved surface each trailing unit will follow in the path of the towing vehicle without shifting or swerving from side to side more than 3 inches. The combination vehicle must have at least five axles but not more than nine axles and except on ramps be able to achieve and maintain a speed of 45 miles per hour. Following distance is 500 feet, and passing maneuvers must be completed within 1 mile. The truck tractor must be equipped at a minimum with emergency equipment including fire extinguisher, spare fuses, tire chains, tire tread minimums, and disabled vehicle warning devices. Every dolly must be coupled with safety chain directly to the frame of the semitrailer by which it is towed. Each unit in a multi-trailer combination must be equipped at a minimum with electric lights and reflectors mounted on the vehicle.

PERMIT: A free annual tandem-trailer permit must be obtained from the Indiana DOT for loads which exceed 90,000 pounds. A multiple-trip access permit, for which a fee is charged, must also be obtained for access to points of delivery or to breakdown locations. Permission to operate can be temporarily suspended by the Indiana DOT due to weather, road conditions, holiday traffic, or other emergency conditions. Any oversize vehicle whose length exceeds 80 feet shall not be operated at a speed in excess of 45 miles per hour. Oversize loads are not to be operated at any time when wind velocity exceeds 25 miles per hour.

ACCESS: 15 miles from toll gates.

ROUTES

STATE: INDIANA

COMBINATION: Truck tractor and 3 trailing units—LCV

LENGTH OF THE CARGO-CARRYING UNITS: 104.5 feet

MAXIMUM ALLOWABLE GROSS WEIGHT: 127,400 pounds

OPERATIONAL CONDITIONS:

WEIGHT, DRIVER, PERMIT, and ACCESS: Same as the IN–TT2 combination.

VEHICLE: Semitrailers and trailers shall not be longer than 28.5 feet, and the minimum number of axles for the combination is seven. Three trailing unit combinations must be equipped with adequate spray-suppressant mud flaps which are properly maintained.

ROUTES: Same as the IN–TT2 combination.

LEGAL CITATIONS: Same as the IN–TT2 combination.

STATE: INDIANA

COMBINATION: Combination of three or more vehicles coupled together

LENGTH OF THE CARGO CARRYING UNITS: 58 feet

OPERATIONAL CONDITIONS:

WEIGHT: This combination must operate in compliance with State laws and regulations. Because it is not an LCV, it is not subject to the ISTEA freeze as it applies to maximum weight.

DRIVER: The driver must have a commercial driver's license with the appropriate endorsement.

VEHICLE: The maximum width is 102 inches, and the maximum height is 13 feet 6 inches.

PERMIT: None required.

ACCESS: Unlimited.

ROUTES: All roads within the State.

LEGAL CITATIONS: Indiana Code 9–8–1–2.

STATE: KANSAS

COMBINATION: Truck tractor and 2 trailing units—LCV

LENGTH OF THE CARGO-CARRYING UNITS: 109 feet

MAXIMUM ALLOWABLE GROSS WEIGHT: 120,000 pounds

OPERATIONAL CONDITIONS:

WEIGHT: Combinations consisting of a truck tractor and two trailing units must comply with the Federal Bridge Formula, with maximum weights of 20,000 pounds on a single axle and 34,000 pounds on a tandem axle, and with a maximum gross weight of 120,000 pounds.

DRIVER: The driver must have a commercial driver's license with the appropriate endorsement.

VEHICLE: Truck tractor and two trailing unit combinations must meet legal width and height with no time-of-day travel restrictions or other special requirements.

PERMIT: Permits are not required for operation on the Kansas Turnpike. A permit is required for access between the Turnpike and motor freight terminals located within a 10-mile radius of each toll booth, except at the northeastern end of the Turnpike where a 20-mile radius is allowed. Access permits are valid for 6 months.

ACCESS: Turnpike access routes include all routes between the Turnpike and a motor freight terminal located within a 10-mile radius of each toll booth, except at the northeastern end of the Turnpike where a 20-mile radius is allowed.

KSA 68–2003.		

STATE: KANSAS

COMBINATION: Truck tractor and 3 trailing units—LCV

LENGTH OF THE CARGO-CARRYING UNITS: 109 feet

MAXIMUM ALLOWABLE GROSS WEIGHT: 120,000 pounds

OPERATIONAL CONDITIONS: The operations of triple trailing unit combinations are governed by two sets of criteria: (1) The Turnpike and Turnpike access rules, and (2) the SVC rules which apply off of the Turnpike except in the case of vehicles operating under Turnpike access authority. The Turnpike and Turnpike access rules allow a maximum combination vehicle length of 119 feet overall. The SVC rules require "Triples" to have trailers of no more than 28.5 feet maximum length or a cargo-carrying length of approximately 95 feet.

The Turnpike and Turnpike access rules have no time-of-day travel restrictions or other special requirements.

The SVC rules have several operational conditions. SVC's cannot operate on holidays or during holiday weekends. SVC's cannot be dispatched or operated during adverse weather conditions. SVC's must travel in the right lane, except for passing, and the following distance is 100 feet for every 10 miles per hour. SVC permits can include any restrictions deemed necessary, including specific routes and hours, days, and/or seasons of operation. Rules and regulations can be promulgated regarding driver qualifications, vehicle equipment, and operational standards.

WEIGHT: All triple trailing unit combinations must comply with the Federal Bridge Formula with maximum axle weights of 20,000 pounds on a single axle and 34,000 pounds on a tandem axle. The maximum gross weight is 120,000 pounds on the Turnpike and Turnpike access routes, but the SVC's have a maximum weight of 110,000 pounds.

DRIVER: A commercial driver's license with the appropriate endorsement is required under both Turnpike and SVC rules. In addition, for SVC operation drivers must have completed SVC driver training and a company road test. Drivers must also have 2 years of experience driving tractor-semitrailers and 1 year driving doubles.

VEHICLE: Vehicle requirements apply to the SVC program only. All axles, except steering axles, must have dual wheels, and all vehicles must be able to achieve and maintain a speed of 40 miles per hour on all grades. Antispray mud flaps shall be attached to the rear of each axle except the steering axle. Mud flaps shall have a surface designed to absorb and deflect excess moisture to the road surface. Drop and lift axles are prohibited. Vehicles may have a minimum of six and a maximum of nine axles. The heaviest trailers are to be placed forward. Hazardous cargo is prohibited. Convex mirrors are required on both sides of the cab. Equipment must comply with the requirements of 49 CFR 390–399.

Any SVC shall be stable at all times during normal braking and normal operation. When traveling on a level, smooth paved surface, an SVC shall follow the towing vehicle without shifting or swerving beyond the restraints of the lane of travel.

PERMIT: Same as the KS–TT2 combination on the Turnpike and Turnpike access routes. A fee per company plus a permit fee for each power unit is required for the SVC program, and the SVC permits are valid for 1 year. SVC's operated pursuant to regulation 36–1–33 under an annual permit shall be covered by insurance.

ACCESS: Turnpike access routes include all routes between the Turnpike and a motor freight terminal located within a 10-mile radius of each toll booth, except at the northeastern end of the Turnpike where a 20-mile radius is allowed. SVC access routes include all routes between the Interstate and a motor freight terminal located within 5 miles of the Interstate at Goodland.

ROUTES:

A. For vehicles subject to the Turnpike and Turnpike access rules:

	From	To
I–35 KTA	Oklahoma	KTA Exit 127.

I–335 KTA	KTA Exit 127	KTA Exit 177.
I–470 KTA	KTA Exit 177	KTA Exit 182.

B. For vehicles subject to the SVC rules:

	From	To
I–70	Colorado	I–70 Exit 19 Goodland.

LEGAL CITATIONS: Same as the KS–TT2 combination, plus KSA 8–1915.

STATE: MASSACHUSETTS

COMBINATION: Truck tractor and 2 trailing units—LCV

LENGTH OF CARGO-CARRYING UNITS: 104 feet

MAXIMUM ALLOWABLE GROSS WEIGHT: 127,400 pounds

OPERATIONAL CONDITIONS:

WEIGHT: Any combination of vehicles may not exceed a maximum gross weight of 127,400 pounds. The maximum gross weight of the tractor and first semitrailer shall not exceed 71,000 pounds. The maximum gross weight of each unit of dolly and semitrailer shall not exceed 56,400 pounds. The maximum gross weight for the tractor and first semitrailer is governed by the formula 35,000 pounds plus 1,000 pounds per foot between the center of the foremost axle and the center of the rearmost axle of the semitrailer. The maximum gross weight on any one axle is 22,400 pounds, and on any tandem axle it is 36,000 pounds. Axles less than 46 inches between centers are considered to be one axle.

DRIVER: The driver must have a commercial driver's license with the appropriate endorsement and must be registered with the Massachusetts Turnpike Authority (MTA). Registration shall include all specified driving records, safety records, physical examinations, and minimum of 5 years of driving experience with tractor trailers.

VEHICLE:

(1) Brake Regulation. The brakes on any vehicle, dolly converter, or combination of vehicles used in tandem-trailer operations as a minimum shall comply with Federal Motor Carrier Safety Regulations in 49 CFR part 393. In addition, any vehicle, dolly converter or combination of vehicles used in tandem-trailer operations shall meet the requirements of the provisions of the Massachusetts Motor Vehicle Law. Tandem-trailer combinations certified on or after June 1, 1968, shall be equipped with suitable devices to accelerate application and release of the brakes of the towed vehicle.

(2) Axles. A tractor used to haul a tandem trailer combination with a gross weight of more than 110,000 pounds shall be equipped with tandem rear axles, each of which shall be engaged to bear its full share of the load on the roadway surface.

(3) Tandem Assembly. When the gross weight of the trailers vary by more than 20 percent, they shall be coupled with the heaviest trailer attached to the tractor. Coupling devices and towing devices shall comply with the Federal regulations as stated in 49 CFR part 393. When the distance between the rear of the one semitrailer and the front of the following semitrailer is 10 feet or more, the dolly shall be equipped with a device, or the trailers shall be connected along the sides with suitable material, which will indicate to other Turnpike users that the trailers are connected and are in effect one unit. The MTA shall approve the devices or connections to be used on the semitrailers that would indicate it is one unit. Coupling devices shall be so designed, constructed, and installed, and the vehicles in a tandem trailer combination shall be so designed and constructed to ensure that when traveling on a level, smooth paved surface they will follow in the path of the towing vehicle without shifting or swerving over 3 inches to each side of the path of the towing vehicle when it is moving in a straight line. A tandem trailer unit may pass another vehicle traveling in the same direction only if the speed differential will allow the tandem trailer unit to complete the maneuver and return to the normal driving lane within a distance of 1 mile.

Each truck tractor shall be equipped with at least one spare fuse or other overload protective device, if the devices are not of a reset type, for each kind and size used. The vehicle is to carry at least one set of tire chains for at least one driving wheel on each side between October 15 and May 1 of each year. Each truck tractor shall carry a fire extinguisher which shall have an aggregate rating of 20 BC.

PERMIT: A permittee must demonstrate to the MTA that it has insurance coverage of the type and amounts required by Turnpike regulation. Both the tractor manufacturer and the permittee shall certify to the MTA, prior to the approval of a tractor, that it is capable of hauling the maximum permissible gross load to be transported by the permittee at a speed not less than 20 miles per hour on all portions of the turnpike system. The MTA may revoke or temporarily suspend any permit at will and the instructions of the MTA or Massachusetts State Police shall be complied with immediately.

ACCESS: Makeup and breakup areas. Tandem trailer units shall not leave the Turnpike right-of-way and shall be assembled and disassembled only in designated areas.

ROUTES

	From	To
I–90 Mass Turnpike.	New York State.	Turnpike Exit 18 Boston.

LEGAL CITATIONS:

The MTA, Massachusetts Rules and Regulations 730, and CMR 4.00.

STATE: MICHIGAN

COMBINATION: Truck tractor and 2 trailing units—LCV

LENGTH OF CARGO-CARRYING UNITS: 58 feet

MAXIMUM ALLOWABLE GROSS WEIGHT: 154,000 pounds

OPERATIONAL CONDITIONS:

WEIGHT: The single-axle weight limit for LCV's is 18,000 pounds for axles spaced 9 feet or more apart. For axles spaced more than 3.5 feet but less than 9 feet apart, the single-axle weight limit is 13,000 pounds. The tandem-axle weight limit is 16,000 pounds per axle for the first tandem and 13,000 pounds per axle for all other tandems. Axles spaced less than 3.5 feet apart are limited to 9,000 pounds per axle. Maximum load per inch width of tire is 700 pounds. Maximum gross weight is determined based on axle and axle group weight limits. The maximum practical gross weight is 154,000 pounds.

When restricted seasonal loadings are in effect, load per inch width of tire and maximum axle weights are reduced as follows: Rigid pavements—525 pounds per inch of tire width, 25 percent axle weight reduction; Flexible pavements—450 pounds per inch of tire width, 35 percent axle weight reduction.

DRIVER: The driver must have a commercial driver's license with the appropriate endorsement.

VEHICLE: Truck height may not exceed 13.5 feet. There is no overall length for LCV's operating on the Interstate System when semitrailer and trailer lengths do not exceed 28.5 feet. If either the trailer or semitrailer is longer than 28.5 feet, the distance from the front of the first box to the rear of the second box may not exceed 58 feet.

A combination of vehicles shall not have more than 11 axles, and the ratio of gross weight to net horsepower delivered to the clutch shall not exceed 400 to 1.

PERMIT: Permits for divisible loads of more than 80,000 pounds must conform to either Federal or grandfathered axle and bridge spacing requirements.

ACCESS: All designated State highways.

ROUTES: All Interstate routes and designated State highways.

LEGAL CITATIONS:

Michigan Public Act 300, section 257.722
Michigan Public Act 300, section 257.719

STATE: MISSISSIPPI

COMBINATION: Truck tractor and 2 trailing units

LENGTH OF THE CARGO-CARRYING UNITS: 65 feet

OPERATIONAL CONDITIONS:

WEIGHT: This combination must operate in compliance with State laws and regulations.

DRIVER: The driver must have a commercial driver's license with the appropriate endorsement.

VEHICLE: Each trailing unit may be a maximum of 30 feet long.

PERMIT: None required.

ACCESS: No restrictions, may operate Statewide.

ROUTES: All NN routes.

LEGAL CITATIONS: Section 63–5–19, Mississippi Code, Annotated, 1972.

STATE: MISSOURI

COMBINATION: Truck tractor and 2 trailing units—LCV

LENGTH OF THE CARGO-CARRYING UNITS: 109 feet

MAXIMUM ALLOWABLE GROSS WEIGHT: 120,000 pounds when entering Missouri from Kansas; 95,000 pounds when entering from Nebraska; 90,000 pounds when entering from Oklahoma.

OPERATIONAL CONDITIONS: Missouri allows vehicles from neighboring States access to terminals in Missouri which are within 20 miles of the Missouri State Line. These vehicles must be legal in the State from which they are entering Missouri.

WEIGHT, DRIVER, VEHICLE: Same conditions which apply to a truck tractor and two trailing units legally operating in Kansas, Nebraska, or Oklahoma.

PERMIT: Annual blanket overdimension permits are issued to allow a truck tractor and two trailing units legally operating in Kansas, Nebraska, or Oklahoma to move to and from terminals in Missouri which are located within a 20-mile band of the State Line for these three States. There is a permit fee per power unit. The permits carry routine permit restrictions, but do not address driver qualifications or any other restrictions not included in the rules and regulations for all permitted movement.

ACCESS: Routes as necessary to reach terminals.

ROUTES: All NN routes within a 20-mile band from the Kansas, Nebraska, and Oklahoma borders.

LEGAL CITATIONS: § 304.170 and § 304.200 Revised Statutes of Missouri 1990.

STATE: MISSOURI

COMBINATION: Truck tractor and 3 trailing units—LCV

LENGTH OF THE CARGO-CARRYING UNITS: 109 feet

MAXIMUM ALLOWABLE GROSS WEIGHT: 120,000 pounds when entering Missouri from Kansas; 90,000 pounds when entering from Oklahoma.

OPERATIONAL CONDITIONS: Missouri allows vehicles from neighboring States access to terminals in Missouri which are within 20 miles of the Missouri State Line. These vehicles must be legal in the State from which they are entering Missouri.

WEIGHT, DRIVER, VEHICLE: Same conditions which apply to a truck tractor and three trailing units legally operating in Kansas or Oklahoma.

PERMIT: Annual blanket overdimension permits are issued to allow a truck tractor and three trailing units legally operating in Kansas or Oklahoma, to move to and from terminals in Missouri which are located within a 20-mile band of the State Line for these two States. There is a permit fee per power unit. The permits carry routine permit restrictions, but do not address driver qualifications or any other restrictions not included in the rules and regulations for all permitted movement.

ACCESS: Routes as necessary to reach terminals.

ROUTES: All NN routes within a 20-mile band from the Kansas and Oklahoma borders.

LEGAL CITATIONS: § 304.170 & § 304.200 Revised Statutes of Missouri 1990.

STATE: MONTANA

COMBINATION: Truck tractor and 2 trailing units—LCV

LENGTH OF CARGO-CARRYING UNITS: 93 feet

MAXIMUM ALLOWABLE GROSS WEIGHT: 137,800 pounds

OPERATIONAL CONDITIONS:

WEIGHT: Except for vehicles operating under the Montana/Alberta Memorandum of Understanding (MOU), any vehicle carrying a divisible load over 80,000 pounds must comply with the Federal Bridge Formula found in 23 U.S.C. 127.

Maximum single-axle limit: 20,000 pounds
Maximum tandem-axle limit: 34,000 pounds
Maximum gross weight is based upon application of the Bridge Formula.
Maximum weight allowed per inch of tire width is 600 pounds.

WEIGHT, MONTANA/ALBERTA MOU:

Maximum single-axle limit: 20,000 pounds
Maximum tandem-axle limit: 37,500 pounds
Maximum tridem-axle limit:
  Axles spaced from 94″ to less than 118″: 46,300 pounds
  Axles spaced from 118″ to less than 141″: 50,700 pounds
  Axles spaced from 141″ to 146″: 52,900 pounds
Maximum gross weight:
  A-Train: 118,000 pounds
  B-Train (eight axle): 137,800 pounds
  B-Train (seven axle): 124,600 pounds

The designation of "A-Train" or "B-Train" refers to the manner in which the two trailing units are connected.

DRIVER: The driver must have a commercial driver's license with the appropriate endorsement.

VEHICLE: No special requirements beyond compliance with Federal Motor Carrier Safety Regulations.

PERMIT: Special permit required for double trailer combinations if either trailer exceeds 28.5 feet. Permits are available on an annual or a trip basis and provide for continuous travel. Statutory reference: 61–10–124, MCA. For vehicles being operated under the Montana/Alberta MOU, operators must have paid gross vehicle weight fees for the total weight being carried. In addition, a term Restricted Route and Oversize Permit for which an annual fee is charged must be obtained. Finally, vehicle operators must secure a single-trip, overweight permit prior to each trip.

ACCESS: Access must be authorized by the Montana DOT. For vehicles

operated under the Montana/Alberta MOU, access routes from I–15 into Shelby are authorized when permits are issued. For vehicles with a cargo-carrying length greater than 88 feet, but not more than 93 feet, a 2-mile access from the Interstate System is automatically granted to terminals and service areas. Access outside the 2-mile provision may be granted on a case-by-case basis by the Administrator of the Motor Carrier Services Division.

ROUTES: Combinations with a cargo-carrying length greater than 88 feet, but not more than 93 feet, are limited to the Interstate System. Combinations with a cargo-carrying length of 88 feet or less can use all NN routes except U.S. 87 from milepost 79.3 to 82.5. For vehicles being operated under the Montana/Alberta MOU, the only route available is I–15 from the border with Canada to Shelby.

Montana/Alberta Memorandum of Understanding
Administrative Rules of Montana

STATE: MONTANA

COMBINATION: Truck tractor and 3 trailing units—LCV

LENGTH OF THE CARGO-CARRYING UNITS: 100 feet

MAXIMUM ALLOWABLE GROSS WEIGHT: 131,060 pounds

OPERATIONAL CONDITIONS:

WEIGHT: Any vehicle carrying a divisible load over 80,000 pounds must comply with the Federal Bridge Formula found in 23 U.S.C. 127.
Maximum single-axle limit: 20,000 pounds
Maximum tandem-axle limit: 34,000 pounds
Maximum gross weight is based upon application of the Bridge Formula.
Maximum weight allowed per inch of tire width is 600 pounds.

DRIVER: Drivers of three trailing unit combinations must be certified by the operating company. This certification includes an actual driving test and knowledge of Federal Motor Carrier Safety Regulations and State law pertaining to triple vehicle operations. Drivers are also required to have a commercial driver's license with the appropriate endorsement.

VEHICLE: The 100-foot cargo-carrying length is only with a conventional tractor within a 110-foot overall length limit. If a cabover tractor is used, the cargo length is 95 feet within a 105-foot overall length limit. Vehicles involved in three trailing unit operations must comply with the following regulations:

1. Shall maintain a minimum speed of 20 miles per hour on any grade;
2. Kingpins must be solid and permanently affixed;
3. Hitch connections must be no-slack type;
4. Drawbars shall be of minimum practical length;
5. Permanently affixed axles must be designed for the width of the trailer;
6. Anti-sail mudflaps or splash and spray suppression devices are required;
7. The heavier trailers shall be in front of lighter trailers;
8. A minimum distance of 100 feet per 10 miles per hour is required between other vehicles except when passing;
9. Operating at speeds greater than 55 miles per hour is prohibited; and
10. Vehicle and driver are subject to Federal Motor Carrier Safety Regulations.

Reference: 18.8.517 Administrative Rules of Montana.

PERMIT: Special triple vehicle permits are required for the operation of these combinations. Permits are available on an annual or trip basis. Permits are good for travel on the Interstate System only and are subject to the following conditions:

1. Travel is prohibited during adverse weather conditions;
2. Transportation of Class A explosives is prohibited; and
3. Companies operating triple combinations must have an established safety program including driver certifications.

ACCESS: Access is for 2 miles beyond the Interstate System, or further if granted by the Administrator of the Motor Carrier Services Division.

ROUTES: Interstate System routes in the State.

LEGAL CITATION: 18.8.517 Administrative Rules of Montana.

STATE: MONTANA

COMBINATION: Truck-Trailer

LENGTH OF CARGO-CARRYING UNITS: 88 feet

OPERATIONAL CONDITIONS:

WEIGHT: This combination must operate in compliance with State laws and regulations. Because it is not an LCV, it is not subject to the ISTEA freeze as it applies to maximum weight.

DRIVER, and ACCESS: Same as the MT–TT2 combination.

VEHICLE: Same as the MT–TT2 combination, except overall length limited to 95 feet.

PERMIT: Special permit required if overall length exceeds 75 feet. Special permits allow continuous travel and are available on an annual or trip basis.

ROUTES: Same as the MT–TT2 combination.

LEGAL CITATIONS: 61–10–121 and 61–10–124, MCA.

STATE: MONTANA

COMBINATION: Truck-trailer-trailer

LENGTH OF THE CARGO-CARRYING UNITS: 103 feet

WEIGHT: This combination must operate in compliance with State laws and regulations. Because it is not an LCV, it is not subject to the ISTEA freeze as it applies to maximum weight.

DRIVER, PERMIT, and ACCESS: Same as the MT–TT2 combination.

VEHICLE: The cargo-carrying unit length is 103 feet with a conventional truck within a 110-foot overall length limit, and 98 feet with a cab-over-engine truck within a 105-foot overall length limit. On two-lane highways the cargo-carrying unit length is 88 feet within a 95-foot overall length limit.

ROUTES: All NN routes except U.S. 87 between mileposts 79.3 and 82.5.

LEGAL CITATIONS:

61–10–124 MCA
61–10–121 MCA
ARM 18–8–509

STATE: NEBRASKA

COMBINATION: Truck tractor and 2 trailing units—LCV

LENGTH OF THE CARGO-CARRYING UNITS: 95 feet

MAXIMUM ALLOWABLE GROSS WEIGHT: 95,000 pounds

OPERATIONAL CONDITIONS:

WEIGHT: The following conditions are for a truck tractor and 2 trailing units with a length of cargo-carrying units of 65 feet or less.
Maximum Weight:
Single axle = 20,000 pounds
Tandem axle = 34,000 pounds
Gross = Determined by Federal Bridge Formula B, but not to exceed 95,000 pounds.

Truck tractor and 2 trailing unit combinations with a length of cargo-carrying units of over 65 feet are required to travel empty.

DRIVER: The driver must have a commercial driver's license with the appropriate endorsement. There are no additional special qualifications where the cargo-carrying unit lengths are 65 feet or less. For cargo-carrying unit lengths over 65 feet, the driver must comply with all State and Federal

requirements and must not have had any accidents while operating such vehicles.

VEHICLE: For combinations with a cargo-carrying length over 65 feet, but not over 85 feet, the semitrailer cannot exceed 48 feet in length and the full trailer cannot be less than 26 feet or more than 28 feet long. The shorter trailer must be placed to the rear. The wheel path of the trailer(s) cannot vary more than 3 inches from that of the towing vehicle.

For combinations with a cargo-carrying length greater than 85 feet, up to and including 95 feet, the trailers must be of approximately equal length.

PERMIT: A weight permit in accordance with Chapter 12 of the Nebraska Department of Roads Rules and Regulations is required for operating on the Interstate System with weight in excess of 80,000 pounds. Combinations with a length of cargo-carrying units over 65 feet are not eligible for the overweight permit. A length permit, in accordance with Chapter 11 of the Nebraska Department of Roads Rules and Regulations, is required for two trailing unit combinations with a length of cargo-carrying units over 65 feet in length. Conditions of the length permit prohibit movements on Saturdays, Sundays, and holidays; when ground wind speed exceeds 25 miles per hour; and when visibility is less than 800 feet. Movement is also prohibited during steady rain, snow, sleet, ice, or other conditions causing slippery pavement. Between November 15 and April 15 permission to move must be obtained from the Nebraska Department of Roads Permit Office within 3 hours of the movement. Between April 16 and November 14 permission to move must be obtained within 3 days of the movement. Fees are charged for the 10-day weight permit and the annual length permit. These permits can be revoked if the terms are violated.

ACCESS: Two trailing unit combinations with a length of cargo-carrying units of not more than 65 feet may operate on all State highways. For two trailing unit combinations with a length of cargo-carrying units over 65 feet, access to and from the Interstate is limited to designated staging areas within 6 miles of I–80 between the Wyoming State Line and Exit 440 (Nebraska Route 50). Except for weather, emergency, and repair, two trailing unit combinations with a length of cargo-carrying units over 65 feet cannot reenter the Interstate after having left it.

ROUTES: Vehicles requiring length permits are restricted to I–80 from Wyoming to Exit 440 (Nebraska Highway 50). There are no route restrictions for vehicles not requiring length permits.

LEGAL CITATIONS:

Nebraska Revised Statutes Reissued 1988

§ 39–6,179 (Double trailers under 65 feet)

§ 39–6,179.01 (Double trailers over 65 feet)

§ 39–6,180.01 (Authorized weight limits)

§ 39–6,181 (Vehicles; size; weight; load; overweight; special permits; etc.)

Nebraska Department of Roads Rules and Regulations, Title 408, Chapter 1 (Double trailers over 65 feet)

STATE: NEBRASKA

COMBINATION: Truck tractor and 3 trailing units

LENGTH OF THE CARGO-CARRYING UNITS: 95 feet

OPERATIONAL CONDITIONS:

WEIGHT: A truck tractor and three trailing unit combination is required to travel empty.

DRIVER, PERMIT, and ACCESS: Same as the NE–TT2 combination.

VEHICLE: A three trailing unit combination must have trailers of approximately equal length and the overall vehicle length cannot exceed 105 feet.

ROUTES: I–80 from Wyoming to Exit 440 (Nebraska Highway 50).

LEGAL CITATIONS:

Neb. Rev. Stat. § 39–6,179.01 (Reissue 1988)

Nebraska Department of Roads Rules and Regulations, Title 408, Chapter 1

STATE: NEBRASKA

COMBINATION: Truck-trailer

LENGTH OF THE CARGO-CARRYING UNITS: 68 feet

OPERATIONAL CONDITIONS

WEIGHT: This combination must operate in compliance with State laws and regulations. Because it is not an LCV, it is not subject to the ISTEA freeze as it applies to maximum weight.

DRIVER: The driver must have a commercial driver's license with the appropriate endorsement.

VEHICLE: The overall vehicle length, including load, cannot exceed 75 feet.

PERMIT: No permit is required.

ACCESS: Statewide during daylight hours only.

ROUTES: All NN routes.

LEGAL CITATIONS: Neb. Rev. Stat. § 39–6,179.

STATE: NEVADA

COMBINATION: Truck tractor and 2 trailing units—LCV

LENGTH OF THE CARGO-CARRYING UNITS: 95 feet

MAXIMUM ALLOWABLE GROSS WEIGHT: 129,000 pounds

OPERATIONAL CONDITIONS:

WEIGHT: The single-axle weight limit is 20,000 pounds, the tandem-axle weight limit is 34,000 pounds, and the gross weight is subject to the Federal Bridge Formula limits, provided that two consecutive tandems with a distance of 36 feet or more between the first and last axle may carry 34,000 pounds on each tandem.

DRIVER: The driver must have a commercial driver's license with the appropriate endorsement, be at least 25 years old, and have had a medical exam within previous 24 months. Every operator must be covered by a liability insurance policy with personal injury and property damage limits meeting State requirements.

VEHICLE: No trailer may be longer than 48 feet. If one trailer is 48 feet long, the other trailer cannot exceed 42 feet. Towed vehicles must not shift or sway more than 3 inches to right or left and must track in a straight line on a level, smooth paved highway. Vehicles must be able to accelerate and operate on a level highway at speeds which are compatible with other traffic and with the speed limits and must be able to maintain a minimum of 20 miles per hour on any grade on which they may operate. All vehicles must have safety chains on converter dollies. Vehicles must carry snow chains for each drive wheel.

Vehicle operations may be suspended in adverse weather and high winds, as determined by police or the Nevada DOT.

The shortest trailer must be in the rear of a combination unless it is heavier than the longer trailer.

Brakes must comply with all State and Federal requirements for commercial vehicles including automatic braking for separation of vehicles, parking brakes, and working lights.

Vehicles must not exceed posted speed limits and cannot operate on any highway on which they cannot at all times stay on the right side of the center line. All LCV's must keep a distance of at least 500 feet from each other.

Every full-sized truck or truck tractor used in a combination of vehicles must be equipped with at least the following emergency and safety equipment:

1. One fire extinguisher which meets "Classification B" of the National Fire Protection Association.

2. One spare light bulb for every electrical lighting device used on the rear of the last vehicle in a combination of vehicles.

3. One spare fuse for each different kind and size of fuse used in every vehicle in the combination of vehicles. If the electrical system of any vehicle in the combination contains any devices for protection of electrical circuits from overloading, other than fuses and circuit breakers which can be reset, one spare of each such device must be kept as emergency and safety equipment.

4. Any flares, reflectors or red electrical lanterns which meet State or Federal law or regulation.

Before operating a combination of vehicles on a highway of this State, the owner or operator of the combination shall certify to the Nevada DOT, on a form provided by it, that all vehicles and equipment in the combination meet the requirements of and will be operated in compliance with NAC 484.300 to 484.440, inclusive.

All axles except for steering axles and axles that weigh less than 10,000 pounds must have at least four tires unless the tire width of each tire on the axles is 14 inches or greater.

PERMIT: Permits are required and a fee is charged. They may be revoked for violation of any of the provisions of the legal regulations. The State may suspend operation on roads deemed unsafe or impracticable. Permits must be carried in the vehicle along with identification devices issued by the Nevada Department of Motor Vehicles.

ACCESS: As authorized by the Nevada DOT.

ROUTES: All NN routes, except US 93 from Nevada State route 500 to Arizona.

LEGAL CITATIONS: NRS 484.400, .405(4), .425, .430, .739, 706.100–4, .100–6(a), and 706.531. Also, "Regulations for the Operation of 70 to 105 foot Combinations" (1990).

STATE: NEVADA

COMBINATION: Truck tractor and 3 trailing units—LCV

LENGTH OF THE CARGO-CARRYING UNITS: 95 feet

MAXIMUM ALLOWABLE GROSS WEIGHT: 129,000 pounds

OPERATIONAL CONDITIONS: Same as the NV–TT2 combination.

ROUTES: Same as the NV–TT2 combination.

LEGAL CITATIONS: Same as the NV–TT2 combination.

STATE: NEVADA

COMBINATION: Truck-trailer, and Truck-trailer-trailer

LENGTH OF THE CARGO-CARRYING UNITS: 98 feet

OPERATIONAL CONDITIONS:

WEIGHT: This combination must operate in compliance with State laws and regulations. Because it is not an LCV, it is not subject to the ISTEA freeze as it applies to maximum weight.

DRIVER, VEHICLE, and ACCESS: Same as the NV–TT2 combination.

PERMITS: Same as the NV–TT2 combination, except permits for Truck-trailer, or Truck-trailer-trailer combinations are only required when the overall length is 70 feet or more.

ROUTES: Same as the NV–TT2 combination.

LEGAL CITATIONS: Same as the NV–TT2 combination.

STATE: NEW MEXICO

COMBINATION: Truck tractor and 2 trailing units—LCV

LENGTH OF THE CARGO-CARRYING UNITS: Not applicable

MAXIMUM ALLOWABLE GROSS WEIGHT: 86,400 pounds

OPERATIONAL CONDITIONS: The cargo-carrying length restriction does not apply to this combination. The length of each trailing unit is limited to 28.5 feet. This describes a two trailing unit vehicle whose operation is guaranteed by the STAA of 1982 regardless of inter-unit spacing. As long as each trailing unit is 28.5 feet long or less, cargo-carrying length is not restricted. This combination is listed as a LCV because it can exceed the 80,000-pound threshold established in the Congressional definition. The 86,400-pound gross weight limit is grandfathered for New Mexico.

WEIGHT: Single axle = 21,600 pounds. Tandem axle = 34,200 pounds. Load per inch of tire width = 600 pounds. The total gross weight with load imposed on the highway by any vehicle or combination of vehicles where the distance between the first and last axles is less than 19 feet shall not exceed that given for the respective distances in the following table:

Distance in feet between first and last axles of group	Allowed load in pounds on group of axles
4	34,320
5	35,100
6	35,880
7	36,660
8	37,440
9	38,220
10	39,000
11	39,780
12	40,560
13	41,340
14	42,120
15	42,900
16	43,680
17	44,460
18	45,240

The total gross weight with load imposed on the highway by any vehicle or combination of vehicles where the distance between the first and last axles is 19 feet or more shall not exceed that given for the respective distances in the following table:

Distance in feet between first and last axles of group	Allowed load in pounds on group of axles
19	53,100
20	54,000
21	54,900
22	55,800
23	56,700
24	57,600
25	58,500
26	59,400
27	60,300
28	61,200
29	62,100
30	63,000
31	63,900
32	64,800
33	65,700
34	66,600
35	67,500
36	68,400
37	69,300
38	70,200
39	71,100
40	72,000
41	72,900
42	73,800
43	74,700
44	75,600
45	76,500
46	77,400
47	78,300
48	79,200
49	80,100
50	81,000
51	81,900
52	82,800
53	83,700
54	84,600
55	85,500
56 and over	86,400

The distance between the centers of the axles shall be measured to the nearest even foot. When a fraction is exactly one-half the next larger whole number shall be used.

DRIVER: The driver must have a commercial driver's license with the appropriate endorsement.

VEHICLE: No special requirements beyond normal Federal Motor Carrier or State regulations. The maximum length of the trailing units is 28.5 feet.

PERMIT: None Required.

ACCESS: STAA vehicles must be allowed reasonable access in accordance with 23 CFR 658.19.

ROUTES: All Interstate highways.

LEGAL CITATIONS:

66–7–409 NMSA 1978
66–7–410 NMSA 1978

STATE: NEW YORK

COMBINATION: Truck tractor and 2 trailing units—LCV

LENGTH OF THE CARGO-CARRYING UNITS: 102 feet

MAXIMUM ALLOWABLE GROSS WEIGHT: 143,000 pounds

OPERATIONAL CONDITIONS:

WEIGHT: The following information pertains to tandem trailer combinations with either trailer more than 28.5 feet long but not more than 48 feet long. A nine-axle combination vehicle may not exceed a total maximum gross weight of 143,000 pounds. An eight-axle combination vehicle may not exceed a total maximum gross weight of 138,400 pounds. The maximum gross weight that may be carried upon any combination of units is limited by the maximum gross weight that can be carried upon the axles as follows. For a nine-axle combination: Drive axles—36,000 pounds, axles four/five—36,000 pounds, axles six/seven—27,000 pounds, and axles eight/nine—36,000 pounds. A minimum 12-foot axle spacing between the fifth and sixth axles is also required on the nine-axle LCV. For an eight-axle combination: Drive axles—36,000 pounds, axles four/five—36,000 pounds, sixth axle—22,400 pounds, and axles seven/eight—36,000 pounds. The eight-axle LCV has no minimum axle-spacing requirements. For gross weights in excess of 138,400 pounds the combination must include a tandem-axle dolly to meet the nine-axle requirements. Maximum permissible gross weight for B-train combination is 127,000 pounds.

When the gross weight of the two trailers in a tandem combination vary more than 20 percent, the heaviest of the two must be placed in the lead position.

For tandem trailer combinations in which neither trailing unit exceeds 28.5 feet in length the following maximum allowable weights apply: for a single axle—28,000 pounds (except that steering axles may not exceed 22,400 pounds), for a tandem axle—42,500 pounds, for a tri-axle—52,500 pounds The gross weight may not exceed 100,000 pounds or the manufacturers gross weight rating, whichever is lower.

DRIVER: For operation on highways under the jurisdiction of the New York State Thruway Authority (NYSTA), except for the full length of I–84 and that portion of I–287 from Thruway exit 8 to I–95, the driver must have a commercial driver's license with the appropriate endorsement, and hold a Tandem Trailer Driver's Permit issued by the NYSTA. In order to obtain an NYSTA driver's permit, an applicant must (1) hold a valid commercial driver's license with multiple-trailer endorsement; (2) be over 26 years old, in good health, and have at least 5 years of provable experience driving tractor-trailer combinations; and (3) meet all other application requirements with regard to driving history established by the NYSTA. Qualified drivers receive a Tandem Trailer Driver's Permit for Tandem Vehicle Operation which is valid only for the operation of the certified equipment owned by the company to which the permit is issued.

For operation on highways under the jurisdiction of the New York State DOT, cities not wholly included in one county, the full length of I–84 and that portion of I–287 from Thruway exit 8 to I–95, the driver must have a commercial driver's license with the appropriate endorsement.

VEHICLE: All vehicles must meet the requirements of applicable Federal and State statutes, rules, and regulations. Vehicles operating on highways under the jurisdiction of the NYSTA, except for the full length of I–84 and that portion of I–287 from Thruway exit 8 to I–95, must also meet the following additional requirements. The tractor manufacturer and the permittee shall certify to the NYSTA prior to the approval of the tractor that it is capable of hauling the maximum permissible gross load at a speed of not less than 20 miles per hour on all portions of the thruway system.

The brakes on any vehicle, dolly converter, or combination of vehicles shall comply with 49 CFR part 393 and, in addition, any vehicle or dolly converter shall meet the provisions of the New York State Traffic Law.

Tandem trailer operations shall be equipped, at a minimum, with emergency equipment as required by 49 CFR part 393, subpart H, as amended, tire chains from October 15 to May 1 of each year, a fire extinguisher with an aggregate rating of 20BC, and each trailer with specific lamps and reflectors.

All tractors certified by the NYSTA for use with tandem trailers will be assigned an identification number by the NYSTA which must be placed on the vehicle. The number must be at least 3 inches in height and visible to a person standing at ground level opposite the driver's position in the cab.

Axle Type. Tractors to be used for hauling 110,000 pounds or more shall be equipped with tandem rear axles, both with driving power. Tractors to be used for hauling 110,000 pounds or less may have a single drive axle. Tandem combinations using single wheel tires commonly referred to as "Super Singles" are required to use triple-axle tractors, dual-axle trailers, and dual-axle dollies.

Dollies. Every converter dolly certified on and after June 1, 1968, used to convert a semitrailer to a full trailer may have either single or tandem axles at the option of the permittee. Single-axle dollies may not utilize low profile tires. Combination vehicles with a gross weight in excess of 138,400 pounds must have a tandem-axle dolly to meet the nine-axle requirement. If the distance between two semitrailers is 10 feet or more, the dolly shall be equipped with a device or the trailers connected along the sides with suitable material to indicate they are in effect one unit. The devices or connection shall be approved by the NYSTA prior to use on a tandem trailer combination. The NYSTA tandem-trailer provisions require that converter dollies shall be coupled with one or more safety chains or cables to the frame or an extension of the frame of the motor vehicle by which it is towed. Each dolly converter must also be equipped with mud flaps. Tandem combinations using a sliding fifth wheel attached to the lead trailer, known as a "B-Train" combination, will require a separate Thruway Engineer Service approval prior to the initial tandem run. Special provisions regarding B-Trains will be reviewed at the time of the application or request for use on the Thruway.

PERMIT: For operation on highways under the jurisdiction of the New York State DOT, cities not wholly included in one county, or the following highway sections under NYSTA jurisdiction; the full length of I–84 and that portion of I–287 from Thruway exit 8 to I–95, a permit to exceed the weight limits set forth in section 385(15) of the New York State Vehicle and Traffic Law must be obtained from the State DOT, city involved, or the NYSTA. A fee is charged for the permit.

For operation on highways under the jurisdiction of the NYSTA, except for the full length of I–84 and that portion of I–287 from Thruway exit 8 to I–95, companies must file an application for a Tandem Trailer Permit with the NYSTA. Permits are issued to such companies upon meeting qualifications, including insurance, for tandem combinations over 65 feet in length. No permit fee is charged; however, Thruway tolls are charged for each use of the Thruway, and the equipment must be certified by the NYSTA annually. The annual re-certification of equipment is handled by: New York State Thruway Authority, Manager of Traffic Safety Services, P.O. Box 189, Albany, New York 12201–0189

Transportation of hazardous materials is subject to special restrictions plus 49 CFR part 397 of the Federal Motor Carrier Safety Regulations.

ACCESS: For tandem trailer combinations with either trailer more than 28.5 feet long but not more than 48 feet long, the following access is available to authorized operating routes.

I–87 (New York Thruway) Access provided at Thruway Exit 21B to or from a point 1,500 feet north of the Thruway on US 9W.

I–90 (NYSTA-Berkshire Section) access provided at:

(1) Thruway Exit B–1 to or from a point 0.8 mile north of the southern most access ramp on US 9.

(2) Thruway Exit B–3 within a 2,000-foot radius of the Thruway ramps to NY 22.

I–90 (New York Thruway) access provided at:

(1) Thruway Exit 28 within a radius of 1,500 feet of the toll booth at Fultonville, New York.

(2) Thruway Exit 32 to or from a point 0.6 mile north of the Thruway along NY 233.

(3) Thruway Exit 44 to or from a point 0.8 mile from the Thruway along NY 332 and Collett Road.

(4) Thruway Exit 52 to or from:

(a) A point 1.7 miles west and south of the Thruway via Walden Avenue and NY 240 (Harlem Road);

(b) A point 0.85 mile east and south of the Thruway via Walden Avenue and a roadway purchased by the Town of Cheektowaga from Sorrento Cheese, Inc.

(5) Thruway Exit 54 to or from a point approximately 2.5 miles east and north of the Thruway via routes NY 400 and NY 277.

(6) Thruway Exit 56 to or from a point approximately 2 miles west and south of the Thruway via NY 179 and Old Mile Strip Road.

I–190 (NYSTA—Niagara Section) access provided at:

(1) Thruway Exit N1 to or from:

(a) A point 0.8 mile west of the Thruway exit along Dingens Street.

(b) A point 0.45 mile from the Thruway exit via Dingens Street and James E. Casey Drive.

(2) Thruway Exit N5 to or from a point approximately 1.0 miles south of the Thruway via Louisiana Street and South Street.

(3) Thruway Exit N15 to or from a point 0.5 mile southeast of the Thruway via NY 325 (Sheridan Drive) and Kenmore Avenue.

(4) Thruway Exit N17 to or from:

(a) A point 1.5 miles north of the Thruway on NY 266 (River Road).

(b) A point approximately 0.4 mile south of the Thruway on NY 266 (River Road).

Tandem trailer combinations in which neither trailing unit exceeds 28.5 feet in length are restricted to the Designated Qualifying and Access Highway System.

ROUTES: For tandem trailer combinations with either trailer more than 28.5 feet long, but not more than 48 feet long, the following routes are available:

	From	To
I–87 (New York Thruway).	Bronx/Westchester County Line.	Thruway Exit 24.
I–90 (New York Thruway).	Pennsylvania.	Thruway Exit 24.
I–90 (New York Thruway Berkshire Section).	Thruway Exit B–1.	Massachusetts.
I–190 (New York Thruway Niagara Section).	Thruway Exit 53.	Int'l Border with Canada.
NY 912M (Berkshire Connection of the New York Thruway).	Thruway Exit 21A.	Thruway Exit B–1

Tandem trailer combinations in which neither trailing unit exceeds 28.5 feet in length may operate on all NN Highways.

LEGAL CITATIONS:

Public Authorities Law—Title 9, sec. 350, et. seq. (section 361 is most relevant)

New York State Thruway Authority Rules & Regulations, sections 100.6, 100.8, and 103.13

New York State Vehicle & Traffic Law, sections 385 and 1630

STATE: NORTH DAKOTA

COMBINATION: Truck tractor and 2 trailing units—LCV

LENGTH OF THE CARGO-CARRYING UNITS: 103 feet

MAXIMUM ALLOWABLE GROSS WEIGHT: 105,500 pounds

OPERATIONAL CONDITIONS:

WEIGHT: The Gross Vehicle Weight (GVW) of any vehicle or combination of vehicles is determined by the Federal Bridge Formula, including the exception for two sets of tandems spaced 36 feet apart.

No single axle shall carry a gross weight in excess of 20,000 pounds. Axles spaced 40 inches or less apart are considered one axle. Axles spaced 8 feet or more apart are considered as individual axles. The gross weight of two individual axles may be restricted by the weight formula. Spacing between axles shall be measured from axle center to axle center.

Axles spaced over 40 inches but less than 8 feet apart shall not carry a gross weight in excess of 17,000 pounds per axle. The gross weight of three or more axles in a grouping is determined by the measurement between the extreme axle centers. During the spring breakup season or on otherwise posted highways, reductions in the above axle weights may be specified.

The weight in pounds on any one wheel shall not exceed one-half the allowable axle weight. Dual tires are considered one wheel.

The weight per inch of tire width shall not exceed 550 pounds. The width of tire shall be the manufacturer's rating.

DRIVER: The driver must have a commercial driver's license with the appropriate endorsement.

VEHICLE: The cargo length of a two trailing unit combination may not exceed 100 feet (when the power unit is a truck tractor) or 103 feet (when the power unit is a truck) when traveling on the NN or local highways designated by local authorities.

All hitches must be of a load-bearing capacity capable of bearing the weight of the towed vehicles. The towing vehicle must have a hitch commonly described as a fifth wheel or gooseneck design, or one that is attached to the frame.

The hitch on the rear of the vehicle connected to the towing vehicle must be attached to the frame of the towed vehicle. All hitches, other than a fifth wheel or gooseneck, must be of a ball and socket type with a locking device or a pintle hook.

The drawn vehicles shall be equipped with brakes and safety chains adequate to control the movement of, and to stop and hold, such vehicles. When the drawn vehicle is of a fifth wheel or gooseneck design, safety chains are not required.

In any truck or truck tractor and two trailer combination, the lighter trailer must always be operated as the rear trailer, except when the gross weight differential with the other trailer does not exceed 5,000 pounds.

The power unit shall have adequate power and traction to maintain a minimum speed of 15 miles per hour on all grades.

PERMIT: No permits are required for GVW of 80,000 pounds or less. Single-trip permits are required for GVW exceeding 80,000 pounds. Weather restrictions (37–06–04–06, NDAC), weight distribution on trailers (37–06–04, NDAC), and signing requirements (37–06–04–05, NDAC) are applicable.

Movements of LCV's are prohibited when:

1. Road surfaces, due to ice, snow, slush, or frost present a slippery condition which may be hazardous to the operation of the unit or to other highway users;

2. Wind or other conditions may cause the unit or any part thereof to swerve, whip, sway, or fail to follow substantially in the path of the towing vehicle; or

3. Visibility is reduced due to snow, ice, sleet, fog, mist, rain, dust, or smoke.

The North Dakota Highway Patrol may restrict or prohibit operations during periods when in its judgment traffic, weather, or other safety conditions make travel unsafe.

The last trailer in any combination must have a "LONG LOAD" sign mounted on the rear. It must be a minimum of 12 inches in height and 60 inches in length. The lettering must be 8 inches in height with 1-inch brush strokes. The letters must be black on a yellow background.

Legal width—8 feet 6 inches on all highways.

Legal height—13 feet 6 inches.

ACCESS: Access for vehicles with cargo-carrying length of 68 feet or more is 10 miles off the NN. Vehicles with a cargo-carrying length less than 68 feet may travel on all highways in North Dakota.

ROUTES: All NN routes.

LEGAL CITATIONS: North Dakota Century Code, section 38–12–04; North Dakota Administrative Code, article 37–06.

STATE: NORTH DAKOTA

COMBINATION: Truck tractor and 3 trailing units—LCV

LENGTH OF THE CARGO-CARRYING UNITS: 100 feet

MAXIMUM ALLOWABLE GROSS WEIGHT: 105,500 pounds

OPERATIONAL CONDITIONS:

WEIGHT, DRIVER, PERMIT, and ACCESS: Same as the ND–TT2 combination.

VEHICLE: Same as the ND–TT2 combination, and in addition, in any combination with three trailing units the lightest trailer must always be operated as the rear trailer. For the first two trailing units the lighter trailer must always be second except when the gross weight differential with the other trailer does not exceed 5,000 pounds.

ROUTES: Same as the ND–TT2 combination.

LEGAL CITATIONS: Same as the ND–TT2 combination.

STATE: NORTH DAKOTA

COMBINATION: Truck-trailer, and Truck-trailer-trailer

LENGTH OF THE CARGO-CARRYING UNITS: 103 feet

OPERATIONAL CONDITIONS:

WEIGHT: This combination must operate in compliance with State laws and regulations. Because it is not an LCV, it is not subject to the ISTEA freeze as it applies to maximum weight.

DRIVER, VEHICLE, PERMIT, and ACCESS: Same as the ND–TT2 combination.

ROUTES: Same as the ND–TT2 combination.

LEGAL CITATIONS: Same as the ND–TT2 combination.

STATE: OHIO

COMBINATION: Truck tractor and 2 trailing units—LCV

LENGTH OF THE CARGO-CARRYING UNITS: 102 feet

MAXIMUM ALLOWABLE GROSS WEIGHT: 127,400 pounds

OPERATIONAL CONDITIONS: Long double combination vehicles are only allowed on that portion of Ohio's Interstate System which is under the jurisdiction of the Ohio Turnpike Commission (OTC). These same vehicles are not allowed on any portion of the Interstate System under the jurisdiction of the Ohio DOT.

WEIGHT: The OTC has established the following provisions for operation:

Maximum Weight: Single axle = 21,000 pounds; tandem axle spaced 4 feet or less apart = 24,000 pounds; tandem axle spaced more than 4 feet but less than 8 feet apart = 34,000 pounds; gross weight for doubles 90 feet or less in length = 90,000 pounds; gross weight for doubles over 90 feet but less than 112 feet in length = 127,400 pounds.

DRIVER: The driver must have a commercial driver's license with the appropriate endorsement, be over 26 years of age, in good health, and shall have not less than 5 years of experience driving tractor-trailer or tractor-short double trailer motor vehicles. Such driving experience shall include experience throughout the four seasons. Drivers must comply with the applicable current requirements of the Federal Motor Carrier Safety Regulations, Federal Hazardous Materials Regulations, and the Economic and Safety regulations of the Ohio Public Utility Commission.

VEHICLE: Vehicles being operated under permit at night must be equipped with all lights and reflectors required by the Ohio Public Utilities Commission and the Federal Motor Carrier Safety Regulations, except that the trailer shall be equipped with two red tail lights and two red or amber stop lights mounted with one set on each side. Trailer and semitrailer length for doubles cannot exceed 48 feet, and mixed trailer length combinations are not allowed for combination vehicles over 90 feet in length. Combined cargo-carrying length, including the trailer hitch, cannot be less than 80 feet or more than 102 feet. The number of axles on a double shall be a minimum of five and a maximum of nine. A tractor used in the operation of a double shall be capable of hauling the maximum weight at a speed of not less than 40 miles per hour on all portions of the Turnpike.

PERMIT: A special permit is required if the vehicle is over 102 inches wide, 14 feet high, or 65 feet in length including overhang. Tractor-semitrailer-semitrailer combinations require a permit if over 75 feet in length, excluding an allowed 3-foot front overhang and a 4-foot rear overhang. For vehicles over 120 inches wide, 14 feet high, or 80 feet long or if any unit of the combination vehicle is over 60 feet in length, travel is restricted to daylight hours Monday through noon Saturday, except holidays and the day before and after holidays. Operators are restricted to daylight driving if the load overhang is more than 4 feet. A "Long Double Trailer Permit" issued by the OTC is required for operation of doubles in excess of 90 feet in length. Towing units and coupling devices shall have

sufficient structural strength to ensure safe operation. Vehicles and coupling devices shall be so designed, constructed, and installed in a double as to ensure that any towed vehicles when traveling on a level, smooth paved surface will follow in the path of the towing vehicle without shifting or swerving more than 3 inches to either side of the path of the towing vehicle when the latter is moving in a straight line. Vehicle coupling devices and brakes shall meet the requirements of the Ohio Public Utilities Commission and Federal Motor Carrier Safety Regulations. The distance between the rearmost axle of a semitrailer and the front axle of the next semitrailer in a coupled double unit shall not exceed 12 feet 6 inches. In no event shall the distance between the semitrailers coupled in a double exceed 9 feet. Double and triple trailer combinations must be equipped with adequate, properly maintained spray-suppressant mud flaps on all axles except the steering axle. In the event that the gross weights of the trailers vary by more than 20 percent, they shall be coupled according to their gross weights with the heavier trailer forward. A minimum distance of 500 feet shall be maintained between double units and/or triple units except when overtaking and passing another vehicle. A double shall remain in the right-hand, outside lane except when passing or when emergency or work-zone conditions exist. When, in the opinion of the OTC, the weather conditions are such that operation of a double is inadvisable, the OTC will notify the permittee that travel is prohibited for a certain period of time.

Class A and B explosives; Class A poisons; and Class 1, 2, and 3 radioactive material cannot be transported in double trailer combinations. Other hazardous materials may be transported in one trailer of a double. The hazardous materials should be placed in the front trailer unless doing so will result in the second trailer weighing more than the first trailer.

ACCESS: Tandem trailer units shall not leave the Turnpike right-of-way and shall be assembled and disassembled only in designated areas located at Exits 4, 7, 10, 11, 13, 14, and 16.

ROUTES

	From	To
I–76 Ohio Turnpike.	Turnpike Exit 15.	Pennsylvania.
I–80 Ohio Turnpike.	Turnpike Exit 8A.	Turnpike Exit 15.
I–80/90 Ohio Turnpike.	Indiana	Turnpike Exit 8A.

LEGAL CITATIONS: Statutory authority, as contained in Chapter 5537 of the Ohio Revised Code, to regulate the dimensions and weights of vehicles using the Turnpike.

STATE: OHIO

COMBINATION: Truck tractor and 3 trailing units—LCV

LENGTH OF THE CARGO-CARRYING UNITS: 95 feet

MAXIMUM ALLOWABLE GROSS WEIGHT: 115,000 pounds

OPERATIONAL CONDITIONS: Same as the OH–TT2 combination, except as follows:

WEIGHT: Gross weight for triples with an overall length greater than 90 feet but not over 105 feet in length = 115,000 pounds.

DRIVER: The driver must have a commercial driver's license with the appropriate endorsement, be over 26 years of age, in good health, and shall have not less than 5 years of experience driving double trailer combination units. Such driving experience shall include experience throughout the four seasons. Each driver must have special training on triple combinations to be provided by the Permittee.

VEHICLE: Triple trailer combination vehicles are allowed to operate on the Turnpike provided the combination vehicle is at least 90 feet long but less than 105 feet long and each trailer is not more than 28.5 feet in length. The minimum number of axles on the triple shall be seven and the maximum is nine.

PERMIT: A triple trailer permit to operate on the Turnpike is required for triple trailer combinations in excess of 90 feet in length. There is an annual fee for the permit. Class A and B explosives; Class A poisons; and Class 1, 2, and 3 radioactive material cannot be transported in triple trailer combinations. Other hazardous materials may be transported in two trailers of a triple. The hazardous materials should be placed in the front two trailers unless doing so will result in the third trailer weighing more than either one of the lead trailers.

ACCESS: With two exceptions, triple trailer units shall not leave the Turnpike right-of-way and shall be assembled and disassembled only in designated areas located at Exits 4, 7, 10, 11, 13, 14, and 16. The first exception is that triple trailer combinations are allowed on State Route 21 from I–80 Exit 11 (Ohio Turnpike) to a terminal located approximately 500 feet to the north in the town of Richfield. The second exception is for a segment of State Route 7 from Ohio Turnpike Exit 16 to 1 mile south.

ROUTES

	From	To
I–76 Ohio Turnpike.	Turnpike Exit 15.	Pennsylvania.
I–80 Ohio Turnpike.	Turnpike Exit 8A.	Turnpike Exit 15.
I–80/90 Ohio Turnpike.	Indiana	Turnpike Exit 8A.
OH–7	Turnpike Exit 16.	Extending 1 mile south.

LEGAL CITATIONS: Same as the OH–TT2 combination.

STATE: OKLAHOMA

COMBINATION: Truck tractor and 2 trailing units—LCV

LENGTH OF THE CARGO-CARRYING UNITS: 110 feet

MAXIMUM ALLOWABLE GROSS WEIGHT: 90,000 pounds

OPERATIONAL CONDITIONS:

WEIGHT: Single axle = 20,000 pounds; tandem axle = 34,000 pounds; gross vehicle weight = 90,000 pounds. The total weight on any group of two or more consecutive axles shall not exceed the amounts shown in Table 1.

60	.....	.....	.....	85,500	90,000

DRIVER: All drivers must have a commercial driver's license with the appropriate endorsement and must meet the requirements of the Federal Motor Carrier Safety Regulations (49 CFR parts 390–397). State requirements more stringent and not in conflict with Federal requirements take precedence.

VEHICLE: All vehicles must meet the requirements of applicable Federal and State statutes, rules, and regulations. Vehicle and load shall not exceed 102 inches in width on the Interstate System and four-lane divided highways. Maximum semitrailer length is 59.5 feet.

Multiple trailer combinations must be stable at all times during braking and normal operation. A multiple trailer combination when traveling on a level, smooth paved surface must follow in the path of the towing vehicle without shifting or swerving more than 3 inches to either side when the towing vehicle is moving in a straight line. Heavier trailers are to be placed to the front in multiple trailer combinations.

PERMIT: An annual special authorization permit is required for tandem trailer vehicles operating on the Interstate System having a gross weight of more than 80,000 pounds. A fee is charged for the special authorization permit.

ACCESS: Access is allowed from legally available routes (listed below) to service facilities and terminals within a 5-mile radius.

LEGAL CITATIONS:

Title 47 1981 O.S. 14–101
Title 47 1990 O.S. 14–103, –109, and –116
DPS Size and Weight Permit Manual 595:30.

STATE: OKLAHOMA

COMBINATION: Truck tractor and 3 trailing units—LCV

LENGTH OF THE CARGO-CARRYING UNITS: 95 feet

MAXIMUM ALLOWABLE GROSS WEIGHT: 90,000 pounds

OPERATIONAL CONDITIONS:

WEIGHT and ACCESS: Same as the OK–TT2 combination.

DRIVER: Same as the OK–TT2 combination except that in addition, a driver of a three trailing unit combination must have had at least 2 years of experience driving tractor-trailer combinations.

VEHICLE: All vehicles must meet the requirements of applicable Federal and State statutes, rules, and regulations. Vehicle and load shall not exceed 102 inches in width on the Interstate System and other four-lane divided highways. Maximum unit length of triple trailers is 29 feet. Truck tractors pulling triple trailers must have sufficient horsepower to maintain a minimum speed of 40 miles per hour on the level and 20 miles per hour on grades under normal operation conditions. Heavy-duty fifth wheels, pick-up plates equal in strength to the fifth wheel, solid kingpins, no-slack hitch connections, mud flaps and splash guards, and full-width axles are required on triple trailer combinations. All braking systems must comply with State and Federal requirements.

Multiple trailer combinations must be stable at all times during braking and normal operation. A multiple trailer combination when traveling on a level, smooth paved surface must follow in the path of the towing vehicle without shifting or swerving more than 3 inches to either side when the towing vehicle is moving in a straight line. Heavier trailers are to be placed to the front in multiple trailer combinations.

PERMIT: An annual special authorization permit is required for triple trailer combination vehicles operating on the Interstate System having a gross weight of more than 80,000 pounds. A special vehicle combination permit is required for the operation of triple trailers on the Interstate System and on other four-lane divided primary highways. The permit holder must certify that the driver of a triple trailer combination is qualified. Operators of triples must maintain a 500-foot following distance and must drive in the right lane except when passing or in an emergency.

Speed shall be reduced and extreme caution exercised when operating triples under hazardous conditions such as those caused by snow, wind, ice, sleet, fog, mist, rain, dust, or smoke. When conditions become sufficiently dangerous as determined by the company or driver, operations shall be discontinued and shall not resume until the vehicle can be safely operated. The State may restrict or prohibit operations during periods when, in the State's judgment, traffic, weather, or other safety conditions make such operations unsafe or inadvisable.

Class A and B explosives; Class A poisons; and Class 1, 2, and 3 radioactive material or any other material deemed to be unduly hazardous by the U.S. DOT cannot be transported in triple trailer combinations.

Permit movements are limited to travel from one-half hour before sunrise to one-half hour after sunset, 7 days a week except on specified holidays, beginning at noon the day preceding the

holiday. Specified holidays are: New Year's Day, Memorial Day, Independence Day, Thanksgiving Day, and Christmas Day.

A fee is charged for both the special authorization and triple trailer combination permits.

ROUTES: Same as the OK–TT2 combination.

LEGAL CITATIONS:

Title 47 1981 O.S. 14–101

Title 47 1990 O.S. 14–109, –116, –121

OPS Size and Weight Permit Manual 595:30.

STATE: OREGON

COMBINATION: Truck tractor and 2 trailing units—LCV

LENGTH OF THE CARGO-CARRYING UNITS: 68 feet

MAXIMUM ALLOWABLE GROSS WEIGHT: 105,500 pounds

OPERATIONAL CONDITIONS:

WEIGHT: Maximum allowable weights are as follows: single wheel—10,000 pounds, single axle—20,000 pounds, tandem axle—34,000 pounds Gross vehicle weights over 80,000 pounds must follow the Oregon extended weight table, with a maximum of 105,500 pounds. Weight is also limited to 600 pounds per inch of tire width.

EXTENDED WEIGHT TABLE

Gross weights over 80,000 pounds are authorized only when operating under the authority of a Special Transportation Permit.

MAXIMUM ALLOWABLE WEIGHTS

1. The maximum allowable weights for single axles and tandem axles shall not exceed those specified under ORS 818.010.

2. The maximum allowable weight for groups of axles spaced at 46 feet or less apart shall not exceed those specified under ORS 818.010.

3. The maximum weights for groups of axles spaced at 47 feet or more and the gross combined weight for any combination of vehicles shall not exceed those set forth in the following table:

Axle spacing in feet	Maximum gross weight in pounds on			
	5 Axles	6 Axles	7 Axles	8 or More axles
47	77,500	81,000	81,000	81,000
48	78,000	82,000	82,000	82,000
49	78,500	83,000	83,000	83,000
50	79,000	84,000	84,000	84,000
51	80,000	84,500	85,000	85,000
52	80,500	85,000	86,000	86,000
53	81,000	86,000	87,000	87,000
54	81,500	86,500	88,000	91,000
55	82,500	87,000	89,000	92,000
56	83,000	87,500	90,000	93,000
57	83,500	88,000	91,000	94,000
58	84,000	89,000	92,000	95,000
59	85,000	89,500	93,000	96,000
60	85,500	90,000	94,000	97,000
61	86,000	90,500	95,000	98,000
62	87,000	91,000	96,000	99,000
63	87,500	92,000	97,000	100,000
64	88,000	92,500	97,500	101,000
65	88,500	93,000	98,000	102,000
66	89,000	93,500	98,500	103,000
67	90,000	94,000	99,000	104,000
68	90,000	95,000	99,500	105,000
69	90,000	95,500	100,000	105,500
70	90,000	96,000	101,000	105,500
71	90,000	96,500	101,500	105,000
72	90,000	96,500	102,000	105,500
73	90,000	96,500	102,500	105,500
74	90,000	96,500	103,000	105,500
75	90,000	96,500	104,000	105,500
76	90,000	96,500	104,500	105,500
77	90,000	96,500	105,000	105,500
78	90,000	96,500	105,500	105,500

Distance measured to nearest foot; when exactly one-half foot, take next larger number.

DRIVER: The driver must have a commercial driver's license with the appropriate endorsement.

VEHICLE: For a combination which includes a truck tractor and two trailing units, the lead trailing unit (semitrailer) may be up to 40 feet long. The second trailing unit may be up to 35 feet long. However, the primary control is the total cargo-carrying distance which has a maximum length of 68 feet. Any towed vehicles in a combination must be equipped with safety chains or cables to prevent the towbar from dropping to the ground in the event the coupling fails. The chains or cables must have sufficient strength to control the towed vehicle in the event the coupling device fails and must be attached with no more slack than necessary to permit proper turning. However, this requirement does not apply to a fifth-wheel coupling if the upper and lower halves of the fifth wheel must be manually released before they can be separated.

PERMIT: A permit is required for operation if the gross combination

weight exceeds 80,000 pounds. A fee is charged. Permitted movements must have the lighter trailing unit placed to the rear, and use splash and spray devices when operating in rainy weather. Movement is not allowed when road surfaces are hazardous due to ice or snow, or when other atmospheric conditions make travel unsafe.

ACCESS: As allowed by the Oregon DOT.

ROUTES: All NN routes.

LEGAL CITATIONS: ORS 810.010, ORS 810.030 through 810.060, and ORS 818.010 through 818.235.

STATE: OREGON

COMBINATION: Truck tractor and 3 trailing units—LCV

LENGTH OF THE CARGO-CARRYING UNITS: 96 feet

MAXIMUM ALLOWABLE GROSS WEIGHT: 105,500 pounds

OPERATIONAL CONDITIONS:

WEIGHT, DRIVER, PERMIT, and ACCESS: Same as the OR–TT2 combination.

VEHICLE: Trailing units must be of equal length. The overall length of the combination is limited to 105 feet. Any towed vehicles in a combination must be equipped with safety chains or cables to prevent the towbar from dropping to the ground in the event the coupling fails. The chains or cables must have sufficient strength to control the towed vehicle in the event the coupling device fails and must be attached with no more slack than necessary to permit proper turning. However, this requirement does not apply to a fifth-wheel coupling if the upper and lower halves of the fifth wheel must be manually released before they can be separated.

ROUTES: The following NN routes are also open to truck tractor and three trailing unit combinations.

LEGAL CITATIONS: Same as the OR–TT2 combination.

STATE: SOUTH DAKOTA

COMBINATION: Truck tractor and 2 trailing units—LCV

LENGTH OF CARGO-CARRYING UNITS: 100 feet

MAXIMUM ALLOWABLE GROSS WEIGHT: 129,000 pounds

OPERATIONAL CONDITIONS:

WEIGHT: For all combinations, the maximum gross weight on two or more consecutive axles is limited by the Federal Bridge Formula but cannot exceed 129,000 pounds. The weight on single axles or tandem axles spaced 40 inches or less apart may not exceed 20,000 pounds. Tandem axles spaced more than 40 inches but 96 inches or less may not exceed 34,000 pounds. Two consecutive sets of tandem axles may carry a gross load of 34,000 pounds each, provided the overall distance between the first and last axles of the tandems is 36 feet or more. The weight on the steering axle may not exceed 600 pounds per inch of tire width.

For combinations with a cargo-carrying length greater than 81.5 feet the following additional regulations also apply. The weight on all axles (other than the steering axle) may not exceed 500 pounds per inch of tire width. Lift axles and belly axles are not considered load-carrying axles and will not count

when determining allowable vehicle weight.

DRIVER: The driver must have a commercial driver's license with the appropriate endorsement.

VEHICLE: For all combinations, a semitrailer or trailer may neither be longer than nor weigh 3,000 pounds more than the trailer located immediately in front of it. Towbars longer than 19 feet must be flagged during daylight hours and lighted at night.

For combinations with a cargo-carrying length of 81.5 feet or less, neither trailer may exceed 45 feet, including load overhang. Vehicles may be 12 feet wide when hauling baled feed during daylight hours.

For combinations with a cargo-carrying length over 81.5 feet long, neither trailer may exceed 48 feet, including load overhang. Loading the rear of the trailer heavier than the front is not allowed. All axles except the steering axle require dual tires. Axles spaced 8 feet or less apart must weigh within 500 pounds of each other. The trailer hitch offset may not exceed 6 feet. The maximum effective rear trailer overhang may not exceed 35 percent of the trailer's wheelbase. The power unit must have sufficient power to maintain 40 miles per hour. A "LONG LOAD" sign measuring 18 inches high by 7 feet long with black on yellow lettering 10 inches high is required on the rear. Offtracking is limited to 8.75 feet for a turning radius of 161 feet.

Offtracking Formula = $61-(161^2-L_1^2+L_2^2+L_3^2-L_4^2-L_5^2+L_6^2-L_7^2-L_8^2)^{1/2}$.

Note: L_1 through L_8 are measurements between points of articulation or vehicle pivot points. Squared dimensions to stinger steer points of articulation are negative. For two trailing unit combinations where at least one trailer is 45 feet long or longer, all the dimensions used to calculate offtracking must be written in the "Permit Restriction" area of the permit along with the offtracking value derived from the calculation.

PERMIT: For combinations with a cargo-carrying length of 81.5 feet or less, a single-trip permit is required for movement on the Interstate System if the gross vehicle weight exceeds 80,000 pounds. An annual or single-trip permit is required for hauling baled feed over 102 inches wide.

For combinations with a cargo-carrying length greater than 81.5 feet, a single-trip permit is required for all movements. Operations must be discontinued when roads are slippery due to moisture, visibility must be good, and wind conditions must not cause trailer whip or sway.

For all combinations, a fee is charged for any permit.

ACCESS: For combinations with a cargo-carrying length of 81.5 feet or less, access is Statewide off the NN unless restricted by the South Dakota DOT.

For combinations with a cargo-carrying length greater than 81.5 feet, access to operating routes must be approved by the South Dakota DOT.

ROUTES: Combinations with a cargo-carrying length of 81.5 feet or less may use all NN routes. Combinations with a cargo-carrying length over 81.5 feet, are restricted to the Interstate System and:

STATE: UTAH

COMBINATION: Truck tractor and 2 trailing units—LCV

LENGTH OF THE CARGO-CARRYING UNITS: 95 feet

MAXIMUM ALLOWABLE GROSS WEIGHT: 129,000 pounds

OPERATIONAL CONDITIONS:

WEIGHT: Weight limits are as follows:
Single axle: 20,000 pounds
Tandem axle: 34,000 pounds
Gross weight: 129,000 pounds
Vehicles must comply with the Federal Bridge Formula

Tire loading on vehicles requiring an overweight or oversize permit shall not exceed 500 pounds per inch of tire width for tires 11 inches wide and greater, and 450 pounds per inch of tire width for tires less than 11 inches wide as designated by the tire manufacturer on the side wall of the tire. Tire loading on vehicles not requiring an overweight or oversize permit shall not exceed 600 pounds per inch of tire width as designated by the tire manufacturer on the sidewall.

DRIVER: The driver must have a commercial driver's license with the appropriate endorsement. Carriers must certify that their drivers have a safe driving record and have passed a road test administered by a qualified safety supervisor.

VEHICLE: While in transit, no trailer shall be positioned ahead of another trailer which carries an appreciably heavier load. An empty trailer shall not precede a loaded trailer. Vehicles shall be powered to operate on level terrain at speeds compatible with other traffic. They must be able to maintain a minimum speed of 20 miles per hour under normal operating conditions on any grade of 5 percent or less over which the combination is operated and be able to resume a speed of 20 miles per hour after stopping on any such grade, except in extreme weather conditions.

Oversize signs are required on vehicles in excess of 75 feet in length on two lane highways.

A heavy-duty fifth wheel is required. All fifth wheels must be clean and lubricated with a light-duty grease prior to each trip. The fifth wheel must be located in a position which provides adequate stability. Pick-up plates must be of equal strength to the fifth wheel. The kingpin must be of a solid type and permanently fastened. Screw-out or folding-type kingpins are prohibited.

All hitch connections must be of a no-slack type, preferably a power-actuated ram. Air-actuated hitches which are isolated from the primary air transmission system are recommended.

The drawbar length should be the practical minimum consistent with the clearances required between trailers for turning and backing maneuvers.

Axles must be those designed for the width of the body.

All braking systems must comply with State and Federal requirements. In addition, fast air transmission and release valves must be provided on all semitrailer and converter-dolly axles. A brake force limiting valve, sometimes called a "slippery road" valve, may be provided on the steering axle. Anti-sail type mud flaps are recommended.

The use of single tires on any combination vehicle requiring an overweight or oversize permit shall not be allowed on single axles. A single axle is defined as one having more than 8 feet between it and the nearest axle or group of axles on the vehicle.

When traveling on a level, smooth paved surface, the trailing units must follow in the path of the towing vehicle without shifting or swerving more than 3 inches to either side when the towing vehicle is moving in a straight line. Each combination shall maintain a minimum distance of 500 feet from another commercial vehicle traveling in the same direction on the same highway. Loads shall be securely fastened to the transporter with material and devices of sufficient strength to prevent the load from becoming loose, detached, dangerously displaced, or in any manner a hazard to other highway users. The components of the load shall be reinforced or bound securely in advance of travel to prevent debris from being blown off the unit and endangering the safety of the traveling public. Any debris from the special permit vehicle deposited on the highway shall be removed by the permittee.

Bodily injury and property damage insurance is required before a special Transportation Permit will be issued.

In the event any claim arises against the State of Utah, Utah Department of Transportation, Utah Highway Patrol, or their employees from the operation granted under the permit, the permittee shall agree to indemnify and hold harmless each of them from such claim.

PERMIT: Permits must be purchased. The Utah DOT Motor Carrier Safety Division will, on submission of an LCV permit request, assign an investigator to perform an audit on the carrier, which must have an established safety program that is in compliance with the Federal Motor Carrier Safety Regulations (49 CFR parts 387–399), the Federal Hazardous Materials Regulations (49 CFR parts 171–178), and a "Satisfactory" safety rating. The request must show a travel plan for the operation of the vehicles. Permits are subject to Highway Patrol supervision and permitted vehicles may be subject to temporary delays or removed from the highways when necessary during hazardous road, weather, or traffic conditions. The permit will be cancelled without refund if violated. Expiration dates cannot be extended except for reasons beyond the control of the permittee, including adverse weather. Permits are void if defaced, modified, or obliterated. Lost or destroyed permits cannot be duplicated and are not transferable.

ACCESS: Routes approved by the Utah DOT plus local delivery destination travel on two-lane roads.

ROUTES: All NN routes, except that, in addition, truck tractor and two trailing unit combinations with a cargo-carrying length of more than 85 feet are restricted to:

	From	To
I–15	Arizona	Idaho.
I–70	Jct. I–15	Colorado.
I–80	Nevada	Wyoming.
I–84	Idaho	Jct. I–80.
I–215	Entire length in the Salt Lake City area.

LEGAL CITATIONS: Same as the WA–TT2 combination.

STATE: WYOMING

COMBINATION: Truck tractor and 2 trailing units—LCV

LENGTH OF THE CARGO-CARRYING UNITS: 81 feet

MAXIMUM ALLOWABLE GROSS WEIGHT: 117,000 pounds

OPERATIONAL CONDITIONS:

WEIGHT: No single axle shall carry a load in excess of 20,000 pounds. No tandem axle shall carry a load in excess of 36,000 pounds. No triple axle, consisting of three consecutive load-bearing axles that articulate from an attachment to the vehicle including a connecting mechanism to equalize the load between axles having a spacing between the first and third axle of at least 96 inches and not more than 108 inches, shall carry a load in excess of 42,500 pounds. No vehicles operated on the Interstate System shall exceed the maximum weight allowed by application of Federal Bridge Weight Formula B.

No wheel shall carry a load in excess of 10,000 pounds. No tire on a steering axle shall carry a load in excess of 750 pounds per inch of tire width and no other tire on a vehicle shall carry a load in excess of 600 pounds per inch of tire width. "Tire width" means the width stamped on the tire by the manufacturer.

Dummy axles may not be considered in the determination of allowable weights.

DRIVER: The driver must have a commercial driver's license with the appropriate endorsement.

VEHICLE: The lead semitrailer can be up to 48 feet long with the trailing unit up to 40 feet long. In a truck tractor-semitrailer-trailer combination, the heavier towed vehicle shall be directly behind the truck-tractor and the lighter towed vehicle shall be last if the weight difference between consecutive towed vehicles exceeds 5,000 pounds.

PERMITS: No permits required.

ACCESS: Unlimited access off the NN to terminals.

ROUTES: All NN routes.

LEGAL CITATIONS:
WS 31–5–1001, –1002, –1004, –1008, and WS 31–17–1–1 through 31–17–117.

STATE: WYOMING

COMBINATION: Truck-trailer

LENGTH OF THE CARGO-CARRYING UNITS: 78 feet

OPERATIONAL CONDITIONS:

WEIGHT: This combination must operate in compliance with State laws and regulations. Because it is not an LCV, it is not subject to the ISTEA freeze as it applies to maximum weight.

DRIVER, PERMIT, and ACCESS: Same as the WY–TT2 combination.

VEHICLE: No single vehicle shall exceed 60 feet in length within an overall limit of 85 feet.

ROUTES: Same as the WY–TT2 combination.

LEGAL CITATIONS:
WS 31–5–1002

STATE: WYOMING

COMBINATION: Automobile/Boat Transporter

LENGTH OF CARGO CARRYING UNITS: 85 feet

OPERATIONAL CONDITIONS:

WEIGHT: This combination must operate in compliance with State laws and regulations. Because it is not an LCV, it is not subject to the ISTEA freeze as it applies to maximum weight.

DRIVER, PERMIT, and ACCESS: Same as the WY–TT2 combination.

VEHICLE: The cargo-carrying length of automobile transporters that carry vehicles on the power unit is the same as the overall length. No single vehicle shall exceed 60 feet in length within an overall limit of 85 feet.

ROUTES: Same as the WY–TT2 combination.

LEGAL CITATIONS: Same as the WY–TT2 combination.

STATE: WYOMING

COMBINATION: Saddlemount Combination

LENGTH OF CARGO CARRYING UNITS: 85 feet

WEIGHT: This combination must operate in compliance with State laws and regulations. Because it is not an LCV, it is not subject to the ISTEA freeze as it applies to maximum weight.

DRIVER, PERMIT, and ACCESS: Same as the WY–TT2 combination.

VEHICLE: The cargo-carrying length of saddlemount combinations that carry vehicles on the power unit is the same as the overall length. No single vehicle shall exceed 60 feet in length within an overall limit of 85 feet.

No more than three saddlemounts may be used in any combination, except additional vehicles may be transported when safely loaded upon the frame of a vehicle in a properly assembled saddlemount combination.

Towed vehicles in a triple saddlemount combination shall have brakes acting on all wheels which are in contact with the roadway.

All applicable State and Federal rules on coupling devices shall be observed and complied with.

ROUTES: Same as the WY–TT2 combination.

LEGAL CITATIONS: Same as the WY–TT2 combination.

Part III

Environmental Protection Agency

40 CFR Parts 280 and 281
Underground Storage Tanks—Lender Liability; Proposed Rule

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Parts 280 and 281

[FRL–4895–3]

RIN 2050–AD67

Underground Storage Tanks—Lender Liability

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule.

SUMMARY: The Environmental Protection Agency (EPA) is proposing this rule under the Resource Conservation and Recovery Act (RCRA), Subtitle I—Regulation of Underground Storage Tanks, 42 U.S.C. 6901 *et seq.*, to limit the regulatory obligations of persons maintaining indicia of ownership in a petroleum underground storage tank (UST) or UST system primarily to protect a security interest. The rule is proposed in response to petitions received by the Agency in connection with the rulemaking related to lender liability under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), 42 U.S.C. 9601 *et seq.* (See 57 FR 18349).

The Agency is proposing conditions under which certain security interest holders may be exempted from the RCRA Subtitle I corrective action, technical, and financial responsibility regulatory requirements that apply to an UST owner and operator. (See 40 CFR part 280.)

DATES: Written comments on this proposed rule must be submitted on or before August 12, 1994.

ADDRESSES: Written comments on today's proposal should be addressed to the docket clerk at the following address: U.S. Environmental Protection Agency, OUST Docket (5405), 401 M Street, SW., Washington, DC 20460. The Docket is located at 401 M Street, SW., Room 2616. One original and two copies of comments should be sent and identified by regulatory docket reference number UST 3–16. The docket is open from 9 a.m. to 4 p.m., Monday through Friday, excluding Federal holidays. Docket materials may be reviewed by appointment by calling (202) 260–9720. Copies of docket materials may be made at a cost of $0.15 per page.

FOR FURTHER INFORMATION CONTACT: For further information about this proposal, contact the RCRA/Superfund Hotline, U.S. Environmental Protection Agency, Washington, DC. 20460, (800) 424–9346 (toll-free) or (703) 412–9810 (local). For the hearing impaired, the number is (300) 553–7672 (toll-free), or (703) 412–3323 (local). For technical information on this proposal, contact Shelley Fudge in the EPA Office of Underground Storage Tanks at (703) 308–8886.

SUPPLEMENTARY INFORMATION: The contents of today's proposed preamble are listed in the following outline:

1. Background
II. Description of the UST Regulatory Program
  A. UST Technical Standards
  1. Leak Prevention
  2. Leak Detection
  3. Release Reporting
  4. Closure
  5. Notification, Reporting, and Recordkeeping
  B. Corrective Action Requirements
  C. Financial Responsibility Requirements
  D. State Program Approval Regulations
  E. Scope of the UST Program
III. The UST Security Interest Exemption and Intent of Today's Proposed Rule
  A. Overview
  B. Legal Authority
  C. Liability of a Holder as an Owner of an Underground Storage Tank or Underground Storage Tank System
  1. Petroleum Production, Refining, and Marketing
  2. Indicia of Ownership
  3. Primarily to Protect a Security Interest
  4. "Holder" of Ownership Indicia
  5. Participating in Management
  D. Liability of a Holder as an Operator of an Underground Storage Tank or Underground Storage Tank System
  1. Pre-Foreclosure Operation
  2. Post-Foreclosure Operation
  3. Lenders in Foreclosure Upon the Effective Date of the Rule
  4. Release Reporting Requirements Following Foreclosure

IV. Financial Responsibility Requirements
V. State Program Approval
VI. Economic Analysis
VII. Regulatory Assessment Requirements
  A. Executive Order 12866
  B. Regulatory Flexibility Act
  C. Paperwork Reduction Act

I. Background

EPA is proposing to establish regulatory criteria specifying which RCRA Subtitle I requirements are applicable to a secured creditor. Section 9003(h)(9) of RCRA exempts from the definition of "owner," for purposes of section 9003(h)—*EPA Response Program for Petroleum*, those persons who, without participating in the management of the UST or UST system, and who are not otherwise engaged in petroleum production, refining, and marketing, maintain indicia of ownership in an UST or UST system primarily to protect a security interest. Those most affected by this "security interest exemption" include private lending institutions or other persons that guarantee loans secured by real estate containing an UST or UST system, or that acquire title to, or other indicia of ownership in, a contaminated UST or UST system.[1] However, the security interest exemption is not limited solely to lending institutions; it potentially applies to any person whose indicia of ownership in an UST or UST system is maintained primarily to protect a security interest.

The RCRA subtitle I security interest exemption not only affects secured creditors but also UST and UST system owners who seek capital through the private lending market. Today's proposed rule will provide a regulatory exemption from corrective action regulatory requirements for those persons who provide secured financing to UST and UST system owners. EPA expects this rule, in conjunction with the statutory exemption in section 9003(h)(9), to encourage the extension of credit to credit-worthy UST owners. At present, EPA believes that concerns over environmental liability are making a significant number of lenders reluctant to make loans to otherwise credit-worthy owners and operators of USTs. The free flow of credit to UST owners (many of whom are small entities that may rely on secured financing mechanisms for capital) is expected to assist UST owners in meeting their obligations to upgrade, maintain, or otherwise comply with RCRA subtitle I and other environmental requirements. Conversely, the lack of such capital may adversely affect the ability of an UST owner to meet its obligations under Subtitle I, with concomitant adverse environmental impacts from USTs and UST systems that are out of compliance due to the lack of financing for the UST owner and operator. (For a more detailed discussion, please refer to the *Regulatory Background Document* for this proposed rule, located in the OUST Docket at 401 M Street, SW., room 2616, Washington, DC 20460.)

The Agency is also concerned that if otherwise credit-worthy UST owners and operators are unable to obtain financing to perform leak detection tests, or to upgrade or replace deficient tanks, the market for UST equipment could be adversely affected, thereby limiting the availability and/or affecting the cost of such equipment. In addition, a lack of adequate capital could produce a ripple effect which would cut across other portions of the UST-related industrial sector. Based on letters received from UST equipment manufacturers, EPA believes that this sector has suffered as a direct result of the capital squeeze on UST owners and operators. The Agency is further concerned that many UST equipment manufacturers may find it increasingly difficult to sustain their production of UST equipment. Unnecessary constrictions on the free flow of capital for UST compliance and improvements could force companies to abandon their production of UST equipment or to close altogether, and it may have adverse impacts on the environment by making the investment or development of new UST technological innovations more difficult.

The preamble to this proposed rule is structured as follows: The following section briefly describes the UST program. This section is followed by a discussion of this proposed rule, which includes a description of the various options lenders may exercise both pre- and post-foreclosure with respect to regulatory compliance for a secured UST or UST system. Proposed regulatory text concludes this proposed rule.

[1] Under the laws of some states, an interest in real property may include an interest in USTs or UST systems located on that property. See *Sunnybrook Realty Co. Inc. v. State of New York, Kesbec, Inc. v. State of New York*, Claim Nos. 32844, 33125, 15 Misc. 2d 739; 182 N.Y.S. 2d 983. Of course, the loan documents may specifically include or exclude USTs as collateral securing the obligation.

II. Description of the UST Regulatory Program

Based on the Agency's study of the banking community's lending practices and discussions with representatives of both lenders and borrowers, EPA believes that the lending community in general is not particularly familiar with the UST statutory scheme and regulatory program. Because UST and UST systems are likely to be used as collateral in securing loans to borrowers, the Agency believes that it is appropriate and useful to briefly describe the UST program in the preamble of this proposed rule. The following discussion is general in nature and is intended to provide a framework for lenders or others to better understand the scope and intent of the program; it is not intended to be a substitute for the regulations themselves.

Under the Hazardous and Solid Waste Amendments of 1984, Congress responded to the increasing threat to groundwater posed by leaking underground storage tanks by adding subtitle I to the Resource Conservation and Recovery Act. Subtitle I required EPA to develop a comprehensive regulatory program for USTs storing petroleum or hazardous substances. Congress directed the Agency to publish regulations that would require owners and operators of new tanks and tanks already in the ground to prevent and detect leaks, cleanup leaks, and demonstrate that they are financially capable of cleaning up leaks and compensating third parties for resulting damages.

EPA's UST regulations, 40 CFR parts 280 and 281, apply to any person who owns or operates an UST or UST system. The term "owner" is defined in the statute generally to mean any person who owns an UST used for the storage, use, or dispensing of substances regulated under subtitle I of RCRA (which includes both petroleum and hazardous substances) (section 9001(3), 42 U.S.C. 6991(3)). Owners are responsible for complying with the "technical requirements," "financial responsibility requirements," and "corrective action requirements" specified in the statute and regulations. These requirements are intended to ensure that USTs are managed and maintained safely, so that they will not leak or otherwise cause harm to human health and the environment. In addition, should a leak occur, the requirements provide that the owner is responsible for addressing the problem.

These same requirements apply to any person who "operates" an UST system. The term "operator" is very broad and means "any person in control of, or having responsibility for, the daily operation of the underground storage tank" (section 9001(4), 42 U.S.C. 6991(4)). As with owners, there may be more than one operator of a tank at a given time. Each owner and operator has obligations under the statute and regulations. In this respect, it is important to understand that a person may have obligations under subtitle I either as an owner or as an operator, or both.

The following subsections describe briefly each of the major components of the UST regulatory program applicable to persons who own or operate USTs and UST systems.

A. UST Technical Standards

The technical standards of 40 CFR part 280 referred to here include: Subpart B—UST systems: Design, Construction, Installation, and Notification (including performance standards for new UST systems, upgrading of existing UST systems, and notification requirements); Subpart C—General Operating Requirements (including spill and overfill control, corrosion protection, reporting and recordkeeping); Subpart D—Release Detection; § 280.50 (reporting of suspected releases) of Subpart E—Release Reporting, Investigation, and Confirmation; and Subpart G—Out of Service UST Systems (including temporary and permanent closure). These regulations impose obligations upon UST owners and operators, separate from the subtitle I corrective action requirements discussed in Section II. B of this preamble.

1. Leak Prevention

Before EPA regulations were issued, most tanks were constructed of bare steel and were not equipped with release prevention or detection features. 40 CFR 280.21 requires UST owners and operators to ensure that their tanks are protected against corrosion and equipped with devices that prevent spills and overfills no later than December 22, 1998. Tanks installed before December 22, 1988 must be replaced or upgraded by fitting them with corrosion protection and spill and overfill prevention devices to bring them up to new-tank standards. USTs installed after December 22, 1988 must be fiberglass-reinforced plastic, corrosion-protected steel, a composite of these materials, or determined by the implementing agency to be no less protective of human health and the environment and must be designed, constructed, and installed in accordance with a code of practice developed by a nationally recognized association or independent testing laboratory. Piping installed after December 22, 1988 generally must be protected against corrosion in accordance with a national code of practice. All owners and operators must also ensure that releases due to spilling or overfilling do not occur during product transfer and that all steel systems with corrosion protection are maintained, inspected, and tested in accordance with § 280.31.

2. Leak Detection

In addition to meeting the leak prevention requirements, owners and operators of USTs must use a method listed in §§ 280.43 through 280.44 for detecting leaks from portions of both tanks and piping that routinely contain product. Deadlines for compliance with the leak detection requirements have been phased in based on the tank's age: The oldest tanks, which are most likely to leak, had the earliest compliance deadlines.

3. Release Reporting

UST owners and operators must, in accordance with § 280.50, report to the implementing agency within 24 hours, or another reasonable time period specified by the implementing agency,

the discovery of any released regulated UST substances, or any suspected release. Unusual operating conditions or monitoring results indicating a release must also be reported to the implementing agency.

4. Closure

Owners or operators who would like to take tanks out of operation must either temporarily or permanently close them in accordance with 40 CFR part 280, subpart G—Out-of-Service UST Systems and Closure. When UST systems are temporarily closed, owners and operators must continue operation and maintenance of corrosion protection and, unless all USTs have been emptied, release detection. If temporarily closed for three months or more, the UST system's vent lines must be left open and functioning, and all other lines, pumps, manways, and ancillary equipment must be capped and secured. After 12 months, tanks that do not meet either the performance standards for new UST systems or the upgrading requirements (excluding spill and overfill device requirements) must be permanently closed, unless a site assessment is performed by the owner or operator and an extension is obtained from the implementing agency. To close a tank permanently, an owner or operator generally must: Notify the regulatory authority 30 days before closing (or another reasonable time period determined by the implementing agency); determine if the tank has leaked and, if so, take appropriate notification and corrective action; empty and clean the UST; and either remove the UST from the ground or leave it in the ground filled with an inert, solid material.

5. Notification, Reporting, and Recordkeeping

UST owners who bring an UST system into use after May 8, 1986 must notify state or local authorities of the existence of the UST and certify compliance with certain technical and other requirements, as specified in § 280.22. Owners and operators must also notify the implementing agency at least 30 days (or another reasonable time period determined by the implementing agency) prior to the permanent closure of an UST. In addition, owners and operators must keep records of testing results for the cathodic protection system, if one is used; leak detection performance and upkeep; repairs; and site assessment results at permanent closure (which must be kept for at least three years).

B. Corrective Action Requirements

Owners and operators of UST systems containing petroleum or hazardous substances must investigate, confirm, and respond to confirmed releases, as specified in §§ 280.51 through 280.67. These requirements include, where appropriate: Performing a release investigation when a release is suspected or to determine if the UST system is the source of an off-site impact (investigation and confirmation steps include conducting tests to determine if a leak exists in the UST or UST system and conducting a site check if tests indicate that a leak does not exist but contamination is present); notifying the appropriate agencies of the release within a specified period of time; taking immediate action to prevent any further release (such as removing product from the UST system); containing and immediately cleaning up spills or overfills; monitoring and preventing the spread of contamination into the soil and/or groundwater; assembling detailed information about the site and the nature of the release; removing free product to the maximum extent practicable; investigating soil and groundwater contamination; and, in some cases, outlining and implementing a detailed corrective action plan for remediation.

C. Financial Responsibility Requirements

The financial responsibility regulations (40 CFR part 280, subpart H) require that UST owners or operators demonstrate the ability to pay the costs of corrective action and to compensate third parties for injuries or damages resulting from the release of petroleum from USTs. The regulations require all owners or operators of petroleum USTs to maintain an annual aggregate of financial assurance of $1 million or $2 million, depending on the number of USTs owned. Financial assurance options available to owners and operators include: Purchasing commercial environmental impairment liability insurance; demonstrating self-insurance; obtaining guarantees, surety bonds, or letters of credit; placing the required amount into a trust fund administered by a third party; or relying on coverage provided by a state assurance fund.

D. State Program Approval Regulations

Subtitle I of RCRA allows state UST programs approved by EPA to operate in lieu of the federal program. EPA's state program approval regulations under 40 CFR part 281 set standards for state programs to meet.

E. Scope of the UST Program

There are certain types or classes of tanks that are exempt from all or part of subtitle I's requirements. Specifically excluded by statute are: Farm and residential tanks of 1,100 gallons or less capacity used for storing motor fuel for noncommercial purposes; tanks used for storing heating oil for consumptive use on the premises where stored; tanks stored on or above the floor of underground areas (such as basements or tunnels); septic tanks; systems for collecting stormwater or wastewater; flow-through process tanks; emergency spill and overfill tanks that are expeditiously emptied after use; and tanks holding 110 gallons or less (42 U.S.C. 6991(1)).

In addition, and of particular importance to today's proposal, the statute excludes one type of potential "owner" from the corrective action requirements applicable to owners. Specifically, the statute excludes from the definition of owner any person "who, without participating in the management of an UST, and otherwise not engaged in petroleum production, refining, and marketing, holds indicia of ownership primarily to protect the owner's security interest in the tank" (RCRA section 9003(h)(9), 42 U.S.C. 6991b(h)(9)). This statutory provision is intended to exempt from cleanup responsibility a person whose only connection with a tank is as the holder of a security interest; i.e., a bank or other secured creditor who has extended credit to a borrower (commonly the tank's owner) and who has in return secured the loan or other obligation by taking a security interest in the tank. EPA has promulgated regulations governing corrective action under subtitle I. (See 40 CFR part 280, §§ 280.51 through 280.67.) The regulation proposed today addresses the requirements of subtitle I that are applicable to a person who holds a security interest in a tank (a "security holder" or merely "holder") from the time that the person extends the credit up through and including foreclosure and re-sale. As described in this proposed rule, a holder may face obligations either as an owner or as an operator, depending upon the specific activities undertaken by the holder.

III. The UST Security Interest Exemption and Intent of Today's Proposed Rule

A. Overview

The security interest exemption under subtitle I, section 9003(h)(9) of RCRA, 42 U.S.C. 6991b(h)(9), provides:

As used in this subsection, the term "owner" does not include any person who, without participating in the management of an underground storage tank and otherwise not engaged in petroleum production, refining, and marketing, holds indicia of ownership primarily to protect the owner's security interest in the tank.

Limited legislative history exists concerning the RCRA subtitle I security interest exemption. No guidance or other indication is available concerning the types of activities that Congress considered to be consistent with the subtitle I security interest exemption, or about the types of activities that Congress considered to be impermissible participation in an UST or UST system's management.

The statutory exemption is limited to liability for corrective action at petroleum-contaminated sites. Since the subtitle I security interest exemption applies only to the corrective action requirements for petroleum—Part 280 Subpart F and portions of subpart E, one interpretation of the statute could hold that the holder is not exempt from complying with other portions of the statute and regulations applicable to an "owner" of a tank. These other parts include 40 CFR part 280, subparts B, C, D, E (§ 280.50 only), and G (hereafter referred to as the "UST technical standards" for purposes of this rule), and Subpart H—Financial Responsibility. However, the statute is silent with respect to a holder's liability for these requirements solely as a consequence of having ownership rights in a tank primarily to protect a security interest. The Agency does not believe that these limited ownership rights rise to the level of full "ownership" sufficient to make the holder an "owner" of the tank, as that term is used in section 9001(3) of RCRA subtitle I. Therefore, EPA is proposing, under its broad rulemaking authority in section 9003, that a holder who meets the criteria specified in this proposed rule (i.e., whose only connection with the tank is as the bona fide holder of a security interest in the UST or UST system) is not subject to the UST technical standards and financial responsibility requirements otherwise applicable to a tank owner. EPA believes that this is both appropriate under the Agency's rulemaking authority and consistent with Congressional intent in providing the section 9003(h)(9) exemption for those persons who provide only financing to owners of a tank. Accordingly, a qualifying holder will not be required to comply with the full panoply of EPA regulations implementing subtitle I that apply to tank owners prior to or following foreclosure, provided that the requirements of today's proposed rule are satisfied.

With respect to a holder's potential to be an "operator" of a tank prior to foreclosure, consistent with the provisions of this proposed rule, the holder typically will not be involved in the day-to-day operations of the tank, and will therefore not incur liability as an "operator."[2] By foreclosing, however, the holder takes affirmative action with respect to the tank and displaces the borrower; therefore, by necessity, the holder has taken "control of . . . [and] responsibility for . . ." the tank, and is therefore a tank operator under the definition at 42 U.S.C. 6991(4). However, under today's proposed rule, a foreclosing holder's responsibility for corrective action as an operator is limited in certain circumstances: In general, a holder's obligations would be limited under the provisions of this rule where the foreclosed-on tank is no longer storing petroleum, or where the holder itself empties the tank within a certain time period. In these circumstances, while a holder is an operator and therefore subject to the UST program's technical requirements and other obligations, a holder may remain exempt from the corrective action requirements and satisfy the technical requirements by exercising one of the options for compliance described in Section III. D. 2 of this preamble. These options allow a holder to satisfy its regulatory obligations as an "operator" by undertaking specified minimally burdensome and environmentally protective actions to secure and protect the UST or UST system. On the other hand, a holder who operates a tank by, for example, storing or dispensing product following foreclosure will be subject to the full range of requirements applicable to any person operating a tank (including corrective action requirements).

In developing today's proposal, EPA examined the potential obligations under subtitle I of government entities that act as conservators or receivers of assets acquired from failed lending and depository institutions, such as the Federal Deposit Insurance Corporation (FDIC) and Resolution Trust Corporation (RTC). Where a government entity or its designee is acting as a conservator or receiver, EPA interprets the security interest exemption in RCRA subtitle I section 9003(h)(9) to preclude the imposition of the insolvent estate's liabilities against the government entity acting as the conservator or receiver, and considers the liabilities of the institution being administered to be limited to the institution's assets. The situation of a conservator or receiver of a failed or insolvent lending institution is analogous to that of a trustee (particularly a trustee in bankruptcy) that is administering an insolvent's estate and, in accordance with those principles, the insolvent's liabilities are to be satisfied from the estate being administered and not from the assets of the conservator or receiver. Therefore, satisfaction of an estate's debts or liabilities would not reach the general assets of the FDIC, the RTC, those of any other government entity acting in a similar capacity, or those of a private person acting on behalf of the government conservator or receiver.

B. Legal Authority

The legal basis for this proposed rule is the Agency's broad authority to issue regulations interpreting and implementing the provisions of RCRA subtitle I at issue in this proposal. Section 9003(b), 42 U.S.C. 6991b(b) provides EPA with authority to "promulgate release detection, prevention, and correction regulations applicable to all owners and operators of underground storage tanks, as may be necessary to protect human health and the environment."[3]

The Agency is proposing to define the regulatory terms under which a secured creditor may, consistent with the statutory exemption, avoid responsibility for corrective action as an owner and operator of an underground storage tank, as well as proposing an exemption from certain financial responsibility requirements. As discussed elsewhere in this preamble (*See* Section III.D), the statutory exemption from corrective action

[2] Of course, a lender which has control of or responsibility for the daily operation of a tank would be an "operator" under section 9001(4), and therefore subject to all requirements applicable to an operator of a tank, including corrective action. Similarly, such acts may also constitute "participation in the management" of the tank, which would void the section 9003(h)(9) exemption and obligate the lender to comply with these same technical, financial, and corrective action requirements as an owner.

[3] The recent decision by the U.S. Court of Appeals for the D.C. Circuit in *Kelley, et al.* v. *EPA*, No. 93-1312 (Feb. 4, 1994) does not apply to or affect the rule the Agency is proposing today. The *Kelley* decision vacated the Agency's rule on lender liability under CERCLA, which interpreted a statutory exemption under CERCLA which is similar to that under RCRA Subtitle I, because "EPA lack[ed] statutory authority to restrict by regulation private rights of action arising under the statute. . . ." *Kelley*, slip op. at 3. As noted above, § 9003 expressly confers upon EPA a broad rulemaking authority; to the extent that the grants of rulemaking authority were not sufficiently explicit under CERCLA, such is not the case under RCRA Subtitle I

liability addresses only *owners* of underground storage tanks, while the statute and EPA's implementing regulations extend liability to both owners and operators. The Agency believes that without promulgating a rule under EPA's broad grant of rulemaking authority applying the protection found in the statutory security interest exemption to operators as well as owners, the statutory exemption may be rendered virtually meaningless, since an owner of an UST is also typically an UST operator. EPA does not believe that Congress, in creating section 9003(h)(9), intended for an otherwise exempt holder of a security interest to nonetheless fall subject to corrective action obligations as an operator. As such, EPA's exercise of its rulemaking authority in the proposed rule is appropriate and, perhaps, needed to fully effectuate the purpose of the statute.

In addition, the Agency has explicit rulemaking authority to, in its discretion, exempt certain classes of owners and operators from corrective action obligations (*i.e.*, holders of security interests as described in this proposal). Section 9003(b) permits the Agency, in promulgating regulations under subtitle I, to make distinctions in its UST regulations between types or classes of tanks, based upon, *inter alia*, "the technical capability of the owners and operators." Because security interest holders are typically not as a general matter engaged in the operation and maintenance of USTs (and thus do not possess the technical capacity of most UST owners and operators), EPA does not believe that requiring them to comply with highly detailed technical requirements is appropriate where requiring them to do so is not necessary for protection of human health and the environment. Furthermore, the Agency believes an exemption from these regulatory requirements is appropriate in the context of this proposed rule, where an exemption will serve, albeit indirectly, to advance the goals of subtitle I by making credit more available and thus aiding in the implementation of tank upgrade requirements.

However, this authority is not open-ended, as section 9003(a) requires EPA to promulgate regulations that are protective of human health and the environment. Without compromising the level of protectiveness established by the UST program, EPA previously relied on its section 9003(b) authority when it excluded a group of owners and operators from RCRA subtitle I requirements in the final Financial Responsibility Rule (53 FR 43322, Oct. 26, 1988). (In relevant part, the preamble to the final Financial Responsibility Rule states: "The Agency does not interpret the Congressional intent of subtitle I to preclude exempting any class of USTs from otherwise applicable requirements when the Agency has determined that such requirements are not necessary to protect human health or the environment.") That rule exempted states and the federal government from the UST financial responsibility requirements since those entities were, as a class, able to satisfy the purpose of the financial responsibility requirements in the absence of regulation.

Similarly, for purposes of this proposal, EPA believes that it is reasonable, in light of the purposes behind this proposal, to exempt a holder from RCRA subtitle I corrective action requirements as an operator if its USTs are empty and secure (as would be required under today's proposal) or if the holder chooses to also engage in environmentally beneficial activities (as discussed in Section III. E of this preamble). Because of the requirements a holder must meet before enjoying this proposed exemption, EPA's UST regulations will satisfy the statutory requirement that they be protective of human health and the environment.

C. Liability of a Holder as an Owner of an Underground Storage Tank or Underground Storage Tank System

The following sections describe the key terms used in this proposed rule. For the most part, these are also terms used in the section 9003(h)(9) security interest exemption. This section specifies the activities that are not "participating in the management" of a tank and which a holder may under today's proposal, engage in consistent with subtitle I regulatory requirements

1. Petroleum Production, Refining, and Marketing

"Production of petroleum" includes, but is not limited to, activities involved in the production of crude oil or other forms of petroleum, as well as the production of petroleum products from purchased materials, either domestically or abroad. "Refining" includes the processes of cracking, distillation, separation, conversion, upgrading, and finishing of refined petroleum or petroleum products. "Marketing" includes the distribution, transfer, or sale of petroleum or petroleum products for wholesale or retail purposes. A holder who stores petroleum products in USTs for on-site consumption only, such as to provide heat to an office building or to refuel its own vehicles, is not considered to be engaged in petroleum production, refining, or marketing for the purposes of the UST regulatory program.

2. Indicia of Ownership

EPA is proposing that "indicia of ownership" means ownership or evidence of an ownership interest in a petroleum UST or UST system. EPA is not proposing to limit or qualify type, quality, or quantity of ownership indicia that may be held by a person for the purpose of the regulatory exemption. The nature of the ownership interest may vary according to the type of secured transaction and the nature of the holder's relationship (such as that of a guarantor or surety). Accordingly, indicia of ownership may be evidence of any ownership interest or right to an UST or UST system, such as a security interest, an interest in a security interest, or any other interest in an UST or UST system. For purposes of this proposed rule, examples of such indicia include, but are not limited to, a mortgage, deed of trust, or legal or equitable title obtained pursuant to foreclosure or its equivalents, a surety bond, guarantee of an obligation, or an assignment, lien, pledge, or other right to or form of encumbrance against an UST or UST system. Accordingly, it is not necessary for a person to hold actual title or a security interest in order to maintain some indicia or evidence of ownership in an UST or UST system.

3. Primarily To Protect a Security Interest

EPA is proposing that the term "primarily to protect a security interest" as used in this proposed regulation means a holder's indicia of ownership are held primarily for the purpose of securing payment or performance of an obligation. EPA intends this phrase to require that the ownership interest be maintained primarily for the purpose of, or primarily in connection with, securing payment or performance of a loan or other obligation (a security interest), and not an interest in the UST or UST system held for some other reason.

A security interest may arise pursuant to a variety of statutory or common law financing transactions. While a security interest is ordinarily created by mutual consent, such as a secured transaction within the scope of Article 9 of the Uniform Commercial Code, there are other means by which a security interest may be created, some of which may or may not be the result of a consensual arrangement between the parties to the transaction. In general, a transaction

that gives rise to a security interest within the ambit of this proposed rule is one that provides the holder with recourse against an UST or UST system of the person pledging the security; the purpose of the interest is to secure the repayment of money, the performance of a duty, or of some other obligation. *See generally* J. White & R. Summers, *Handbook on the Uniform Commercial Code* § 22 (2d Ed. 1980); *Restatement of Security* (1941).

As a matter of general law, security interests may arise from transactions in which an interest in an UST or UST system is created or established for the purpose of securing a loan or other obligation, and includes mortgages, deeds of trust, liens, and title held pursuant to lease financing transactions. Security interests may also arise from transactions such as sale-and-leasebacks, conditional sales, installment sales, trust receipt transactions, certain assignments, factoring agreements or accounts receivable financing agreements, consignments, among others, provided that the transaction creates or establishes an interest in an UST or UST system for the purpose of securing a loan or other obligation.

In contrast, "indicia of ownership" held "primarily to protect [a] security interest" do not include evidence of interests in the nature of an *investment* in the UST or UST system, or an ownership interest held primarily for any reason other than as protection for a security interest. The person holding ownership indicia to protect a security interest may have additional, secondary reasons for maintaining the indicia in addition to protecting a security interest; maintaining indicia for reasons in addition to protecting a security interest may be consistent with the exemption and this proposed rule. However, any such additional reasons must be secondary to protecting a security interest in the secured UST or UST system. EPA recognizes that lending institutions have revenue interests in the loan transactions that create security interests; such revenue interests are not considered to be investment interests, but are considered secured transactions falling within the proposed security interest regulatory exemption.

4. "Holder" of Ownership Indicia

A "holder" as used in this proposed regulation is a person who maintains ownership indicia primarily to protect a security interest, however acquired or held. The term "holder" includes the initial holder (such as the loan originator) and any subsequent holder, such as a successor-in-interest, subsequent purchaser on the secondary market, loan guarantor, surety, or other person who maintains indicia of ownership primarily to protect a security interest. The term also includes any person acting on behalf of or for the benefit of the holder, such as a court-appointed receiver or a holder's agent, employee, or representative.

Finally, it should be noted that lending institutions, which typically hold a large number of security interests, may also act in some trustee, fiduciary, or other capacity with respect to an UST or UST system. However, this rule does not address circumstances in which a lending institution or any person acts as a trustee, or in a non-lending capacity, or has any interest in an UST or UST system other than as provided in this rule. Because this proposed regulation, as well as the exemption in section 9003(h)(9), addresses only persons who maintain a "security interest," any discussion of persons with other interests or involvement in an UST or UST system is beyond the scope of this proposed rule. Of course, a trustee or other fiduciary with respect to an UST or UST system (or any person who independent of the status as trustee or fiduciary) who holds indicia of ownership in the UST or UST system primarily to protect a security interest may fall within this proposed security interest regulatory exemption.

5. Participating in Management

EPA proposes that, as used in this proposed rule, "participation in the management of an UST or UST system" means the actual involvement in the management or control of decisionmaking related to the UST or UST system by the holder. Participation in management does not include the mere capacity or unexercised right or ability to influence UST or UST system operations. This proposal contains a list of activities that is not all-inclusive, but which generally describes activities that are not considered to be evidence that a holder is participating in the management of an UST or UST system. In addition, to address those other activities not specifically listed, a general test of management participation is proposed. The general test specifies that a holder is considered to be participating in management, within the scope of this proposed regulatory exemption, when it exercises decisionmaking control over the borrower's UST or UST system, or where the holder assumes overall management responsibility encompassing decisionmaking authority over the enterprise that includes day-to-day operation of the UST or UST system.

Under the proposed rule, activities that are evidence that a holder is participating in the management of an UST or UST system, and thus acting outside the scope of this proposed regulatory exemption, include: Exercising management control or decisionmaking authority over operational aspects of an UST or UST system, or securing a lease agreement, contractual arrangement, or employee relationship with any other person to manage or operate the UST or UST system. Such activities indicate that a holder is involved in or exercising decisionmaking control of operations of the UST or UST system in which the holder has a security interest.

For purposes of this proposed rule, a holder performing the functions of a plant manager, operations manager, chief operating officer, chief executive officer, and the like, of the facility or business at which the UST is located is considered to be exercising management control or decisionmaking authority over the operational aspects of the UST or UST system and therefore, participating in management, unless the responsibilities for the position specifically exclude all UST responsibilities. Control over the operational aspects of management should not be confused, however, with those activities which constitute administrative or financial management or involvement in non-operational activities. Such activities may be engaged in by a holder in the course of managing a loan portfolio and do not exceed the boundaries of the security interest exemption. Such activities may include providing financial or other assistance, environmental investigations or monitoring of the borrower's business and collateral, engaging in "loan work out" activities, foreclosing on a secured UST or UST system, winding down operations following foreclosure or its equivalents, or divesting itself of the foreclosed-on property containing an UST or UST system. These, as well as other actions related to a holder's financial and administrative obligations, are discussed in more detail in the following section.

a. *General Test of Management Participation.* It is not possible to specifically cover in this proposed rule or any regulation every conceivable situation in which a holder might act, or to make specific provisions for every action that a holder might undertake that might make it ineligible for the protection of the proposed security interest regulatory exemption, voiding

the security interest exemption. A general test or standard of participation in an UST or UST system's management has therefore been formulated to provide a framework within which to assess the consistency of a holder's actions with the limitations of the proposed regulatory exemption.

This proposal's two-prong test or standard of management participation provides that while the borrower is still in possession of an UST or UST system (i.e., pre-foreclosure), a holder participates in the management of an UST or UST system only where the holder either exercises decisionmaking control over the UST or UST system, or where the holder's actions manifest or assume responsibility for the overall management of the UST or UST system's day-to-day operations. The general test adopts a functional approach which focuses on the holder's actual decisionmaking involvement in the operational (as opposed to the financial or administrative) affairs of the borrower's UST or UST system. The first prong looks to whether the holder has exercised decisionmaking control over the borrower's environmental compliance. If so, the holder is "participating in the management" of the UST or UST system as defined in the proposed rule. Similarly, the second prong looks to where the holder is functioning as the overall manager by exercising management at a level encompassing the borrower's environmental obligations, or over all or substantially all of the operational aspects of the borrower's enterprise, regardless of whether decisionmaking control over compliance with the regulations governing the UST or UST system has been explicitly assumed or not. This level of actual involvement in the management of the UST or UST system is sufficient to constitute management participation for purposes of this proposed regulatory exemption.

Under the first prong of the general test, a holder cannot remain within the scope of the exemption if it controls the borrower's environmental compliance activities associated with the UST or UST system. Under the second prong of the general test, the ability to carve out environmental compliance responsibilities from other operational aspects of the borrower's business or enterprise demonstrates that the holder has manifested or assumed operational responsibility at a management level that includes environmental matters, and in doing so is considered to be participating in the UST or UST system's management.

However, management participation does not include the unexercised right to become involved in operational UST or UST system decisionmaking. In other words, if the holder does not exercise its rights to participate in the management of the UST or UST system, it still may qualify for the security interest exemption. Whether the exercise of rights that a holder might have—whether under contract or other agreement (if any) or otherwise, including the enforcement of loan terms and covenants or other rights—rises to the level of participation in the UST or UST system's management is measured by reference to the general test.

b. *Actions that are not participation in management.* Participation in the following activities will not exclusively, in themselves, exceed the bounds of this proposed regulatory exemption: Policing the loan, undertaking financial work out with a borrower where the obligation is in default or in threat of default, undertaking foreclosing and winding up operations (as described later in this proposal), or preparing the UST or UST system for sale or liquidation. In addition, the holder is not considered to be participating in the management of the UST or UST system by monitoring the borrower's business; by requiring or conducting on-site investigations, including site assessments, inspections, and audits, of the environmental condition of the UST or UST system or the borrower's financial condition; by monitoring other aspects of the UST or UST system considered relevant or necessary by the holder; by requiring certification of financial information or compliance with applicable duties, laws, or regulations, or by requiring other similar actions, provided that the holder does not otherwise participate in the management or operation of the UST or UST system, as provided in this proposed regulation. Such oversight and obligations of compliance imposed by the holder are not considered part of the management of an UST or UST system. Although such requirements and oversight may inform and perhaps strongly influence the borrower's management of an UST or UST system, the holder is not considered to be participating in management where the borrower continues to make operational decisions concerning the UST or UST system.

The protected activities of a holder that are specifically identified in this rule are consistent with the language of RCRA section 9003(h)(9) and the overall purpose of subtitle I. Judicial decisions construing the substantially similar language of CERCLA section 101(20)(A) have addressed the issue of the appropriate degree of a holder's involvement at a facility in which it held a security interest (i.e., the standard of "participation in management"). Although the cases articulated the CERCLA standard using different language, these cases generally held that the exemption is abrogated once a holder has divested the borrower or debtor of its management authority prior to foreclosure, such as when the holder becomes involved in the facility's day-to-day operations, where it becomes overly entangled in the affairs of the facility, or where its involvement otherwise affects a facility's hazardous waste practices. See *United States* v. *Maryland Bank & Trust Co.*, 632 F. Supp. 573 (D. Md. 1986); *United States* v. *Mirabile*, 15 Envtl. L. Rep. (Envtl. L. Inst.) 20994 (E.D. Pa. 1985) (participation in financial management insufficient to void the security interest exception to owner liability); *United States* v. *Fleet Factors Corp.*, 901 F.2d 1550 (11th Cir. 1990), cert. denied, 111 S.Ct. 752 (1991).

Other cases interpreting the provisions of CERCLA established that a holder's involvement in financially related matters—such as periodic monitoring or inspections of secured property, loan refinancing and restructuring, financial advice, and similar activities—will not void the exemption. See *Guidice* v. *BFG Electroplating and Manufacturing Co.*, 732 F. Supp. 556 (W.D. Pa. 1989); *United States* v. *Nicolet*, 29 Envtl. Rep. Cas. (BNA) 1851 (E.D. Pa. 1989); *United States* v. *Mirabile*, 15 Envtl. L. Rep. (Envtl. L. Inst.) 20994 (E.D. Pa. 1985) (participation in financial management insufficient to void the security interest exception to owner liability). The variations in the courts' articulations of the standard, however, left unclear the precise degree of involvement that could be undertaken without voiding the CERCLA exemption. See, e.g., *Fleet Factors Corp.*, 901 F.2d at 1557 (secured creditor may incur CERCLA liability by participating in the financial management of a facility to a degree indicating a capacity to influence the corporation's treatment of hazardous waste); In *re Bergsoe Metal Corp.*, 910 F.2d 668 (9th Cir. 1990) ("there must be some actual management of the facility before a secured creditor will fall outside the exception [found in CERCLA section 101(20)(A)]"). However, more recent cases under CERCLA have articulated a standard of management participation that is substantially similar to that in this proposed rule. See *United States* v. *McLamb*, 5 F. 3d 69 (4th Cir. 1993); *Waterville Industries, Inc.* v. *Finance*

Authority of Maine, 984 F 2d. 549 (1st Cir. 1993).

While the cases listed above describe particular activities and draw a line between the actions of a holder that are and are not evidence of management participation for purposes of CERCLA, there remains uncertainty about the effect of activities commonly or routinely undertaken by a holder in the course of managing a loan secured by an UST or UST system. EPA believes that the uncertainty created for holders examining their potential for liability under CERCLA also exist when holders assess their potential obligations under RCRA subtitle I. Therefore, this proposed rule is intended to specify the compliance obligations for lenders when conducting normal business activities and to define with greater precision the point at which a holder's actions pass from loan oversight and advice to actual UST or UST system management.

The following sections discuss and describe the specific activities of a holder that the proposed rule defines as either activities that indicate the holder's participation in the management of an UST or UST system or those that are *not* instances of participation in the management of an UST or UST system by a person holding indicia of ownership primarily to protect a security interest in the UST or UST system.

It bears repeating, however, that the activities identified in this proposed rule do not specify the only activities that may be undertaken by a holder without losing the protection of the proposed security interest regulatory exemption, and one should not infer that activities not specifically mentioned in this rule are automatically considered evidence of participation in an UST or UST system's management—those must be addressed on a case-by-case basis based on the general test provided in this rule.

(1) *Actions at the inception of the loan or other transaction giving rise to a security interest.* Actions undertaken by a holder prior to the inception of a transaction in which indicia of ownership are held primarily to protect a security interest are irrelevant with respect to the general test of participation in management, and thus are not considered evidence of participation in the management of the UST or UST system. Thus, consultation and negotiation concerning the structure and terms of the loan or other obligation, the payment of interest, the payment period, and specific or general financial or other advice, suggestions, counseling, guidance, or other actions at or prior to the time that indicia of ownership are first held are not considered evidence of participation in the management of the UST or UST system for purposes of this proposed rule. Activities that take place *prior* to holding indicia of ownership are not relevant for determining whether the holder has participated in the management of the UST or UST system *after* the time that the holder acquires indicia of ownership.

In addition to such pre-loan involvement, a holder may determine (whether for risk management or any other business purpose) to undertake or require an environmental investigation (which could include a site assessment, inspection, and/or audit) of an UST or UST system securing the loan or other obligation. Such environmental investigation may be undertaken by the holder, for example, or the holder may require one to be conducted by another party (such as the borrower) as a condition of the loan or other transaction. Neither RCRA Subtitle I nor this proposed rule require that such an environmental investigation be undertaken to qualify for the security interest exemption, and the obligations of a holder seeking to avail itself of the exemption cannot be based on or affected by the holder's not conducting or not requiring an environmental investigation in connection with the security interest. Similarly, a holder is not engaged in management participation solely as a result of undertaking or requiring an environmental investigation, and nothing in this proposed rule should be understood to discourage a holder from undertaking or requiring such an environmental investigation in circumstances deemed appropriate by the holder. Because lender-conducted or -required investigations of a borrower's business or collateral are information-gathering in nature, such activities cannot, alone, be considered to be management participation by a holder.

In the event that a pre-loan environmental investigation of a UST or UST system reveals contamination, the holder may undertake any one of a variety of responses that it deems appropriate: For example, the holder may refuse to extend credit or to follow through with the transaction or instead maintain indicia of ownership in other, non-contaminated property as protection for the security interest. Alternatively, a holder may determine that the risk of default is sufficiently slight (or that the extent of contamination is minimal and does not significantly affect the value of the UST or UST system as collateral) to proceed to extend credit and maintain indicia of ownership in the UST or UST system. Additionally, the holder may require the borrower to clean up the contamination as a condition for extending the loan. Such activities are not considered participation in the UST or UST system's management, and a holder that knowingly takes a security interest in contaminated collateral is not subject to compliance with the RCRA Subtitle I corrective action regulatory program solely on this basis.

(2) *Policing the security interest or loan.* A holder may undertake actions that are consistent with holding ownership indicia primarily to protect a security interest which include, but are not limited to, a requirement that the borrower clean up a release from the UST or UST system which may have occurred prior to or during the life of the loan or security interest (as described in the last section); a requirement of assurance of the borrower's compliance with applicable federal, state, and local environmental or other laws and regulations during the life of the loan or security interest; securing authority or permission for the holder to periodically or regularly monitor or inspect the UST or UST system in which the holder possesses indicia of ownership, or the borrower's business or financial condition, or both; or to comply with legal requirements to which the holder is subject; or other requirements or conditions by which the holder is able to police adequately the loan or security interest, provided that the exercise by the holder of such other loan policing activities are not considered evidence of management participation as provided in the proposed rule's "general test" of management participation.

The authority for the holder to take such actions may be contained in contractual (e.g., loan) documents or other relevant documents specifying requirements for financial, environmental, and other warranties, covenants, and representations or promises from the borrower. While the regulatory exemption in this proposed rule requires that the actions undertaken by a holder in overseeing or managing the loan or other obligation be consistent with those of a person whose indicia of ownership in an UST or UST system is held primarily to protect a security interest, a holder is not expected to be an insurer or guarantor of environmental safety or quality at a secured UST or UST system. The inclusion of environmental warranties and covenants is not considered to be evidence of a holder's acting as an insurer or guarantor, and a finding of

"management participation" cannot be premised solely on the existence of such terms or upon the holder's actions that ensure that the UST or UST system is managed in an environmentally sound manner. Since these actions are consistent with holding indicia of ownership primarily to protect a security interest, they are not considered to be participation in management in this proposed rule.

(3) *Loan work out.* The holder may determine that actions need to be taken with respect to the UST or UST system to safeguard the security interest from loss. These actions may be necessary when, for example, a loan is in default or threat of default, and are commonly referred to as "loan work out" activities. "Loan work out" is largely an undefined term but is generally understood in the financial community to mean those activities undertaken to prevent, mitigate, or cure a default by the obligor or to preserve or prevent the diminution of the value of the security. Loan work out activities are recognized by EPA as a common lender undertaking and, as such, these actions will not take a holder outside of the scope of the security interest exemption provided for in this proposed rule, provided that such actions are consistent with the proposed general test of management participation.

When the holder undertakes loan work out activities, provides financial or other advice, or similar support to a financially distressed borrower, the holder will remain within the scope of the proposed security interest regulatory exemption only so long as the holder does not participate in management as provided by this proposed rule's general test. Loan work out actions that are not evidence of "participation in management" include, but are not limited to: Restructuring or renegotiating the terms of the security interest; requiring payment of additional rent or interest; exercising forbearance with regard to the security interest; requiring or exercising rights pursuant to an assignment of accounts or other amounts owing to an obligor; requiring or exercising rights pursuant to an escrow agreement pertaining to amounts owing to an obligor; providing specific or general financial or other advice, suggestions, counseling, or guidance; and exercising any right or remedy the holder is entitled to by law or under any warranties, covenants, conditions, representations, or promises from the borrower.

(4) *Foreclosure and sale or liquidation.* Foreclosure and possession of property for purposes of sale or liquidation are often the only remedy the holder may have to secure performance of an obligation. The process of foreclosure and sale or liquidation of a foreclosed-on UST or UST system often results in the exclusive possession of the UST or UST system by the holder and may require or result in the holder's taking record title to the UST or UST system under the laws of some states. For purposes of this proposed rule, the term "foreclosure or its equivalents" includes foreclosure, purchase at foreclosure sale, acquisition or assignment of title in lieu of foreclosure, acquisition of a right to possession or title, or other agreement in settlement of the loan obligation, or any other formal or informal manner by which the holder acquires possession of the borrower's collateral for subsequent disposition in partial or full satisfaction of the underlying obligation. These actions are considered to fall within the scope of the proposed regulatory exemption as necessary incidents to holding ownership indicia primarily to protect a security interest. However, a holder is under the coverage of the proposed rule and is not considered an "owner" of a UST or UST system only so long as the holder's acquisition pursuant to foreclosure is reasonably necessary to ensure satisfaction or performance of the obligation, is temporary in nature, and occurs while the holder is actively seeking to sell or otherwise divest the foreclosed-on UST or UST system.

To meet the requirements of the proposed rule's exemption from regulatory compliance as an "owner" following foreclosure, a holder must be acting consistently with the security interest exemption's requirement that the ownership indicia maintained by the holder continue to be held primarily to protect the security interest. Where a holder's actions indicate that it is not seeking to sell or liquidate the secured assets, the exemption is voided because such actions are akin to holding the asset for investment purposes. This proposed regulation describes circumstances under which a holder may avoid being considered an "owner" of property on which it forecloses for purposes of certain Subtitle I regulations. It is only by complying with the provisions of this proposed rule that the limited ownership rights of a security holder do not rise to the level of full "ownership" sufficient to make the security holder an "owner" of the tank, as that term is used in EPA's UST regulations. The proposed rule first provides a set of general criteria for offering an UST or UST system for sale, and when and under what circumstances an offer of purchase may or may not be rejected. In addition, even though a holder is permitted to use whatever means are appropriate and available to sell or otherwise divest itself of foreclosed-on property, as a measure of certainty this proposed rule contains an objective test that, if followed by a holder, establishes that the holder is meeting the general obligation to divest itself of a foreclosed-on UST or UST system in a reasonably expeditious manner. EPA believes that this aspect of the proposed rule is consistent with the RCRA Subtitle I security interest exemption.

In general, under this proposal, a foreclosing holder must, in order to maintain consistency with the security interest exemption, seek to sell or otherwise divest itself of foreclosed-on property in a reasonably expeditious manner using whatever commercially reasonable means are available or appropriate, taking all facts and circumstances into account. A holder cannot, under the terms of the proposed rule, reject or refuse offers for the property that represent fair consideration for the asset and remain within the proposed regulatory exemption. A holder that outbids or refuses offers from parties offering fair consideration for the property establishes that the property is no longer being held primarily to protect a security interest. The terms of the bid are relevant for this purpose, and a holder is not required to accept offers that would require it to breach duties owed to other holders, the borrower, or other persons with interests in the property that are owed a legal duty. In addition, the term "fair consideration" refers to an all cash offer, which is intended to ensure that this proposed rule would not require a holder to accept a bid that contains unacceptable conditions, such as requirements for indemnification agreements, non-cash offers, "bundled" offers, etc. This proposed provision should not be read to require that a holder may accept only cash offers, however; a holder is always free to accept any offer satisfactory to the holder. The exact requirement that would be imposed by this proposed regulation is that a holder may not reject a cash offer of fair consideration for the foreclosed-on property. If it does, or if it outbids others offering fair consideration, then the holder would, under today's proposal, be considered to be an owner of the UST or UST system in the same manner as any other purchaser.

This proposed rule's provisions defining "fair consideration" and specifying when the foreclosing holder may reject or outbid offers for the property are formulated to reflect the amount that the holder may bid at the foreclosure sale, or not reject during the foreclosure sale or thereafter, in order to recover on its loan or other obligation. In addition, there may be multiple security interests in a borrower's property held by secured creditors, which the definition of "fair consideration" must account for. Therefore, for a senior creditor, the term "fair consideration" is proposed to mean a cash amount that represents a value equal to or greater than the outstanding obligation owed to the holder (including the fees, penalties, and other charges incurred by the holder in connection with the property). "Fair consideration" is further proposed to indicate that the amount that will recover the holder's "security interest" in the property may vary depending on the seniority of the loan or other obligation that is being foreclosed upon. Specifically, a junior creditor may be required to outbid senior creditors in order to recover the value of its loan or other obligation. The definition of fair consideration therefore distinguishes between what junior or senior creditors may bid or not reject for purposes of maintaining the exemption. In addition, in order to avoid liability under law (for example, to the borrower), the foreclosing holder may be required to seek an amount at the foreclosure sale that is greater than the outstanding obligation owed to the foreclosing holder, or to sell the property in a different manner; therefore, the proposed rule does not require a holder to accept an offer of "fair consideration" if to do so would subject the holder to liability under federal or state law.

In this way the proposed rule's provisions with respect to the sale or disposition of property will not conflict with the manner in which such sales are required to be conducted under general principles of law applicable to the holder and the disposition of the property including the UST. For purposes of this proposed rule, the definition of "fair consideration" is an objective, "bright-line" test to determine whether the foreclosing holder has an investment or other interest in the property that is not within the exemption, or whether the holder's post-foreclosure activities indicate that it continues to maintain its ownership indicia in the property primarily to protect a security interest, and is therefore within the protective ambit of the proposed rule.

While a holder may use whatever means are reasonable and appropriate for marketing foreclosed-on property to establish that it is seeking to divest itself of property in an expeditious manner, this proposed rule also provides a mechanism by which a holder can definitely establish that it continues to hold indicia of ownership primarily to protect a security interest and is not an "owner," for purposes of complying with the UST regulatory program, of foreclosed-on property. This mechanism is intended to act as another "bright line" to provide clear and unambiguous evidence that a holder is not the UST or UST system's "owner" following foreclosure: A holder choosing to avail itself of this bright line test must, within 12 months following the acquisition of marketable title, list the property with a broker, dealer, or agent who deals with the type of property in question, or advertise the property as being for sale or disposition on at least a monthly basis in either a real estate publication or a trade or other publication suitable for the property in question, or a newspaper of general circulation (defined as one with a circulation over 10,000, or one suitable under any applicable federal, state, or local rules of court for publication required by court order or rules of civil procedure) covering the area where the property is located. If the holder satisfies these criteria, the holder is considered to have complied with the requirement in the proposed rule that it is seeking to sell or otherwise divest the property in an expeditious manner.

EPA also recognizes that market conditions, the condition of the property, and other factors may mean that despite reasonable efforts to expeditiously sell or divest foreclosed-on property, the property may not be quickly sold. Therefore, this regulation does not impose a time requirement for the ultimate disposition of foreclosed-on property. Provided that the property is being actively offered for sale by the holder and no offers of fair consideration are ignored, outbid, or rejected, foreclosed-on property may continue to be held by the holder without the holder being considered an "owner" of the UST or UST system for purposes of complying with the UST regulatory program, as detailed in this proposed rule.

Regardless of the manner in which the foreclosing holder chooses to market the property, if at any time after six months following the acquisition of marketable title the holder rejects, or does not act upon within 90 days of receipt of, a written, *bona fide*, firm offer of fair consideration for the property, the holder will lose the protection of the proposed rule. Under this proposal, a "written, *bona fide*, firm offer" is a legally enforceable, commercially reasonable, offer, including all material terms of the transaction, from a ready, willing, and able purchaser who demonstrates to the holder's satisfaction the ability to perform. Where a holder outbids, rejects, or fails to act upon an offer of fair consideration, the holder is considered, for the purpose of the proposed regulatory exemption, to be maintaining its indicia of ownership in the property as protection for investment purposes, and not as security for the obligation.

The proposed exemption from regulatory compliance would also permit a foreclosing holder to undertake actions with respect to the UST or UST system to protect or preserve the value of the secured asset. For example, a holder may determine that it needs to take certain actions with respect to an UST or UST system's operations in order to preserve the value of the foreclosed-on assets or to prevent a future release (such as by the removal of an UST or UST system's contents as described below), or to otherwise prepare property for safe public access incident to sale or liquidation of assets. Precisely because a holder in charge of an UST or UST system may need to take affirmative action with respect to the UST or UST system incident to foreclosure and with respect to any petroleum products that are known to be present, the proposal provides that such actions of dominion and control over the UST or UST system are considered necessary components of holding ownership indicia primarily to protect a security interest, provided such actions are undertaken to protect the asset's value and are not undertaken for investment purposes. Therefore, under this proposed rule, such mitigative or preventative measures are considered to be actions that are consistent with holding ownership indicia primarily to protect the security interest in the UST or UST system.

(5) Winding up operations after foreclosure. In addition, in the post-foreclosure context, this proposed rule provides that a holder that forecloses on an UST or UST system with ongoing operations may wind up the UST or UST system's operations without also being considered to be participating in management. Winding up is considered a protected activity by a foreclosing holder because, without such protection, foreclosure would not be possible where practical or commercial necessity dictates that the foreclosing holder undertake such actions. "Winding up" in the post-foreclosure context includes those actions that are necessary to close down an UST or UST

system's operations, secure the site, and otherwise protect the value of the foreclosed assets for subsequent sale or liquidation. In winding up an UST or UST system, a holder may undertake all necessary security measures or take other actions that protect and preserve an UST or UST system's assets, including steps taken to prevent or minimize the risk of a release or threat of release of the UST or UST system's contents.

D. Liability of a Holder as an Operator of an Underground Storage Tank or Underground Storage Tank System

Although this proposed rule would be promulgated under authority to write regulations governing UST activities, EPA intends that it be consistent with and further the purposes of the statutory security interest exemption found at Section 9003(h)(9). One critical aspect of the RCRA subtitle I statutory security interest exemption is that while it excludes a holder from the definition of "owner" for corrective action purposes, the statute does not explicitly address a holder's responsibilities as an UST or UST system "operator."[4] The absence of explicit language in the statute regarding operators creates a potential problem for holders, since EPA's UST corrective action regulations (as described in Section II. B of this preamble) apply to both owners and operators of underground storage tanks. Thus, although RCRA subtitle I clearly exempts holders from corrective action liability as "owners" of USTs, the statute does not address whether such otherwise exempt persons face correction action liability as "operators" of USTs. Without clear protection from corrective action liability as potential operators of USTs, EPA believes that lenders will continue to be reluctant to make loans to UST-related businesses due to continued uncertainty about their potential liability for corrective action. This regulatory proposal therefore addresses a holder's potential liability for RCRA subtitle I corrective action as an "operator" of an UST or UST system.

1. Pre-Foreclosure Operation

Prior to foreclosure, a holder who is in control of, or has responsibility for, the daily operation of an UST or UST system is subject to the full range of requirements applicable to operators of USTs. In addition, a holder may also forfeit the protection of the proposed regulatory security interest exemption from compliance with the UST regulatory program as an owner if the holder participates in the management of an UST or UST system as defined in this proposal.

However, a holder will not, as a general matter, have control of, or responsibility for, the daily operation of an UST or UST system prior to foreclosure in its capacity as a secured creditor who holds indicia of ownership primarily to protect a security interest. Prior to foreclosure, a holder is permitted to conduct those activities related to its financial and administrative obligations of managing a loan portfolio. The holder in this position will not lose its ability to take advantage of the proposed regulatory exemption exclusively as a result of engaging in these activities. See Section III.C.5 of this preamble for a more complete discussion of this issue.

2. Post-Foreclosure Operation

If a borrower defaults on its loan obligation and the holder, primarily to protect its security interest, forecloses on the borrower's UST or UST system, the holder is faced with the decision to continue or suspend the storage or dispensing of product from the UST. As with activities prior to foreclosure, a holder who operates an UST following foreclosure (in any manner other than placing the UST in temporary or permanent closure as specified in this proposal) would, under the current regulatory scheme, be an "operator" and subject to all subtitle I requirements. If the holder complies with the requirements of this rule for placing a tank into temporary or permanent closure, a holder, although nevertheless an operator, would be exempt from the subtitle I corrective action regulatory requirements otherwise applicable to operators.

The strategies for complying with the UST technical standards described in this proposal include emptying tanks, leaving vent lines open and functioning, capping and securing lines within 15 days after foreclosure, and performing either temporary or permanent closure of the UST or UST system. Conversely, a foreclosing security holder who exercises some other strategy for complying with the subtitle I technical requirements (or who fails to comply) could be an "operator" under the subtitle I regulations and would therefore be subject to the full panoply of subtitle I regulatory obligations applicable to all operators of tanks including the corrective action regulations.

As long as an UST or UST system continues to store product, future releases are possible. Consequently, EPA believes that the best way to ensure that a holder's tanks will not contribute to contamination after the holder has taken possession of the UST or UST system (particularly if the holder is exempted from EPA's corrective action regulations) is to require the holder to empty its tanks of all petroleum product. An UST or UST system is empty—in accordance with § 280.70—when all materials have been removed using commonly employed practices so that no more than 2.5 centimeters (one inch) of residue, or 0.3 percent by weight, of the total capacity of the UST system, remain in the system. To ensure that the UST system has been adequately secured, vent lines must be left open and functioning, and all other lines, pumps, manways, and ancillary equipment must be capped and secured (§ 280.70). Under today's proposal, holders who engage in these activities within 15 days after foreclosure will be exempted from the corrective action requirements applicable to "operators." This is a reasonable condition on which to base this exemption since the threat of future contamination will have been effectively abated for the temporary period of time that the property remains in foreclosure by emptying the tank and complying with the other requirements of 40 CFR part 280, as described in this proposed rule. Compliance with these requirements will also satisfy the technical requirements applicable to foreclosing holders as "operators" under the rule proposed today.

EPA is proposing that 15 days be allowed to empty the tank, and cap and secure all lines and equipment based on its familiarity with companies that specialize in providing UST technical services and on the Agency's knowledge of the steps required to properly complete these tasks. Based on this, EPA proposes that 15 days is a reasonable and adequate time frame that limits the period of time during which a tank containing petroleum product may be left largely unattended. However, the Agency is interested in receiving comments from any holders who feel that a 15-day time frame would be inadequate for a holder to arrange for the completion of these tasks. EPA requests comments and data about the adequacy of a 15-day time frame and information supporting an alternative time frame. Information supporting EPA's proposed time frame is available

[4] Under RCRA Subtitle I, being an "operator" is not synonymous with "participating in the management" of an UST or UST system. Section 9001(3)—Definitions and Exemptions—defines the term "operator" to mean "any person in control of, or having responsibility for, the daily operation of the UST system." A person may, without being an "operator" of an UST or UST system, be sufficiently involved so as to be participating in the management (as that term is defined elsewhere in this proposal) of an UST or UST system.

from the Agency OUST docket, reference number UST 3–16.

In addition to emptying and securing the UST or UST system, a holder who wishes to take advantage of the proposed exemption from subtitle I corrective action regulatory requirements as an operator must comply with the subtitle I requirements for either temporary or permanent closure. A holder who chooses to permanently close its UST or UST system, must do so in accordance with §§ 280.71 through 280.74, Subpart G—Out of Service UST Systems and Closure. A holder who chooses to temporarily close its tanks is required, throughout the first 12 months following foreclosure, to maintain corrosion protection and report any known or suspected releases from the UST system. In accordance with § 280.70, release detection is not required as long as the UST system is empty.

If, after 12 months in temporary closure status, the holder possesses an UST or UST system that does not meet either the performance standards in § 280.20 for new UST systems or the upgrading requirements in § 280.21 (excluding the spill and overfill equipment requirements), and the holder has not successfully disposed of the UST or UST system, the holder must either permanently close the UST system in accordance with §§ 280.71 through 280.74 or perform a site assessment in accordance with § 280.72(a) and apply for an extension through the appropriate implementing agency.

A holder will only need to perform a site assessment if it has failed to sell or otherwise divest of its UST or UST system property within 12 months after entering temporary closure and only if the tanks it has acquired have not been upgraded or replaced to meet the requirements of § 280.20 for new UST systems or § 280.21 for upgraded systems. (UST systems that are adequately protected from corrosion and equipped with leak detection devices pose a significantly lower threat to human health and the environment than do substandard tanks.) The site assessment requirement can also be satisfied if one of the external release detection methods allowed in § 280.43(e) or (f) is operating at the end of the 12-month period, and the release detection method operating indicates that no release has occurred. For those who are still in possession of tanks 12 months after foreclosure, many are expected to possess upgraded or replaced tanks since much of the credit that is expected to be extended subsequent to this rule should be used for upgrading or replacing substandard tanks. Under these circumstances, the holder would be allowed to remain in temporary closure indefinitely. Therefore, EPA believes that few situations should call for a site assessment while the holder is in temporary closure. For those cases in which a holder will find it necessary to perform a site assessment and apply for a temporary closure extension, EPA does not believe that such a requirement will pose a significant additional burden upon the holder, since it is increasingly a standard business practice for a site assessment to be conducted upon most transfers of commercial property. (See Guidelines for an Environmental Risk Program, Federal Deposit Insurance Corporation, February 25, 1993.) While in some cases the requirement may oblige a holder to perform a site assessment sooner (within 12 months after foreclosure) rather than later (upon the date of sale or disposition of the UST or UST system), EPA expects that in most cases a site assessment will, in all probability, be performed before the UST or UST system is transferred to a subsequent purchaser.

The purpose of the provision that requires an UST owner and operator to perform a site assessment in order to apply for an extension 12 months after entering temporary closure (if a substandard UST or UST system has not been replaced or upgraded) was to allow a variance mechanism for UST owners to avoid permanent closure of tanks, on a case-by-case basis. The reason for requiring the site assessment before applying for an extension was based on EPA's concerns that prior contamination could have occurred and could continue to spread from a temporarily closed UST system. Although a holder would not be required to comply with EPA's UST corrective action regulations if contamination is discovered (provided, of course, the holder satisfies the requirements of this proposed rule), it would be required to report evidence of the contamination to the implementing agency (as discussed in the following subsection), who can then decide on the appropriate course of action.

Of course, a holder may choose to continue to operate the UST by storing or dispensing product after foreclosure, or otherwise not exercise either of the options described above. The holder may determine that its interests will be best served by forgoing the security interest exemption, continuing operation of the UST system, and perhaps realizing a greater return of capital on the security interest by selling the property with the UST system as a going concern. In such cases, the tank would be regulated in the same manner as a tank operated by any other person, and the holder would be fully responsible as an operator for compliance with RCRA subtitle I regulations, including corrective action, the UST technical standards, and financial responsibility requirements.

EPA believes that the environment is adequately protected where a holder chooses either of the post-foreclosure options described above for complying with the technical requirements of Subtitle I. Where the tank is removed from service and emptied of its contents, the threat of an unknown or undetected leak resulting in environmental contamination is abated; accordingly, the Agency believes it is appropriate to exempt a foreclosing holder from UST corrective action regulatory requirements under these circumstances.

3. Lenders in Foreclosure Upon the Effective Date of the Rule

The Agency recognizes that some lenders may already hold UST properties through foreclosure or its equivalents at the time the final rule is promulgated. Although EPA is primarily concerned about the future availability of capital to UST owners and operators, rather than loans that have already been extended, the Agency recognizes that holders may be concerned about their potential liability associated with current holdings acquired through foreclosure or its equivalents affecting the extension of future UST loans. A holder who possesses an UST property at the time the rule is promulgated may have tanks that still store product. It would be difficult to determine whether or not contamination caused by a release from such tanks had occurred during the time that the holder had possession of the UST property. A holder, therefore, could potentially be held liable as an UST operator if he has possession of a tank at the time the final rule is promulgated.

EPA requests comments on this aspect of today's proposal. We are interested in collecting data that will clarify whether future UST loan decisions would be negatively affected if the security interest exemption is not extended to holders possessing UST properties through foreclosure or its equivalents upon promulgation of this rule. In addition, EPA is interested in comments addressing whether and how an exemption from the UST regulatory requirements could be structured for holders of such tanks. Finally, we are also interested in receiving comments addressing the extent to which such a

regulatory exemption could impact human health and the environment.

4. Release Reporting Requirements Following Foreclosure

Under today's proposal, upon foreclosure, a holder taking advantage of the proposed exemption from corrective action regulations must nevertheless comply with the requirement in § 280.50 that the discovery of any releases from the UST be reported to the implementing agency. Only the reporting requirement must be followed; the holder need not comply with § 280.52, despite the reference to that provision in § 280.50. The release reporting requirement of § 280.50 is part of Subpart E, which details the obligations for reporting known or suspected releases, investigating off-site impacts, confirming that a release has occurred, and cleaning up spills and overfills. While subpart E generally implements Subtitle I's corrective action and site investigation requirements, from which a holder may be excluded under today's proposed rule, § 280.50 has historically been viewed by EPA as part of the UST technical standards.

A holder is responsible, following foreclosure or its equivalents, for reporting to the implementing agency, any discovery of released regulated substances, or any suspected release at an UST site or in the surrounding area. Such reporting is considered necessary to ensure protection of human health and the environment. By informing the implementing agency of a release, the implementing agency can then determine the appropriate response action, if any.

In the absence of today's proposed rule, a holder would have to perform release investigation and confirmation in accordance with §§ 280.51 through 280.53. Under today's proposal, a holder who chooses to take the tank(s) out of service as described in this proposal is required to follow the procedures established in § 280.50 but is not subject to the release investigation and confirmation requirements in §§ 280.51 through 280.53. A holder who elects to keep the tank(s) in operation is obligated to comply with all of the Subpart E requirements, including those related to release investigation and confirmation, and corrective action.

E. Actions Taken to Protect Human Health and the Environment

Because of the special position and role played by bona fide holders, as has been recognized by Congress in creating the statutory exemption from corrective action liability, the Agency believes that it is appropriate to include within the scope of protected UST or UST system activities certain lender actions which protect human health and the environment. EPA believes that there are a number of activities in which a holder may engage after foreclosure which can contribute to the protection of human health and the environment and in which the holder may engage and still meet the terms of the proposed rule's exemption from regulatory requirements. Such activities include: Release response and corrective action for UST systems, permanent or temporary closure of an UST or UST system, tank upgrades or replacements, environmental investigations, maintenance of corrosion protection, and release reporting. The Agency believes that protection of human health and the environment can be advanced by allowing a holder to participate in activities associated with environmental compliance either prior to or following foreclosure on an UST or UST system. Environmental compliance activities are generally considered to be integral to the daily operations of an UST or UST system, and a person who participates in those activities would typically be considered an operator. However, a reasonable holder may also undertake such activities in the course of maintaining its indicia of ownership in the tank to protect its security interest. Therefore, the Agency believes that it is appropriate to propose that environmental compliance activities, if undertaken by a holder, will nevertheless allow the holder to take advantage of the proposed exemption from regulatory requirements. The Agency is not proposing that these activities be required of a holder as a condition for obtaining the security interest exemption as an UST owner, but that holders be able to participate in these activities without losing the protection of the proposed exemption.

Prior to foreclosure, therefore, and where the holder is otherwise permitted,[5] a holder may require the borrower to comply, or itself undertake to ensure compliance, with the subtitle I regulations applicable to the tank owner and operator (typically, the borrower), without being deemed an "operator" under the provisions of this proposed rule. EPA believes that a holder who is ensuring that a tank is operated as specified in 40 CFR part 280 (even if the holder is itself performing the activities authorized or required by part 280) is acting both to preserve the collateral (and therefore acting consistent with its capacity as a security interest holder) and to protect human health and the environment. It is appropriate for a holder to intervene in such circumstances in which human health and the environment are threatened by an UST owner or operator's improper management or operation of its tank(s). However, undertaking activities that bring the tank(s) into compliance (i.e., regulatory compliance actions such as tank testing, leak detection, upgrading, etc.) will not exempt a holder from complying with the UST corrective action regulatory requirements if the holder is otherwise involved in the day-to-day operation of the tank(s). All other acts of operation undertaken by a holder (such as filling the tank(s) with product, selling and/or dispensing tank product, performing overall management functions, etc.) are not shielded activities under this proposed rule because by doing so the holder displaces the borrower as the primary operator of the tank(s).

Furthermore, following foreclosure, where the holder chooses to take advantage of the conditional exemption from the corrective action regulations by emptying and removing the tank from operation, as specified above, the Agency proposes that the holder may—without losing the protection of the proposed rule—undertake cleanup activities consistent with the corrective action requirements of 40 CFR part 280, subpart F at or in connection with the UST or UST system. EPA specifically requests comments on this aspect of today's proposal.

IV. Financial Responsibility Requirements

RCRA section 9003(d), as implemented by EPA at 40 CFR part 280, subpart H—Financial Responsibility, requires owners or operators of petroleum USTs to demonstrate financial responsibility for taking corrective action and for compensating third parties for bodily injury and property damage caused by accidental UST releases. As discussed earlier under Section III. A of this proposal, EPA is defining, for purposes of its Subtitle I corrective action and technical requirements, the term "owner" to mean that a holder who maintains ownership rights in an UST or UST system primarily to protect a security interest does not rise to level of a full "owner," and therefore is not subject to compliance with those regulatory requirements. As described earlier, this proposed revision of EPA's corrective action regulatory program is consistent with the Subtitle I statutory security interest exemption. Similarly,

[5] For example, where the lender is permitted pursuant to the loan document or under applicable state laws.

the Agency believes that a holder is not subject to the financial responsibility requirements as an UST owner. The Agency is also proposing to exempt a holder as an UST operator from the financial responsibility requirements.

Before a holder takes possession of an UST or UST system, a holder is not considered an UST operator, for purposes of EPA's technical and financial responsibility regulations, if it is acting merely as a holder and is not in control of the daily operation of the UST or UST system. Therefore, a holder typically is not subject to the UST financial responsibility requirements of 40 CFR part 280, subpart H as an operator prior to foreclosure. EPA is today proposing that a holder be exempted from corrective action as an operator after foreclosure if it ensures that its tanks no longer store petroleum and it complies with the temporary or permanent closure requirements specified in this rule. (See Section III. D. 2 of this preamble). In these situations, where the tanks are empty and pose little threat of release, it would serve no useful purpose to require a holder to demonstrate compliance with the financial responsibility requirements for corrective action. Therefore, the Agency is proposing to exempt holders who satisfy all the other requirements in this proposed rule from demonstrating Subtitle I financial responsibility for UST corrective action.

A holder's responsibility for demonstrating UST financial responsibility for third-party bodily injury and property damage compensation poses a different issue. While RCRA Subtitle I does not include provisions that actually impose third-party liability upon UST owners and operators, it does require UST owners and operators to demonstrate their ability to compensate third parties for bodily injury and property damage caused by accidental releases arising from the operation of an UST or UST system. The Agency believes that a holder who complies with all the conditions set forth in today's proposal should not be required to comply with any of the UST financial responsibility requirements as an owner or operator, including those for both corrective action and third-party liability coverage. EPA has chosen to propose this exemption based on the statutory authority provided in section 9003. The proposed exemption is consistent with the interpretation of that language adopted in the preamble to the UST financial responsibility final rule (53 FR 43323). In that rule, EPA exempted tanks taken out of operation prior to the effective date of the rule from UST financial responsibility compliance. In the preamble to the final rule, EPA recognized that "insurance providers would be extremely reluctant to assure tanks taken out of operation because of the perceived greater uncertainty associated with them" (53 FR 43327). In particular, insurers have indicated that in the case of foreclosed USTs, they would be concerned about vandalism and other threats to USTs at non-operational, unattended gas stations or similar locations with public access. The preamble also states that "even if providers of assurance would assure these tanks, it is unlikely that they would cover leaks which occurred before the effective date of the policy" (53 FR 43327).

A similar situation exists for holders who empty their tanks and enter temporary or permanent closure after foreclosure. EPA has discovered that it is practically impossible to obtain third-party environmental insurance coverage for a new owner of empty tanks. Providers of financial assurance are very reluctant to provide any coverage for tanks that no longer store petroleum product. Further, providers are reluctant to provide coverage for damages that occur after the effective date of the policy for releases that might have occurred prior to the effective date of the policy. Under this proposed rule a holder is required to empty its tanks in order to be exempt from corrective action regulatory requirements. Since providers are unlikely to provide any coverage for empty tanks at non-operational facilities or for releases that occurred prior to foreclosure, and since third-party damages would be extremely unlikely to stem from releases occurring after the holder forecloses on and empties its tanks, the Agency believes it is unnecessary to require third-party liability coverage for such tanks.

RCRA section 9003(c)(6) supports this proposed exemption. That provision emphasizes the connection between the UST financial responsibility requirement and a tank's operational status: "The regulations promulgated pursuant to this section shall include: . . . (6) requirements for maintaining evidence of financial responsibility for taking corrective action and compensating third parties for bodily injury and property damage caused by sudden and nonsudden accidental releases arising from *operating* an underground storage tank." [emphasis added.] The Agency believes that since a holder must demonstrate that its tanks are empty and that it is complying with the UST temporary or permanent closure requirements in order to avoid corrective action liability as an operator, there should be no need for a holder who meets these requirements to demonstrate financial responsibility for corrective action or third-party damages. By requiring the holder to empty the tank in order to be exempt from corrective action requirements, EPA is ensuring that damages caused by future releases from that tank will be minimized if not avoided altogether. As a result, EPA is proposing that holders who act in accordance with the requirements described in this proposed rule be exempt from all subtitle I financial responsibility requirements.

V. State Program Approval

RCRA subtitle I section 9004, as implemented by 40 CFR part 281, provides states the ability to operate an UST regulatory program in lieu of the federal program if they first submit the program for review and receive approval from EPA. EPA approval of a state program means that the requirements in the state's laws and regulations will be in effect rather than the federal requirements. Program approval ensures that a single set of requirements (the state's) will be enforced in that state, thus eliminating the duplication and confusion that can result from having separate state and federal requirements. EPA considers state program approval to be an integral part of the UST regulatory program.

EPA's approval review focuses primarily on the basic state authorities (laws and regulations) needed to achieve the underlying objectives of the federal regulations covering the UST technical standards, corrective action, and financial responsibility requirements. The UST state program approval process is also based upon a performance-oriented approach. The statutory test for an approvable state program is that it be "no less stringent" than the federal requirements and include as many categories of UST systems (or be as broad in scope) as the federal requirements. EPA reviews the state's specific statutory and regulatory provisions as well as their interpretation by the attorney general of the state.

Today's proposed rule is not intended to present a barrier for states to receive state program approval. A state is not required to have enacted a security interest exemption in order to receive approval of its program from EPA, since failure to have such a provision would merely make the state program broader in scope than the federal one. However, EPA encourages states to adopt statutory and/or regulatory provisions comparable to the final federal UST lender liability rule so that credit-

worthy UST owners and operators will have access to funds to upgrade or replace their tanks.

If a state program includes an UST security interest exemption, EPA will evaluate it against the criteria in § 281.39, as proposed in this notice. These criteria stem from the key components contained in this proposed rule. A state program that exempts a holder from UST corrective action, financial responsibility, and technical requirements as an owner may be approved if: The holder is maintaining indicia of ownership primarily to protect a security interest in a petroleum UST or UST system; the holder does not participate in the management of the UST or UST system; and the holder does not engage in petroleum production, refining, and marketing. In addition, a state program may be approved if it exempts a holder from corrective action and financial responsibility as an operator and if, in addition to the three previous criteria, it requires the holder to demonstrate that its tanks have been emptied and secured, and that it has either permanently or temporarily closed the UST or UST system.

The state's program application should address the issue of UST lender liability in the "Scope" section of its state program description, under § 281.21(a)(3) of the State Program Approval regulations.

VI. Economic Analysis

As discussed elsewhere in this proposal, EPA believes that concerns over environmental liability are making a significant number of lenders reluctant to make loans to otherwise credit-worthy owners and operators of USTs. A more analytical approach to describing the current lending climate and the potential effects associated with today's proposal is through a discussion of lending rates that UST owners are currently faced with, in comparison to those that may prevail after promulgation of a final rule.

In analytical terms, prior to final promulgation of today's proposed rule, the rate that lenders charge now when considering making an UST-related loan can be described as:

$r_{market} - i = r_b + r_e$

where:

r_{market}=Prevailing interest rate on UST-related loans

i=Risk-free rate of return

r_b=Risk premium banks charge for loans to small businesses. (This factor includes the financial risk for a business with certain assets that is unable to repay its loan.)

r_e=Risk premium charged for UST owners. (This factor includes the financial risk that a lender may have to pay for contamination, or uncertainty regarding the true value of collateral, in the event of contamination.)

Due to the current uncertainty regarding a holder's obligations to comply with the UST regulatory requirements, the risk premium "r_e" that banks have to charge in order to be adequately compensated for their risk in an UST-related loan may often be so high that it effectively precludes lenders from making loans at this level. A related barrier to lending is that since all UST owners bear a systematic risk imposed by government regulations, lenders cannot diversify to substantially reduce or eliminate the UST-related risk premium, r_e, by holding a portfolio of UST-related loans with different characteristics and risks. Since most UST owners and operators are small businesses that cannot self finance, they will either forego or delay UST facility improvements. While many UST-related loans are expected to be used for financing tank upgrades or replacements, these loans may also be used to provide additional services at the facility (e.g., an expanded area for food items at a convenience store). If lenders are precluded from making UST-related loans, both environmental protection and economic growth may suffer.

By providing the exemption for holders from UST regulatory requirements contained in this proposed rule and thus reducing the uncertainty associated with making an UST-related loan, the risk premium is expected to be significantly reduced. The interest rate relationship after final promulgation of today's proposed rule can be described as:

r_{market} (post rule)$= i + r_b + r_e$ (post rule)

where:

r_{market} (post rule)=Prevailing interest on UST-related loans after final promulgation of today's proposed rule

r_e (post rule)=Risk premium charged for UST owners after final promulgation of today's proposed rule

Although r_e (post rule) will still exist, it is expected to be significantly less than r_e. The result would be the reduction of the prevailing interest rate on UST-related loans to a level, r_{market} (post rule), that is both adequate to compensate lenders for their perceived risk and at the same time affordable for credit-worthy UST owners.

There are social costs associated with owners' and operators' inability to use the least costly financial mechanism to comply with the existing UST regulations. By reducing the risk premium to a level at which lenders are both willing and able to make UST-related loans, this proposed regulation is expected to increase the ability of UST owners and operators to comply with subtitle I regulations, thereby reducing these social costs. To the extent that loans are made for environmental compliance purposes, social costs would also be reduced by decreasing the number and severity of releases from old USTs that might otherwise occur in the absence of upgrading or replacing tanks.

The Agency is interested in obtaining comments on how this proposed rule might allow UST owners and operators to use less costly financial mechanisms to comply with UST regulations. Specifically, the Agency requests information from lenders on the current interest rate charged for loans when property with one or more USTs is used as collateral. The Agency also requests information from lenders regarding the extent to which credit might have been extended to UST owners and operators in the past had this proposed rule been in effect.

Further information and a more detailed discussion of the costs and benefits associated with today's proposal is contained in the "Regulatory Background Document" for this proposed rule, located in the OUST Docket at 401 M Street, SW.; room 2616: Washington, DC 20460.

VII. Regulatory Assessment Requirements

A. Executive Order 12866

Under Executive Order 12866 (58 FR 51,735 (October 4, 1993)), the Agency must determine whether the regulatory action is "significant" and therefore subject to review by the U.S. Office of Management and Budget (OMB) and the requirements of the Executive Order. The Order defines "significant regulatory action" as one that is likely to result in a rule that may:

(1) Have an annual effect on the economy of $100 million or more or adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or state, local, or tribal governments or communities;

(2) Create a serious inconsistency or otherwise interfere with an action taken or planned by another agency;

(3) Materially alter the budgetary impact of entitlements, grants, user fees, or loan programs or the rights and obligations of recipients thereof, or

(4) Raise novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in the Executive Order.

Pursuant to the terms of Executive Order 12866, it has been determined that this proposed rule is a "significant regulatory action" because it raises policy issues. As such, this action was submitted to OMB for review. Changes made in response to OMB suggestions or recommendations will be documented in the public record.

B. Regulatory Flexibility Act

In accordance with the Regulatory Flexibility Act of 1980, agencies must evaluate the effects of a regulation on small entities. If the rule is likely to have a "significant impact on a substantial number of small entities," then a Regulatory Flexibility Analysis must be performed. Because this proposed rule may actually result in cost savings for small entities that hold security interests in USTs or UST systems, EPA certifies that today's proposed rule would not have a significant impact on a substantial number of small entities.

C. Paperwork Reduction Act

This proposed rule does not contain any new information collection requirements under the provision of the *Paperwork Reduction Act*, 44 USC 3501 *et seq.*

To the extent that this proposed rule discusses any information collection requirements imposed under existing underground storage tank regulations, those requirements have been approved by the OMB under the *Paperwork Reduction Act* and have been assigned control number 2050–0068 (ICR no. 1360).

List of Subjects in 40 CFR Parts 280 and 281

Environmental liability, Financial institutions, Ground water, Lender liability, Oil pollution, Petroleum, State program approval, Underground storage tanks, Water pollution control.

Dated: June 3, 1994.

Carol M. Browner,

Administrator.

For the reasons set out in the preamble, chapter I, title I of the Code of Federal Regulations is proposed to be amended as follows:

PART 280—TECHNICAL STANDARDS AND CORRECTIVE ACTION REQUIREMENTS FOR OWNERS AND OPERATORS OF UNDERGROUND STORAGE TANKS (USTs)

1. The authority citation for part 280 continues to read as follows:

Authority: 42 U.S.C. 6912, 6991a, 6991b, 6991c, 6991d, 6991e, 6991f, 6991h.

2. Part 280 is proposed to be amended by adding subpart I consisting of §§ 280.200 through 280.250 to read as follows:

Subpart I—Lender Liability

Sec.

280.200 Definitions.
280.210 Participation in management.
280.220 Ownership of an underground storage tank or underground storage tank system.
280.230 Operating an underground storage tank or underground storage tank system.
280.240 Actions taken to protect human health and the environment under 40 CFR part 180.
280.250 Financial responsibility.

Subpart I—Lender Liability

§ 280.200 Definitions.

(a) *UST technical standards*, as used in this subpart, refers to the UST preventative and operating requirements under 40 CFR part 280, subparts B, C, D, G, and § 280.50 of subpart E.

(b) *Petroleum production, refining, and marketing.*—(1) *Petroleum production* means the production of crude oil or other forms of petroleum (as defined in § 280.12) as well as the production of petroleum products from purchased materials.

(2) *Petroleum refining* means the cracking, distillation, separation, conversion, upgrading, and finishing of refined petroleum or petroleum products.

(3) *Petroleum marketing* means the distribution, transfer, or sale of petroleum or petroleum products for wholesale or retail purposes.

(c) *Indicia of ownership* means evidence of a secured interest, evidence of an interest in a security interest, or evidence of an interest in real or personal property securing a loan or other obligation, including any legal or equitable title to real or personal property acquired incident to foreclosure or its equivalents. Evidence of such interests include, but are not limited to, mortgages, deeds of trust, liens, surety bonds and guarantees of obligations, title held pursuant to a lease financing transaction in which the lessor does not select initially the leased property (hereinafter "lease financing transaction"), legal or equitable title obtained pursuant to foreclosure, and their equivalents. Evidence of such interests also includes assignments, pledges, or other rights to or other forms of encumbrance against property that are held primarily to protect a security interest. A person is not required to hold title or a security interest in order to maintain indicia of ownership.

(d) *A holder* is a person who maintains indicia of ownership (as defined in § 280.200(c)) primarily to protect a security interest (as defined in § 280.200(f)(1)) in a petroleum UST or UST system. A holder includes the initial holder (such as a loan originator); any subsequent holder (such as a successor-in-interest or subsequent purchaser of the security interest on the secondary market); a guarantor of an obligation, surety, or any other person who holds ownership indicia primarily to protect a security interest; or a receiver or other person who acts on behalf or for the benefit of a holder.

(e) *A borrower, debtor, or obligor* is a person whose UST or UST system is encumbered by a security interest. These terms may be used interchangeably.

(f) *Primarily to protect a security interest* means that the holder's indicia of ownership are held primarily for the purpose of securing payment or performance of an obligation.

(1) *Security interest* means an interest in a petroleum UST or UST system or in the facility or property on which the UST or UST system is located, created, or established for the purpose of securing a loan or other obligation. Security interests include but are not limited to mortgages, deeds of trusts, liens, and title pursuant to lease financing transactions. Security interests may also arise from transactions such as sale and leasebacks, conditional sales, installment sales, trust receipt transactions, certain assignments, factoring agreements, accounts receivable financing arrangements, and consignments, if the transaction creates or establishes an interest in an UST or UST system or in the facility or property on which the UST or UST system is located, for the purpose of securing a loan or other obligation.

(2) *Primarily to protect a security interest*, as used in this subpart, does not include indicia of ownership held primarily for investment purposes, nor ownership indicia held primarily for purposes other than as protection for a security interest. A holder may have other, secondary reasons for maintaining indicia of ownership, but the primary reason why any ownership

indicia are held must be as protection for a security interest.

§ 280.210 Participation in management.

The term *participating in the management of an UST or UST system* means that the holder is engaging in acts of petroleum UST or UST system management, as defined herein.

(a) *Actions that are participation in management pre-foreclosure.* Participation in the management of an UST or UST system means, for purposes of this subpart, actual participation in the management or control of decisionmaking related to the UST or UST system by the holder and does not include the mere capacity or ability to influence or the unexercised right to control UST or UST system operations. A holder is participating in management, while the borrower is still in possession of the UST or UST system encumbered by the security interest, only if the holder either:

(1) Exercises decisionmaking control over the borrower's environmental compliance, such that the holder has undertaken responsibility for the borrower's UST or UST system management; or

(2) Exercises control at a level comparable to that of a manager of the borrower's enterprise, such that the holder has assumed or manifested responsibility for the overall management of the enterprise encompassing the day-to-day decisionmaking of the enterprise with respect to:

(i) Environmental compliance; or

(ii) All, or substantially all, of the operational (as opposed to financial or administrative) aspects of the enterprise other than environmental compliance. Operational aspects of the enterprise include functions such as that of facility or plant manager, operations manager, chief operating officer, or chief executive officer. Financial or administrative aspects include functions such as that of credit manager, accounts payable/receivable manager, personnel manager, controller, chief financial officer, or similar functions.

(b) *Actions that are not participation in management pre-foreclosure.*

(1) *Actions at the inception of the loan or other transaction.* No act or omission prior to the time that indicia of ownership are held primarily to protect a security interest constitutes evidence of participation in management within the meaning of this Subpart. A prospective holder who undertakes or requires an environmental investigation (which could include a site assessment, inspection, and/or audit) of the UST or UST system in which indicia of ownership are to be held or requires a prospective borrower to clean up contamination from the UST or UST system or to comply or come into compliance (whether prior or subsequent to the time that indicia of ownership are held primarily to protect a security interest) with any applicable law or regulation is not by such action considered to be participating in the UST's or UST system's management.

(2) *Loan policing and workout.* Actions that are consistent with holding ownership indicia primarily to protect a security interest do not constitute participation in management for purposes of this subpart. The authority for the holder to take such actions may, but need not, be contained in contractual or other documents specifying requirements for financial, environmental, and other warranties, covenants, conditions, representations or promises from the borrower. Loan policing and workout activities cover and include all such activities up to foreclosure or its equivalents, exclusive of any activities that constitute participation in management.

(i) *Policing the security interest or loan.* A holder who engages in policing activities prior to foreclosure will remain within the exemption provided that the holder does not by such actions participate in the management of the UST or UST system as provided in § 280.210(a). Such actions include, but are not limited to, requiring the borrower to clean up contamination from the UST or UST system during the term of the security interest; requiring the borrower to comply or come into compliance with applicable federal, state, and local environmental and other laws, rules, and regulations during the term of the security interest; securing or exercising authority to monitor or inspect the UST or UST system (including on-site inspections) in which indicia of ownership are maintained, or the borrower's business or financial condition during the term of the security interest; or taking other actions to adequately police the loan or security interest (such as requiring a borrower to comply with any warranties, covenants, conditions, representations, or promises from the borrower).

(ii) *Loan work out.* A holder who engages in work out activities prior to foreclosure or its equivalents will remain within the exemption provided that the holder does not by such action participate in the management of the UST or UST system as provided in § 280.210(a). For purposes of this rule, *work out* refers to those actions by which a holder, at any time prior to foreclosure or its equivalents, seeks to prevent, cure, or mitigate a default by the borrower or obligor; or to preserve, or prevent the diminution of, the value of the security. Work out activities include, but are not limited to, restructuring or renegotiating the terms of the security interest; requiring payment of additional rent or interest; exercising forbearance; requiring or exercising rights pursuant to an assignment of accounts or other amounts owing to an obligor; requiring or exercising rights pursuant to an escrow agreement pertaining to amounts owing to an obligor; providing specific or general financial or other advice, suggestions, counseling, or guidance; and exercising any right or remedy the holder is entitled to by law or under any warranties, covenants, conditions, representations, or promises from the borrower.

(c) *Foreclosure on an UST or UST system and participation in management activities post-foreclosure—(1) Foreclosure.* Indicia of ownership that are held primarily to protect a security interest include legal or equitable title acquired through or incident to foreclosure or its equivalents. For purposes of this subpart, the term *foreclosure or its equivalents* includes purchase at foreclosure sale; acquisition or assignment of title in lieu of foreclosure; termination of a lease or other repossession; acquisition of a right to title or possession; an agreement in satisfaction of the obligation; or any other formal or informal manner (whether pursuant to law or under warranties, covenants, conditions, representations, or promises from the borrower) by which the holder acquires title to or possession of the secured UST or UST system. The indicia of ownership held after foreclosure continue to be maintained primarily as protection for a security interest provided that the holder undertakes to sell, re-lease an UST or UST system held pursuant to a lease financing transaction (whether by a new lease financing transaction or substitution of the lessee), or otherwise divest itself of the UST or UST system in a reasonably expeditious manner, using whatever commercially reasonable means are relevant or appropriate with respect to the UST or UST system, taking all facts and circumstances into consideration, and provided that the holder did not participate in management (as defined in § 280.210(a)) prior to foreclosure or its equivalents. For purposes of establishing that a holder is seeking to sell, re-lease an UST or UST system held pursuant to a lease financing

transaction (whether by a new lease financing transaction or substitution of the lessee), or divest an UST or UST system in a reasonably expeditious manner, the holder may use whatever commercially reasonable means as are relevant or appropriate with respect to the UST or UST system, or may employ the means specified in § 280.210(c)(2). A holder that outbids, rejects, or fails to act upon a written *bona fide*, firm offer of fair consideration for the UST or UST system, as provided in § 280.210(c)(2), is not considered to hold indicia of ownership primarily to protect a security interest.

(2) *Holding foreclosed property for disposition and liquidation.* A holder, who did not participate in management prior to foreclosure or its equivalents, may sell, re-lease an UST or UST system held pursuant to a lease financing transaction (whether by a new lease financing transaction or substitution of the lessee), liquidate, wind up operations, and take measures to preserve, protect, or prepare the secured UST or UST system prior to sale or other disposition. The holder may conduct these activities without voiding the exemption, subject to the requirements of this subpart.

(i) A holder establishes that the ownership indicia maintained following foreclosure or its equivalents continue to be held primarily to protect a security interest by, within 12 months following foreclosure, listing the UST or UST system or the facility or property on which the UST or UST system is located, with a broker, dealer, or agent who deals with the type of property in question, or by advertising the UST or UST system as being for sale or disposition on at least a monthly basis in either a real estate publication or a trade or other publication suitable for the UST or UST system in question, or a newspaper of general circulation (defined as one with a circulation over 10,000, or one suitable under any applicable federal, state, or local rules of court for publication required by court order or rules of civil procedure) covering the area where the UST or UST system is located. For purposes of this provision, the 12-month period begins to run from the time that the holder acquires marketable title, provided that the holder, after the expiration of any redemption or other waiting period provided by law, was acting diligently to acquire marketable title. If the holder fails to act diligently to acquire marketable title, the 12-month period begins to run on the date of foreclosure or its equivalents.

(ii) A holder that outbids, rejects, or fails to act upon an offer of fair consideration for the UST or UST system or the facility or property on which the UST or UST system is located establishes by such outbidding, rejection, or failure to act, that the ownership indicia in the secured UST or UST system are not held primarily to protect the security interest, unless the holder is required, in order to avoid liability under federal or state law, to make a higher bid, to obtain a higher offer, or to seek or obtain an offer in a different manner.

(A) *Fair consideration,* in the case of a holder maintaining indicia of ownership primarily to protect a senior security interest in the UST or UST system, is the value of the security interest as defined in this section. The value of the security interest is calculated as an amount equal to or in excess of the sum of the outstanding principal (or comparable amount in the case of a lease that constitutes a security interest) owed to the holder immediately preceding the acquisition of full title (or possession in the case of an UST or UST system subject to a lease financing transaction) pursuant to foreclosure or its equivalents, plus any unpaid interest, rent, or penalties (whether arising before or after foreclosure or its equivalents), plus all reasonable and necessary costs, fees, or other charges incurred by the holder incident to work out, foreclosure or its equivalents, retention, preserving, protecting, and preparing the UST or UST system prior to sale, re-lease of an UST or UST system held pursuant to a lease financing transaction (whether by a new lease financing transaction or substitution of the lessee) or other disposition, plus environmental investigation and corrective action costs incurred under §§ 280.51 through 280.67; less any amounts received by the holder in connection with any partial disposition of the property and any amounts paid by the borrower subsequent to the acquisition of full title (or possession in the case of an UST or UST system subject to a lease financing transaction) pursuant to foreclosure or its equivalents. In the case of a holder maintaining indicia of ownership primarily to protect a junior security interest, fair consideration is the value of all outstanding higher priority security interests plus the value of the security interest held by the junior holder, each calculated as set forth in the preceding sentence.

(B) *Outbids, rejects, or fails to act upon an offer of fair consideration* means that the holder outbids, rejects, or fails to act upon within 90 days of receipt of a written, *bona fide*, firm offer of fair consideration for the UST or UST system received at any time after six months following foreclosure or its equivalents. A "written, *bona fide*, firm offer" means a legally enforceable, commercially reasonable, cash offer solely for the foreclosed UST or UST system, including all material terms of the transaction, from a ready, willing, and able purchaser who demonstrates to the holder's satisfaction the ability to perform. For purposes of this provision, the six-month period begins to run from the time that the holder acquires marketable title, provided that the holder, after the expiration of any redemption or other waiting period provided by law, was acting diligently to acquire marketable title. If the holder fails to act diligently to acquire marketable title, the six-month period begins to run on the date of foreclosure or its equivalents.

§ 280.220 Ownership of an underground storage tank or underground storage tank system.

(a) *Ownership of an UST or UST system for purposes of corrective action.* A holder is not an "owner" of a petroleum UST or UST system for purposes of compliance with corrective action requirements under §§ 280.51 through 280.67, provided the person:

(1) Does not participate in the management of the UST or UST system as defined in § 280.210; and

(2) Does not engage in petroleum production, refining, and marketing.

(b) *Ownership of an UST or UST system for purposes of the UST technical standards.* A holder is not an "owner" of a petroleum UST or UST system for purposes of the UST technical standards provided that the holder:

(1) Does not participate in the management of the UST or UST system as defined in § 280.210; and

(2) Does not engage in petroleum production, refining, and marketing.

§ 280.230 Operating an underground storage tank or underground storage tank system.

(a) *Operating an UST or UST system prior to foreclosure.* A holder, prior to foreclosure or its equivalents, is not an "operator" of a petroleum UST or UST system for purposes of compliance with the corrective action requirements of §§ 280.51 through 280.67 and the UST technical standards, provided the holder is not in control of or does not have responsibility for the daily operation of the UST or UST system.

(b) *Operating an UST or UST system after foreclosure.*

(1) A holder who has not participated in management prior to foreclosure and

who acquires a petroleum UST or UST system through foreclosure or its equivalents is not an "operator" of the UST or UST system for purposes of compliance with the corrective action requirements under §§ 230.51 through 280.67, provided that the holder within 15 days following foreclosure or its equivalents, empties all of its USTs and UST systems so that no more than 2.5 centimeters (one inch) of residue, or 0.3 percent by weight of the total capacity of the UST system, remains in the system; leaves vent lines open and functioning; and caps and secures all other lines, pumps, manways, and ancillary equipment.

(2) In addition, the holder must either:

(i) *Permanently close the UST or UST system* in accordance with §§ 280.71 through 280.74, except § 280.72(b); or

(ii) *Temporarily close the UST or UST system* in accordance with the applicable provisions of § 280.70 as follows:

(A) A holder may remain in temporary closure for up to 12 months by:

(*1*) Continuing operation and maintenance of corrosion protection in accordance with § 280.31; and

(*2*) Reporting suspected releases to the implementing agency.

(B) If the UST system is temporarily closed for more than 12 months, the holder must permanently close the UST system if it does not meet either the performance standards in § 280.20 for new UST systems or the upgrading requirements in § 280.21 except that the spill and overfill equipment requirements do not have to be met. A substandard UST system must be permanently closed in accordance with §§ 280.71 through 280.74, except § 280.72(b), unless the implementing agency provides an extension of the 12-month temporary closure period. The holder must complete a site assessment in accordance with § 280.72(a) before such an extension can be applied for.

(3) A holder who acquires a petroleum UST or UST system through foreclosure or its equivalents is not an "operator" of the UST or UST system for purposes of 40 CFR part 280, subparts B, C, and D of the technical standards for the first 15 days following foreclosure or its equivalents, provided the holder complies with § 280.230(b).

§ 280.240 Actions taken to protect human health and the environment under 40 CFR part 280.

A holder is not considered to be an operator of an UST or UST system or to be participating in the management of an UST or UST system solely on the basis of undertaking actions under 40 CFR part 280, subparts B through H, provided that the holder does not otherwise participate in the management or daily operation of the UST or UST system. Such actions include, but are not limited to, release reporting, release response and corrective action, temporary or permanent closure of an UST or UST system, UST upgrading or replacement, and maintenance of corrosion protection. A holder who undertakes these actions must do so in compliance with the applicable requirements in 40 CFR part 280.

§ 280.250 Financial responsibility.

A holder is exempt from the requirement to demonstrate financial responsibility under subpart H—Financial Responsibility, provided the holder:

(a) Does not participate in the management of the UST or UST system as defined in § 280.210;

(b) Does not engage in petroleum production, refining, and marketing as defined in § 280.200(b); and

(c) Complies with the requirements of § 280.230.

PART 281—APPROVAL OF STATE UNDERGROUND STORAGE TANK PROGRAMS

1. The authority citation for part 281 continues to read as follows:

Authority: Sections 2002, 9004, 9005, 9006 of the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act of 1976, as amended (42 U.S.C. 6912, 6991 (c), (d), (e)).

Subpart C—[Amended]

2. Section 281.39 to added to subpart C to read as follows:

§ 281.39 Lender liability.

(a) A state is not required to have a security interest exemption to obtain or maintain RCRA Subtitle I program approval. If a state enacts a security interest exemption provision, it does not have to be as extensive as the security interest exemption provided for in 40 CFR part 280, subpart I, as defined in §§ 280.200 through 280.250, to obtain or maintain RCRA subtitle I program approval. However, a state's security interest exemption cannot be broader in scope or less stringent than the security interest exemption provided for in 40 CFR part 280, subpart I.

(b) A state program will be considered to be no less stringent than, and as broad in scope as, the federal program provided that the state provision:

(1) Mirrors the security interest exemption provided for in 40 CFR part 280, subpart I; or

(2) Achieves the same effect as provided by the following key criteria:

(i) A holder, meaning a person who maintains indicia of ownership primarily to protect a security interest in a petroleum UST or UST system, who does not participate in the management of the UST or UST system as defined under § 280.210 and who does not engage in petroleum production, refining, and marketing as defined under § 280.200(a) is not:

(A) An "owner" of a petroleum UST or UST system for purposes of compliance with 40 CFR part 280 requirements;

(B) An "operator" of a petroleum UST or UST system for purposes of compliance with 40 CFR part 280 requirements *prior to foreclosure or its equivalents,* provided the holder is not in control of or does not have responsibility for the daily operation of the UST or UST system;

(C) An "operator" of a petroleum UST or UST system for purposes of compliance with 40 CFR part 280 corrective action and financial responsibility requirements *after* foreclosure or its equivalents, provided the holder complies with the requirements of § 280.230(b).

Use of Force and Application of Restraints; Final Rule

DEPARTMENT OF JUSTICE

Bureau of Prisons

28 CFR Part 552

RIN 1120–AA13

Use of Force and Application of Restraints

AGENCY: Bureau of Prisons, Justice.

ACTION: Finalization of interim rule.

SUMMARY: In this document, the Bureau of Prisons is finalizing its interim rule on Use of Force and Application of Restraints. These amendments take note of public comment received and include clarification on confrontation avoidance procedures, provisions for the use of soft restraints and ambulatory restraints, updated provisions for the documentation of incidents, provisions on the role of medical staff, and various editorial amendments. In updating procedures to follow in situations which require the use of force or application of restraints, these amendments are intended to provide for the security of the institution and for the well-being of inmates and staff.

EFFECTIVE DATE: June 13, 1994.

ADDRESSES: Office of General Counsel, Bureau of Prisons, HOLC Room 754, 320 First Street, NW., Washington, DC 20534.

FOR FURTHER INFORMATION CONTACT: Roy Nanovic, Office of General Counsel, Bureau of Prisons, phone (202) 514–6655.

SUPPLEMENTARY INFORMATION: The Bureau of Prisons is finalizing its interim rule on Use of Force and Application of Restraints, which was published in the **Federal Register** May 17, 1989 (54 FR 21394). A summary of the public comment and agency response follows.

The Bureau received comment regarding paragraphs (c), (e), (f), (g), and (j) of § 552.21, and on §§ 552.22 and 552.23. With respect to § 552.21(c), the commenter stated that there was a lack of specificity as to which institutional regulations could be enforced by the use of restraints and/or force. The Bureau believes, however, that the general guidelines and statement of purpose in revised § 552.20 (discussed below) and the governing principles contained in newly designated § 552.22 adequately acknowledge the serious nature of conditions which authorize the use of force and/or restraints.

With respect to § 552.21(e), the commenter stated that the lifting and carrying of an inmate in restraints could expose the inmate to both malicious and unintentional physical harm by those prison staff carrying the inmate. The commenter further stated that such lifting might also expose staff to injury, and stated that no prisoners should be dragged nor should inmates be enlisted for the purpose of lifting or carrying a restrained inmate because they have not had appropriate training. The Bureau believes that newly designated § 552.22(h) clearly prohibits the infliction of malicious harm. In addition, appropriate training on the use of force and/or restraints and on the lifting and carrying of an inmate in restraints is provided to Bureau staff. The Bureau believes that this training is sufficient to address the commenter's concerns on minimizing the risk of unintentional physical harm to either inmate or staff. Finally, the Bureau wishes to note that its regulations on the use of force and/or restraints are implemented by staff and not by inmates.

With respect to § 552.21(f), the commenter objected to the absence of any reference to maximum time length allowed on the use of restraints. The commenter further noted that medical staff should be consulted when the inmate "is unable to regain his or her self-control within a normal time" and for determining whether continued use of restraints is necessary. The Bureau believes that adequate provision for medical review and/or continuing care is contained in newly designated § 552.26. As noted below, the Bureau is making further amendment to its provisions for the role of medical staff in use of force and application of restraints incidents.

With respect to § 552.21(g), the commenter questioned the use of restraints on an inmate in administrative detention or disciplinary segregation. The Bureau notes that this paragraph (now designated as § 552.22(g)) states that, except when the immediate use of restraints is required for the control of the inmate, application or continued application of restraints on an inmate in administrative detention or disciplinary segregation requires the approval of Warden or designee. The Bureau wishes to note that such application would not be routine, and it believes that requiring approval at this level is sufficient to ensure that such application does accomplish legitimate penological objectives. As noted below, the Bureau is making further amendments to this section.

With respect to § 552.21(j), the commenter noted a discrepancy in that this paragraph provided that all significant incidents involving use of force and application of restraints require documentation, while § 522.26 stated that all incidents involving use of force or restraints be documented. As noted below, newly designated § 552.22(j) is being amended to remove this unintentional discrepancy.

With respect to § 552.22, the commenter objected to exception being made by the Director for use of confrontation avoidance procedures in specific institutions or housing units. As noted below, this section (now designated as § 552.23) is being revised to remove stated exceptions.

With respect to § 552.23, the commenter stated that with the exception of preventing inmate self-injury, it is never necessary to implement four-point restraints. The commenter noted particular objection to paragraph (e), stating that it allows prison staff to deny the inmate in four-point restraints an opportunity to use the toilet if he or she continued to resist or became violent while being released. The commenter believed that any self-destructive behavior exhibited by an inmate in four-point restraint should be reported to medical staff and that control over the use of four-point restraint by medical personnel is essential. The Bureau believes that this section contains sufficient safeguards. As noted below, however, this section (now designated as § 552.24) is being further amended for editorial purposes. The Bureau believes that the editorial restatement of the introductory text clarifies that four-point restraints are to be used when it is determined that they are the only means available to obtain and maintain control over an inmate. The provisions in paragraph (e) are intended to guarantee that the inmate's access to toilet facilities are controlled by the inmate's behavior. The Bureau believes that newly designated §§ 552.24(f) and 552.26 adequately provide for medical review and responsibility.

After due consideration of the comments received, and based upon the experience gained from application of the previously revised regulations, the Bureau makes the following further amendments. For the sake of clarity, the provisions in former § 552.20 are being revised into two separate sections, and former §§ 552.21 through 552.26 are redesignated as §§ 552.22 through 552.27 in order to accommodate the new section. Paragraph codification and cross references in the revised regulations have been adjusted as necessary. In § 552.20, the introductory text (formerly paragraph (a)) is further amended to include a statement that staff are authorized to use force only as a last alternative after all other

reasonable efforts to resolve a situation have failed. Paragraphs (a) and (b) of this section (formerly paragraphs (a) (1) and (2)) are amended for editorial purposes. In paragraph (d) (formerly paragraph (a)(4)) the word "wounds" is revised to read "injury" to describe more accurately conditions which may lead to authorized use of restraints by staff. Because an injury may be of such a nature that it would not by strict definition be considered a wound, the Bureau believes it reasonable to use the broader word "injury." In new § 552.21 on types of force, section headings were added to paragraphs (c) and (d) for the sake of editorial consistency. In addition, paragraph (c) (formerly § 552.20(d)) is amended to include reference to soft and ambulatory (leg) restraints. The use of soft restraints and ambulatory restraints is intended to allow for graduated procedures in applying restraints.

In newly designated § 552.22, paragraph (a) is amended to remove an obsolete cross reference, and paragraph (g) is amended to include reference to graduated procedures in applying restraints. In paragraph (h), introductory text is amended to include an example of restraint equipment, and paragraph (h)(2) is amended to clarify specific situations to help avoid physical problems of an inmate under restraints. Paragraph (j) is amended to remove any inconsistency with the provisions of newly designated § 522.27.

Newly designated § 552.23 is revised to broaden the use of confrontation avoidance procedures. To this effect, paragraph (b), which contained provisions for exception, is removed.

In newly designated § 552.24, introductory text is amended to further clarify when four-point restraints may be used. In paragraph (a), "vinyl" is substituted for "leather." Additional editorial amendments to this section make no change in the intent of the regulation.

Newly designated § 552.25 is amended for editorial purposes. There is no change in the intent of the regulation.

Newly designated § 552.26 is revised to specify the role of medical staff in calculated use of force situations. Paragraph (a) is also amended to include provisions specifically applicable to pregnant inmates.

Newly designated § 552.27 is reworded, although its intent is unchanged.

The Bureau believes that the changes to the interim rule discussed above do not impose additional restrictions on inmates and are necessary in order to provide for the continued protection of inmates, staff, and property. The Bureau therefore finds good cause for exempting the provisions of the Administrative Procedure Act (5 U.S.C. 553) requiring notice of further proposed rulemaking, the opportunity for public comment, and delay in effective date for these additional changes.

The Bureau of Prisons has determined that this rule is not a significant regulatory action for the purpose of E.O. 12866; this rule was reviewed by the Office of Management and Budget pursuant to E.O. 12866. After review of the law and regulations, the Director, Bureau of Prisons has certified that this rule, for the purpose of the Regulatory Flexibility Act (Pub. L. 96–354), does not have a significant impact on a substantial number of small entities.

List of Subjects in 28 CFR Part 552

Prisoners.

Kathleen M. Hawk,

Director, Bureau of Prisons.

Accordingly, pursuant to the rulemaking authority vested in the Attorney General in 5 U.S.C. 552(a) and delegated to the Director, Bureau of Prisons in 28 CFR 0.96(p), the interim rule amending 28 CFR part 552 which was published at 54 FR 21394 on May 17, 1989, is adopted as a final rule with the following change:

SUBCHAPTER C—INSTITUTIONAL MANAGEMENT

PART 552—CUSTODY

1. The authority citation for 28 CFR part 552 continues to read as follows:

Authority: 5 U.S.C. 301; 18 U.S.C. 3621, 3622, 3624, 4001, 4042, 4081, 4082 (Repealed in part as to offenses committed on or after November 1, 1987), 5006–5024 (Repealed October 12, 1984 as to offenses committed after that date), 5039; 28 U.S.C. 509, 510; 28 CFR 0.95–0.99.

§§ 552.21 through 552.26 [Redesignated as §§ 552.22 through 552.27]

2. Sections 552.21 through 552.26 are redesignated as §§ 552.22 through 552.27.

3. Section 552.20 is revised to read as follows:

§ 552.20 Purpose and scope.

The Bureau of Prisons authorizes staff to use force only as a last alternative after all other reasonable efforts to resolve a situation have failed. When authorized, staff must use only that amount of force necessary to gain control of the inmate, to protect and ensure the safety of inmates, staff, and others, to prevent serious property damage and to ensure institution security and good order. Staff are authorized to apply physical restraints necessary to gain control of an inmate who appears to be dangerous because:

(a) The inmate assaults another individual;

(b) The inmate destroys government property;

(c) The inmate attempts suicide;

(d) The inmate inflicts injury upon self; or

(e) The inmate becomes violent or displays signs of imminent violence.

This rule on application of restraints does not restrict the use of restraints in situations requiring precautionary restraints, particularly in the movement or transfer of inmates (e.g., the use of handcuffs in moving inmates to and from a cell in detention, escorting an inmate to a Special Housing Unit pending investigation, etc.).

4. A new § 552.21 is added to read as follows:

§ 552.21 Types of force.

(a) *Immediate use of force.* Staff may immediately use force and/or apply restraints when the behavior described in § 552.20 constitutes an immediate, serious threat to the inmate, staff, others, property, or to institution security and good order.

(b) *Calculated use of force and/or application of restraints.* This occurs in situations where an inmate is in an area that can be isolated (e.g., a locked cell, a range) and where there is no immediate, direct threat to the inmate or others. When there is time for the calculated use of force or application of restraints, staff must first determine if the situation can be resolved without resorting to force (see § 552.23).

(c) *Use of Force Team Technique.* If use of force is determined to be necessary, and other means of gaining control of an inmate are deemed inappropriate or ineffective, then the Use of Force Team Technique shall be used to control the inmate and to apply soft restraints, to include ambulatory leg restraints. The Use of Force Team Technique ordinarily involves trained staff, clothed in protective gear, who enter the inmate's area in tandem, each with a coordinated responsibility for helping achieve immediate control of the inmate.

(d) *Exceptions.* Any exception to this rule is prohibited, except where the facts and circumstances known to the staff member would warrant a person with correctional experience to reasonably believe other action is necessary (as a last resort) to prevent serious physical injury, or serious property damage which would

immediately endanger the safety of staff, inmates, or others.

5. In newly designated § 552.22, paragraphs (a), (g), (h) introductory text, (h)(2), (h)(4), and (j) are revised to read as follows:

§ 552.22 Principles governing the use of force and application of restraints.

(a) Staff ordinarily shall first attempt to gain the inmate's voluntary cooperation before using force.

* * * * *

(g) Except where the immediate use of restraints is required for control of the inmate, staff may apply restraints to, or continue the use of progressive restraints on, an inmate while in a cell in administrative detention or disciplinary segregation only with approval of the Warden or designee.

(h) Restraint equipment or devices (e.g., handcuffs) may not be used in any of the following ways:

* * * * *

(2) About an inmate's neck or face, or in any manner which restricts blood circulation or obstructs the inmate's airways.

* * * * *

(4) To secure an inmate to a fixed object, such as a cell door or cell grill, except as provided in § 552.24.

* * * * *

(j) All incidents involving the use of force and the application of restraints (as specified in § 552.27) must be carefully documented.

6. Newly designated § 552.23 is revised to read as follows:

§ 552.23 Confrontation avoidance procedures.

Prior to any calculated use of force, the ranking custodial official (ordinarily the Captain or shift Lieutenant), a designated mental health professional, and others shall confer and gather pertinent information about the inmate and the immediate situation. Based on their assessment of that information, they shall identify a staff member(s) to attempt to obtain the inmate's voluntary cooperation and, using the knowledge they have gained about the inmate and the incident, determine if use of force is necessary.

7. In newly designated § 552.24, the introductory text and paragraph (a) are revised, and paragraph (e) is amended by revising the first sentence to read as follows:

§ 552.24 Use of four-point restraints.

When it is determined that four-point restraints are the only means available to obtain and maintain control over an inmate, the following procedures must be followed:

(a) Soft restraints (e.g., vinyl) must be used to restrain an inmate, unless such restraints previously have proven ineffective with respect to that inmate, or proven ineffective during the initial application procedure.

* * * * *

(e) A review of the inmate's placement in four-point restraints shall be made by a Lieutenant every two hours to determine if the use of restraints has had the required calming effect and so that the inmate may be released from these restraints (completely or to lesser restraints) as soon as possible. * * *

8. Newly designated § 552.25 is amended by revising the introductory text and paragraph (a) to read as follows:

§ 552.25 Use of chemical agents or non-lethal weapons.

The Warden may authorize the use of chemical agents or non-lethal weapons only when the situation is such that the inmate:

(a) Is armed and/or barricaded; or

* * * * *

9. Newly designated § 552.26 is revised to read as follows:

§ 552.26 Medical attention in use of force and application of restraints incidents.

(a) In immediate use of force situations, staff shall seek the assistance of mental health or medical staff upon gaining physical control of the inmate. When possible, staff shall seek such assistance at the onset of the violent behavior. In calculated use of force situations, guidance of medical staff (based on a review of the inmate's medical record) will be sought by the use of force team leader to identify physical or mental problems. When mental health or medical staff determine that an inmate requires continuing care, and particularly when the inmate to be restrained is pregnant, the deciding staff shall assume responsibility for care of the inmate, to include possible admission to the institution hospital or, in the case of a pregnant inmate, restraining her in other than a face down four-point position.

(b) After any use of force or forcible application of restraints, the inmate shall be examined by a member of the medical staff, and any injuries noted, immediately treated.

10. Newly designated § 552.27 is revised to read as follows:

§ 552.27 Documentation of use of force and application of restraints incidents.

Staff shall appropriately document all incidents involving the use of force, chemical agents, or non-lethal weapons. Staff shall also document, in writing, the use of restraints on an inmate who becomes violent or displays signs of imminent violence. A copy of the report shall be placed in the inmate's central file.

24 CFR Part 968

[Docket No. R–94–1659; FR–3398–F–02]

RIN 2577–AB26

Vacancy Reduction Program

AGENCY: Office of the Assistant Secretary for Public and Indian Housing, HUD.

ACTION: Final rule

SUMMARY: The Department is issuing regulations to implement the Vacancy Reduction Program. The Notice of Funding Availability (NOFA) for the program is published elsewhere in today's **Federal Register**. Under this program, certain Public Housing Agencies (PHAs) are required to develop and submit a plan regarding vacancies in units owned or operated by the PHA. Each plan will be required to include the elements specified in the statute and this rule. In addition, assessment teams have conducted on-site assessments of the vacancy situations of known eligible PHAs and may provide assistance to PHAs in developing their plans. The assistance available under this program is intended to supplement other initiatives of the PHA that will reduce the rate of addressable vacancies in a PHA's inventory.

EFFECTIVE DATE: July 13, 1994.

FOR FURTHER INFORMATION CONTACT: MaryAnn Russ, Director, Office of Assisted Housing, Public and Indian Housing, room 4204, U.S. Department of Housing and Urban Development, 451 Seventh Street SW., Washington DC 20410, telephone (202) 708–1380. Individuals with hearing or speech impairments may call HUD's TDD number: (202) 708–0850. (These telephone numbers are not toll-free.)

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Statement

The information collection requirements contained in this final rule have been approved by the Office of Management and Budget, under section 3504(h) of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501–3520), and assigned OMB control number 2577–0181.

Background

On May 21, 1993, the Department published a proposed rule to implement the Vacancy Reduction Program (program). The program was authorized when section 510 of the Cranston-Gonzales National Affordable Housing Act added a new section 14(p) to the United States Housing Act of 1937 (42 U.S.C. 14371) (1937 Act). Recently section 14(p) was amended by section 115 of the Housing and Community Development Act of 1992 (Pub. L. 102–550, approved October 28, 1992) (1992 Act), and funding was made available for the first time for the program.

Section 14(p) requires any public housing agency (PHA) to participate in the program if the PHA has a vacancy rate that exceeds twice the national average, is designated as troubled under section 6(j) of the 1937 Act, or has been placed under a receiver pursuant to section 6(j)(3) of the 1937 Act. Each PHA participating in the program will be required to develop a vacancy reduction plan that identifies vacant dwelling units in its inventory and the reasons for the vacancies, and describes actions to be taken by the PHA for the following five years to eliminate the vacancies.

In addition, the vacancy situations of every participating PHA will be reviewed on-site by assessment teams consisting of representatives of the Department, independent experts knowledgeable about vacancy problems and management issues relating to public housing, and PHA officials. The assessment teams will submit recommendations to HUD and the PHA, and, at the request of the PHA, may assist the PHA in preparing its vacancy reduction plan.

The plans will be the basis for selecting those PHAs that will receive assistance under the program. For troubled PHAs, funding of vacancy reduction activities will be contingent upon the PHA either making or providing reasonable assurances of substantial progress in remedying any management deficiencies.

Use of Survey to Determine FY 1993 NOFA Threshold Factors

As discussed in the proposed rule, all PHAs where existing data indicated the PHA met the statutory criteria for mandatory participation in the program were surveyed. The results of the survey have been used to define the threshold factors for the NOFA published elsewhere in today's **Federal Register** and are discussed in greater detail in that NOFA. In addition, the Department has conducted assessments at PHAs that the Department believes meet the threshold factors for the NOFA that is published elsewhere in today's **Federal Register**. As explained in the NOFA, any PHA that meets the threshold factors and has not already been assessed should immediately request an assessment by contacting the Department.

Comments on Proposed Rule

Six sets of comments were submitted to the Department on the proposed rule: two from public housing authority (PHA) industry groups and four from local housing authorities. Comments were received from the:

—Council of Large Public Housing Authorities (CLPHA);
—Public Housing Authorities Directors Association (PHADA);
—Chicago Housing Authority (CHA);
—Morgan County (Illinois) Housing Authority (MCHA);
—Los Angeles County Housing Authority (LACHA); and
—Atlanta (Georgia) Housing Authority (AHA).

Discussion of the comments is organized according to the following topics: Eligibility requirements; development of the vacancy reduction plan; assessments; funding of vacancy reduction activities; sanctions; use of NOFAs to convey significant program information; the relationship of the Vacancy Reduction Program to other HUD programs; and miscellaneous comments.

Eligibility Requirements

(1) The rule states that a PHA must participate in the program if a receiver has been appointed for the PHA. The term "receiver" should be clarified, in that HUD has taken actions against PHAs that have resulted in takeovers of programs or operations from PHAs without necessarily having a court-appointed receiver. (CLPHA)

Response: The term is statutory and refers to a receiver appointed by a Federal or State court under section 6(j)(3) of the United States Housing Act of 1937; the term does not include other arrangements.

(2) Benefits of the program should be available to a PHA that does not have a vacancy rate of twice the national average only if the PHA fails the Public Housing Management Assessment Program (PHMAP) standard for vacancies (see 24 CFR part 901). (PHADA) Similarly, program participation should be optional for troubled authorities that do not have a vacancy rate twice the national average (CHA)

Response: As the commenter noted, using the PHMAP standard would require congressional action because the current statute requires participation by PHAs that are troubled or for which receivers have been appointed.

(3) In defining the term "vacant unit", reference is made to an effective lease, which is defined in terms of an eligible family being charged rent. However, because of utility allowances or zero income, many residents do not pay rent for the units they occupy. (CLPHA)

Response: The definition requires that the family have a right to possession of the unit, in addition to being charged rent. The calculation of the rent to be charged by a PHA takes into account income and any utility allowance. As noted by the commenter, as a result of this calculation of rent, the PHA might not actually collect any money from the family having the right to possess a unit (e.g., when the utility allowance equals or exceeds the total tenant payment). However, the lease still obligates the tenant and includes a rental charge that, at least in part, is based on income. Therefore, the elements of the definition are met, even though the actual amount collected by the PHA from the tenant is $0.

(4) A PHA is required to participate in the program if it has a vacancy rate that is twice the national average, regardless of the number of units in the PHA's inventory. Because the vacancy problems of small PHAs, especially, may be due to lack of demand, participation in the program should be optional for PHAs with less than 250 units. (PHADA) For the first year, program participation should be limited to PHAs with 500 or more units. (CHA)

Response: The statute does not discriminate among the causes of vacancies in establishing the participation requirements. However, the extent of participation may be limited to providing documentation of lack of demand or proposals to deprogram units. In awarding funding, the Department will concentrate on PHAs where there is a demand for housing, as reflected in the terms of the NOFA published elsewhere in today's **Federal Register**. Furthermore, because smaller PHAs dependent on CIAP funding often have fewer resources to solve a vacancy problem, these PHAs could realize substantial improvement of their vacancy statistics with a minimal increment of funding. Thus, their selection for funding would serve the statutory purposes of the program, and their exclusion from the initial round of funding could not be justified.

(5) Program participation should be available to any PHA that needs help in addressing its vacancy situation. (MCHA, CHA)

Response: Because current program funding is limited, the Department is concentrating on PHAs that are required to participate.

(6) In the definition of "vacant unit," the proposed rule does not specify a timeframe for determining the existence of a vacancy. Similarly, in calculating a PHA's vacancy rate for purposes of determining program eligibility, the proposed rule does not recognize any normal turnover time, such as the 20-day transition period allowed under PHMAP Indicator 5. (LACHA)

Response: The Department recognizes that the vacancy rate of a PHA is fluid. However, for the purpose of determining eligibility for the program, the Department has decided to use a snapshot approach, i.e., the number of units vacant at the PHA on the appropriate date.

Development of the Vacancy Reduction Plan

(1) The proposed rule provides a number of examples of project-specific activities to eliminate vacancies that a PHA might include in its vacancy reduction plan. The number of examples should be expanded to include such activities as unit redesign or conversion, site reconfiguration, security improvements, and density reductions. These additional examples will serve to give a better idea of the range of acceptable activities. (CLPHA, CHA) Similarly, examples of specific management improvements that should be encouraged include tenant screening, evictions, and marketing and leasing efforts. (CHA)

Response: A number of these examples have been included in § 968.407(b)(3)(i) of the final rule.

(2) If demolition or disposition are selected activities, HUD's review and approval process and replacement housing requirements will make it very difficult for a PHA to provide the required schedule that forecasts when the selected activities would be accomplished. (CLPHA, PHADA (similar comment for other HUD actions)) In addition, participating PHAs need to be able to change their schedules for eliminating vacancies to reflect actual funding. (PHADA)

Response: Sections 968.407(b)(3)(ii) and 968.407(b)(8) have been revised to include language providing that, in developing the required schedule, PHAs should specify action within *x* days from HUD approval or other action, when progress is dependent on HUD action. In addition, a schedule may be revised to reflect the adequacy of funding for proposed activities.

(3) If a PHA needs help in preparing the vacancy reduction plan, the assessment team should be required to assist in the plan development, if requested by the PHA. The proposed rule does not make this assistance mandatory. (PHADA)

Response: Section 968.410(d) has been changed to clarify that, if requested by the PHA, HUD will assist a PHA in preparing its vacancy reduction plan.

(4) The final rule should clarify that participating PHAs do not have to address each single vacant unit separately, but should be permitted to group together vacant units by the cause of vacancy. (PHADA)

Response: In accordance with the statutory requirements, each vacant dwelling unit must be identified. However, vacant units may be grouped together for purposes of explaining the reasons for the vacancies and proposed actions for eliminating the vacancies.

(5) The vacancy reduction plan should include information on turnover problems. (PHADA, AHA) The information should include the number of units vacated and reoccupied during a defined period and any indication of whether the turnover rate is changing. (CHA)

Response: A new paragraph has been added to § 968.407(b) to require that a vacancy reduction plan include certain information on a PHA's turnover rate.

(6) A complete strategy needs to be developed that includes not just rehabilitation work, but tenant screening, eviction, property management, and security measures, as well. (CHA)

Response: The Department and the statute contemplate a complete strategy. A PHA's vacancy reduction plan should include any action to remove the unit from the PHA's inventory of vacant units, including management improvements in each of the specific areas mentioned by the commenter.

Assessments

(1) If funding will be on a "first-come, first served" basis, the sequence of assessment team visits should be by public drawing in order to avoid charges of favoritism. (PHADA)

Response: For the NOFA published today, the Department has decided upon an approach that should provide some funding to all PHAs that meet the eligibility criteria. Each eligible PHA that is a Comprehensive Improvement Assistance Program (CIAP) agency will be funded fully for all eligible units and approved activities, because smaller PHAs dependent on CIAP funding often have fewer resources to solve a vacancy problem. If sufficient funds are available, each PHA that is a Comprehensive Grant Program (CGP) agency will be funded fully; however, if there are not sufficient funds remaining, each CGP agency will be awarded a pro

rata share of the available funding. This pro rata share will be calculated by a method, to be determined by HUD and announced in the NOFA, that will provide funding equitably to those agencies.

(2) When the PHA already is required under PHMAP to have developed a plan to address its vacancy problem, the primary purpose of the Vacancy Reduction Program assessment team should be a validation or critique of the PHA's existing plan, rather than an independent assessment. The intent of the program is to encourage action, not further studies. (PHADA)

Response: The statute requires an on-site assessment of the vacancy situation of each participating PHA, and specifies what is to be included in the PHA's vacancy reduction plan. To the extent that a PHA is able, the Department encourages the PHA to use work that has been done in accordance with PHMAP requirements to comply with the requirements of this program.

(3) PHAs that lend a staff person to an assessment team should be reimbursed for the staff person's salary and benefits during that assignment. (PHADA)

Response: The Department agrees that the statutory provision allowing program funds to be used for travel and administrative expenses of assessment teams, extends to PHA staff. Therefore, PHAs will be reimbursed for the salary and benefits for any staff person that serves on an assessment team. However, this does not apply to staff members of the PHA that is being assessed.

(4) Because the need for these funds is great, the Department should speed up the scheduling of assessments. (MCHA, PHADA)

Response: The Department has assessed all known eligible PHAs.

Funding of Vacancy Reduction Activities

(1) HUD needs to clarify its position regarding the use of program funds for security improvements. (CLPHA)

Response: Where units are vacant because of security problems, HUD will provide funding for physical security improvements, such as improved locks, security screens, additional lighting, and site improvement. As part of management improvements, HUD also will provide funding for security activities over a limited duration, if HUD determines that such funding is likely to result in the reoccupancy and continued occupancy of vacant units. Examples of security activities that could be funded as part of management improvements include:

- Hiring of additional staff to coordinate the provision, by local government or other public and private entities, of appropriate social services, such as drug education and treatment referral programs;
- Hiring of security guards, through individual employment contracts, or guard services, using competitive proposal or small purchase procurement procedures, or contracting with a local police force for security that is in addition to that required under the Cooperation Agreement. As a condition of employment, these security personnel shall be required to meet all relevant State insurance, training, licensing, and other similar requirements;
- Development and implementation of improved screening procedures for prospective residents;
- Development of more timely and effective management techniques for dealing with disruptive residents and drug-related crime;
- Organization and training of unarmed voluntary resident patrols to work cooperatively with the local law enforcement agencies;
- Development and implementation of improved communication and coordination with local law enforcement agencies; and
- Hiring of investigators to investigate drug-related crime in and around the developments or to provide evidence relating to any such crime in any administrative or judicial proceedings.

(2) The minimum housing standards that should be imposed for capital improvements funded under this program are the modernization standards, not the Housing Quality Standards (HQS). Units renovated to the HQS often still need modernization. (CLPHA) In addition, the minimum housing standards should be applied only to the inside of units improved under the program, rather than to common areas and major structural items. (CHA)

Response: Each work item funded under this program must be performed in compliance with modernization standards. However, the vacancy reduction program is an occupancy program, and HQS is a minimum occupancy standard. The goal of the individual work items (performed to modernization standards) is to bring the vacant units into an occupiable condition. Section 968.435 of this rule requires certification that affected vacant units will be brought into compliance with the HQS. As applied in Section I.F(1)(b) of today's NOFA, only aspects of the HQS that pertain to the vacant unit directly are required.

(3) The decision on how to target the initial funding available under this program should be based on the survey responses only and not on any existing data mentioned in the preamble of the proposed rule. (PHADA)

Response: The survey responses were used to determine which PHAs surveyed have vacancy problems and the nature of their problems. Eligibility and final decisions on funding will be based on submitted applications, including the vacancy reduction plans, the number of eligible units, and the assessments.

(4) Funding should not be on a "first-come, first-served" basis, which rewards those able to act the quickest, but should be awarded using a more traditional competitive approach. Criteria that should be used to make awards include: PHA capacity and ability to use the funds effectively and likelihood that additional funds will improve vacancy situation. Severely distressed properties should not be a priority, and funding should be targeted for entire developments, rather than scattered units. (PHADA)

Response: Because the Department would like to fund all PHAs that meet the requirements of the NOFA, it has decided not to include the first-come, first-served limitation. The immediate goal of the Department is to promote the occupancy of the greatest number of units; the problems of severely distressed developments are targeted more directly through other programs and are not priorities of the vacancy reduction program. Similarly, because of funding limitations, the Department believes the program purposes will be promoted best by targeting the elimination of vacant units, rather than the upgrading of entire developments that include occupied units.

(5) Under some circumstances, a PHA may be made eligible for program funds, but restricted in spending the funds until an assessment is performed. If this assessment is not done within 45 days of the fund award, then the PHA should be allowed to expend the funds. (PHADA, CHA)

Response: The Department has already conducted assessments of known eligible PHAs and will complete all assessments in advance of funding decisions. In order to ensure fairness, in the NOFA published elsewhere in today's **Federal Register**, the Department has provided that a PHA for which an assessment has not been conducted but that considers itself eligible under the NOFA, should notify the Department within 15 days of its request for an immediate assessment. In addition, when an approvable plan submitted in response to the NOFA needs improvement or supplementation, the Department will assist the PHA in

revising its plan prior to the execution of the amendment to the Annual Contributions Contract (ACC). Because very few, if any, eligible PHAs will not have had assessments by today's publication of the NOFA, the Department believes that all assessments will be completed on a timely basis in this funding cycle.

(6) Activities that will decrease unit turnover in occupied units (e.g., replacement of appliances) also should be considered eligible for funding under this program. (CHA)

Response: Although the Department recognizes the relationship between turnover and vacancy rates and is sympathetic to this reasonable suggestion, current funding for the vacancy reduction program is limited. Therefore, the Department intends to target funding of unit improvements for currently vacant units or units to become vacant for reconfiguration purposes, where reconfiguration is necessary to reduce the current number of vacancies.

(7) Funding should be guaranteed for a minimum of a three-year period following HUD approval of a five-year vacancy reduction plan, subject to the PHA's continued progress on and adherence to its vacancy reduction plan. (CHA, MCHA)

Response: The Department cannot guarantee funds that have not been appropriated by Congress. Therefore, a PHA's five-year plan should reflect a realistic projection of the actions that can be taken with available or potential resources.

(8) If funded activities require compliance with Housing Quality Standards, the amount of funds may not be sufficient to address problems in areas outside the unit (e.g., hallways, stairways, fire protection systems). HQS standards should apply only to unit interiors. (CHA)

Response: The Department recognizes that current funding available under the Vacancy Reduction Program will not be sufficient to address all problems areas relating to excess vacancies, and it expects to be guided in its funding decisions by the assessment team reports. The vacancy reduction plans and the recommendations of the assessment teams should include all work inside the units, in the hallways, in common areas, on the site, and to the exterior of the buildings necessary to make the units marketable; providing plans and funding for only the interiors of vacant units may not make those units marketable. Individual work items funded under this program must comply with modernization standards and must result in the targeted unit meeting the HQS.

(9) Program funds should not be directed at PHAs that have vacancy problems due primarily to marketing problems or lack of demand. (CHA)

Response: The Department agrees that the limited program funds should be focused on those PHAs whose vacancy situations can actually be improved by additional funding. This factor is accounted for in § 968.413(d)(2) of the rule ("extent to which the proposed activities will improve the PHA's vacancy problem") and in the definition of "eligible unit" set out in the NOFA published elsewhere in today's **Federal Register**.

Sanctions

In the proposed rule, the Department reported that, at this time, it does not intend to implement section 14(p)(3) of the statute, which provides sanctions for the failure to make progress under a plan. However, commenters were invited to submit suggestions on how this portion of the statute could be implemented in the future. Several commenters submitted remarks on this aspect of the current statutory program, as follows: (1) If a withholding action seems likely after 18 months, an assessment team should be sent to the PHA to perform a review and prepare a report. (PHADA) (2) If there is withholding, consideration should be given to forcing a receiver to be used so that the funds can be used. (PHADA, CHA) (3) Withholding of subsidy because of a failure to make progress is contrary to the approach of rewarding PHAs for solving problems. (MCHA)

Response: This final rule does not include provisions implementing the sanctions mandated by section 14(p)(3) of the 1937 Act. However, the Department is continuing to work on those provisions, and will take into consideration the remarks provided by commenters in response to the proposed rule. The Department will comply with the requirements within the applicable statutory timeframe.

Use of NOFAs

(1) HUD is proposing to use NOFAs as the vehicle to convey significant program information to interested PHAs, which defeats the intent of notice-and-comment rulemaking. The proposed rule does not provide sufficient detail on how program funds will be targeted, the format of the vacancy reduction plans, and criteria for determining a PHA's capacity to implement the plan in a timely and effective manner. Use of NOFAs will lead PHAs to try to second-guess HUD on selection criteria and lead to a hit or miss approach on solving the vacancy problem. (CLPHA)

Response: The Department disagrees with this comment. The rule provides the framework for the program and meets or exceeds the requirements of the Administrative Procedure Act and the Department's regulations. The preamble to the proposed rule elaborates on the Department's expectations for targeting funds made available for the program.

The Department views the program as a dynamic tool in the effort to reduce unnecessary vacancies in public housing. Experience with the program and elimination of certain root causes of vacancies will guide the Department in selecting the optimal criteria for any subsequent targeting of program funds. This targeting would be done in compliance with the statutory parameters of the program.

The Department intends to undertake the vacancy reduction effort by providing funding for those vacant units most likely to be turned around quickly, targeting the majority of the funding for units averaging a cost of $8,000 or less, with some funds targeted for units for which a CGP agency can provide the additional funding necessary.

Furthermore, the report of the assessment team is expected to address the capacity of a PHA to implement vacancy reduction activities in a timely and efficient manner. The Department reiterates that the intent of the requirement that participating PHAs submit vacancy reduction plans is to assist in the development of a comprehensive approach to vacancy reduction. As demonstrated by its efforts to solicit the input of industry and PHA representatives during the development of the proposed rule and the initial NOFA, the Department is committed to implementing this program in a constructive way that responds to the needs of PHAs with remediable vacancy problems.

(2) Before the NOFA is published, there should be a meeting with industry groups. The meeting should be used to share survey results and exchange viewpoints. (PHADA)

Response: The Department solicited the input of representatives of the industry, PHAs, and resident organizations during the development of the proposed rule and the initial NOFA. Meetings were held with these representatives on January 28 and July 9, 1993. The Department believes these meetings have been valuable in helping to develop the program, but does not believe that it is necessary to schedule any additional meetings at this time.

The discussions at the previous meetings, along with the written comments received in response to the proposed rule, have provided the Department with a foundation for the policy decisions it has made regarding how to operate this program within the parameters established by Congress. Furthermore, in the NOFA published elsewhere in today's **Federal Register**, the Department discusses the results of the survey, in the context of both general results and specific implications for the program decisionmaking process.

(3) The proposed rule seems to imply that more than one NOFA might be published in a single fiscal year. Only one NOFA should be issued and it should coincide with the Comprehensive Grant Program planning process. (PHADA, CHA)

Response: The language that referred to "periodic" NOFAs in the proposed rule was intended simply to verify that separate NOFAs would be published for any money that is appropriated for the program in subsequent years. This is the common practice of the Department, as established in the HUD Reform Act, but the actual timing of a subsequent NOFA in any fiscal year cannot be predicted. The Department appreciates the commenters' point about the coordination of capital planning programs.

Relationship of the Vacancy Reduction Program to Other HUD Programs

(1) HUD should integrate the approach of the Vacancy Reduction Program into an overall effort to draft a new vacancy rule. The Vacancy Reduction Program itself is insufficient to address problems faced by PHAs with expired Comprehensive Occupancy Plans (COPs); these PHAs still need operating funds to keep vacant units in shape until money is available to make necessary improvements. (CLPHA)

Response: Any new vacancy rule would require substantial time for development and implementation. Meanwhile, the Department is committed to providing assistance currently available under the vacancy reduction program to PHAs with vacancy problems. Changes to the determination of operating subsidy eligibility as proposed by the commentor are outside the scope of this rule.

(2) The Vacancy Reduction Program may duplicate planning requirements of other programs, such as PHMAP and the Comprehensive Grant Program, that also address vacancy problems. (PHADA, CHA)

Response: As noted above, the Department appreciates the commenters' point about the coordination of capital planning programs and will endeavor to integrate the vacancy reduction program with other related programs.

(3) The same format used for the vacancy reduction plan should be used for developing an Improvement Plan under PHMAP if the PHA fails the PHMAP vacancy standard. (PHADA)

Response: The Department intends to coordinate the formats of these plans, to the extent possible.

(4) The restrictions placed on assistance to troubled authorities (see § 968.413(b)) should be made consistent with the language of HOPE VI. (PHADA)

Response: The restrictions are prescribed by the authorizing statute for the program. However, in recognition of the comments requesting coordination of the Department's capital planning programs, the final rule includes new language that cross-references PHMAP indicators and clarifies the evaluation of the progress of troubled PHAs.

(5) If a PHA presents a vacancy reduction plan that HUD approves, the PHA should receive operating subsidy based on its actual occupancy rate, rather than on the current formula rate. (CHA, AHA) How does the Department view this program in the context of the Performance Funding System (PFS) funding of vacant units? (PHADA)

Response: The vacancy reduction program is not intended as a substitute for the vacancy rule or to provide relief for PHAs that do not meet established goals under COPs. However, the vacancy reduction program should improve the revenue situations of participating PHAs in two ways: First, through direct funding of portions of the plans; second, through the increased operating subsidies and rent collections that will result from reoccupancy of those vacant units.

Miscellaneous

(1) The survey results and data developed from analyzing the vacancy reduction plans should be released publicly. (PHADA)

Response: The Department is releasing data from the survey as part of the NOFA published elsewhere in today's **Federal Register**. In addition, the Department intends to develop a report based on data and information provided by the assessment teams in their reports.

(2) The Vacancy Reduction Program should be separately funded, instead of using amounts set aside from regular modernization funding. (PHADA, CHA)

Response: As recognized by the commenters, Congress has authority over the mechanism used for funding the program.

(3) Funding decisions under the program should recognize when a PHA has used existing resources to address its vacancy problem. For example, although a commitment to use a large portion of CGP funds to address vacancies will reduce the need for additional vacancy reduction funds, those CGP funds could have been used to fund other substantial needs of the PHA. (AHA)

Response: When PHAs have other modernization needs that cannot be met by current funding, Vacancy Reduction Program funds may be used instead of CGP funding committed but not yet under contract for vacancy reduction

Section-by-Section Analysis

The Department is establishing the Vacancy Reduction Program as new subpart D in 24 CFR part 968, with conforming amendments made as necessary in other sections of title 24 of the Code of Federal Regulations. The following discussion is a section-by-section description of the rule.

Section 968.103 addresses the allocation of funds under section 14 of the 1937 Act. The Department is amending paragraph (c) to account for the new set-aside for the Vacancy Reduction Program. The new language repeats the statutory scheme for setting aside four percent of the section 14 funds remaining after deducting amounts for emergencies and natural and other disasters. Paragraph (c)(1) provides that 20 percent of these funds will be available for activities under section 6(j) of the 1937 Act, while the remaining 80 percent will be available for the Vacancy Reduction Program, as implemented by this rule. Section 968.103 also is amended to clarify that the Vacancy Reduction Program does not apply to Indian Housing Authorities (IHAs).

Subpart D of part 968, encompassing §§ 968.401–968.425, is added to implement the Vacancy Reduction Program.

Section 968.401 states the policy of the Department with respect to achieving high occupancy rates in public housing, in order to ensure maximum use of available housing resources.

Section 968.403 repeats the statutory definition of PHAs to which the Vacancy Reduction Program is applicable, but clarifies that units not eligible for funding under section 14 of the 1937 Act are excluded from this set-aside program, as well.

Section 968.405 defines terms that are used in subpart D to the extent these

terms are not applicable to the remainder of part 968.

Section 968.407 establishes the requirement that eligible PHAs submit a five-year vacancy reduction plan, and specifies the contents of the plan. For purposes of identifying components of a plan that may be identified as eligible for funding, within the limits of appropriated amounts, each submitted plan must be organized in a manner that facilitates review by the Department. For each action proposed to eliminate vacancies, the plan must include a schedule that shows the number of vacancies that the PHA expects to eliminate by the end of each 12-month period during the five years of the plan.

When components of a plan involve capital improvements to dwelling units, the PHA must ensure that, after the improvements, the units themselves would meet or exceed the Housing Quality Standards set forth in 24 CFR 882.109, as amended by regulatory requirements concerning lead-based paint hazards.

Section 968.410 explains the requirement for an on-site assessment of a participating PHA's vacancy situation, including the composition and responsibilities of the assessment teams and the purpose of the assessments.

Section 968.413 establishes eligible uses and limitations on the use of funds available for the Vacancy Reduction Program. Paragraphs (a), (b), and (c) echo the statute establishing the program, but paragraph (b) includes clarifying language that cross-references PHMAP indicators in measuring the progress required under the statute for troubled PHAs. Paragraph (d) establishes that funding decisions would be through a publicly announced process, on the basis of priorities to be established by the Department.

Section 968.416 provides that the PHA must comply with HUD requirements in requesting funds against the approved modernization budget.

Section 968.419 requires the grantee to be responsible for assuring the quality of work performed using program funds.

Section 968.422 establishes periodic reporting requirements for grantees until activities funded under the vacancy reduction program are completed. This section also specifies a schedule for completion of funded activities.

Section 968.425 details the process for notifying a PHA of any deficiencies in its compliance with program requirements and specifies the nature of the changes and sanctions that may be pursued by HUD.

Section 968.428 establishes requirements to be applied in auditing the grantee's use of funds upon completion of activities funded under the program.

Section 968.435 lists program requirements that apply to the Vacancy Reduction Program in addition to the requirements specified in other sections of subpart D and § 968.110.

Other Matters

Environmental Review

At the time of publication of the proposed rule, a finding of no significant impact with respect to the environment was made in accordance with HUD regulations in 24 CFR part 50 that implement section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332). The proposed rule is adopted by this final rule without significant change. Accordingly, the initial finding of no significant impact remains applicable, and is available for public inspection between 7:30 a.m. and 5:30 p.m. weekdays in the office of the Rules Docket Clerk at the above address.

Executive Order 12866

This rule has been reviewed by the Office of Management and Budget under Executive Order 12866. Any changes made in the rule as a result of this review are identified in the docket file of the rule maintained by the Department and available for review at the above address.

Regulatory Flexibility Act

The Secretary, in accordance with the Regulatory Flexibility Act (5 U.S.C. 605(b)), has reviewed this rule before publication and by approving it certifies that this rule does not have a significant economic impact on a substantial number of small entities. The rule implements a statutory program that provides funding to PHAs for limited activities designed to reduce the number of vacant dwelling units in their inventories.

Executive Order 12612, Federalism

The General Counsel, as the Designated Official under section 6(a) of Executive Order 12612, Federalism, has determined that the policies contained in this rule do not have substantial direct effects on States or their political subdivisions, or the relationship between the Federal Government and the States, or on the distribution of power and responsibilities among the various levels of government. As a result, the rule is not subject to review under the Order. The rule merely implements a statutory program that provides funding to PHAs for limited activities designed to reduce the number of vacant dwelling units in their inventories.

Executive Order 12606, the Family

The General Counsel, as the Designated Official under Executive Order 12606, The Family, has determined that this rule does not have potential for significant impact on family formation, maintenance, and general well-being, and, thus, is not subject to review under the Order. No significant change in existing HUD policies or programs result from promulgation of this rule, as those policies and programs relate to family concerns.

Regulatory Agenda

This rule was listed as Item 1688 in the Department's Semiannual Agenda of Regulations published on April 25, 1994 (59 FR 20424, 20470), in accordance with Executive Order 12866 and the Regulatory Flexibility Act.

List of Subjects in 24 CFR Part 968

Grant programs—housing and community development, Indians, Loan programs—housing and community development, Public housing, Reporting and recordkeeping requirements.

For the reasons set out in the preamble, part 968 of title 24 of the Code of Federal Regulations is amended as follows.

PART 968—PUBLIC HOUSING MODERNIZATION

1. The authority citation for part 968 continues to read as follows:

Authority: 42 U.S.C. 1437d, 1437l and 3535(d).

2. Section 968.103 is amended by revising paragraph (c) to read as follows:

§ 968.103 Allocation of funds under section 14.

* * * * *

(c) *Set-asides.* After deducting amounts for the reserve for natural and other disasters and for emergencies under paragraph (b) of this section, HUD shall set aside from the funds remaining:

(1) *Regarding vacancy reduction,* an amount equal to 4 percent of those funds, to be further allocated as follows:

(i) Twenty percent of this four percent shall be available only for carrying out activities under section (6)(j) of the United States Housing Act of 1937; and

(ii) Eighty percent of this four percent shall be available under the vacancy reduction program (see subpart D of 24 CFR part 968).

(2) *Regarding the comprehensive grant program,* no more than five

percent for the purpose of providing credits to PHAs that were formerly designated as mod troubled agencies under the Public Housing Management Assessment Program (PHMAP) (see 24 CFR part 901). The purpose of this set-aside is to compensate these PHAs for amounts not allocated by HUD because of a PHA's prior designation as a mod troubled agency.

(3) *Nonapplicability to IHAs.* The Vacancy Reduction Program in subpart D of this part does not apply to IHAs. In addition, because the PHMAP performance indicators under 24 CFR part 901 do not apply to IHAs, these agencies cannot be deemed "mod troubled" for purposes of the CGP and are not eligible for funding under paragraph (c)(1)(i) of this section. Hence, IHAs are not subject to any reduction in funding under section 14(k)(5)(A) of the Act, and IHAs do not participate in the set-aside credits established under paragraph (c)(2) of this section.

* * * * *

3. A new subpart D, consisting of §§ 968.401 through 968.425, is added to read as follows:

Subpart D—Vacancy Reduction Program

Sec.

968.401 Purpose.
968.403 Applicability.
968.405 Definitions.
968.407 Vacancy reduction plan.
968.410 Assessments.
968.413 Funding.
968.416 Fund requisitions.
968.419 Grantee's oversight responsibilities.
968.422 Progress reports and completion schedule.
968.425 HUD review of grantee performance.
968.428 Program closeout.
968.425 Other program requirements.

§ 968.401 Purpose.

Section 14(p) of the United States Housing Act of 1937 establishes the Vacancy Reduction Program, in conjunction with statutory provisions on public and Indian housing modernization. It is the policy of the Department that public housing agencies should maximize the use of housing resources, using every reasonable means to achieve and maintain high levels of occupancy by eligible families in PHA-owned or -operated housing.

§ 968.403 Applicability.

(a) *Participation.* A PHA shall participate in the vacancy reduction program under this subpart if:

(1) The PHA has a vacancy rate among dwelling units owned or operated by the PHA that exceeds twice the average vacancy rate among all public housing agencies;

(2) The PHA is designated as a troubled or mod troubled agency under section 6(j) of the Act; or

(3) A receiver has been appointed for the PHA pursuant to section 6(j)(3) of the Act.

(b) *Exclusions.* Units owned or operated by a PHA that are not eligible for funding under section 14 of the Act are excluded from coverage under this subpart and shall not be used to calculate the eligibility of a PHA under this subpart.

(c) *Examples of eligibility.* The following are specific examples of eligibility under this program:

(1) All units in the Federal Low-Rent Public Housing Program are eligible;

(2) In the Section 23 program, only those units that are in projects that are bond-financed and for which the PHA would receive clear title at the end of the lease term will be eligible; and

(3) Section 8 projects are not eligible.

§ 968.405 Definitions.

In addition to the definitions applicable under § 968.105, the following definitions apply to this subpart:

Average vacancy rate means the average vacancy rate for all public housing agencies.

NOFA means Notice of Funding Availability. NOFAs announcing available funding under the program will be published in the **Federal Register**, and will set out the application requirements and applicable selection criteria.

Operating subsidy means the annual contribution for operating subsidy made to the PHA by HUD, which is determined in accordance with part 990 of this chapter.

PHA means public housing agency. For purposes of this subpart, the term excludes Indian Housing Authorities.

PHMAP means the Public Housing Management Assessment Program, authorized in 42 U.S.C. 1437d(j) and implemented in 24 CFR part 901, which is designed to allow HUD and the PHA to identify PHA management capabilities and deficiencies and to lead to better overall management of the public housing.

Receiver means a person or entity appointed by a court pursuant to section 6(j)(3) of the United States Housing Act of 1937 to be responsible for the day-to-day operation of a PHA.

Troubled PHA means a public housing agency that has been designated as a troubled agency (including mod troubled) under section 6(j) of the United States Housing Act of 1937.

Vacancy or *vacant unit* means a dwelling unit that is not under an effective lease to an eligible family. An effective lease is a lease under which an eligible family has a right to possession of the unit and is being charged rent, even if the amount of any utility allowance equals or exceeds the amount of a total tenant payment that is based on income and, as a result, the amount paid by the family to the PHA is zero.

Vacancy reduction plan means a plan developed and submitted by a PHA to HUD, regarding vacancies in units owned or operated by the PHA. The plan must meet the criteria established in § 968.407.

§ 968.407 Vacancy Reduction Plan.

(a) *Submission of plan.* Each PHA to which this subpart applies, in accordance with § 968.403, shall submit a vacancy reduction plan. The plan shall contain the elements identified in paragraph (b) of this section, and shall be organized so that each of the elements can be identified, reviewed, and funded separately.

(b) *Contents of plan.* The format of a plan submitted for funding under this program will be defined in NOFAs to be published periodically in the **Federal Register**. Each vacancy reduction plan submitted by a PHA under paragraph (a) of this section shall include statements:

(1) Identifying all vacant dwelling units administered by the PHA, including unmarketable units, and explaining the reasons for the vacancies. Units may be grouped together when explaining the reasons for the vacancies;

(2) A description of the turnover rate of units for the past two years, including the number of units vacated and reoccupied per development per year and the average number of days required to return a unit to occupancy. If the turnover rate is increasing, the plan should identify each cause of the increase.

(3) Describing the actions to be taken by the PHA during the following five years to eliminate the vacancies. The PHA shall:

(i) State project-specific actions that it is taking or intends to take that will eliminate vacancies, such as modernization, demolition, unit redesign or conversion, density reduction, disposition, modification of occupancy policies, site and security improvements, and other physical or management improvements; and

(ii) For each project identified, set out a schedule for completing the actions identified in paragraph (b)(3)(i) of this section and removing the dwelling units from the PHA's inventory of vacant units. If the timing of any action is

dependent upon a HUD approval or decisionmaking process, the schedule for the PHA action may be presented in terms of a specified time period following completion of the HUD process. For each action, the schedule shall include the number of vacancies that will be eliminated by the end of each 12-month period after the PHA begins to receive assistance under this subpart.

(iii) When the PHA has been unable to return units vacated during the last two years to occupancy within an average of 30 days, the plan shall describe actions that the PHA will undertake to achieve at least a 30-day turnover rate.

(4) Identifying any impediments that will prevent elimination of the vacancies within the five-year period;

(5) Identifying any vacant units funded for modernization, major reconstruction, demolition, or disposition activities;

(6) Identifying any vacant dwelling units that are eligible for modernization, major reconstruction, demolition, or disposition, but have not been funded or approved for these activities and are not likely to be funded or approved for at least three years. The statement shall include an estimate of the amount of assistance necessary to complete the modernization, major reconstruction, demolition, or disposition of these units;

(7) Identifying any vacant units not identified under paragraphs (b)(5) and (b)(6) of this section. The statement shall include a description of any appropriate activities relating to elimination of the vacancies in these units and an estimate of the amount of assistance necessary to carry out the activities identified under this paragraph (b)(7);

(8) Setting forth an agenda for implementation of management improvements during the first fiscal year beginning after submission of the plan. If the timing of any improvement is dependent upon a HUD approval or decisionmaking process, the schedule for the improvement may be presented in terms of a specified time period following completion of the HUD process. The agenda should include any management improvements recommended by the assessment team pursuant to § 968.410 and an estimate of the amount of assistance necessary to implement the management improvements; and

(9) Of any other information that the Secretary shall deem appropriate, as provided in the applicable NOFA. Such information may include budget documents, in the case of any PHA that is applying for funds under a NOFA.

(c) *Housing standards.* To the extent that a plan involves modernization, reconstruction, or rehabilitation activities that have not been funded or approved previously and are not planned to be undertaken using Comprehensive Grant Program funds, the plan must reflect cost estimates that, at a minimum, are based on:

(1) For individual work items funded under the program, compliance with modernization standards, as set forth in HUD Handbook 7485.2, as revised; and

(2) For each vacant unit on which funds are expended, compliance of the unit with the Housing Quality Standards, as set forth in 24 CFR 882.109 and as amended by the regulations concerning lead-based paint in public housing in 24 CFR part 35.

(Approved by the Office of Management and Budget under control number 2577–0181)

§ 968.410 Assessments.

(a) *Requirement.* Each PHA participating in the program under this subpart shall cooperate with an onsite assessment of the vacancy situation of the PHA by an assessment team, whose members will be selected by the Secretary in accordance with paragraph (b) of this section. The Secretary will schedule assessments in a priority order, based on:

(1) The nature and extent of each PHA's vacancy problem, and HUD's goal of achieving maximum reoccupancy using the funds available; and

(2) The availability of assessment teams and the expected level of complexity of the assessments to be scheduled.

(b) *Composition of assessment team.* The assessment team shall include representatives of HUD, an equal number of independent experts knowledgeable with respect to vacancy problems and management issues relating to public housing, and officials of the PHA.

(c) *Scope of assessment.* The assessment team shall assess the vacancy situation of the PHA to determine the causes of the vacancies, including any management deficiencies or modernization activities. At least one member of the assessment team shall consult with residents of the PHA's units regarding the vacancy situation of the PHA. The assessment team shall also examine indicators of the management performance of the PHA relating to vacancy, which shall include consideration of the performance of the PHA as measured by the indicators under paragraphs (A) and (E) of section 6(j)(1) of the Act (implemented by 24 CFR 901.10(b)(1) and 901.10(b)(5)).

(d) *Report of assessment team.* The assessment team shall submit to the PHA and the Secretary written recommendations for management improvements to eliminate or alleviate management deficiencies and for strategies to deal with vacant units. If requested by the PHA, HUD will assist the PHA in preparing the vacancy reduction plan under § 968.407, including determining appropriate actions to eliminate vacancies.

§ 968.413 Funding.

(a) *Eligible activities.* Except as provided in paragraph (b) of this section, assistance may be provided under this subpart to PHAs submitting vacancy reduction plans for reasonable costs of the following activities:

(1) Implementing management improvements;

(2) Rehabilitating vacant dwelling units identified in the plan in accordance with § 968.407; and

(3) Carrying out vacancy reduction activities described in the plan in accordance with § 968.407.

(b) *Assistance to troubled PHAs.* Assistance may be provided to a troubled PHA only if the PHA meets either of the conditions described in paragraphs (b)(1) and (2) of this section:

(1) The PHA has demonstrated substantial progress on the following vacancy related Public Housing Management Assessment Plan (PHMAP) indicators: 2 (Modernization), 5 (Unit Turnaround), 6 (Outstanding Work Orders), or 7 (Annual Inspection and Condition of Units and Systems), as demonstrated by a PHMAP score of "C" or better. If the PHA does not have a score of "C" or better on these indicators, substantial progress may be demonstrated as follows:

(i) The PHA, based on current data would qualify for a score of "C" or better on the indicators.

(ii) A statement of alternative arrangements that have been made to assure effective administration of the function covered by the indicator, i.e. rehabilitation and modernization activities (in regard to the units for which funding is requested) and the PHA-wide administration of unit turnaround, work orders, and preventive maintenance.

(2) The PHA has provided reasonable assurances that substantial progress will be made to remedy any management deficiencies identified by the assessment team or any vacancy-related deficiencies identified in HUD reviews and audits, through activities that have already begun or will be initiated.

(c) *Costs of assessment teams.* The Secretary may use amounts appropriated for activities under this subpart for any travel, administrative, and other necessary expenses of assessment teams under § [illegible].410.

(d) *Determination of assistance amounts.* (1) Whether a PHA is to receive assistance, and the amount of any assistance, under this subpart will be determined through a process to be described in detail for each round of funding in Notices of Funding Availability to be published in the **Federal Register**. A portion of a PHA's plan, rather than the entire plan, may be funded, and the Secretary may establish reasonable limits on the funding that will be available under a NOFA for any category of eligible activities or for any PHA.

(2) Prior to determining the amount of any assistance to be awarded to a PHA, HUD will review the PHA's plan and the extent to which it is consistent with the assessment of the PHA, and any other factors that the Secretary finds to be appropriate.

(e) *Revisions.* Funding is expected to be spent to carry out the vacancy reduction activities funded under this program. Should a change in circumstances make a revision necessary, HUD approval is required. The grantee must submit a report that substantiates a need for the revision, along with an account of how the revision affects the funded plan.

§ 968.416 Fund requisitions.

To request funds against the total approved vacancy reduction program budget, a PHA must submit a request to HUD in accordance with HUD requirements.

§ 968.419 Grantee's oversight responsibilities.

Each grantee shall provide, by contract or otherwise, adequate and competent supervisory and inspection personnel to assure work quality and progress during modernization, whether work is performed by contract or force account labor and with or without the services of an architect/engineer.

§ 968.422 Progress reports and completion schedule.

(a) *Reports required.* Until completion of the activities funded under the vacancy reduction program, the grantee shall submit to HUD, in a form and at a time prescribed by HUD, the following:

(1) A report on modernization fund expenditures;

(2) A narrative report that includes an accounting of the grantee's progress against the milestones established in its vacancy reduction plan. The report shall include the number of both funded and regular turn-over units that have been made ready for occupancy; and

(3) Any additional information as HUD may require.

(b) *Completion schedule.* HUD expects that most work items funded under this program will be completed within one year. Work items must be completed within two years from the date of funding, or by some other time as may be specified in the Notice of Funding Availability, unless prior approval is obtained from HUD.

(Approved by the Office of Management and Budget under control number 2577–0181)

§ 968.425 HUD review of grantee performance.

(a) *Performance reviews.* HUD shall carry out such reviews of the performance of each funded PHA as may be necessary or appropriate to determine compliance with the PHA's vacancy reduction plan and related HUD requirements. In these reviews HUD will determine whether the PHA has:

(1) Carried out its vacancy reduction activities in a timely manner and in accordance with its vacancy reduction plan;

(2) Completed, or made reasonable progress toward completing, the physical items funded under the vacancy reduction plan, and whether the work items being carried out conform with the modernization and energy standards in § 968.115 of this chapter;

(3) Implemented, or made reasonable progress toward implementing, the management improvements funded under the vacancy reduction program; and

(4) Made reasonable progress in meeting the goals established in its vacancy reduction plan.

(b) *Notice of deficiency.* If HUD finds any deficiency in a review of a grantee's performance under this part, HUD may issue to the grantee a notice of deficiency stating the specific program requirements that the grantee has violated and requesting the grantee to take corrective action.

(c) *Corrective action order.* (1) *Issuance.* If HUD finds any of the deficiencies listed in paragraph (c)(3) of this section in its review of the grantee's performance, HUD may issue to the grantee a corrective action order, whether or not a notice of deficiency has previously been issued on the specific deficiency. The corrective action order shall notify the grantee of the specific program requirements that the grantee has violated and shall specify the corrective action.

(2) *Consultation with grantee.* Before ordering corrective action, HUD will give the grantee an opportunity to consult with HUD regarding the proposed action.

(3) *Bases for corrective action.* HUD may order a grantee to take corrective action only if HUD determines:

(i) The grantee has not submitted a performance report as required by HUD;

(ii) The grantee has not carried out activities under its vacancy reduction program in a timely manner and in accordance with HUD requirements;

(iii) The grantee does not have continuing capacity to carry out activities in its vacancy reduction plan; or

(iv) An audit conducted in accordance with 24 CFR part 44, or pursuant to other HUD reviews, reveals deficiencies that HUD reasonably believes require corrective action.

(d) *Nature of corrective action.* (1) HUD shall design corrective action to prevent a continuation or recurrence of the same or a similar deficiency or to mitigate to the greatest extent feasible any adverse effects of the deficiency.

(2) HUD may order a grantee to take the corrective action that HUD determines appropriate for carrying out the elements of the vacancy reduction plan. Corrective action may include, but is not limited to, suspension of grantee's authority to incur costs against the vacancy reduction funding and reimbursement, from sources other than HUD funds, of any amount spent improperly.

(e) *Failure to take corrective action.* In cases where HUD has ordered corrective action and the grantee has failed to take the required action within a reasonable time, as specified by HUD, HUD may take one or more of the following steps:

(1) Withhold vacancy reduction funds from the grantee;

(2) Declare a breach of the ACC by the grantee; and

(3) Any other sanctions authorized by law or regulation.

§ 968.428 Program closeout.

(a) *Requirements for grantees.* Upon completion of the activities funded in accordance with this part, the grantee shall submit to HUD, and in a form prescribed by HUD, the actual modernization cost certificate for HUD's review, audit verification, and approval. The grantee shall immediately remit any excess funds provided by HUD. If the audited modernization cost certificate discloses unauthorized expenditures, the grantee shall take such corrective actions as HUD may direct.

(b) *Audit.* The audit shall follow the guidelines prescribed in 24 CFR part 44, Non-Federal Government Audit Requirements.

(Approved by the Office of Management and Budget under control number 2577–0181)

§ 968.435 Other program requirements.

In addition to the program requirements applicable to this subpart under § 968.110, each PHA participating in the vacancy reduction program under this subpart shall:

(a) Certify that any modernization, reconstruction, or rehabilitation activities that are funded under this subpart will be undertaken in accordance with modernization standards, as set forth in HUD Handbook 7485.2, as revised;

(b) Certify that activities undertaken within vacant units will bring the affected vacant units into compliance with the Housing Quality Standards, as set forth in 24 CFR 882.109 and amended by the regulations concerning lead-based paint in public housing at 24 CFR part 35; and

(c) Provide for resident involvement, in a manner to be determined by the Secretary, in the process of applying for any funding available under this part

Dated: June 6, 1994.

Joseph Shuldiner,

Assistant Secretary for Public and Indian Housing.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Public and Indian Housing

[Docket No. N–94–3761; FR–3538–N–01]

NOFA for Vacancy Reduction Program

AGENCY: Office of the Assistant Secretary for Public and Indian Housing, HUD.

ACTION: Notice of funding availability.

SUMMARY: This NOFA announces the availability of funding for activities under the Vacancy Reduction Program. Under this program, certain public housing agencies (PHAs) are required to develop and submit a plan regarding vacancies in units owned or operated by the PHA. Assessment teams have conducted on-site assessments of the vacancy situation at known eligible PHAs, and when notified will conduct an assessment at any PHA that meets the eligibility requirements but has not been assessed. In addition, when requested, HUD will provide assistance to any eligible PHA in developing its vacancy reduction plan. Although funds available under this NOFA will be used to implement the plans, these funds are intended to supplement other initiatives of the PHA that will reduce the rate of vacancies in a PHA's inventory. The NOFA contains information on the following:

(a) The purpose of the NOFA, available amounts, and eligibility; and

(b) Application processing, including how to apply, the required content of the application, and how selections will be made.

DATES: An application must be submitted before 4 p.m. (Eastern Standard Time) on July 28, 1994.

Any PHA that considers itself eligible for funding under this NOFA, but that has not yet been scheduled for an assessment under 24 CFR 968.410, must request an assessment before June 28, 1994.

The above-stated deadlines are firm as to date and hour. Applications may be hand-delivered or mailed, but applications sent by facsimile will not be accepted.

ADDRESSES: The original completed application must be submitted to: Attention: Office of Assisted Housing, Department of Housing and Urban Development, 451 Seventh St., SW., room 4204, Washington, DC 20410; one copy must be sent to the appropriate HUD Field Office; and a one copy must be sent to each member of the assessment team.

FOR FURTHER INFORMATION CONTACT: MaryAnn Russ, Director, Office of Assisted Housing, Department of Housing and Urban Development, 451 Seventh Street, SW., room 4204, Washington, DC 20410, telephone (202) 708–1800 or (202) 708–1380 (TDD). (These are not toll-free numbers.)

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Act Statement

The information collection requirements contained in this NOFA have been approved by the Office of Management and Budget (OMB), under section 3504(h) of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501–3520), and assigned OMB control number 2577–0181.

I. Purpose and Substantive Description

A. Authority

The funding made available under this Notice of Funding Availability (NOFA) is authorized as a set-aside by section 115(a) of the Housing and Community Development Act of 1992 (Pub. L. 102–550, approved October 28, 1992) (1992 Act). Section 115(a) requires a percentage of the amounts available under section 14 of the United States Housing Act of 1937 in fiscal years 1993 and 1994 to be set aside for the Vacancy Reduction Program. Final implementing regulations for the Vacancy Reduction Program are published elsewhere in today's **Federal Register**.

In the Departments of Veterans Affairs and Housing and Urban Development, and Independent Agencies Appropriations Act, 1993 (Pub. L. 102–389, approved October 6, 1992; 106 Stat. 1582) (1993 Appropriations Act), Congress appropriated $3.1 billion for activities under section 14, and in the Departments of Veterans Affairs and Housing and Urban Development, and Independent Agencies Appropriations Act, 1994 (Pub. L. 103–124, approved October 28, 1993 (1994 Appropriations Act), Congress appropriated $3.23 billion for these activities. A total of $202,560,000 in set-asides is available for this program to fund Vacancy Reduction Program activities.

B. Allocation Amounts

A portion of the funds available for this program will be used for travel and administrative expenses of the assessment teams, as authorized by Section 115 of the 1992 Act. Of the remaining amount, no PHA applying for funding under this NOFA may receive more than 15 percent of the total available funds.

Subject to this 15 percent limitation, eligible public housing agencies (PHAs) that are Comprehensive Improvement Assistance Program (CIAP) agencies will be provided funding in the full amounts approved for Vacancy Reduction Program activities. For PHAs that are Comprehensive Grant Program (CGP) agencies, if insufficient funds remain to fund all eligible and approved activities under this NOFA, the amount to be reserved for each CGP agency will be its pro rata share of the total remaining funds available, in accordance with Section I.J(3) of this NOFA.

All units that are funded in whole or in part by the Vacancy Reduction Program must be brought into compliance with the Housing Quality Standards (HQS), as set forth in 24 CFR 882.109, and must be readily marketable when the work is completed.

C. Background

In order to gain greater insight into the vacancy problems of the PHAs required to participate in the Vacancy Reduction Program, the Department sent a survey form on April 2, 1993, to all PHAs that, based on HUD data bases, were troubled or mod-troubled on January 1, 1993, or had a vacancy rate that exceeded 15.9% on that date. Of the 400 identified PHAs, 345 responded to the survey. These PHAs reported a total of 56,324 vacancies, about half of the total vacancies nationally. The responses showed that additional funding was necessary to cure only half of the vacancies in the inventories of the responding PHAs.

Of those vacant units whose occupancy was not dependent upon additional funding, the reasons for and percentages of the total vacancies were as follows:

- Ready, awaiting leasing—5.7%;
- No demand (defined as few or no persons on the waiting list)—3.5%;
- Undesirable (defined as requiring 4 or more offers to obtain a tenant, but not requiring funding)—2.0%;
- Funded under a modernization program—29.7%;
- In litigation—6.5%; and
- Other reason not requiring funding—3.2%.

Of those units in which vacancies could be eliminated with additional funding, the reasons for and percentages of the vacancies were as follows:

- Awaiting demolition—5.4%;
- Needing modernization—30.0%;
- Needing repair—12.8%; and
- Other reason requiring funding—1.1%.

Of the vacant units that would benefit from additional funding, the estimated costs of rehabilitation (exclusive of any

costs for lead-based paint testing and abatement) and percentage of total vacancies were as follows:

- Up to $5,000—4.8%;
- $5,000–10,000—14.8%;
- $10,000–25,000—7.1%; and
- Over $25,000—13.8%.

Thus, almost 20% of all vacancies in these high-vacancy PHAs could be remedied for a cost of $10,000 or less per unit, plus the cost of any lead-based paint activity, essential management improvements, Section 504 (of the Rehabilitation Act of 1973) rehabilitation, or other essential costs.

The Department seeks maximum efficiency in the use of Vacancy Reduction Program funds. To this end, the Department met with public housing interest groups and resident representatives on January 28 and July 9, 1993, to discuss the needs of public housing that might be met by this program. As a result, the Department has decided to focus this NOFA on units that can be rehabilitated for occupancy at a modest cost, and on units with more expensive rehabilitation costs where the PHA has the ability and agrees to provide the remainder of the funding necessary to prepare the property for occupancy. In this way, the Department hopes to house the optimal number of additional families using the available program funds.

The survey has enabled the Department to proceed with vacancy assessments (see 24 CFR 968.410 in the final rule published elsewhere in today's **Federal Register** and the preamble of the proposed rule, published at 58 FR 29728) for those PHAs that responded to the survey and indicated an inventory of unfunded vacant units. Other PHAs that did not receive a survey form or did not respond to the survey, but that believe they are eligible under this NOFA and wish to apply for funding, must notify the Department so that an assessment can be scheduled as indicated under **DATES**, at the beginning of this NOFA.

The Vacancy Reduction Program is not designed to focus solely on the rehabilitation of vacant units; the program also is intended to identify and correct site and management deficiencies as necessary to achieve and sustain occupancy of vacant units. Management problems in some of the high-vacancy PHAs also may be responsible for vacancies. These problems may include high turnover, poor maintenance and security, delays in making units ready for occupancy after they are vacated, delays in placing tenants in units as soon as they are ready, or inability to deal with marketability problems that could be addressed successfully. Therefore, management improvements that are necessary for a PHA to achieve and maintain a high level of occupancy and to manage turnover successfully also will be funded under this NOFA. The vacancy assessments will assist the PHAs and HUD in identifying what actions need to be taken in this regard.

Some PHAs may have difficulty preparing an application, including a vacancy reduction plan. The Department will, on request by the PHA, assist the PHA in preparation of the plan. Such assistance may be requested by telephoning Strategic Resources, Inc. (703) 749–3040. Moreover, if an application submitted in response to this NOFA is technically approvable under the NOFA, but is deemed by HUD to need improvement or supplementation in specific areas of the PHA's plan to increase the potential for success, HUD will require changes in the plan before execution of the amendment of the Annual Contributions Contract (ACC).

D. Definitions

The following definitions apply to this NOFA, in addition to the definitions that apply generally to the program under § 968.405 of the final rule published elsewhere in today's **Federal Register**:

Assistant Secretary means the Assistant Secretary for Public and Indian Housing.

Eligible unit means a dwelling unit that satisfies the conditions under either paragraph (1) or paragraph (2) of this definition, as applicable. The unit must be either:

(1) A *vacant unit* that meets the characteristics of both of the following paragraphs (1) (a) and (b):

(a) The cost of rehabilitation necessary to make the unit available for occupancy and marketable (including development-wide physical improvements and other necessary costs, but not including costs of lead-based paint activity, costs for accessibility for those with disabilities, and management improvement funding) is either:

(i) $8,000 or less, when averaged with other vacant units in the development for which the PHA is applying for this category of funding (i.e., average of not more than $8,000 per unit); or

(ii) More than $8,000, when averaged with other vacant units in the development for which the PHA is applying for this category of funding (i.e., average of more than $8,000 per unit), and the PHA has available funding that it agrees to use to pay the costs in excess of $8,000 per unit. "Available funding" includes funds legally available to the PHA by September 30, 1994; and

(b) The unit will be marketable when it has been made ready for occupancy. Units that cannot be made marketable, for any reason, are not eligible to be funded under this NOFA, and funds should not be requested for them in the application. Such units, however, must be included in the vacancy reduction plan; or

(2) An *occupied unit*, if either:

(a) The unit meets the criteria of paragraphs (1)(a)(i) or (ii) and paragraph (1)(b) of this definition, and either:

(i) In order to address the overall vacancy situation at a PHA, it is necessary to move a resident family to another unit. The unit vacated by that family may then be considered an eligible unit. For example, if a PHA has vacant one-bedroom units for which there is no demand, but also has overhoused families that could be transferred to the one-bedroom units (thus freeing up larger units for which there is a demand), the PHA could request funding under this NOFA for both units; or

(ii) The unit is expected to be vacated under the Moving to Opportunities Program; or

(b) The PHA has fewer vacancies on the date of its application than it had on September 1, 1993, and the PHA had expended funds on rehabilitation of the unit in reasonable anticipation of reimbursement from Vacancy Reduction Program funds. The PHA may be reimbursed for the cost of the rehabilitation only if funds remain available after HUD has funded all other eligible costs at all PHAs applying for funds.

Lead-based paint activity includes lead-based paint risk assessments, risk management (interim containment), testing, and abatement, consistent with the Lead-Based Paint Poisoning Prevention Act (42 U.S.C. 4821–4826) and HUD implementing regulations at 24 CFR parts 35, 965, and 968.

Marketable means that there is a waiting list for units of the applicable size and that either the past experience of the PHA would indicate that the unit should lease reasonably quickly after completion of the work funded under this program, or other available data indicates that physical and management improvements, including more extensive outreach, would likely result in a demand for the units.

Repair includes routine maintenance when essential to the reoccupancy of the eligible vacant units.

Vacancy Reduction Plan means a plan developed by the PHA that includes the following:

(1) The statements required by § 968.407(b) of the final rule (also see Appendix to this NOFA) published elsewhere in today's **Federal Register**;

(2) For all vacant units, reported by development, information on the:

(i) Number and percentage of units vacant at the time of application under this NOFA;

(ii) Number and percentage of units expected to be occupied by each semiannual date after the submission of the PHA's vacancy reduction plan, as provided under paragraph (3) of this definition, including date of full occupancy;

(iii) Source of funding and expected percentage of funds to be obligated and expended by each semiannual date, as provided under paragraph (3) of this definition; and

(iv) Expected date of any demolition or disposition, and the number of units involved in this activity.

(3) A schedule, by chart or time line, indicating milestones for vacancy reduction activities (all vacant units must be included regardless of whether they require funding and whether they have already been funded). The schedule shall indicate all actions that will have been taken as of the end of each semiannual period, either September 30 or March 31.

(i) Actual calendar dates shall be used for units that do not require vacancy reduction program funding, but will be funded from sources within the control of the PHA (e.g., CGP and the operating budget) or have already been funded by another governmental program (e.g., CIAP, the Severely Distressed Public Housing Program).

(ii) For units for which specific calendar dates cannot be given because approval from HUD is a prerequisite to the action, the schedule shall specify semiannual dates from the expected HUD approval (e.g., first semiannual reporting date after approval, second semiannual reporting date after approval, etc.). Such units include those for which the PHA is requesting or intends to request funding under the Vacancy Reduction Program or another HUD program (e.g., CIAP or the Severely Distressed Public Housing Program), or for which approval of demolition/disposition is required but has not yet been granted.

E. PHA Eligibility

(1) Indian Housing Authorities are not eligible for the Vacancy Reduction Program.

(2) To be eligible under this NOFA, a PHA must:

(a) Have had a vacancy rate that exceeded 15.9% on March 30, 1993, the date used in the HUD survey of vacancies;

(b) Have had a receiver appointed for the PHA pursuant to section 6(j)(3) of the United States Housing Act of 1937; or

(c) Have been a designated troubled or mod-troubled PHA any time within the twelve-month period that ended September 1, 1993. Such a PHA must also meet either of the conditions described in paragraphs (i) and (ii) below:

(i) The PHA has demonstrated substantial progress on the following vacancy related Public Housing Management Assessment Program (PHMAP) indicators: 1 (Vacancy Number and Percentage), 2 (Modernization), 5 (Unit Turnaround), 6 (Outstanding Work Orders), or 7 (Annual Inspection and Condition of Units and Systems), as demonstrated by a PHMAP score of "C" or better. If the PHA does not have a score of "C" or better on these indicators, substantial progress may be demonstrated as follows:

(*A*) Evidence that the PHA, based on more recent data would qualify for a score of "C" or better on the indicators; or

(*B*) A statement of alternative arrangements that have been made to assure effective administration of the function covered by the indicator, i.e., rehabilitation and modernization activities (in regard to the units for which funding is requested) and the PHA-wide administration of unit turnaround, work orders, and preventive maintenance; or

(ii) The PHA has provided a reasonable assurance that substantial progress will be made to remedy any management deficiencies identified by the assessment team, or any vacancy-related management deficiencies related to PHMAP indicators 1, 2, 5, 6, and 7, through activities that have already begun or will be initiated in the next six months, including activities to be funded under this NOFA. The assurance may cross-reference management improvement activity described in its vacancy reduction plan.

F. Eligibility of Activities and Costs

(1) *Eligible Activities.* The following activities are eligible for funding to the extent that they are essential to the goal of improving and maintaining a lower vacancy rate at the PHA. The extent to which activities requested for funding are essential to the achievement of this goal will be determined by HUD on the basis of the application and the vacancy assessment.

(a) Management improvements that have the following characteristics:

(i) The management improvements generally may not exceed 25% of the hard costs to be funded (exclusive of costs for lead-based paint abatement and handicapped accessibility), except that higher amounts for management improvements may be approved when such expenditures are deemed by HUD to be critical to the reduction of vacancies in the PHA. Management improvements include, but are not limited to: activities permitted under paragraph 2–3 of CIAP Handbook 7485.1 (Rev. 4); equal opportunity and civil rights training; and the development of appropriate procedures when there are management problems regarding the PHA's administration of equal opportunity requirements; and

(ii) The management improvement costs shall be funded one time only, to cover a period not to exceed three years or, with regard to PHAs with serious management difficulties, such period as is proposed by the PHA and approved by HUD. Where an approved Vacancy Reduction Program includes management improvements that involve ongoing costs, such as security, HUD will not be obligated to provide any continued funding or additional operating subsidy after the funded period. The PHA shall be responsible for finding other funding sources or reducing its ongoing management costs.

(b) Rehabilitation or repair of vacant eligible units to bring the unit at least into compliance with the Housing Quality Standards (HQS), as set forth in 24 CFR 882.109. Correction of HQS deficiencies outside the unit is not required, unless the correction of the HQS deficiencies is essential to the marketability of the vacant units in the development. Any physical component that is replaced must meet the standards for such components set forth in the Public Housing Modernization Standards Handbook, 7485.2 Rev.1.

(c) Costs necessary to provide accessibility in eligible units to persons with disabilities, in accordance with the requirements of Section 504 of the Rehabilitation Act of 1973 and the Americans with Disabilities Act of 1990.

(d) Lead-based paint activity, as defined in Section I.D of this NOFA, in eligible units. For lead-based paint (LBP) activities, the PHA is required to comply with 24 CFR part 965, subpart H, and 24 CFR part 35.

(e) Development-wide improvements that are essential to the marketability of the eligible units, such as improvements

made to enhance security or "curb appeal."

(f) Reconfiguration of the interior of buildings or units when there is documentation of significant problems in marketability for the currently available unit size. Documentation for reconfiguration must meet the requirements of HUD Handbook 7465.1 REV. In addition, where reconfiguration is requested, applicants must document that the lack of demand for these units is not compounded by the failure of the PHA to transfer inappropriately housed families. Approval of an application under this NOFA that includes reconfiguration activity will constitute HUD approval of the reconfiguration and no further HUD approval is necessary.

(g) When vacancies are attributable to families being overhoused, activities relating to reassigning those families and repairing of the occupied units made vacant by the reassignment may be included in the PHA request, if the reassignment is essential to correcting the vacancy problem. However, such units will be considered only if the reassignment and repair is likely to result in a decrease of the vacancy rate in the PHA.

(h) Other related activities and improvements eligible under the modernization program (see 24 CFR part 968), such as administrative expenses, fees and costs, nondwelling structures and equipment, and relocation, but only to the extent that such costs are necessary to support activity otherwise eligible and are essential to the achievement and maintenance of a lower vacancy rate.

(i) Demolition of vacant units, when a demolition application has been approved by HUD and the demolition has not been previously funded.

(j) If the PHA has fewer vacancies on the date of its application than it had on September 1, 1993, the PHA will be reimbursed for the costs of rehabilitating the formerly vacant units only if funds remain available after the Department has funded all other eligible costs at all PHAs applying for funds.

(2) *Eligible Costs.* The total amount of funding for which a PHA is eligible is the sum of the following:

(a) For each development, the necessary costs of rehabilitation of eligible units; development-wide physical improvements, including common areas; demolition; or reconfiguration. These costs are not to exceed $8,000 times the number of eligible units in the development at the time of application.

(b) Necessary costs of management improvements, not to exceed 25% of the total hard costs to be funded for all developments (exclusive of costs for lead-based paint abatement and handicapped accessibility), except that the Assistant Secretary may approve higher amounts for management improvements when such expenditures are deemed critical to reduction of vacancies in the PHA;

(c) Other related costs as discussed in paragraph (1)(h) (under "Eligible Activities") of this Section I.F;

(d) Necessary costs for lead-based paint containment or abatement in eligible units; and

(e) Necessary costs for handicapped accessibility for eligible units.

(3) *Ineligible Activities.* Activities are not eligible if the activities are under contract; have been selected for funding from other sources, such as Urban Revitalization Demonstration (URD) grants, CIAP, or State or local funding; or if the PHA has sufficient funds in its operating budget or pursuant to its formula grant under the CGP to fund the activities.

Sufficiency of funds will be determined as follows:

(a) For hard costs, a CGP agency will be deemed to have insufficient funds for the activities if the Assessment of Physical Needs in the Comprehensive Plan shows a need for funds greater than the funds expected to be available to the PHA under the CGP in the next five years.

(b) For management improvements, a CGP agency will be deemed to have insufficient funds if:

(i) For CGP agencies, the Management Needs Assessment in the Comprehensive Plan shows a need for funds greater than 10% of the funds expected to be available to the PHA under its CGP in the next five years; and

(ii) The PHA plans to use at least 10% of its CGP funds for management improvements in each of the next five years.

(c) In addition, for CGP and Comprehensive Improvement Assistance Program (CIAP) agencies, operating funds will be deemed to be insufficient only if the PHA has an operating reserve of less than 75% of the maximum allowable reserve.

G. Resident Involvement

The PHA shall develop a process that assures that residents are fully briefed, have an opportunity to comment on the proposed content of the PHA's application in response to this NOFA, and to be involved in all phases of the process. Particular attention shall be given to opportunities for resident employment. The PHA shall give full consideration to the comments and concerns of residents. The process shall include:

(1) Informing residents of the applicable housing developments about the preparation of the application, including a discussion of the report of the assessment team and actions that will be taken to address any deficiencies;

(2) Once a draft application has been prepared, the PHA shall make a copy available for reading in the management office; provide copies of the draft to any resident organization representing the residents of any development involved; and provide adequate opportunity for comment by the residents of the developments and their representative organizations prior to making the application final;

(3) Providing to HUD and any resident organization representing the development a summary of the resident comments and the PHA's response to them; and notifying residents of the developments that the summary and responses are available for reading in the management office; and

(4) After HUD approval of a grant, notifying residents of the development and any representative organizations of the approval of the grant; providing any resident organization with a copy of the HUD-approved implementation schedule; notifying the residents that the schedule is available in the management office for reading; and developing a system to facilitate regular resident monitoring of the program.

H. Resident Training, Employment, and Contracting

The Vacancy Reduction Program provides an ideal opportunity to enhance resident training, employment, and contracting. In furtherance of HUD goals and priorities, PHAs should, to the greatest extent possible, provide such opportunities for residents under this program, including development of programs under section 3 of the Housing and Urban Development Act of 1968 (12 U.S.C. 1701u) (Section 3). Section 3 requires best efforts on the part of the PHA to give low- and very low-income persons training and employment opportunities generated by Vacancy Reduction Program assistance, and to award contracts for work to be performed in connection with Vacancy Reduction Program assistance to business concerns that provide economic opportunities for low- and very low-income persons. A PHA shall include in its vacancy reduction plan the projected number of residents the PHA expects to be trained or hired, and the number of business firms that provide economic opportunity to low-

and very low-income persons to be contracted with for vacancy reduction activities, whether directly by the PHA or through business concerns with which the PHA has contracts for vacancy reduction activities.

I. Required Results

(1) Except as provided below, funds provided under this NOFA must be expended and units reoccupied within 24 months from the date of funding, and management improvements must be implemented fully within 3 years from the date of funding. However, the Assistant Secretary for Public and Indian Housing may approve alternative schedules proposed by PHAs with significant management improvement needs. Funds awarded under this program that are not obligated on a timely basis may be recaptured.

(2) During the funding period, move-ins to developments funded under this program must at least equal the number of move-outs plus the number of units funded under this program (excluding units that are vacated for modernization and later reoccupied after modernization). At the end of the funding period, the PHA's current vacancy rate must be reduced to the extent of the number of units funded under this program.

J. Selection and Funding Process

(1) *Sufficiency of Application.* In order to be considered for funding, an application must be complete and consistent with the terms of this NOFA, and the vacancy reduction plan must generally be consistent with the recommendations of the assessment team. The Department recognizes that some variance will exist since some of the assessments already conducted concentrated on units that could be repaired for $10,000 or less. In determining the amount of funds to be reserved for each approvable application, HUD will review the request for consistency with the recommendations of the assessment team and will consider any other information HUD may have available. When an approvable vacancy reduction plan submitted in response to this NOFA needs improvement or supplementation, HUD will require any necessary changes or additions to the plan, and will assist the PHA in revising its plan, before execution of the amendment of the ACC.

(2) *Management Deficiencies.* If a PHA does not adequately address management weaknesses that contribute to its vacancy problem and have been reported by the assessment team, its application will be deemed ineligible for funding.

(3) *Funding Decisions.* When a PHA is requesting funding for eligible units in which rehabilitation costs will exceed an average of $8,000 (see paragraph (1)(a)(ii) in the definition of "eligible unit" in Section I.D of this NOFA), HUD will determine whether the PHA's plan to fund the cost above an average of $8,000 per unit is reasonable. However, no PHA may receive greater than 15 percent of the total amount of funding available.

(a) *CIAP Agencies.* HUD will fully fund all eligible units and associated costs (as defined in Section I.F of this NOFA) for which CIAP agencies apply.

(b) *CGP Agencies.* From the remaining funds HUD will fund eligible applications from CGP agencies to the extent funding is available. Of the total funds remaining available for CGP agencies, 75 percent will be made available for units eligible under paragraph (1)(a)(i) in the definition of "eligible unit" in Section I.D, "Definitions," of this NOFA. The other 25 percent will be made available for units eligible under paragraph (1)(a)(ii) of that definition of "eligible unit".

(i) If the amount of funds available is sufficient to fund fully (including the costs of management improvements, lead-based paint control, and accessibility for the disabled) all CGP agencies in either category of funding, HUD will fund those requests fully.

(ii) If the total funding requested by CGP agencies in any category exceeds the total amount of funds available in that category, the amount to be reserved for each CGP agency will be determined as follows, except that an agency will not be funded at a level exceeding its budget request:

(A) If the amount of available funding is sufficient, each CGP agency will be funded for its eligible costs (exclusive of management improvements and the costs of lead-based paint control and accessibility for the disabled). If funds remain available after funding the requested costs under this paragraph, each CGP agency will receive a pro rated share of the remaining funds, according to the ratio of eligible related costs (i.e., management improvements and the costs of lead-based paint control and accessibility for the disabled) requested by the agency to the total of eligible related costs requested by all CGP agencies.

(B) If the amount of available funding is not sufficient to fund all eligible costs costs under paragraph (3)(b)(ii)(A) of this Section I.J, the funding allocated to each CGP agency will be its pro rata share of funds, determined by using the same ratio as the number of eligible units in the CGP agency in that category for which funding is requested to the total number of eligible units in that category for which funding is requested by all applicant CGP agencies.

(iii) If funds remain available in either category and there are unmet needs in the other category, the excess funds will be reallocated to the category in which additional funding is needed.

(iv) If applications from CGP agencies are not fully funded, those agencies will be required to revise their vacancy reduction plans and budgets to indicate which items will be funded with the amounts reserved for the CGP agency under this program and state alternative plans for unfunded vacancies. To the extent that funds are prorated for its units averaging more than $8,000 in costs, each CGP agency receiving program funds under paragraph (1)(a)(ii) of that definition of "eligible unit" in Section I.D, "Definitions," will be required to commit a portion of the funds the agency had agreed to commit from independent resources if those units had been funded in the full amount requested. This portion will be determined by applying (to the total commitment made in the application) the ratio of funding received for those units to funding requested for those units.

(c) *Remaining funds.* If funds remain available after funding all eligible activities under paragraphs (a) and (b) of Section I.J(3), "Funding Decisions," of this NOFA, a PHA may be reimbursed for costs, or a portion of costs, associated with rehabilitating certain occupied units. The PHA must have fewer vacancies on the date of its application than it had on September 1, 1993, and must have expended funds on those units in reasonable anticipation of reimbursement from Vacancy Reduction Program funds.

K. Implementation of Plan and Other Programs

(a) An applicant's vacancy reduction plan must be approved before an application is funded under this NOFA even though, in most cases, the plan will cover the physical treatment of many units that are not eligible under this NOFA. The PHA is expected to implement the plan using available funds, including the operating budget and CGP funds, and by requesting funds under discretionary programs, including CIAP and the Severely Distressed Public Housing Program. HUD will monitor implementation of the vacancy reduction plan.

(b) Eligible units that a PHA originally planned to fund with CGP funds may

also be funded under this NOFA, as long as they are not currently under contract. The PHA may then reprogram its CGP funds to other work set forth in the Five-Year Action Plan.

II. Application Process

A. Submission of Application

An application must be submitted before 4 p.m. (Eastern Standard Time), July 28, 1994.

An original completed application must be submitted, as follows: (1) One to: Attention: Director, Office of Assisted Housing, Department of Housing and Urban Development, 451 Seventh St., SW., room 4204, Washington, DC 20410,; (2) one copy to the appropriate HUD Field Office; and (3) one copy to each member of the assessment team. The above-stated deadline is firm as to date and hour. Applications may be hand-delivered or mailed, but applications sent by facsimile will not be accepted.

B. Scheduling of Assessments

Any PHA that considers itself eligible and wishes to apply for funding under this NOFA, but that is not yet scheduled for a vacancy assessment under § 968.410, must notify the Department by June 28, 1994, so that an assessment can be performed.

C. Availability of Funding

CIAP agencies that apply early may receive funding prior to the application deadline. Funding will be provided as soon as the application is approved.

III. Checklist of Application Submission Requirements

The following documents comprise the application:

A. Vacancy Reduction Plan

As defined in Section I.D of this NOFA.

B. Request for Funding

Under this NOFA, including:

(1) Form HUD–52825, CIAP Budget/Progress Report, Part I—Summary, including work to be performed with funds other than VRP funds for units eligible under paragraph (1)(a)(ii) of the definition of "eligible unit" in Section I.E of this NOFA, indicating the source of funds. Do not include non-VRP funds in the totals.

(2) Form HUD–52825, CIAP Budget/Progress Report, Part II—Supporting Pages, include work to be performed with funds other than VRP funds for units eligible under paragraph (1)(a)(ii) of the definition of "eligible unit" in Section I.D of this NOFA, indicating the source of funds. Do not include non-VRP funds in the totals. Note that Form HUD–52825, CIAP Budget/Progress Report, Part III—Implementation Schedule is not required;

(3) For both categories of funding (i.e., units averaging costs of $8,000 or less by development, and units averaging costs of more than $8,000 by development), a statement of the number of eligible units in each development and the average per-unit cost in the development, including the costs for rehabilitation of the units and for any development-wide improvements, but excluding costs for lead-based paint, Section 504 compliance, and management improvements.

(4) Troubled and mod-troubled PHAs must demonstrate eligibility for the program by submission of documentation required under Section I.E(2)(b) of this NOFA.

(5) An administrative plan for carrying out the work.

(6) When funding is requested under Section I.J(3)(c), "Remaining Funds," of this NOFA, statements of the number of vacancies on September 1, 1993, and the total number of vacancies in the PHA at the time of the application under this NOFA.

C. Other Submissions

(1) OMB Standard Form SF–424, Application for Federal Assistance, including SF–424B, Assurances—Non-Construction Programs. On the SF–424, PHAs need to complete only items 2, 5, 12, 13, 14, 15, 17, and 18.

(2) A resolution of the governing board of the PHA, including the following:

(a) A certification that the units for which funding is requested in this application will be readily marketable when they are made ready for occupancy;

(b) Certification of eligibility of the PHA and the proposed activities under sections I.F(1) and (2) of this NOFA;

(c) A certification that the PHA has insufficient funds (as defined in Section I.F(3) of this NOFA) in its operating budget or pursuant to its formula grant under the Comprehensive Grant Program to fund the activities for which funding is sought under this NOFA, and that the activities have not been selected for funding from other sources, such as Urban Revitalization Demonstration (URD) grants, CIAP, or State or local funding.

(3) Form HUD–50070, Certification for Drug-Free Workplace.

(4) Form HUD–50071, Certification for Contracts, Grants, Loans and Cooperative Agreements, required of PHAs established under State law that are applying for grants exceeding $100,000.

(5) SF–LLL, Disclosure of Lobbying Activities, required of HAs established under State law only when any funds, other than federally appropriated funds, will be or have been used to influence Federal workers or Members of Congress or their staffs regarding specific grants or contracts.

(6) Form HUD–2880, Applicant/Recipient Disclosure/Update Report.

(7) For any unit reconfiguration for which funds are requested under Section I.F(1)(e) of this NOFA, data supporting the eligibility of the conversions.

(8) Certification of the PHA's intent to comply with the Fair Housing Act, Title VI of the Civil Rights Act of 1964, Executive Order 11063, the Age Discrimination Act of 1975, Section 504 of the Rehabilitation Act of 1973, the Americans with Disabilities Act of 1990, and any implementing regulations.

(9) Certification that the PHA will make best efforts to give low- and very low-income persons training and employment opportunities generated by assistance awarded under this NOFA, and to award contracts for work to be performed in connection with assistance provided under this NOFA to business concerns that provide economic opportunities for low- and very low-income persons, as required by section 3 of the Housing and Urban Development Act of 1968 (12 U.S.C. 1701u).

IV. Corrections to Deficient Applications

Immediately after the submission of an application, HUD will screen the application to determine whether all items were submitted. If the PHA fails to submit any of the items listed in Section III.C of this NOFA, or the application contains a technical mistake such as an incorrect signatory, HUD will immediately notify the PHA that it has 14 calendar days from the date of HUD's written notification to submit or correct the specified items. If any items are missing and the PHA does not submit them within the 14-day cure period, the application will be ineligible for further processing.

V. Subsequent Revisions of Vacancy Reduction Plan

The intent of the Department is to assist each high vacancy PHA to develop a plan that will assure success in reducing the PHA's vacancy rate and improving management capacity to assure continued progress in reaching high occupancy levels. If a plan submitted in response to this NOFA is

approved under the NOFA, but needs improvement or supplementation, HUD will so advise the PHA. The Department will specify areas in which improvement or supplementation is needed and require that revisions be made prior to execution of the amendment of the ACC. HUD staff will be available to assist the PHA in revising its plan.

VI. Other Matters

A. Environmental Review

A finding of no significant impact with respect to the environment has been made in accordance with HUD regulations at 24 CFR part 50, which implement section 102(2)(C) of the National Environmental Policy Act of 1969. The finding of no significant impact is available for public inspection between 7:30 a.m. and 5:30 p.m. weekdays in the Office of the Rules Docket Clerk, Office of the General Counsel, room 10276, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, DC 20410–0500.

B. Federalism Executive Order

The General Counsel, as the Designated Official under section 6(a) of Executive Order 12612, Federalism, has determined that the policies contained in this notice will not have substantial direct effects on States or their political subdivisions, or the relationship between the federal government and the States, or on the distribution of power and responsibilities among the various levels of government. As a result, the notice is not subject to review under the Order. The NOFA merely sets forth funding availability for eligible PHAs that require the assistance to undertake vacancy reduction activities.

C. Family Executive Order

The General Counsel, as the Designated Official under Executive Order 12606, The Family, has determined that this notice has potential for a significant impact on family formation, maintenance, and general well-being. The purpose of the notice is to provide funding to improve housing opportunities by reducing the number of vacant units in the inventories of PHAs, which could benefit some families significantly. However, because the impact on families would be indirect and would be beneficial, no further review is considered necessary.

D. Section 102 of the HUD Reform Act: Documentation and Public Access Requirements; Applicant/Recipient Disclosures

Disclosures. HUD will make available to the public for five years all applicant disclosure reports (HUD Form 2880) submitted in connection with this NOFA. Update reports (also Form 2880) will be made available along with the applicant disclosure reports, but in no case for a period of less than three years. All reports—both applicant disclosures and updates—will be made available in accordance with the Freedom of Information Act (5 U.S.C. 552) and HUD's implementing regulations at 24 CFR part 15. (See 24 CFR part 12, subpart C, and the notice published in the **Federal Register** on January 16, 1992 (57 FR 1942), for further information on these disclosure requirements.)

Public notice. HUD will include recipients that receive assistance pursuant to this NOFA in its quarterly **Federal Register** notice of recipients of all HUD assistance awarded on a competitive basis. (See 24 CFR 12.16(b), and the notice published in the **Federal Register** on January 16, 1992 (57 FR 1942), for further information on these requirements.)

E. Section 103 of the HUD Reform Act

HUD's regulation implementing section 103 of the Department of Housing and Urban Development Reform Act of 1989 (42 U.S.C. 3537a) was published on May 13, 1991 (56 FR 22088) and became effective on June 12, 1991. That regulation, codified as 24 CFR part 4, applies to the funding competition announced today. The requirements of the rule continue to apply until the announcement of the selection of successful applicants.

HUD employees involved in the review of applications and in the making of funding decisions are restrained by part 4 from providing advance information to any person (other than an authorized employee of HUD) concerning funding decisions, or from otherwise giving any applicant an unfair competitive advantage. Persons who apply for assistance in this competition should confine their inquiries to the subject areas permitted under 24 CFR part 4.

Applicants who have questions should contact the HUD Office of Ethics (202) 708–3815 (voice/TDD) (this is not a toll-free number). The Office of Ethics can provide information of a general nature to HUD employees, as well. However, a HUD employee who has specific program questions, such as whether particular subject matter can be discussed with persons outside the Department, should contact his or her Field Office Counsel or Headquarters counsel for the program to which the question pertains.

F. Section 112 of the Reform Act

Section 13 of the Department of Housing and Urban Development Act (42 U.S.C. 3537b), added by section 112 of the Reform Act, contains two provisions dealing with efforts to influence HUD's decisions with respect to financial assistance. The first imposes disclosure requirements on those who are typically involved in these efforts—those who pay others to influence the award of assistance or the taking of a management action by the Department *and* those who are paid to provide the influence. The second restricts the payment of fees to those who are paid to influence the award of HUD assistance, if the fees are tied to the number of housing units received or are based on the amount of assistance received, or if they are contingent upon the receipt of assistance.

Section 13 was implemented by 24 CFR part 86. If readers are involved in any efforts to influence the Department in these ways, they are urged to read part 86, particularly the examples contained in Appendix A of that part.

Any questions about part 86 should be directed to the Office of Ethics, room 2158, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, DC 20410–3000. Telephone: (202) 708–3815 (voice/TDD). (This is not a toll-free number.) Forms necessary for compliance with the rule may be obtained from the local HUD office.

G. Prohibition Against Lobbying Activities

The use of funds awarded under this NOFA is subject to the disclosure requirements and prohibitions of section 319 of the Department of Interior and Related Agencies Appropriations Act for Fiscal Year 1990 (31 U.S.C. 1352) (the "Byrd Amendment") and the implementing regulations at 24 CFR part 87. These authorities prohibit recipients of federal contracts, grants, or loans from using appropriated funds for lobbying the Executive or Legislative branches of the Federal government in connection with a specific contract, grant, or loan. The prohibition also covers the awarding of contracts, grants, cooperative agreements, or loans unless the recipient has made an acceptable certification regarding lobbying. Under 24 CFR part 87, applicants, recipients, and subrecipients of assistance

exceeding $100,000 must certify that no federal funds have been or will be spent on lobbying activities in connection with the assistance.

Authority: 42 U.S.C. 14371 and 3535(d).

Dated: June 6, 1994.

Joseph Shuldiner,

Assistant Secretary for Public and Indian Housing.

Appendix—Requirements for "Vacancy Reduction Plan" in 24 CFR 968.407

Section 968.407—Vacancy Reduction Plan

(a) *Submission of plan.* Each PHA to which this subpart applies, in accordance with § 968.403, shall submit a vacancy reduction plan. The plan shall contain the elements identified in paragraph (b) of this section, and shall be organized so that each of the elements can be identified, reviewed, and funded separately.

(b) *Contents of plan.* The format of a plan submitted for funding under this program will be defined in NOFAs to be published periodically in the **Federal Register**. Each vacancy reduction plan submitted by a PHA under paragraph (a) of this section shall include statements:

(1) Identifying all vacant dwelling units administered by the PHA, including unmarketable units, and explaining the reasons for the vacancies. Units may be grouped together when explaining the reasons for the vacancies;

(2) A description of the turnover rate of units for the past two years, including the number of units vacated and reoccupied per development per year and the average number of days required to return a unit to occupancy. If the turnover rate is increasing, the plan should identify each cause of the increase.

(3) Describing the actions to be taken by the PHA during the following five years to eliminate the vacancies. The PHA shall:

(i) State project-specific actions that it is taking or intends to take that will eliminate vacancies, such as modernization, demolition, unit redesign or conversion, density reduction, disposition, modification of occupancy policies, site and security improvements, and other physical or management improvements; and

(ii) For each project identified, set out a schedule for completing the actions identified in paragraph (b)(3)(i) of this section and removing the dwelling units from the PHA's inventory of vacant units. If the timing of any action is dependent upon a HUD approval or decisionmaking process, the schedule for the PHA action may be presented in terms of a specified time period following completion of the HUD process. For each action, the schedule shall include the number of vacancies that will be eliminated by the end of each 12-month period after the PHA begins to receive assistance under this subpart.

(iii) For units vacated during the last two years, when the PHA has been unable to return these units to occupancy within 30 days from the date the units become vacant, the plan shall describe actions planned to achieve at least a 30-day turnover rate.

(4) Identifying any impediments that will prevent elimination of the vacancies within the five-year period;

(5) Identifying any vacant units funded for modernization, major reconstruction, demolition, or disposition activities;

(6) Identifying any vacant dwelling units that are eligible for modernization, major reconstruction, demolition, or disposition, but have not been funded or approved for these activities and are not likely to be funded or approved for at least three years. The statement shall include an estimate of the amount of assistance necessary to complete the modernization, major reconstruction, demolition, or disposition of these units;

(7) Identifying any vacant units not identified under paragraphs (b)(5) and (b)(6) of this section. The statement shall include a description of any appropriate activities relating to elimination of the vacancies in these units and an estimate of the amount of assistance necessary to carry out the activities identified under this paragraph;

(8) Setting forth an agenda for implementation of management improvements during the first fiscal year beginning after submission of the plan. If the timing of any improvement is dependent upon a HUD approval or decisionmaking process, the schedule for the improvement may be presented in terms of a specified time period following completion of the HUD process. The agenda should include any management improvements recommended by the assessment team pursuant to § 968.410 and an estimate of the amount of assistance necessary to implement the management improvements; and

(9) Of any other information that the Secretary shall deem appropriate, as provided in the applicable NOFA. Such information may include budget documents, in the case of any PHA that is applying for funds under a NOFA.

(c) *Housing standards.* To the extent that a plan involves modernization, reconstruction, or rehabilitation activities that have not been funded or approved previously and are not planned to be undertaken using Comprehensive Grant Program funds, the plan must reflect cost estimates that, at a minimum, are based on:

(1) For individual work items funded under the program, compliance with modernization standards, as set forth in HUD Handbook 7485.2, as revised; and

(2) For each vacant unit on which funds are expended, compliance of the unit with the Housing Quality Standards, as set forth in 24 CFR 882.109 and as amended by the regulations concerning lead-based paint in public housing in 24 CFR part 35.

Part VI

Department of Agriculture

Forest Service

36 CFR Part 292
Hells Canyon National Recreation Area—Private Lands; Final Rule

DEPARTMENT OF AGRICULTURE

Forest Service

36 CFR Part 292

RIN 0596–AA88

Hells Canyon National Recreation Area—Private Lands

AGENCY: Forest Service, USDA.

ACTION: Final rule.

SUMMARY: This final rule implements section 10(a) of the Hells Canyon National Recreation Area Act of 1975. The Act directs the Secretary of Agriculture to promulgate rules and regulations deemed necessary to guide the use and development of private lands within the Hells Canyon National Recreation Area. This rule establishes the baseline standards of private land use and development that are compatible with the purposes of the Act and that, if not met, could result in the Secretary's use of the private land acquisition authority provided by the Act. The intended effect is to ensure that the values of the HCNRA will be protected and preserved, and as envisioned by the Act, that traditional ranching, grazing, farming, timber harvesting, and other uses can be perpetuated.

EFFECTIVE DATE: This rule is effective June 13, 1994.

FOR FURTHER INFORMATION CONTACT: Tom Lennon, Branch Chief, Special Designations, Recreation, Heritage, and Wilderness Resources Staff, Forest Service, (202) 205–1423 or Ed Cole, Area Ranger, (503) 426–4978.

SUPPLEMENTARY INFORMATION:

Background

Congress established the Hells Canyon National Recreation Area (HCNRA) by the Act of December 31, 1975 (the Act) in order to assure that the natural beauty, and historical and archaeological values of the Hells Canyon area are preserved for this and future generations, and that the recreational and ecologic values and public enjoyment of the area are thereby enhanced. Public Law 94–199, 89 Stat. 1117 at Sec. 1 (codified at 16 U.S.C. 460gg et seq.).

Section 10 of the Act directs the Secretary to promulgate such rules and regulations as are deemed necessary to accomplish the purposes of the Act, including standards for the use and development of privately owned property within the HCNRA. Section 10 further provides that the Secretary may use the land acquisition authority in section 9 of the Act to implement the rules and regulations promulgated pursuant to section 10. As for the Snake, Rapid, and Imnaha Wild and Scenic Rivers, the governing authority for land acquisition is found in section 6 of the Wild and Scenic Rivers Act. Both section 9 of the Act and section 6 of the Wild and Scenic Rivers Act restrict the Secretary's condemnation authority; i.e. acquiring land without the consent of the landowner.

On December 14, 1993, the Forest Service published a proposed rule that would establish the standards for the use and development of private lands in the HCNRA (56 FR 65300). The purpose of the proposed regulations was to make clear those circumstances which would trigger possible use of the Secretary's condemnation authority. The proposed rule established categories of private land and standards for the use and development of private land within a given category. Compliance with the standards would generally be deemed consistent with the purposes for which the HCNRA was established. Violation of the standards would generally be deemed inconsistent with the purposes for which the HCNRA was established, and, thus the lands could become the subject of federal acquisition. Thus, the proposed rule sought to make clear to affected landowners those uses that could continue or be undertaken without risk of federal acquisition.

Throughout its efforts to devise regulations applicable to private lands within the HCNRA, the Forest Service has sought to avoid direct regulation of private lands and their uses. Instead, the agency has sought to define those uses of private lands that are consistent with the purposes for which the HCNRA was established, to encourage retention of traditional and valid private land uses as established by the Act, and, thereby, to avoid having to exercise the condemnation authority granted the Secretary by the Act. Under the proposed rule, the Forest Service would not seek to regulate per se or enjoin proposed uses or developments on private land. Rather, the agency chose to set forth in the proposed rule standards for private land use and development, which establish the basis for using the secretary's land acquisition authority in the HCNRA. The proposed rule also established a mechanism by which a landowner could petition for a change in land category assignment and a mechanism by which a landowner could determine whether an existing or proposed land use or development was in compliance with the standards of the rule. The Forest Service may also initiate a noncompliance determination on its own without having first received a landowner request.

Under the proposed rule, the Secretary would not acquire the subject land or interests therein unless it was with the consent of the landowner in those cases where a landowner was in compliance with the applicable standards. If, however, the landowner was not in compliance, the Secretary could acquire a fee simple or lesser interest in the subject land without the landowner's consent. The proposed rule also provided landowners and other interested parties an opportunity to appeal a compliance or noncompliance determination.

Eight letters expressing a variety of viewpoints were received during the 60-day comment period on the proposed rule. These letters contained the views of a power company, a powerboat association, a preservation group, a local county government, another agency of the federal government, an ad hoc citizens river committee, a state agricultural organization, and a local chapter of the same organization. The comments contained in these letters have been carefully considered in the adoption of this final rule. The Department appreciates the time and energy the reviewers invested in preparing these letters and articulating their concerns on the proposed rule.

All comments received are available for review in the Office of the Director, Recreation, Heritage, and Wilderness Resources Staff, Auditors Building, 4th Floor, 201 14th Street SW at Independence Avenue SW., Washington, DC, during regular business hours (8 a.m. to 4:30 p.m.) Monday through Friday.

Analysis of Public Comment

Comments on the proposed rule dealt both with general issues, such as the scope and extent of the Secretary's authority under this rule, as well as discrete issues relating to specific provisions enumerated in the proposed rule. In addition, there were several comments urging that language in the Supplementary Information section of the proposed rule be corrected and/or clarified. A summary of the comments and the Department's response follows.

General Comments

1. Scope and Extent of the Secretary's Authority Under This Rule

Two reviewers raised a number of concerns regarding the use of the Secretary's land acquisition authority to effectuate the standards set out in the rule for private land use and development. The comments reflected

the divergent views of the reviewers and, to some degree, a misunderstanding of the system as envisioned in the proposed rule. The comments received on this issue and the Department's response follow.

Comment: The Secretary is impermissibly engaged in the zoning of private lands in the HCNRA. One reviewer suggested that the process set forth in the proposed rule which establishes land use categories and allowable uses within those categories is "zoning." Further, this same reviewer noted that the acquisition of lands without the landowner's consent is "zoning." Finally, this reviewer noted that using condemnation to ensure compliance is an extreme measure and that the Forest Service should attempt to "work in harmony" with the private landowners in the HCNRA to ensure compliance.

Response. The proposed rule does not vest the Secretary with zoning authority. Zoning is defined as the division of a community into areas in each of which only certain designated uses of land are permitted, so that a community may develop in an orderly manner.

While the end result may be the same in terms of protecting an area against potentially incompatible land uses, there is an important distinction between the exercise of a local government's zoning authority and the federal government's eminent domain authority. Zoning laws are rooted in the exercise of a state's police power (usually delegated to a subdivision of the state) to prevent persons under its jurisdiction from using their property to the detriment of the general welfare. The power of eminent domain, on the other hand, is the power to acquire, or to authorize the acquisition of, private property for a public use or purpose without the owner's consent, conditioned upon the payment of just compensation. Because, zoning laws ordinarily do not constitute a taking of property for public use for which compensation must be paid, they differ substantially from the government's right to determine the use of real estate under the power of eminent domain, which requires just compensation.

In the preamble to the proposed rule, the agency went to great length to explain that the mechanism by which the Secretary would protect the HCNRA from incompatible private land use and development was through acquisition (condemnation) rather than regulation (injunction). In the conclusion to the preamble of the proposed rule [58 FR 65304, Col. 2], the agency expressly stated that: "The proposed regulations have been carefully drafted to avoid any conflict with local zoning authority and any appearance that the Forest Service desires to regulate private land uses." Relying on acquisition authority to enforce zoning ordinances is entirely consistent with sections 9 and 10 of the Act. Moreover, this approach is the least intrusive to the private landowners in the HCNRA, and it will not duplicate the role nor supplant the authority of the local governmental units in the HCNRA.

Finally, the Department agrees with the reviewer's observation that condemnation is an extreme measure to enforce compliance with the standards set out in this rule. As was stated in the conclusion to the preamble to the proposed rule [59 FR 65304, Col. 2], "The agency views the use of condemnation authority as a last resort to protect the HCNRA," to be instituted only where other, more harmonious measures and attempts to cooperate with the landowners do not succeed.

Comment: The Secretary should more actively regulate private lands in the HCNRA. Ironically, while one reviewer asserted that the Forest Service had virtually usurped local zoning authority over the private lands in the HCNRA, another reviewer stated that the Forest Service was obligated to assert a more vigorous regulatory role over these same lands. In particular, this reviewer asserted that relying on the condemnation authority delegated to the Secretary in section 9 of the Act will not adequately protect the HCNRA and that the Forest Service must exercise its "inherent regulatory authority" over private lands that are adjacent to federal lands.

Response: In order to properly respond to this comment, the following two questions must be addressed—(1) Does the Secretary have an "inherent regulatory authority" vis-a-vis private lands in the HCNRA? and (2) If so, is its exercise necessary to comply with the HCNRA Act?

The Department does not dispute the proposition that, pursuant to the Property Clause of the Constitution, Congress has delegated to it the authority to regulate and administer National Forest System lands under the Organic Act; the Multiple-Use, Sustained-Yield Act; the National Forest Management Act; the Forest and Rangeland Renewable Resources Planning Act; the Wilderness Act; the Wild and Scenic Rivers Act; and the HCNRA Act, to name just a few. In furtherance of those enactments, regulations throughout title 36 of the Code of Federal Regulations vest broad authority in the Forest Service to manage National Forest System lands and many of the activities that occur thereon.

However, these authorities are confined to National Forest System lands and do not apply to private lands. The options regarding regulation on private lands are considerably more limited. To begin with, the Forest Service cannot "zone" private lands as that term is commonly understood. "Zoning" is an authority that is reserved to the States and their subdivisions under the Constitution. Congress examined this issue prior to the establishment of the Cape Cod National Seashore many years ago. Their analysis then is instructive today.

> The Federal Government does not have authority to directly enact zoning laws applicable to private property in any of the States. If it had such authority, the task of preserving an area such as lower Cape Cod in such a way as to safeguard the interests of private landowners might be somewhat simplified, for Congress could simply enact a zoning law for the area. However, in the division of powers between the States and the Federal Government, it is wisely left to States to adopt zoning laws * * *
>
> For this reason, [the Act] requires the Secretary of the Interior to issue regulations as soon as possible after the enactment of the bill setting forth the standards which must be met by town zoning bylaws for purposes of suspending his power of eminent domain.

The only regulatory authority that the Forest Service possesses relative to private lands is its authority as a landowner to enjoin activities on adjacent or nearby lands which threaten the National Forest land.

It is the considered judgment of the Department that the acquisition of lands or interests therein, in conjunction with locally established zoning measures, remains the most efficient and viable system to legally control potentially incompatible land use and development in the HCNRA. This is the thrust of this rule. Its success depends on the best efforts of the Forest Service, State and local governments, and landowners in the HCNRA.

However, this rule should not be construed to foreclose the Agency's right to enjoin certain activities which threaten to compromise the values for which the HCNRA was established. Whether such action is warranted would need to be decided on a case-by-case basis. In the event that a nuisance-like activity should arise in the future which threatens the HCNRA, the Forest Service would be fully authorized to exercise its prerogative as a landowner to seek to get the activity terminated or modified so as to eliminate the deleterious effects on National Forest System lands.

Comment: Snake River water rights. One reviewer suggested that the rule should address withdrawals and diversions of water from the Snake River that are used for irrigating traditional farming and ranching activities in and around the HCNRA. This reviewer urged that the rule prescribe: how much water can be diverted, the time and purpose of diversion, and whether the diversion should be phased out so water may be retained in the Snake River.

Response. The use of water from the Snake River is an integral component of many of the traditional farming and ranching operations occurring in the HCNRA. While the reviewer's concern may be legitimate and this rule would present an appropriate vehicle to address these concerns, Section 6 of the Act expressly prohibits the incorporation of these suggestions into this rule as follows: No provision of this Act, nor any regulations issued hereunder, shall in any way limit, restrict, or conflict with present and future uses of the waters of the Snake River and its tributaries upstream from the boundaries of the [HCNRA] created hereby, for beneficial uses, whether consumptive or nonconsumptive, now or hereafter existing, including, but not limited to, domestic, municipal, stockwater, irrigation, mining, power, or industrial uses.

Comments: Access to private land. One reviewer stated that access is an integral part of the traditional uses recognized under the HCNRA Act and should not be arbitrarily limited since such limitations would reduce property value and restrict traditional uses.

Response. While the reviewer did not make clear how the proposed rule would limit access to private lands, nor did the reviewer offer suggestions for addressing the access issue, the Department notes that the proposed rule was silent on the issue of access and nowhere can it be inferred that the rule would permit the Forest Service to arbitrarily limit such access. The Department does not believe that this rule needs to address access, since section 1323 of the Alaska National Interest Lands Conservation Act (ANILCA) requires that access be granted to nonfederally owned lands located within the National Forest System. Agency rules at 36 CFR part 254, subpart E implement section 1323 and already apply to private lands within the HCNRA which are subject to the terms and conditions for reasonable ingress and egress that may be imposed by the Forest Service.

Comment: Monitoring. One reviewer noted that the proposed rule failed to establish a system whereby the use and development of private land in the HCNRA could be monitored by the Forest Service to detect violations. According to this reviewer, the rule is "grossly deficient, and contrary to law in this respect."

Response. While there was no provision for monitoring in the proposed rule, this rule is not somehow legally insufficient as a result. Monitoring by the Forest Service can occur in a number of ways and need not be expressly provided for or authorized in this rule. For instance, monitoring can occur by reviewing the actions of the local government regarding private land use and development issues. The Forest Service also can and does monitor private land use and development through routine aerial photographs for fire prevention and control, forest pest management, and landscape planning and management and on-the-ground observations from adjacent National Forest land. Additionally, where the Forest Service receives permission from the landowner, monitoring could also be accomplished via an on-site investigation.

In the proposed rule, monitoring also would be accomplished through the compliance determination process which is optional on the part of the landowner. Although the Department believes that monitoring was never eliminated from the Forest Service's responsibilities by the proposed rule, it also believes that monitoring is so important that it would like to make clear that the Forest Service may monitor the uses and developments on private lands at any time it believes it has good reason to be concerned about the protection of the values for which the HCNRA was established. To emphasize this point, the final rule adds a new standard in § 292.24, paragraph (b)(2) which states that the Forest Service may initiate the compliance process on its own without having first received a landowner request. This standard clearly shows that the Forest Service may initiate the determination of compliance process, where the agency has reason to believe, based on monitoring or other information, that the landowner may be violating the standards for private land use and development established by this rule.

Specific Comments on Proposed Subpart E of 36 CFR Part 292

The following is a discussion of comments that were received pertaining to specific sections of the proposed rule and the changes, if any, resulting from the comments. No comments were received on § 292.20, Purpose and Scope, or on § 292.25, Information Requirements, and no substantive modifications have been made to the text of these sections, although editing for improved readability and word choice was made. Accordingly, neither section is set out for further discussion.

Section 292.21 Definitions

This section listed and defined special terms used in this subpart.

Comment: "Farm/forest/grazing lands." Two reviewers suggested that the definition of "farm/forest/grazing lands" be modified to eliminate references to watershed protection, fish & wildlife habitat maintenance and recreational activities as purposes for which farm/forest/grazing lands may be used. These reviewers felt that these additional non-farming uses could pose burdensome and expensive requirements on the management of farming or grazing operations.

Response. The reviewers' concern that this definition would result in the imposition of additional requirements on their operations is unfounded. The subject definition is set out in the disjunctive. In other words, farm/forest/grazing lands may be used for farm/forest/grazing purposes or for watershed purposes, or for fish & wildlife purposes, or for recreational purposes, or for a combination of the above. The inclusion of these terms in this definition does not imply that new requirements would be incorporated into ongoing farming and ranching operations in the HCNRA. Of course, these farming and ranching operations are still subject to applicable federal, state, and local laws and ordinances. Therefore, the definition is adopted without change from the proposed rule. However, on consideration of the comments on the term "farm/forest/grazing lands," the Department has determined that the definition of "farm/forest/grazing uses" should be modified so that it more closely parallels the definition of "farm/forest/grazing lands." To that end, a new second sentence has been included in the "farm/forest/grazing use" definition which recognizes that uses related to watershed protection, fish and wildlife habitat maintenance, and recreational activities may also be undertaken on these lands. Again, because these activities may be undertaken does not signify that they must be undertaken. The definition of "farm/forest/grazing use" also has been rearranged for ease of reading and comprehension.

Comment: "Land modification." One reviewer noted that the definition of "land modification" in the proposed

rule included road construction as an example but that the circumstances under which road construction would be accommodated in conjunction with access needs for the purpose of maintaining and constructing utility facilities were unclear.

Response. The Department agrees that the potential applicability of the definition of "land modification" to utility maintenance activities is unclear. Indeed, while "land modification" was included in § 292.21 of the proposed rule, it was not used elsewhere; therefore, it has been deleted from the final rule. Absent this term, the Department construes the standard at § 292.23(a)(4) of the final rule as accommodating reasonable road access to utility facilities provided that such access is associated with the routine and necessary maintenance of these facilities.

In addition, further review of the definition section disclosed that the terms, "Comprehensive management plan," "seasonal feedlots," and "zoning", were not used in the proposed rule; accordingly, those terms have not been retained in the final rule. All other terms and their definitions are retained without change in the final rule.

Section 292.22 Land Category Assignments

The proposed rule established four categories to which private lands in the HCNRA would be assigned and would require that maps showing private lands and the categories to which they have been assigned be on file and available for public inspection at the Ranger's office.

Comment. One reviewer complained that the map identifying the private lands in the HCNRA and the land use category to which they had been assigned was not available for review during the comment period on the proposed rule.

Response. The Department regrets that the map was unavailable, since this could have been of some assistance to the parties in the preparation of their comments on the rule. The Department has modified this section in the final rule to require the map (or maps) to be prepared and available for review not later than 60 days after the effective date of this regulation and also to require the Ranger to give notice of the availability of the maps in the local newspapers of record. If any parties are concerned about a specific land category assignment, they can make their concerns known to the Forest Service at that time, and the Forest Service will consider these concerns prior to the adoption of a final map. No other changes were made to this section.

Section 292.23 Standards of Compatible Land Use and Development

The proposed rule would establish standards of private land use and development that reflect traditional and valid uses of private lands in existence as of December 31, 1975 for four categories of land use. These categories were farm/forest/grazing, mining, residential, and commercial land. The standards for these land categories were intended to guide the Ranger in determining whether uses of a private parcel are compatible with the purposes for which the HCNRA was established. Some standards applied to all categories of private lands, while others were specific only to a particular land category. Standards were prescribed to allow conformity of private land uses and developments with the laws of various jurisdictions. Among other things, the proposed rule set standards for the screening and blending of new and replacement structures, banned solid waste and hazardous substance disposal sites, required utility lines to be buried, disallowed new or replacement structures in wilderness, and provided for the protection of historic and archaeological sites.

Comment: Expense of underground utility installation. One reviewer noted that the standard in § 292.23(a)(4) regarding the placement of new or replacement of existing utility lines underground could be prohibitively expensive and environmentally damaging.

Response. While this standard clearly establishes a preference for underground utility installation wherever feasible, the Department is well aware of the rugged and varied terrain in the HCNRA and the difficulty, if not impossibility, of installing utility lines underground in certain areas. It is for that reason that the standard in the proposed rule regarding underground utility installation included the caveat "where ground conditions and topography permit." Therefore, a change in the final rule was necessary. It is recognized that, by necessity, the evaluation of the location of utility lines must be made on a case-by-case basis.

Comment: Wilderness structures. One reviewer opposed the standard in § 292.23(a)(5) which provided that no new structures could be developed on private lands within the boundaries of the Hells Canyon Wilderness in the HCNRA. This reviewer stated that this standard oversteps the professed bounds of the law. This reviewer further contended that such a restriction should apply only if the structure would be visible from the wilderness, since otherwise there would be no negative effect on anyone's wilderness experience. The reviewer also stated that nothing in the Wilderness Act permitted wilderness visitors to trespass on private lands.

Response. The intent of the rule is, where deemed necessary, to apply the same standards for private land uses and developments to lands within the designated wilderness boundaries, as would be applied outside of wilderness. Under the proposed rule, those lots within wilderness would be classified as farm/forest/grazing lands. Most of the private land parcels within wilderness are less than 160 acres, and so, even without the wilderness lands restriction, the proposed rule would not consider the development of any new residences appropriate.

In developing the proposed rule, the Department determined that the protection of the wilderness resource is paramount. Congress designates wilderness to protect and preserve a variety of natural resource and other values; scenic value is only one of many attributes. Uses and developments on private lands have the potential to impact a full range of wilderness values, including scientific, cultural, historical, and water quality values. One of the most important aspects of the recreational experience within wilderness is the opportunity for solitude and to experience an area where man is only a temporary visitor. A standard which would allow development of new structures so long as they are not visible from the wilderness simply ignores the fact that other, non-visual impacts may result from the construction of new structures. Furthermore, the Forest Service is unaware of any location from which a new structure could be developed within the wilderness and also not be visible because of the area's topography. As noted in the proposed rule, the repair and maintenance of existing structures that may be located on private land within a wilderness is not affected by this standard. Therefore, after considering this comment, no change was made in the final rule regarding the construction of new or replacement structures in wilderness.

Comment: Lack of standards for livestock grazing, timber harvesting, pesticide application, water quality, and ground disturbing activities. One reviewer objected to the lack of standards in the proposed rule for livestock grazing, timber harvesting, pesticide use, water quality protection,

and ground disturbing activities on private lands.

Response. This concern is fully addressed by the proposed rule. In determining what approach it should take to the regulation of private lands, the Forest Service determined that if other federal, state, and local laws and ordinances are enforced, then the HCNRA Act's purposes would be accomplished. Accordingly, in developing the proposed rule, the agency assessed existing ordinances and laws for their capability to protect on private lands the values for which the HCNRA was established. In many instances, the proposed rule expressed these local ordinances as standards.

However, the proposed rule made it very clear that other laws would be enforced; if not by the promulgating government, then, if necessary, by the Forest Service through acquisition (condemnation) action. In § 292.23 paragraph (a)(1), the final rule retains the language of the proposed rule, with minor editing, to make clear that land uses are compatible if they conform to applicable local, state, and federal laws. This provision is intended to cover such matters as those referred to by the reviewer. Examples of the types of ordinances and laws that this clause refers to include the following: Oregon Forest Practices Act; Idaho Forest Practices Act; Idaho Water Quality Standards and Wastewater Treatment Requirements; Oregon Water Quality Standards; and the Idaho Agricultural Pollution Abatement Plan. The Department is not aware of any situation which merits standards different from those currently imposed by other laws. The proposed rule addressed the concerns raised by this reviewer by providing for compliance with environmental and other laws and ordinances. Therefore, no modification has been made in the final rule as a result of this comment.

Additional Changes Adopted in the Final Rule

In the process of reviewing the comments on § 292.23, the Department recognized the need to make two other changes.

1. *Residences on less than 160 acre parcels in farm/forest/grazing lands.* As drafted, the provision at § 292.23(b)(1) that limits residences on farm/forest/grazing lands to minimum lots of 160 acres could be interpreted to mean that an existing house on a lot that is less than 160 acres would prompt the Secretary to exercise the acquisition authority. This is not the Department's intent. It is recognized that some of these smaller parcels have existed with residential developments for years and there is no reason that they should not continue as a recognized nonconforming use. Consequently, the final rule is modified to make clear that nonconforming lots (i.e., less than 160 acres) with permanently affixed residences (i.e., constructed on a foundation or basement), existing on the effective date of the final rule, are in compliance with the Act.

2. *Sites used for the extraction of common mineral materials.* The proposed rule, at § 292.23 (a)(7), would only allowed extraction of common materials for road construction and maintenance and would limit sites to not exceed 5 acres. The use limitation ignored other forms of construction that may also use smaller quantities of materials, such as in the repair or construction of structures. It is impractical to require a landowner to find a gravel source outside of the HCNRA boundaries, when a source may exist already within a mile of his or her property. Upon reconsideration, the 5 acre size limit appears to be excessive for the foreseen uses for this resource and the esthetic concerns for the HCNRA. Therefore, the final rule is modified to eliminate the references to only road construction and maintenance and to decrease the size limit to not exceed 2 acres. As written, the final rule may be more generally applied to the extraction of common mineral materials for construction and maintenance purposes so long as these sites have screening and are less than 2 acres in size.

Section 292.24 Determination of Compliance and Noncompliance

Under the proposed rule, this section provided an optional compliance determination process so that the landowner could obtain assurance from the Ranger that existing or proposed uses of their land are compatible with the Act and thus would not be acquired by the Secretary without their consent. A notice of noncompliance would mean that a proposed or actual land use does not comply with the standards in § 292.23 and thus, could potentially trigger the initiation of the Secretary's land acquisition authority, as authorized by the Act. This section also proposed a process for reviewing a compliance or noncompliance decision.

Comment: Noncompliance results in condemnation. One reviewer thought that the system to determine compliance or noncompliance was flawed because a finding of noncompliance resulted in condemnation.

Response. Condemnation is one option that may be considered in the event of a noncompliance determination. However, it is not the only option. The proposed rule clearly states that if the Forest Service makes a noncompliance determination, it will offer suggestions on how the land use or development could be modified to avoid this result. As noted previously, condemnation is not the tool of choice to enforce compliance with the standards of this rule—it is the last resort. In administering the HCNRA, the Forest Service position has been, and will continue to be, one which favors discussion, negotiation, and cooperation with landowners to reach mutually satisfactory objectives wherever possible.

Comment: Written petition. Three reviewers requested that the procedure to appeal a determination of compliance or noncompliance be modified to exclude "other interested parties." These reviewers felt that the petition process provided by this rule should be strictly limited to the Forest Service and the affected landowner and that the involvement of outside parties would unnecessarily complicate and prolong the process. Another reviewer supported the petition process as set out in the proposed rule.

Response. The Department agrees with the reviewers that requests for reviews of compliance and noncompliance determinations involving "other interested parties" could be unnecessarily cumbersome and time consuming and that the review process should be limited to those directly affected, i.e. the landowner whose property was the subject of the determination. Accordingly, in the final rule, paragraph (c) of § 292.24 has been revised to limit petitions for review to affected landowners.

Comment: Acquiescence to local zoning ordinances and administration. One reviewer felt that the compliance/noncompliance determination procedure should be discarded in favor of a system in which proposals for use and development of private land in the HCNRA would be channeled through the existing local mechanisms provided under the Wallowa County Land Use Development Ordinance and the Wallowa County Comprehensive Land Use Plan. In this alternative, the HCNRA Ranger's role would be limited to that of an interested party who would be able to testify in favor of or in opposition to a proposed use or development. However, if the Ranger opposed the proposal, it would be his or her burden to prove that the proposal is contrary to the County Ordinance and Plan. According to this reviewer, it is only through this mechanism that the

standard of local citizen involvement required by state and local law would be satisfied.

Response. This alternative is not one that the Department can implement and remain consistent with its responsibilities under the HCNRA Act. The federal interest must be protected and cannot be dependent upon, or subservient to, state and local zoning decisions. In effect, this alternative would relegate the Forest Service to the status of an interested party whose comments would be considered by the County in the context of a pending development or use proposal. Forest Service comments would not be binding on the commission, nor would they necessarily even be persuasive. It is difficult to comprehend how the Forest Service could carry out its responsibilities under the HCNRA Act and effectively ensure that activities on the private lands not impair the values for which Congress established the HCNRA under this system.

It is the hope of the Department that the procedures currently in place at the state and local level will suffice to condition, restrict, or preclude many incompatible uses or developments in the HCNRA. The standards adopted by the final rule are from local zoning ordinances and applicable laws that already adequately protect the HCNRA. The County's disposition of pending development proposals should, in most cases, result in decisions that are compatible with the purposes of the HCNRA Act. However, in the event uses or developments are incompatible, or in the event that the County Ordinances and Plan are amended in such a way as to lessen the restrictions on private lands which would thereby increase the potential threat to the HCNRA, then the Forest Service must have the ability to enforce the standards needed to protect the HCNRA. The rule as proposed provides this protection. Therefore, no change was made to § 292.24 in response to this comment.

Finally, the heading for § 292.24 was edited for clarity to read: "Determination of compliance and noncompliance."

Conclusion

Having carefully considered the comments received on the proposed rule, and explained the basis for adopting or not adopting changes proposed by reviewers, the Department hereby adopts a final rule to ensure that the use and development of private lands within the Hells Canyon Recreation Area are compatible with the purposes for which Congress established the Area and its management direction.

The standards established by the final rule are those essential to protection of the Area. The approach adopted is not one of direct federal regulation of private land but rather one of relying, to the greatest extent possible, on local zoning authority. The rule gives private landowners notice of those uses that are compatible with the purposes of the HCNRA, provides a mechanism whereby the landowner and the agency may determine compliance or noncompliance with the standards of the rule and gives constructive notice to private landowners that incompatible uses of private land may trigger the use of the Secretary's condemnation authority. Nevertheless this rule is predicated on the premise that the use of the Secretary's condemnation authority is to be a last resort and that the agency shall make every effort to work harmoniously and cooperatively with private landowners to ensure protection of the HCNRA.

Regulatory Impact

This final rule has been reviewed under USDA procedures and Executive Order 12866 on Regulatory Planning and Review. It has been determined that this is not a significant rule. This rule will not have an annual effect of $100 million or more on the economy nor adversely affect productivity, competition, jobs, the environment, public health or safety, nor state or local governments. This rule will not interfere with an action taken or planned by another agency nor raise new legal or policy issues. Finally, this action will not alter the budgetary impact of entitlements, grants, user fees, or loan programs or the rights and obligations of recipients of such programs. Accordingly, this final rule is not subject to OMB review under Executive Order 12866.

Moreover, this final rule has been considered in light of the Regulatory Flexibility Act (5 U.S.C. 601 et seq.), and it has been determined that this action will not have a significant economic impact on a substantial number of small entities as defined by that Act. To the extent that the rule imposes additional requirements on any small entity, these requirements are the minimum necessary to protect the public interest, are not administratively burdensome or costly to meet, and are well within the capability of small entities to perform.

Takings Implication

Since this rule is premised on the formal exercise of the Secretary's eminent domain authority, it is not an "action" as that term is defined in Section 2(c)(1) of Executive Order 12630. Nonetheless, the Office of General Counsel has reviewed this rule for takings implications and determined that there is no risk of a taking related to this rule or its implementation.

Executive Order 12778, Civil Justice Reform Act

This rule has been reviewed under Executive Order 12778, Civil Justice Reform. Accordingly, (1) all state and local laws and regulations that are in conflict with this rule or which impede its full implementation are preempted; (2) no retroactive effect will be given to this rule; and (3) it will not require administrative proceedings before parties could file suit in court challenging its provisions.

Environmental Impact

This rulemaking was discussed as a proposed rule in the final Environmental Impact Statement and Comprehensive Management Plan for the Hells Canyon National Recreation Area, pages 155–158. The analysis completed for the Comprehensive Management Plan was revalidated in April 1990 with the signing of the Wallowa-Whitman National Forest Land and Resource Management (pages 1–2). Information pertaining to the environmental analysis may be obtained by writing or calling the persons or offices listed under **ADDRESSES** and **FOR FURTHER INFORMATION CONTACT**.

Information collection requirements

As outlined in the rule at § 292.24, a landowner may request an optional compliance determination from the Forest Service. As such, this rule contains information requirements as defined in 5 CFR Part 1320. These information requirements are assigned control number 0596–0135 and are approved for use through March 1997.

List of Subjects in 36 CFR Part 292

Recreation and recreation uses, and National forest.

Therefore, for the reasons set forth in the preamble, part 292 of title 36 of the Code of Federal Regulations, is amended by adding a new subpart E to read as follows:

PART 292—NATIONAL RECREATION AREAS [AMENDED]

Subpart E—Hells Canyon National Recreation Area—Private Lands

Sec.

292.20 Purpose and scope.
292.21 Definitions.
292.22 Land category assignments.

292.23 Standards of compatible land use and development.
292.24 Determination of compliance and noncompliance.
292.25 Information requirements.

Authority: 89 Stat. 1117; 16 U.S.C. 460gg–460gg–13.

Subpart E—Hells Canyon National Recreation Area—Private Lands

§ 292.20 Purpose and scope.

(a) *Purpose.* The Act establishing the Hells Canyon National Recreation Area (hereafter referred to as HCNRA) (16 U.S.C. 460gg–460gg–13) encourages the retention of traditional and valid uses of private land within the HCNRA, such as ranching, grazing, farming, timber harvesting, and the occupation of homes and lands associated therewith, as they existed at the time the HCNRA was established on December 31, 1975. To this end, the Act directs the Secretary of Agriculture to promulgate regulations establishing standards for the use and development of private land within the HCNRA and grants the Secretary limited condemnation authority to address situations where the standards are not met. The purpose of this subpart is to establish standards that would guide the Secretary's consideration of the use of the limited condemnation authority granted by the Act.

(b) *Scope.* The regulations in this subpart establish standards applicable to all private property within the boundaries of the HCNRA, including that within the boundaries of the Rapid, Snake, and Imnaha Wild and Scenic Rivers and the Hells Canyon Wilderness. The regulations in this subpart do not operate to restrict the use and development of private property; rather, they serve to inform the landowner of those uses that are compatible with purposes for which the HCNRA was established. Uses not compatible with these standards could result in the Secretary acquiring land or interests therein without a landowner's consent.

The regulations in this subpart, in and of themselves, do not effect a taking of private property, including valid, existing water rights, nor do the standards established in this subpart limit or restrict a private landowner's property use that is compatible with the purposes of the Act. The Responsible Official may use the regulations in this subpart solely to determine whether private land uses or developments are compatible with the purposes and direction of the Act and, if not, to determine whether the Secretary should consider initiating condemnation proceedings to acquire land or scenic easements.

§ 292.21 Definitions.

For the purposes of this subpart, the following terms are defined:

Act refers to the act of December 31, 1975, which established the Hells Canyon National Recreation Area (89 Stat. 1117; 16 U.S.C. 460gg–460gg–13).

Archaeological sites are those sites containing relics, artifacts, and other evidence of past human cultures including historic properties as defined by the National Historic Preservation Act.

Commercial land is land within the HCNRA developed for commercial purposes as of June 13, 1994 and which is assigned to the commercial land category (§ 292.22).

Condemnation is the acquisition of lands or interests therein by the Secretary without the consent of the owner. In the case of the Act, condemnation is a limited authority that may be exercised by the Secretary only in the event that a standard or standards set forth herein are violated for all private land categories except mining lands. Where mining lands are involved, the Secretary may exercise his or her condemnation authority notwithstanding the fact that the mining land owner has complied with the relevant standards of this section.

Conservation easement or *Scenic easement* as defined in Section 9(d) of the Act "means the right to control the use of land in order to protect aesthetic values for the purposes of this Act, but shall not be acquired without the consent of the owner to preclude the continuation of any farming or pastoral use exercised by the owner as of the date of enactment of this Act."

Dude ranching is a business oriented primarily towards furnishing small groups with an outdoor recreational and educational experience associated with ranching activities and perpetuates the purposes for which the HCNRA was established. Dude ranching is subservient to the primarily recognized ranching operation.

Existing uses are those uses of or developments to private land as of the date of enactment of the Act on December 31, 1975.

Farm/Forest/Grazing lands are those lands used for farm, forest, and grazing purposes, for maintaining watersheds as fish and wildlife habitat, or for providing outdoor recreational activities. All such lands are assigned to the Farm/Forest/Grazing land category in § 292.22.

Farm/Forest/Grazing Use is any traditional agricultural, silvicultural, or livestock management use or combination thereof on farm/forest/grazing lands within the HCNRA. This includes, but is not limited to, truck farming, growing and harvesting of timber, grazing of livestock, horticultural use, animal husbandry use, horse, cattle, and sheep ranching, and preparation and storage of the products raised on farm/forest/grazing land for on-site use or for disposal by marketing or otherwise. Farm/forest/grazing uses may also consist of uses related to and in furtherance of the protection of watersheds, maintenance of fish and wildlife habitat, and the pursuit of recreational activities.

Hazardous substance includes any material so classified under the Comprehensive Environmental Response, Compensation and Liability Act of 1980, as amended (42 U.S.C. 9601 et seq.).

Mining lands are lands primarily used for mining purposes as of June 13, 1994 and which are assigned to the mining land category in § 292.22.

Outdoor recreational activities are activities such as camping, picnicking, rafting, boating, hiking, rock climbing, fishing, hunting, horseback riding, and the viewing of wildlife or scenery.

Parcel as used in this subpart refers to contiguous tax lots under one ownership. For the purposes of this subpart, rights-of-way do not divide parcels into smaller units.

Partition is the division of land into lots, and which, under county planning ordinances, is identified by a map, drawing, or writing which contains the descriptions, locations, specifications, and dedications for roads, utilities, etc. and which has been properly filed with the County recorder.

Private land is land not in federal, state, or local government ownership.

Proposed uses are those uses of or development to a private land parcel within the HCNRA initiated after June 13, 1994.

Ranger is the HCNRA Area Ranger, Wallowa-Whitman National Forest, with offices located in Enterprise, Oregon, Riggins, Idaho, and Clarkston, Washington, except for the Rapid Wild and Scenic River where the term refers to the Salmon River District Ranger, Nez Perce National Forest, located in Whitebird, Idaho.

Recreational facilities are facilities associated with or required for outdoor recreational activities and include, but are not limited to, parks, campgrounds, hunting and fishing lodges, and interpretive displays.

Residential lands are lands within the HCNRA developed for residential purposes as of June 13, 1994 and which

are assigned to the Residential land category in § 292.22.

Scenic Easement. See *Conservation Easement.*

Screening is the reduction or elimination of the visual impact of any structure or land modification as seen from any public travel route within the HCNRA.

Solid waste is discarded solid materials resulting from mining, industrial, commercial, agricultural, silvicultural, and community activities. This term does not include domestic sewage or pollutants such as silt or dissolved materials in irrigation return flows.

Structure is any permanent building or facility, or part thereof such as barns, outhouses, residences and storage sheds. This includes electric transmission line systems, substations, commercial radio transmitters, relays or repeater stations, antennas, and other electronic sites and associated structures.

Traditional uses are ranching, grazing, farming, timber harvesting and the occupation of homes and land associated therewith within the HCNRA, or other activities including outdoor recreational activities and facilities, which existed on or before December 31, 1975.

Travel route is a route, such as a county or National Forest system road or river or trail, that is open for use by members of the general public.

§ 292.22 Land category assignments.

(a) *Land categories.* (1) All privately owned lands within the HCNRA are to be assigned to one of the following four land categories:

(i) Farm/forest/grazing land.

(ii) Mining land.

(iii) Residential land.

(iv) Commercial land.

(2) Not later than August 12, 1994, a map or maps displaying the privately owned lands within the HCNRA and the land categories to which they have been assigned must be on file and available for public inspection at the Ranger's office. The Ranger shall give notice of the availability of this map or maps in the local newspapers of record.

(b) *Changes in land category assignment.* Lands assigned to the Commercial, Residential, or Mining category may be reclassified as farm/forest/grazing land so long as the intended use or development is consistent with the standards in § 292.23 and the Ranger has given public notice of the proposed change in the local newspaper of record and has notified adjacent landowners and the affected county government at least 30 days prior to any decision on the proposed change.

§ 292.23 Standards of compatible land use and development.

Private land use that conforms to the standards of this section is deemed to be compatible with the purpose for which the HCNRA was established.

(a) *Standards applicable to all private lands.* As of June 13, 1994, the use and development of private lands in all land categories within the HCNRA is deemed compatible with the purposes for which the HCNRA was established, if the use and development of such lands meets the following standards:

(1) Use and development conforms to applicable local, state, and federal environmental, natural resource, cultural resource, and land use development law.

(2) All new or replacement structures are screened and/or constructed of materials that blend with the natural environment, except where structures typify the architectural style and materials of a significant historic era such as pre-World War II. Screening is not required, however, for new or replacement structures that are associated with an existing unscreened structure or structures that were not screened at the time this rule became effective.

(3) No public or commercial solid waste disposal sites or hazardous substance disposal sites are located on private lands within the HCNRA.

(4) All new or replacement utility lines are placed underground where ground conditions and topography permit. This standard does not prevent or impair routine maintenance of utility lines or related structures in existence prior to June 13, 1994.

(5) No new or replacement structures are developed within the boundaries of the Hells Canyon Wilderness, provided that existing structures may be repaired and/or maintained.

(6) Significant historic, archaeologic, or paleontologic sites are protected.

(7) Sites used for the extraction of common mineral materials, such as gravel, for construction and maintenance purposes on all except designated mining lands, are screened where possible, and are not in excess of 2 acres in size.

(8) New recreational facilities enhance and are compatible with the purpose of the Act.

(b) *Farm/forest/grazing lands standards.* The following additional standards are applicable to farm/forest/grazing lands:

(1) Except as otherwise provided in this paragraph, the minimum lot size for residential development is 160 acres. Only residences associated with farm/forest/grazing uses may be developed. Partitions of less than 160 acres may be made to provide for the continuation of existing commercial agriculture, but such partitions may not be developed for residential use. Lots of less than 160 acres existing on June 13, 1994, with residences permanently affixed to a foundation or basement, are considered to be in compliance.

(2) Structures are limited to those necessary to conduct farm/forest/grazing use.

(3) Dude ranching is permitted provided it is compatible with the purpose and direction of the Act and is part of a recognized ranching operation.

(4) New or replacement structures for farm/forest/grazing use are not closer than 25 feet from a property line or 55 feet from the center line of a travel route.

(c) *Mining Lands.* (1) The following standards are applicable to mining lands:

(i) The owner of mining lands must consult with the Ranger concerning proposed mineral development activities prior to submitting a plan of operations to the relevant state or federal agencies.

(ii) Operations comply with Federal and State mining, air quality, water quality, hazardous waste, water disposal and reclamation standards.

(iii) The type and number of structures, including but not limited to residences associated with the mining activity, are limited to the minimum necessary for the use and development of the mining lands.

(iv) No new structures are located closer than 25 feet from a property line or 55 feet from the center line of a travel route.

(v) Mining lands are not partitioned.

(2) Notwithstanding compliance with the standards of paragraph (c)(1) of this section, the Secretary may acquire mineral interests in the HCNRA without the consent of the owner, if the Secretary deems this necessary to meet the purposes for which the HCNRA was established.

§ 292.24 Determination of compliance and noncompliance.

(a) *Compliance.* Landowners may request a determination by the Forest Service as to whether an existing or a proposed use or development complies with the relevant standards set out in this subpart.

(1) Requests for a determination of compliance must be made in writing to the Ranger and include the following information:

(i) The current land category to which the land is assigned (§ 292.23);

(ii) The use of development that exists or that is proposed for the property;

(iii) A statement as to whether a change in the land category assignment will be necessary to accommodate the proposed use or development;

(iv) The timeframe for implementing the proposed use or development; and

(v) A statement as to how the proposed use or development satisfies the relevant standards of § 292.23 of this subpart.

(2) The Ranger shall review the request and notify the landowner in writing within 45 days whether the existing or proposed use or development is in compliance with § 292.23 of this subpart. The Ranger may extend the time for making a compliance determination by 30 days if additional information is needed.

(b) *Noncompliance.* (1) In the event that the Forest Service determines that an existing or proposed use of development is not in compliance with the standards of § 292.23 of this subpart, the Ranger shall give the landowner written notice of the manner and nature of noncompliance. To the extent practicable, the notice will include suggestions for achieving compliance. The notice also must include a statement that the violation of a standard or standards and the failure to cure such violation may result in the initiation of condemnation proceedings by the Secretary.

(2) The Forest Service may initiate a noncompliance determination on its own without having first received a landowner request.

(c) *Written petition.* The landowner may file a written petition with the Forest Supervisor for a review of a decision of compliance or noncompliance. The Forest Supervisor shall render a decision within 30 days of the receipt of the petition. A decision by the Forest Supervisor constitutes the final administrative determination by the Department of Agriculture. Petitions of decisions on lands within the Rapid River Wild and Scenic River Corridor should be addressed to the Forest Supervisor, Nez Perce National Forest, Route 2, P.O. Box 475, Grangeville, Idaho 83450. All other petitions should be addressed to the Forest Supervisor, Wallowa-Whitman National Forest, P.O. Box 907, Baker City, Oregon 97814.

§ 292.25 Information requirements.

The information required by § 292.24 of this subpart in order for a landowner to obtain a determination of compliance constitutes an information requirement as defined in the Paperwork Reduction Act (44 U.S.C. 3507) and has been approved for use by the Office of Management and Budget and assigned control number 0596–0135.

Dated: June 6, 1994.

James R. Lyons,

Assistant Secretary, Natural Resources and Environment.

LIST OF PUBLIC LAWS

Note: No public bills which have become law were received by the Office of the Federal Register for inclusion in today's **List of Public Laws.**

Last List June 6, 1994

CFR CHECKLIST

This checklist, prepared by the Office of the Federal Register, is published weekly. It is arranged in the order of CFR titles, stock numbers, prices, and revision dates.

An asterisk (*) precedes each entry that has been issued since last week and which is now available for sale at the Government Printing Office.

A checklist of current CFR volumes comprising a complete CFR set, also appears in the latest issue of the LSA (List of CFR Sections Affected), which is revised monthly.

The annual rate for subscription to all revised volumes is $829.00 domestic, $207.25 additional for foreign mailing.

Mail orders to the Superintendent of Documents, Attn: New Orders, P.O. Box 371954, Pittsburgh, PA 15250–7954. All orders must be accompanied by remittance (check, money order, GPO Deposit Account, VISA, or Master Card). Charge orders may be telephoned to the GPO Order Desk, Monday through Friday, at **(202) 783–3238** from 8:00 a.m. to 4:00 p.m. eastern time, or FAX your charge orders to **(202) 512-2233**.

[1] Because Title 3 is an annual compilation, this volume and all previous volumes should be retained as a permanent reference source.

[2] The July 1, 1985 edition of 32 CFR Parts 1–189 contains a note only for Parts 1–39 inclusive. For the full text of the Defense Acquisition Regulations in Parts 1–39, consult the three CFR volumes issued as of July 1, 1984, containing those parts.

[3] The July 1, 1985 edition of 41 CFR Chapters 1–100 contains a note only for Chapters 1 to 49 inclusive. For the full text of procurement regulations in Chapters 1 to 49, consult the eleven CFR volumes issued as of July 1, 1984 containing those chapters.

[4] No amendments to this volume were promulgated during the period Apr. 1, 1990 to Mar. 31, 1994. The CFR volume issued April 1, 1990, should be retained.

[5] No amendments to this volume were promulgated during the period Apr. 1, 1991 to Mar. 31, 1993. The CFR volume issued April 1, 1991, should be retained.

[6] No amendments to this volume were promulgated during the period July 1, 1991 to June 30, 1993. The CFR volume issued July 1, 1991, should be retained.

[7] No amendments to this volume were promulgated during the period January 1, 1993 to December 31, 1993. The CFR volume issued January 1, 1993, should be retained.

Public Laws

103d Congress, 2d Session, 1994

Pamphlet prints of public laws, often referred to as slip laws, are the initial publication of Federal laws upon enactment and are printed as soon as possible after approval by the President. Legislative history references appear on each law. Subscription service includes all public laws, issued irregularly upon enactment, for the 103d Congress, 2d Session, 1994.

(Individual laws also may be purchased from the Superintendent of Documents, Washington, DC 20402–9328. Prices vary. See Reader Aids Section of the Federal Register for announcements of newly enacted laws.)

Briefing on How To Use the Federal Register
For information on a briefing in Washington, DC, see announcement on the inside cover of this issue.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The seal of the National Archives and Records Administration authenticates this issue of the **Federal Register** as the official serial publication established under the Federal Register Act. 44 U.S.C. 1507 provides that the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper, 24x microfiche and as an online database through *GPO Access*, a service of the U.S. Government Printing Office. The online database is updated by 6 a.m. each day the **Federal Register** is published. The database includes both text and graphics from Volume 59, Number 1 (January 2, 1994) forward. It is available on a Wide Area Information Server (WAIS) through the Internet and via asynchronous dial-in. The annual subscription fee for a single workstation is $375. Six-month subscriptions are available for $200 and one month of access can be purchased for $35. Discounts are available for multiple-workstation subscriptions. To subscribe, Internet users should telnet to wais.access.gpo.gov and login as newuser (all lower case); no password is required. Dial in users should use communications software and modem to call (202) 512–1661 and login as wais (all lower case); no password is required; at the second login prompt, login as newuser (all lower case); no password is required. Follow the instructions on the screen to register for a subscription for the **Federal Register** Online via *GPO Access*. For assistance, contact the *GPO Access* User Support Team by sending Internet e-mail to help@eids05.eids.gpo.gov, or a fax to (202) 512–1262, or by calling (202) 512–1530 between 7 a.m. and 5 p.m. Eastern time, Monday through Friday, except Federal holidays.

The annual subscription price for the **Federal Register** paper edition is $444, or $490 for a combined **Federal Register**, Federal Register Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the Federal Register Index and LSA is $403. Six month subscriptions are available for one-half the annual rate. The charge for individual copies in paper form is $6.00 for each issue, or $6.00 for each group of pages as actually bound; or $1.50 for each issue in microfiche form. All prices include regular domestic postage and handling. International customers please add 25% for foreign handling. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA or MasterCard. Mail to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250–7954.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 59 FR 12345.

THE FEDERAL REGISTER
WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present:

1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

WASHINGTON, DC

WHEN: June 23 at 9:00 am

WHERE: Office of the Federal Register
Conference Room, 800 North Capitol Street NW., Washington, DC (3 blocks north of Union Station Metro)

RESERVATIONS: 202–523–4538

Printed on recycled paper containing 100% post consumer waste

Presidential Documents

Title 3—

The President

Executive Order 12920 of June 10, 1994

Prohibiting Certain Transactions With Respect to Haiti

By the authority vested in me as President by the Constitution and the laws of the United States of America, including the International Emergency Economic Powers Act (50 U.S.C. 1701 *et seq.*), the National Emergencies Act (50 U.S.C. 1601 *et seq.*), section 5 of the United Nations Participation Act of 1945, as amended (22 U.S.C. 287c), and section 301 of title 3, United States Code, and in order to take additional steps with respect to the actions and policies of the *de facto* regime in Haiti and the national emergency described and declared in Executive Order No. 12775, it is hereby ordered as follows:

Section 1. The following are prohibited, except to the extent provided in regulations, orders, directives, or licenses which may hereafter be issued pursuant to this order, and notwithstanding the existence of any rights or obligations conferred or imposed by any international agreement or any contract entered into or any license or permit granted before the effective date of this order: (a) Any payment or transfer of funds or other financial or investment assets or credits to Haiti from or through the United States, or to or through the United States from Haiti, except for:

(i) payments and transfers for the conduct of activities in Haiti of the United States Government, the United Nations, the Organization of American States, or foreign diplomatic missions;

(ii) payments and transfers between the United States and Haiti for the conduct of activities in Haiti of nongovernmental organizations engaged in the provision in Haiti of essential humanitarian assistance as authorized by the Secretary of the Treasury;

(iii) payments and transfers from a United States person to any close relative of the remitter or of the remitter's spouse who is resident in Haiti, provided that such payments do not exceed $50 per month to any one household, and that neither the *de facto* regime in Haiti nor any person designated by the Secretary of the Treasury as a blocked individual or entity of Haiti is a beneficiary of the remittance;

(iv) reasonable amounts of funds carried by travelers to or from Haiti to cover their travel-related expense; and

(v) payments and transfers incidental to shipments to Haiti of food, medicine, medical supplies, and informational materials exempt from the export prohibitions of this order;

(b) The sale, supply, or exportation by United States persons or from the United States, or using U.S.-registered vessels or aircraft, of any goods, technology, or services, regardless of origin, to Haiti, or for the purpose of any business carried on in or operated from Haiti, or any activity by United States persons or in the United States that promotes such sale, supply, or exportation, other than the sale, supply, or exportation of:

(i) informational materials, such as books and other publications, needed for the free flow of information; or

(ii) medicines and medical supplies, as authorized by the Secretary of the Treasury, and rice, beans, sugar, wheat flour, cooking oil, corn, corn flour, milk, and edible tallow, provided that neither the *de facto* regime in Haiti nor any person designated by the Secretary of the Treasury as a blocked individual or entity of Haiti is a direct or indirect party to the transaction; or

(iii) donations of food, medicine, and medical supplies intended to relieve human suffering; and

(c) Any transaction by United States persons that evades or avoids, or has the purpose of evading or avoiding, or attempts to violate, any of the prohibitions set forth in this order.

Sec. 2. For the purposes of this order, the definitions contained in section 3 of Executive Order No. 12779 apply to the terms used in this order.

Sec. 3. The Secretary of the Treasury, in consultation with the Secretary of State, is hereby authorized to take such actions, including the promulgation of rules and regulations, and to employ all powers granted to me by the International Emergency Economic Powers Act and the United Nations Participation Act, as may be necessary to carry out the purposes of this order. The Secretary of the Treasury may redelegate any of these functions to other officers and agencies of the United States Government. All agencies of the United States Government are hereby directed to take all appropriate measures within their authority to carry out the provisions of this order, including suspension or termination of licenses or other authorizations in effect as of the effective date of this order.

Sec. 4. Nothing contained in this order shall create any right or benefit, substantive or procedural, enforceable by any party against the United States, its agencies or instrumentalities, its officers or employees, or any other person.

Sec. 5. (a) This order shall take effect at 11:59 a.m., eastern daylight time on June 10, 1994.

(b) This order shall be transmitted to the Congress and published in the **Federal Register**.

William J. Clinton

THE WHITE HOUSE,
June 10, 1994.

Rules and Regulations

Federal Register
Vol. 59, No. 113
Tuesday, June 14, 1994

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

OFFICE OF PERSONNEL MANAGEMENT

5 CFR Part 532

RIN 3206-AG08

Prevailing Rate Systems; Change of Lead Agency Responsibility for the Miami, Florida, Appropriated Fund Wage Area

AGENCY: Office of Personnel Management.

ACTION: Interim rule with request for comments.

SUMMARY: The Office of Personnel Management (OPM) is issuing an interim regulation to transfer lead agency responsibility for the Miami, Florida, appropriated fund Federal Wage System (FWS) wage area from the Department of Defense (DOD) to the Department of Veterans Affairs (VA). The FWS employment at Homestead Air Force Base (AFB), the current host installation for the Miami wage area, has declined since Hurricane Andrew in 1992 and is expected to decline further. The VA Medical center is now the largest single employer of FWS employees in the wage area, has the resources to carry out local wage surveys in the area, and is willing to assume responsibility as lead agency.

DATES: This interim rule becomes effective on June 14, 1994. Comments must be received by July 14, 1994.

ADDRESSES: Send or deliver comments to Donald J. Winstead, Acting Assistant Director for Compensation Policy, Personnel Systems and Oversight Group, U.S. Office of Personnel Management, room 6H31, 1900 E Street NW., Washington, DC 20415.

FOR FURTHER INFORMATION CONTACT: Angela Graham Humes, (202) 606-2848.

SUPPLEMENTARY INFORMATION: DOD is the lead agency for the Miami, Florida, appropriated fund FWS wage area, and Homestead AFB is the host activity for the local FWS wage survey. FWS employment at Homestead AFB has declined since the destruction caused by Hurricane Andrew in 1992 and is expected to decline further. The next largest DOD activity is located in Key West, Florida, and is not a practical alternative to function as a host activity. DOD has requested that VA assume lead agency responsibility. The VA Medical Center is now the largest single employer of FWS employees in the appropriated fund wage area and is willing to assume responsibility as lead agency. Both DOD and VA request that the transfer of lead agency responsibility for the Miami appropriated fund wage area become effective as soon as possible. Pre-survey activities for the next full-scale wage survey, scheduled for January 1995, begin in mid-1994. The Federal Prevailing Rate Advisory Committee has reviewed and concurred with this proposed change.

Pursuant to 5 U.S.C. 553(b)(3)(B), I find that good cause exists for waiving the general notice of proposed rulemaking. Also, pursuant to section 553(d)(3) of title 5, United States Code, I find that good cause exists for making this rule effective in less than 30 days. The notice is being waived and the regulation is being made effective in less than 30 days because pre-survey preparations for the January 1995 wage survey must begin shortly.

Regulatory Flexibility Act

I certify that these regulations will not have a significant economic impact on a substantial number of small entities because they will affect only Federal agencies and employees.

List of Subjects in 5 CFR Part 532

Administrative practice and procedure, Freedom of information, Government employees, Reporting and recordkeeping requirements, Wages.

U.S. Office of Personnel Management.

Lorraine A. Green,
Deputy Director.

Accordingly, OPM is amending 5 CFR part 532 as follows:

PART 532—PREVAILING RATE SYSTEMS

1. The authority citation for part 532 continues to read as follows:

Authority: 5 U.S.C. 5343, 5346; § 532.707 also issued under 5 U.S.C. 552.

Appendix A to Subpart B [Amended]

2. Appendix A to subpart B is amended for Miami, Florida, by removing the lead agency listing "DOD" and adding in its place "VA".

[FR Doc. 94-14274 Filed 6-13-94; 8:45 am]
BILLING CODE 6325-01-M

FEDERAL LABOR RELATIONS AUTHORITY

5 CFR Ch. XIV

Regional Offices; Jurisdictional Changes

AGENCY: Federal Labor Relations Authority and the General Counsel of the Federal Labor Relations Authority

ACTION: Notice of final amendments to rules and regulations.

SUMMARY: This document amends the rules and regulations of the Federal Labor Relations Authority and the General Counsel of the Federal Labor Relations Authority to provide for changes in the geographical jurisdictions of the seven Regional Directors concerning unfair labor practice charges and representation petitions.

EFFECTIVE DATE: June 20, 1994.

FOR FURTHER INFORMATION CONTACT: David L. Feder, Acting Deputy General Counsel, (202) 482-6680 extension 203

SUPPLEMENTARY INFORMATION: Effective January 28, 1980, the Authority and the General Counsel published, at 45 FR 3482, January 17, 1980, final rules and regulations to govern the processing of cases by the Authority and the General Counsel under chapter 71 of title 5 of the United States Code. These rules and regulations are required by title VII of the Civil Service Reform Act of 1978 and are set forth in 5 CFR part 2400 *et seq.* (1993). Appendix A, paragraph (f) of the rules and regulations sets forth the geographic jurisdictions of the Regional Directors of the Authority.

In the best interest of maximizing the resources within the Office of the General Counsel and efficient and effective case processing, the General Counsel and the Authority published on May 2, 1994 at 49 FR 22537-22538, a proposed rule to realign the

geographical jurisdictions of the Regional Directors to distribute the caseload, based on historic perspective, among the seven Regional Directors so that the seven regional offices have a substantially similar size caseload. No comments were submitted.

The change in geographic jurisdiction is in conjunction with the General Counsel review of regional office staffing patterns with the goal of achieving parity in the number of employees per region. The change will result in equalizing the work per regional office employee. The Office of the General Counsel will transfer cases between regions on a recurring basis, as necessary, based on caseload and staffing so that Office of the General Counsel resources will be utilized to the fullest extent.

Executive Order 12291

This proposed regulation has been reviewed in accordance with Executive Order 12291. It is not classified as major because it does not meet the criteria for major regulations established by the Order.

Regulatory Flexibility Act Certification

The General Counsel has determined that this proposed regulation will not have a significant economic impact on a substantial number of small entities.

Paperwork Reduction Act of 1980

The proposed regulation contains no information collection or recordkeeping requirement under the Paperwork Reduction Act of 1980 (44 U.S.C. 3507 *et seq.*)

For the reasons set out in the preamble and under the authority of 5 U.S.C. 7134, Appendix A to 5 CFR Chapter XIV is amended by revising paragraph (f) to read as follows:

Appendix A to 5 CFR Chapter XIV—Current Addresses and Geographic Jurisdictions

* * * * *

(f) The geographic jurisdictions of the Regional Directors of the Authority are as follows:

State or other locality	Regional office
Alabama	Atlanta.
Alaska	Denver.
Arizona	Denver.
Arkansas	Dallas.
California	San Francisco.
Colorado	Denver.
Connecticut	Boston.
Delaware	Boston.
District of Columbia	Washington, DC.
Florida	Atlanta.
Georgia	Atlanta.
Hawaii and all land and water areas west of the continents of North and South America (except coastal islands) to long. 90 degrees East.	San Francisco.
Idaho	Denver.
Illinois	Chicago.
Indiana	Chicago.
Iowa	Chicago.
Kansas	Denver.
Kentucky	Chicago.
Louisiana	Dallas.
Maine	Boston.
Maryland	Washington, DC
Massachusetts	Boston.
Michigan	Chicago.
Minnesota	Chicago.
Mississippi	Atlanta.
Missouri, Eastern (Scotland, Knox, Monroe, Audrain, Shelby, Callaway, Maries, Osage, Pulaski, Texas and Howell counties and all counties east thereof).	Chicago.
Missouri, Western (all counties west of Scotland, Knox, Monroe, Audrain, Shelby, Callaway, Maries, Osage, Pulaski, Texas and Howell counties).	Denver
Montana	Denver.
Nebraska	Denver.
Nevada	Denver.
New Hampshire	Boston.
New Jersey	Boston.
New Mexico	Denver.
New York	Boston.
North Carolina	Atlanta.
North Dakota	Denver.
Ohio	Chicago.
Oklahoma	Dallas.
Oregon	San Francisco.
Pennsylvania, Eastern (all counties except Erie, Crawford, Mercer, Lawrence, Beaver, Allegheny, Washington, Greene, Fayette, Somerset, Westmoreland, Warren, Indiana, Butler, Armstrong, Clarion, Venango, Forest, Cambia, Elk and McKean).	Boston.
Pennsylvania, Western (Erie, Crawford, Mercer, Lawrence, Beaver, Allegheny, Washington, Greene, Fayette, Somerset, Westmoreland, Warren, Indiana, Butler, Armstrong, Clarion, Venango, Forest, Cambia, Elk and McKean counties).	Chicago.
Puerto Rico	Atlanta.
Rhode Island	Boston.
South Carolina	Atlanta.
South Dakota	Denver.
Tennessee	Atlanta.

State or other locality	Regional office
Texas	Dallas.
Utah	Denver.
Vermont	Boston.
Virginia	Washington, DC.

West Virginia	Chicago.
Wisconsin	Chicago.
Wyoming	Denver.
Virgin Islands	Atlanta.
Panama/limited FLRA jurisdiction	Dallas.
All land and water areas east of the continents of North and South America to long. 90 degrees E., except the Virgin Islands, Panama (limited FLRA jurisdiction), Puerto Rico and coastal islands.	Chicago.

(5 U.S.C. 7134)

For the Authority.

Jean McKee,

Chairman.

Pamela Talkin,

Member.

Tony Armendariz,

Member.

For the General Counsel:

Joe Swerdzewski,

General Counsel.

[FR Doc. 94–14451 Filed 6–13–94; 8:45 am]

BILLING CODE 6727–01–M

DEPARTMENT OF AGRICULTURE

Rural Electrification Administration

7 CFR Part 1755

REA Specification for Terminating Cables

AGENCY: Rural Electrification Administration, USDA.

ACTION: Final rule.

SUMMARY: The Rural Electrification Administration (REA) amends its regulations on telecommunications standards and specifications for materials, equipment and construction. The revised specification will require that terminating cables comply with Article 800–50 of the 1993 National Electrical Code regarding fire retardancy of these products, include raw material requirements for insulating and jacketing compounds, and update the end product requirements associated with these type cables.

DATES: Effective date: July 14, 1994.

Compliance date: Manufacturers of terminating cables will be allowed until March 14, 1995 to supply borrowers with products already produced or currently in the process of manufacturing under previous Bulletin 345–87.

Incorporation by reference: Incorporation by reference of certain publications listed in this final rule is approved by the Director of the Federal Register as of July 14, 1994.

FOR FURTHER INFORMATION CONTACT: Garnett G. Adams, Chief, Outside Plant Branch, Telecommunications Standards Division, Rural Electrification Administration, room 2844, South Building, U.S. Department of Agriculture, Washington, DC 20250–1500, telephone number (202) 720–0667.

SUPPLEMENTARY INFORMATION:

Executive Order 12866

This final rule has been determined to be not significant for the purposes of Executive Order 12866 and therefore has not been reviewed by OMB.

Executive Order 12778

This final rule has been reviewed under Executive Order 12778, Civil Justice Reform. If adopted, this final rule will not:

(1) Preempt any State or local laws, regulations, or policies;

(2) Have any retroactive effect; and

(3) Require administrative proceeding before parties may file suit challenging the provisions of this rule.

Regulatory Flexibility Act Certification

The Administrator of REA has determined that this final rule will not have a significant economic impact on a substantial number of small entities, as defined by the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). This final rule involves standards and specifications, which may increase the direct short term costs to REA borrowers. However, the long-term direct economic costs are reduced through greater durability and lower maintenance cost over time.

Information Collection and Recordkeeping Requirements

In compliance with the Office of Management and Budget (OMB) regulations (5 CFR part 1320) which implements the Paperwork Reduction Act of 1980 (Pub. L. 96–511) and section 3504 of that Act, information collection and recordkeeping requirements contained in this final rule have been submitted to OMB. Comments concerning these requirements should be directed to the office of Information and Regulator Affairs of OMB, Attention: Desk Officer for USDA, room 3201, New Executive Office Building, Washington, DC 20503. When OMB has approved the information collection and recordkeeping requirements contained in this final rule, REA will publish an amendment to this final rule to add the OMB control number and statement to the regulatory text.

National Environmental Policy Act Certification

The Administrator of REA has determined that this final rule will not significantly affect the quality of the human environment as defined by the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*). Therefore, this action does not require an environmental impact statement or assessment.

Catalog of Federal Domestic Assistance

The program described by this final rule is listed in the Catalog of Federal Domestic Assistance programs under No. 10.851, Rural Telephone Loans and Loan Guarantees, and No. 10.852, Rural Telephone Bank Loans. This catalog is available on a subscription basis from the Superintendent of Documents, the United States Government Printing Office, Washington, DC 20402–9325.

Executive Order 12372

This final rule is excluded from the scope of Executive Order 12372, Intergovernmental Consultation that requires intergovernmental consultation with state and local officials. A Notice of Final rule titled Department Programs and Activities Excluded from Executive Order 12372 (50 FR 47034) exempts REA and RTB loans and loan guarantees, and RTB bank loans, to governmental and nongovernmental entities from coverage under this Order

Background

REA issues publications titled "Bulletins" which serve to guide borrowers regarding already codified policy, procedures, and requirements needed to manage loans, loan guarantee programs, and the security instruments which provide for and secure REA financing. REA issues standards and specifications for construction of telephone facilities financed with REA loan funds. REA is rescinding Bulletin 345–87, REA Specification for Terminating (TIP) Cable, PE–87, and codifying the revised specification at 7 CFR 1755.870, REA Specification for Terminating Cables.

Terminating cables are used to connect the incoming outside plant cables to the vertical side of the main distributing frame in a telephone central office. Since these cables are installed inside of a building, these cables are required to be listed in accordance with Article 800–50 of the 1993 National Electrical Code (NEC). The current specification does not require these cables to be listed in accordance with Article 800–50 of the 1993 NEC. Therefore, REA is revising the current specification to require these cables to be listed in accordance with Article 800–50 of the 1993 NEC.

The current specification does not include insulation and jacketing raw requirements, because these requirements were previously covered by REA Bulletins 345–21, 345–51, and 345–58 which have since been rescinded. Therefore, revision of the current specification is necessary to incorporate essential jacketing and insulation raw material requirements. By incorporating the raw material requirements which were formerly found in REA Bulletins 345–21, 345–51, and 345–58 into 7 CFR 1755.870, a comprehensive document will be published for the manufacture of terminating cable products.

The current specification contains end product performance requirements that have become outdated for these type cables because of the technological advancements made in the design of terminating cables over the past ten years. Therefore, REA is revising the current specification to update the end product performance requirements associated with these cables to reflect the technological advancements made in the design of these cables.

On November 17, 1993, REA published a proposed rule at 58 FR 220 to rescind REA Bulletin 345–87, REA Specification for Terminating (TIP) Cable, PE–87, and to codify the revised specification at 7 CFR 1755.870, REA Specification for Terminating Cables. Comments on this proposed rule were due by December 17, 1993. Comments and recommendations were received from one company by this due date. The comments, recommendations, and responses are summarized as follows:

The first comment recommended that solid low density polyethylene and expanded polyethylene insulating compounds should also be allowed as an optional primary layer for the dual extruded insulated conductor.

Response: One reason REA 7 CFR 1755.870 requires dual insulated conductors is to provide electrical stability and fire resistance of the insulated conductors. The electrical stability of the insulated conductor is provided by the primary layer which specifies the use of either solid high density polyethylene or solid crystalline propylene/ethylene copolymer insulating compounds. The fire resistance of the insulated conductor is provided by the outer layer or skin which specifies various types of polyvinyl chloride (PVC) insulating compounds. REA chose to limit the primary layer of the dual insulated conductor to either the solid high density polyethylene or the solid crystalline propylene/ethylene copolymer insulating compounds because these insulating compounds have proven histories of providing satisfactory electrical stability of the dual insulated conductor over time. Therefore, REA will not change 7 CFR 1755.870 to allow the use of solid low density polyethylene and expanded polyethylene insulating compounds as primary layers as recommended by the commenter.

The second comment recommended that 7 CFR 1755.870 should allow the use of single insulated conductors using solid PVC insulating compounds in addition to dual insulated conductors.

Response: Another reason REA requires the use of dual insulated conductors for terminating cables is because these terminating cables are presently being spliced to filled outside plant cables at REA borrower construction projects. REA knows that the PVC outer skin of the dual insulated conductor will degrade over time as a result of the PVC's incompatibility with the filling compound used in filled cables. REA also knows that the primary layer of the dual insulated conductor will not degrade because the insulation materials used as the primary layer of the dual insulated conductor are the same insulation materials used as conductor insulations in filled cables which have been proven to be compatible with the filling compound used in filled cables. Since satisfactory signal transmission is dependent upon the integrity of the primary layer of the dual insulated conductor in terminating cables covered by 7 CFR 1755.870, REA must assure that the primary layer will not degrade when these cables are spliced to filled outside plant cables. If REA allowed the use of single insulated conductors using solid PVC insulating compounds, signal transmission on these cables would degrade as a result of the PVC's incompatibility with filling compound when spliced to filled outside plant cables. Based on the above reasons, REA will not allow the use of single insulated conductors using PVC insulating compounds in 7 CFR 1755.870.

The next comment recommended that more restrictive volatile loss requirements should be added to the PVC raw materials used as the outer skin of the dual insulated conductors specified in 7 CFR 1755.870.

Response: The PVC raw materials used as the outer skin of the dual insulated conductor presently specified in 7 CFR 1755.870 have been used in these cables for a number of years with satisfactory results. Since no problems with terminating cables using these PVC raw materials have been encountered. REA will not add the more restrictive volatile loss requirement to the PVC raw materials requirements specified in 7 CFR 1755.870 as recommended by the commenter.

The fourth comment recommended that test method for insulation resistance (IR) specified in the American Society for Testing and Materials (ASTM) D 4566–90 Standard be allowed as an alternative test method for determining the insulation fault rate of the dual insulated conductors.

Response: REA would like to point out that the IR test method for determining the fault rate of the dual insulated conductors specified in 7 CFR 1755.870 is same IR test method as specified in REA Bulletin 345–87. Since manufacturers have been using this IR test method for determining the fault rate of the dual insulated conductors specified in REA Bulletin 345–87 for more than eleven years without any reported problems, REA will not change 7 CFR 1755.870 to allow the alternative IR test method specified in ASTM D 4566–90 as a method for determining the insulation fault of the dual insulated conductors.

The next comment recommended that the dual insulated conductor cold bend test temperature specified in 7 CFR 1755.870 be changed from -40 ± 1 °C to -20 ± 1 °C.

Response: REA would like to point out that the −40 ± 1 °C dual insulated cold bend test temperature specified in 7 CFR 1755.870 is same cold bend test temperature as specified in REA Bulletin 345–87. Since manufacturers have been performing cold bend tests on the dual insulated conductors using the −40 ± 1 °C test temperature specified in REA Bulletin 345–87 for more than eleven years without any reported problems, REA will not change the −40 ± 1 °C cold bend test temperature specified in 7 CFR 1755.870 to the −20 ± 1 °C cold bend test temperature recommended by the commenter.

The sixth comment recommended that the PVC jacket raw material requirements be eliminated from the specification.

Response: REA considers the PVC jacket raw material requirements along with end product PVC jacket requirements to be critical requirements to assure that the PVC jacket will withstand the rigors of installation. Since REA considers PVC jacket raw material requirements as one essential way of assuring that the PVC jacket will withstand the rigors of installation, REA will not eliminate the PVC jacket raw material requirements from 7 CFR 1755.870 as recommended by the respondent.

The seventh comment from the respondent recommended that the thicknesses of the outer jacket should be reduced to coincide with other standards for these type cables.

Response: First, REA knows of no accepted American National Standard for terminating cables. If REA was aware otherwise, REA would reference the jacket thickness requirements of the national standard to assist the industry in providing one cable design that could be used by both REA and non-REA telephone operating companies. Since its REA's knowledge, no accepted national standard exists, REA incorporated the jacket thickness requirements presently specified in REA Bulletin 345–87 into 7 CFR 1755.870 because these thickness requirements have been used for REA terminating cables for over eleven years without any reported field problems. Therefore, REA will not reduce the jacket thickness requirements specified in 7 CFR 1755.870 to the recommendation of the commenter.

The next comment recommended reducing the voice frequency electrical requirements because the respondent feels that the voice frequency electrical requirements specified in 7 CFR 1755.870 are too stringent for voice frequency signal transmission.

Response: The voice frequency electrical requirements specified in 7 CFR 1755.870 were chosen to match voice frequency electrical requirements of outside plant cables to provide satisfactory voice frequency signal transmission. In addition the voice frequency electrical requirements specified in 7 CFR 1755.870 are identical to the voice frequency electrical requirements specified in REA Bulletin 345–87 which has been providing satisfactory voice frequency signal transmission to REA borrowers for the past eleven years. Since REA wanted the voice frequency electrical requirements of terminating cables to match the voice frequency electrical requirements of outside plant cables, REA will not reduce the voice frequency electrical requirements of 7 CFR 1755.870 as recommended by the respondent.

The last comment from the respondent recommended that the test voltages used to test dielectric strength between conductors and dielectric strength between the cable core and shield be changed to coincide with other industry specifications for these type cables.

Response: First, REA knows of no accepted American National Standard for terminating cables. If such a standard did exist, REA would reference the dielectric strength test voltages of the national standard to assist the industry in providing one cable design that could be used by both non-REA and REA telephone operating companies. Since no accepted national standard exists, REA incorporated the dielectric strength test voltages presently specified in REA Bulletin 345–87 into 7 CFR 1755.870 because these dielectric strength test voltages have been used for REA terminating cables for over eleven years without any reported problems. Therefore, REA will not change the dielectric strength test voltages specified in 7 CFR 1755.870 to the commenter's recommendation.

Although REA did not incorporate any of the respondent's recommendations into 7 CFR 1755.870, REA did renumber paragraphs (b)(3)(i) through (b)(12),(e)(2)(i) and (e)(2)(ii) to (b)(3) through (b)(13),(e)(2), and (e)(3), respectively, to make these paragraph numbers more user friendly to interested parties. No changes were made to the technical requirements specified in the above mentioned paragraphs.

List of Subjects in 7 CFR Part 1755

Incorporation by reference, Loan programs—communications, Reporting and recordkeeping requirements, Rural areas, Telephone.

For reasons set out in the preamble, REA amends Chapter XVII of title 7 of the Code of Federal Regulations as follows:

PART 1755—TELECOMMUNICATIONS STANDARDS AND SPECIFICATIONS FOR MATERIALS, EQUIPMENT AND CONSTRUCTION

1. The authority citation for part 1755 continues to read as follows:

Authority: 7 U.S.C. 901 *et seq.*, 1921 *et seq.*

§ 1755.97 [Amended]

2. Section 1755.97 is amended by removing the entry REA Bulletin 345–87 from the table.

3. Section 1755.870 is added to read as follows:

§ 1755.870 REA specification for terminating cables.

(a) *Scope.* (1) This section establishes the requirements for terminating cables used to connect incoming outside plant cables to the vertical side of the main distributing frame in a telephone central office.

(i) The conductors are solid tinned copper, individually insulated with extruded solid dual insulating compounds.

(ii) The insulated conductors are twisted into pairs which are then stranded or oscillated to form a cylindrical core.

(iii) The cable structure is completed by the application of a core wrap, a shield, and a polyvinyl chloride jacket

(2) The number of pairs and gauge size of conductors which are used within the REA program are provided in the following table:

American Wire Gauge (AWG)	D22	24
Number of Pairs	12	12
	50	50
	100	100
	200	200
	300	300
	400	400
	600	600
	900	900

NOTE: Cables larger in pair sizes from those shown in this table shall meet all the requirements of this section.

(3) All cables sold to REA borrowers for projects involving REA loan funds under this section must be accepted by REA Technical Standards Committee "A" (Telephone). For cables manufactured to the specification of this section, all design changes to an accepted design must be submitted for acceptance. REA will be the sole

VOL 59 ISS 113 JE 14 1994 UMI

authority on what constitutes a design change.

(4) Materials, manufacturing techniques, or cable designs not specifically addressed by this section may be allowed if accepted by REA. Justification for acceptance of modified materials, manufacturing techniques, or cable designs shall be provided to substantiate product utility and long term stability and endurance.

(5) The American National Standard Institute/Electronic Industries Association (ANSI/EIA) 359–A–84, EIA Standard Colors for Color Identification and Coding, referenced in this section is incorporated by reference by REA. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies of ANSI/EIA 359–A–84 are available for inspection during normal business hours at REA, room 2845, U.S. Department of Agriculture, Washington, DC 20250–1500 or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC. Copies are available from Global Engineering Documents, 15 Inverness Way East, Englewood, CO 80112, telephone number (303) 792–2181.

(6) American Society for Testing and Materials Specifications (ASTM) B 33–91, Standard Specification for Tinned Soft or Annealed Copper Wire for Electrical Purposes; ASTM B 736–92a Standard Specification for Aluminum, Aluminum Alloy and Aluminum-Clad Steel Cable Shielding Stock; ASTM D 1248–84 (1989), Standard Specification for Polyethylene Plastics Molding and Extrusion Materials; ASTM D 1535–89, Standard Test Method for Specifying Color by the Munsell System; ASTM D 2287–81 (Reapproved 1988), Standard Specification for Nonrigid Vinyl Chloride Polymer and Copolymer Molding and Extrusion Compounds; ASTM D 2436–85, Standard Specification for Forced-Convection Laboratory Ovens for Electrical Insulation; ASTM D 2633–82 (Reapproved 1989), Standard Methods of Testing Thermoplastic Insulations and Jackets for Wire and Cable; ASTM D 4101–82 (1988), Standard Specification for Propylene Plastic Injection and Extrusion Materials; ASTM D 4565–90a, Standard Test Methods for Physical and Environmental Performance Properties of Insulations and Jackets for Telecommunications Wire and Cable; ASTM D 4566–90, Standard Test Methods for Electrical Performance Properties of Insulations and Jackets for Telecommunications Wire and Cable; and ASTM E 29–90, Standard Practice for Using Significant Digits in Test Data to Determine Conformance with Specifications, referenced in this section are incorporated by reference by REA. These incorporations by references were approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies of the ASTM standards are available for inspection during normal business hours at REA, room 2845, U.S. Department of Agriculture, Washington, DC 20250–1500 or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC. Copies are available from ASTM, 1916 Race Street, Philadelphia, Pennsylvania 19103–1187, telephone number (215) 299–5585.

(7) American National Standards Institute/National Fire Protection Association (ANSI/NFPA), NFPA 70–1993 National Electrical Code referenced in this section is incorporated by reference by REA. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. A copy of the ANSI/NFPA standard is available for inspection during normal business hours at REA, room 2845, U.S. Department of Agriculture, Washington, DC 20250–1500 or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC. Copies are available from NFPA, Batterymarch Park, Quincy, Massachusetts 02269, telephone number 1 (800) 344–3555.

(8) Underwriters Laboratories Inc. (UL) 1666, Standard Test for Flame Propagation Height of Electrical and Optical-Fiber Cables Installed Vertically in Shafts, dated January 22, 1991, referenced in this section is incorporated by reference by REA. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. A copy of the UL standard is available for inspection during normal business hours at REA, room 2845, U.S. Department of Agriculture, Washington, DC 20250–1500 or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC. Copies are available from UL Inc., 333 Pfingsten Road, Northbrook, Illinois 60062–2096, telephone number (708) 272–8800.

(b) *Conductors and conductor insulation.* (1) Each conductor shall be a solid round wire of commercially pure annealed tin coated copper. Conductors shall meet the requirements of the American Society for Testing and Materials (ASTM) B 33–91 except that requirements for *Dimensions and Permissible Variations* are waived.

(2) Joints made in conductors during the manufacturing process may be brazed, using a silver alloy solder and nonacid flux, or they may be welded using either an electrical or cold welding technique. In joints made in uninsulated conductors, the two conductor ends shall be butted. Splices made in insulated conductors need not be butted but may be joined in a manner acceptable to REA.

(3) The tensile strength of any section of a conductor, containing a factory joint, shall not be less than 85 percent of the tensile strength of an adjacent section of the solid conductor of equal length without a joint.

(4) Engineering Information: The sizes of wire used and their nominal diameters shall be as shown in the following table:

AWG	Nominal diameter	
	Millimeters	(Inches)
22	0.643	(0.0253)
24	0.511	(0.0201)

(5) Each conductor shall be insulated with a primary layer of natural or white solid, insulating grade, high density polyethylene or crystalline propylene/ethylene copolymer and an outer skin of colored, solid, insulating grade, polyvinyl chloride (PVC) using one of the insulating materials listed in paragraphs (b)(5)(i) through (iii) of this section.

(i) The polyethylene raw material selected to meet the requirements of this section shall be Type III, Class A, Category 4 or 5, Grade E9, in accordance with ASTM D 1248–84 (1989).

(ii) The crystalline propylene/ethylene raw material selected to meet the requirements of this section shall be Class PP 200B 40003 E11 in accordance with ASTM D 4101–82 (1988).

(iii) The PVC raw material selected to meet the requirements of this section shall be either Type PVC–64751E3XO, Type PVC–76751E3XO, or Type PVC–77751E3XO in accordance with ASTM D 2287–81 (1988).

(iv) Raw materials intended as conductor insulation furnished to these requirements shall be free from dirt, metallic particles, and other foreign matter.

(v) All insulating raw materials shall be accepted by REA prior to their use.

(6) All conductors in any single length of cable shall be insulated with the same type of material.

(7) A permissible overall performance level of faults in conductor insulation when using the test procedures in paragraph (b)(8) of this section shall average not greater than one fault per 12,000 conductor meters (40,000 conductor feet) for each gauge of conductor.

(8) The test used to determine compliance with paragraph (b)(7) of this section shall be conducted as follows:

(i) Samples tested shall be taken from finished cables selected at random from standard production cable. The samples tested shall contain a minimum of 300 conductor meters (1,000 conductor feet) for cables sizes less than 50 pairs and 1,500 conductor meters (5,000 conductor feet) for cables sizes greater than or equal to 50 pairs. No further sample need be taken from the same cable production run within 6,000 cable meters (20,000 cable feet) of the original test sample from that run.

(ii) The cable sample shall have its jacket, shield, and core wrap removed and its core shall be immersed in tap water for a minimum period of 6 hours. In lieu of removing the jacket, shield, and core wrap from the core, the entire cable may be tested. In this case, the core shall be completely filled with tap water, under pressure; then the cable assembly shall be immersed for a minimum period of 6 hours. With the cable core still fully immersed, except for end connections, the insulation resistance (IR) of all conductors to water shall be measured using a direct current (dc) voltage of 100 volts to 550 volts.

(iii) An IR value of less than 500 megohms for any individual insulated conductor tested at or corrected to a temperature of 23 °C is considered a failure. If the cable sample is more than 7.5 meters (25 feet) long, all failing conductors shall be retested and reported in 7.5 meter (25 foot) segments.

(iv) The pair count, gauge, footage, and number of insulation faults shall be recorded. This information shall be retained on a 6 month running basis for review by REA when requested.

(v) A fault rate, in a continuous length in any one reel, in excess of one fault per 3,000 conductor meters (10,000 conductor feet) due to manufacturing defects is cause for rejection. A minimum of 6,000 conductor meters (20,000 conductor feet) is required to develop a noncompliance in a reel.

(9) Repairs to the conductor insulation during manufacturing are permissible. The method of repair shall be accepted by REA prior to its use. The repaired insulation shall be capable of meeting the relevant electrical requirements of this section.

(10) All repaired sections of insulation shall be retested in the same manner as originally tested for compliance with paragraph (b)(7) of this section.

(11) The colored composite insulating material removed from or tested on the conductor, from a finished cable, shall be capable of meeting the following performance requirements:

Property	Composite insulation
Tensile Strength, Minimum Megapascals (MPa) (Pounds per square inch (psi))	16.5 (2400)
Ultimate Elongation Percent, Minimum	125
Cold Bend Failures, Maximum	0/10
Shrinkback, Maximum Millimeter (mm) (Inches (in.))	9.5 (3/8)
Adhesion, Maximum Newtons (N) (Pound-force (lbf))	13.3 (3)
Compression Minimum, N (lbf)	1780 (400)

(12) *Testing procedures.* The procedures for testing the composite insulation samples for compliance with paragraph (b)(11) of this section shall be as follows:

(i) *Tensile strength and ultimate elongation.* Samples of the insulation material, removed from the conductor, shall be tested in accordance with ASTM D 2633–82(1989), except that the speed of jaw separation shall be 50 millimeters/minute (50 mm/min) (2 inches/minute (2 in./min)).

Note: Quality assurance testing at a jaw separation speed of 500 mm/min (20 in./min) is permissible. Failures at this rate shall be retested at the 50 mm/min (2 in./min) rate to determine specification compliance.

(ii) *Cold bend.* Samples of the insulation material on the conductor shall be tested in accordance with ASTM D 4565–90a at a temperature of −40±1 °C with a mandrel diameter of 6 mm (0.25 in.). There shall be no cracks visible to normal or corrected-to-normal vision.

(iii) *Shrinkback.* Samples of insulation shall be tested for four hours at a temperature of 115±1 °C in accordance with ASTM D 4565–90a.

(iv) *Adhesion.* Samples of insulation material on the conductor shall be tested in accordance with ASTM D 4565–90a with a crosshead speed of 50 mm/min (2 in./min).

(v) *Compression.* Samples of the insulation material on the conductor shall be tested in accordance with ASTM D 4565–90a with a crosshead speed of 5 mm/min (0.2 in./min).

(13) Other methods of testing may be used if acceptable to REA.

(c) *Identification of pairs and twisting of pairs.* (1) The PVC skin shall be colored to identify:

(i) The tip and ring conductor of each pair; and

(ii) Each pair in the completed cable.

(2) The colors used to provide identification of the tip and ring conductor of each pair shall be as shown in the following table:

Pair No.	Color	
	Tip	Ring
1	White	Blue
2	White	Orange
3	White	Green
4	White	Brown
5	White	Slate
6	Red	Blue
7	Red	Orange
8	Red	Green
9	Red	Brown
10	Red	Slate
11	Black	Blue
12	Black	Orange
13	Black	Green
14	Black	Brown
15	Black	Slate
16	Yellow	Blue
17	Yellow	Orange
18	Yellow	Green
19	Yellow	Brown
20	Yellow	Slate
21	Violet	Blue
22	Violet	Orange
23	Violet	Green
24	Violet	Brown
25	Violet	Slate

(3) *Standards of color.* The colors of the insulated conductors supplied in accordance with this section are specified in terms of the Munsell Color System (ASTM D 1535–89) and shall comply with the "Table of Wire and Cable Limit Chips" as defined in ANSI/EIA–359–A–84. (Visual color standards meeting these requirements may be obtained directly from the Munsell Color Company, Inc., 2441 North Calvert Street, Baltimore, Maryland 21218).

(4) Positive identification of the tip and ring conductors of each pair by marking each conductor of a pair with the color of its mate is permissible. The method of marking shall be accepted by REA prior to its use.

(5) Other methods of providing positive identification of the tip and ring conductors of each pair may be employed if accepted by REA prior to its use.

(6) The insulated conductors shall be twisted into pairs.

(7) In order to provide sufficiently high crosstalk isolation, the pair twists shall be designed to enable the cable to meet the capacitance unbalance and the crosstalk loss requirements of paragraphs (h)(2), (h)(3), and (h)(4) of this section.

(8) The average length of pair twists in any pair in the finished cable, when measured on any 3 meter (m) (10 foot

(ft)) length, shall not exceed 152 mm (6 in.).

(d) *Forming of the cable core.* (1) Twisted pairs shall be assembled in such a way as to form a substantially cylindrical group.

(2) When desired for lay-up reasons, the basic group may be divided into two or more subgroups called units.

(3) Each group, or unit in a particular group, shall be enclosed in bindings of the colors indicated for its particular pair count. The pair count, indicated by the color of insulation, shall be consecutive as indicated in paragraph (d)(5) of this section through units in a group.

(4) Threads or tapes used as binders shall be nonhygroscopic and nonwicking. The threads shall consists of a suitable number of ends of each color arranged as color bands. When tapes are used as binders, they shall be colored. Binders shall be applied with a lay of not more than 100 mm (4 in.). The colored binders shall be readily recognizable as the basic intended color and shall be distinguishable from all other colors.

(5) The colors of the bindings and their significance with respect to pair count shall be as shown in the following table:

Group No.	Color of bindings	Group pair count
1	White-Blue	1–25
2	White-Orange	26–50
3	White-Green	51–75
4	White-Brown	76–100
5	White-Slate	101–125
6	Red-Blue	126–150
7	Red-Orange	151–175
8	Red-Green	176–200
9	Red-Brown	201–225
10	Red-Slate	226–250
11	Black-Blue	251–275
12	Black-Orange	276–300
13	Black-Green	301–325
14	Black-Brown	326–350
15	Black-Slate	351–375
16	Yellow-Blue	376–400
17	Yellow-Orange	401–425
18	Yellow-Green	426–450
19	Yellow-Brown	451–475
20	Yellow-Slate	476–500
21	Violet-Blue	501–525
22	Violet-Orange	526–550
23	Violet-Green	551–575
24	Violet-Brown	576–600

(6) The use of the white unit binder in cables of 100 pair or less is optional.

(7) When desired for manufacturing reasons, two or more 25 pair groups may be bound together with nonhygroscopic and nonwicking threads or tapes into super-units. The group binders and the super-unit binders shall be colored such that the combination of the two binders shall positively identify each 25 pair group from every other 25 pair group in the cable.

(8) Super-unit binders shall be of the colors shown in the following table:

SUPER-UNIT BINDER COLORS

Pair No.	Binder color
1–600	White
601–1200	Red

(e) *Core wrap.* (1) The core shall be completely covered with a layer of nonhygroscopic and nonwicking dielectric material. The core wrap shall be applied with an overlap.

(2) The core wrap shall provide a sufficient heat barrier to prevent visible evidence of conductor insulation deformation or adhesion between conductors, caused by adverse heat transfer during the jacketing operation.

(3) Engineering Information: If required for manufacturing reasons, white or uncolored binders of nonhygroscopic and nonwicking material may be applied over the core and/or core wrap.

(f) *Shield.* (1) An aluminum shield, plastic coated on one side, shall be applied longitudinally over the core wrap.

(2) The shield may be applied over the core wrap with or without corrugations (smooth) and shall be bonded to the outer jacket.

(3) The shield overlap shall be a minimum of 3 mm (0.125 in.) for cables with core diameters of 15 mm (0.625 in.) or less and a minimum of 6 mm (0.25 in.) for cables with core diameters greater than 15 mm (0.625 in.). The core diameter is defined as the diameter under the core wrap and binding.

(4) General requirements for application of the shielding material shall be as follows:

(i) Successive lengths of shielding tapes may be joined during the manufacturing process by means of cold weld, electric weld, soldering with a nonacid flux, or other acceptable means;

(ii) The metal shield with the plastic coating shall have the coating removed prior to joining the metal ends together. After joining, the plastic coating shall be restored without voids using good manufacturing techniques;

(iii) The shields of each length of cable shall be tested for continuity. A one meter (3 ft) section of shield containing a factory joint shall exhibit not more than 110 percent of the resistance of a shield of equal length without a joint;

(iv) The breaking strength of any section of a shield tape containing a factory joint shall not be less than 80 percent of the breaking strength of an adjacent section of the shield of equal length without a joint;

(v) The reduction in thickness of the shielding material due to the corrugating or application process shall be kept to a minimum and shall not exceed 10 percent at any spot; and

(vi) The shielding material shall be applied in such a manner as to enable the cable to pass the bend test as specified in paragraph (i)(1) of this section.

(5) The dimensions of the uncoated aluminum tape shall be 0.2030±0.0254 mm (0.0080±0.0010 in.).

(6) The aluminum tape shall conform to either Alloy AA–1100–0, AA–1145–0, or AA–1235–0 as covered in the latest edition of Aluminum Standards and Data, issued by the Aluminum Association, except that requirements for tensile strength are waived.

(7) The single-sided plastic coated aluminum shield shall conform to the requirements of ASTM B 736–92a, Type I Coating, Class 1 or 2, or Type II Coating, Class 1. The minimum thickness of the Type I Coating shall be 0.038 mm (0.0015 in.). The minimum thickness of the Type II Coating shall be 0.008 mm (0.0003 in.).

(8) The plastic coated aluminum shield shall be tested for resistance to water migration by immersing a one meter (3 ft) length of tape under a one meter (3 ft) head of water containing a soluble dye plus 0.25 percent (%) wetting agent.

(i) After a minimum of 5 minutes, no dye shall appear between the interface of the shield tape and the plastic coating.

(ii) The actual test method shall be acceptable to REA.

(9) The bond between the plastic coated shield and the jacket shall conform to the following requirements:

(i) Prepare test strips approximately 200 mm (8 in.) in length. Slit the jacket and shield longitudinally to produce 4 strips evenly spaced and centered in 4 quadrants on the jacket circumference. One of the strips shall be centered over the overlapped edge of the shielding tape. The strips shall be 13 mm (0.5 in.) wide. For cable diameters less than 19 mm (0.75 in.) make two strips evenly spaced.

(ii) Separate the shield and jacket for a sufficient distance to allow the shield and jacket to be fitted in the upper and lower jaws of a tensile machine. Record the maximum force required to separate the shield and jacket to the nearest newton (pound-force). Repeat this action for each test strip.

(iii) The force required to separate the jacket from the shield shall not be less

than 9 N (2 lbf) for any individual strip when tested in accordance with paragraph (f)(9)(ii) of this section. The average force for all strips of any cable shall not be less than 18 N (4 lbf).

(g) *Cable jacket and extraneous material.* (1) The jacket shall provide the cable with a tough, flexible, protective covering which can withstand stresses reasonably expected in normal installation and service.

(2) The jacket shall be free from holes, splits, blisters, or other imperfections and shall be as smooth and concentric as is consistent with the best commercial practice.

(3) The raw material used for the cable jacket shall be one of the following four types:

(i) Type PVC–55554EOXO in accordance with ASTM D 2287–81(1988);

(ii) Type PVC–65554EOXO in accordance with ASTM D 2287–81(1988);

(iii) Type PVC–55556EOXO in accordance with ASTM D 2287–81(1988); or

(iv) Type PVC–66554EOXO in accordance with ASTM D 2287–81(1988).

(4) The jacketing material removed from or tested on the cable shall be capable of meeting the following performance requirements:

Property	Jacket performance
Tensile Strength-Unaged Minimum, MPa (psi)	13.8 (2000)
Ultimate Elongation-Unaged Minimum, Percent (%)	200
Tensile Strength-Aged Minimum, % of original value	80
Ultimate Elongation-Aged Minimum, % of original value	50
Impact Failures, Maximum	2/10

(5) *Testing procedures.* The procedures for testing the jacket samples for compliance with paragraph (g)(4) of this section shall be as follows:

(i) *Tensile strength and ultimate elongation-unaged.* The test shall be performed in accordance with ASTM D 2633–82(1989), using a jaw separation speed of 50 mm/min (2 in./min).

Note: Quality assurance testing at a jaw separation speed of 500 mm/min (20 in./min) is permissible. Failures at this rate shall be retested at the 50 mm/min (2 in./min) rate to determine specification compliance.

(ii) *Tensile strength and ultimate elongation-aged.* The test shall be performed in accordance with paragraph (g)(5)(i) of this section after being aged for 7 days at a temperature of 100±1 °C in a circulating air oven conforming to ASTM D 2436–85.

(iii) *Impact.* The test shall be performed in accordance with ASTM D 4565–90a using an impact force of 4 newton-meter (3 pound force-foot) at a temperature of −10±1 °C. The cylinder shall strike the sample at the shield overlap. A crack or split in the jacket constitutes failure.

(6) *Jacket thickness.* The nominal jacket thickness shall be as specified in the following table. The test method used shall be either the End Sample Method (paragraph (g)(6)(i) of this section) or the Continuous Uniformity Thickness Gauge Method (paragraph (g)(6)(ii) of this section):

No. of pairs	Nominal jacket thickness mm (in.)
25 or less	1.4 (0.055)
50	1.5 (0.060)
100	1.7 (0.065)
200	1.9 (0.075)
300	2.2 (0.085)
400	2.4 (0.095)
600	2.9 (0.115)
800 and over	3.3 (0.130)

(i) *End sample method.* The jacket shall be capable of meeting the following requirements:

Minimum Average Thickness—90% of nominal thickness

Minimum Thickness—70% of nominal thickness

(ii) *Continuous uniformity thickness gauge method.* (A) The jacket shall be capable of meeting the following requirements:

Minimum Average Thickness—90% of nominal thickness

Minimum (Min.) Thickness—70 % of nominal thickness

Maximum (Max.) Eccentricity—55%

Eccentricity=Max. Thickness—Min. Thickness (Average Thickness)×100

(B) *Maximum and minimum thickness values.* The maximum and minimum thickness values shall be based on the average of each axial section.

(7) The color of the jacket shall be either black or dark grey in conformance with the Munsell Color System specified in ASTM D 1535–89.

(8) There shall be no water or other contaminants in the finished cable which would have a detrimental effect on its performance or its useful life.

(h) *Electrical requirements*—(1) *Mutual capacitance and conductance.* (i) The average mutual capacitance (corrected for length) of all pairs in any reel shall not exceed the following when tested in accordance with ASTM D 4566–90 at a frequency of 1.0± 0.1 kilohertz (kHz) and a temperature of 23±3°C:

Number of cable pairs	Mutual capacitance	
	Nanofarad/kilometer	(Nanofarad/mile)
12	52±4	(83±7)
Over 12	52±2	(83±4)

(ii) The root mean square (rms) deviation of the mutual capacitance of all pairs from the average mutual capacitance of that reel shall not exceed 3.0 % when calculated in accordance with ASTM D 4566–90.

(iii) The mutual conductance (corrected for length and gauge) of any pair shall not exceed 3.7 micromhos/kilometer (micromhos/km) (6.0 micromhos/mile) when tested in accordance with ASTM D 4566–90 at a frequency of 1.0±0.1 kHz and a temperature of 23±3°C.

(2) *Pair-to-pair capacitance unbalance.* The capacitance unbalance as measured on the completed cable shall not exceed 45.3 picofarad/kilometer (pF/km) (25 picofarad/1000 ft (pF/1000 ft)) rms when tested in accordance with ASTM D 4566–90 at a frequency of 1.0±0.1 kHz and a temperature of 23±3°C.

(3) *Pair-to-ground capacitance unbalance.* (i) The average capacitance unbalance as measured on the completed cable shall not exceed 574 pF/km (175 pF/1000 ft) when tested in accordance with ASTM D 4566–90 at a frequency of 1 0.1 kHz and a temperature of 23±3°C.

(ii) When measuring pair-to-ground capacitance unbalance all pairs except the pair under test are grounded to the shield except when measuring cable containing super-units in which case all other pairs in the same super-unit shall be grounded to the shield.

(iii) Pair-to-ground capacitance unbalance may vary directly with the length of the cable.

(4) *Crosstalk loss.* (i) The rms output-to-output far-end crosstalk loss (FEXT) measured on the completed cable in accordance with ASTM D 4566–90 at a test frequency of 150 kHz shall not be less than 68 decibel/kilometer (dB/km) (73 decibel/1000 ft (dB/1000 ft)). The rms calculation shall be based on the combined total of all adjacent and alternate pair combinations within the same layer and center to first layer pair combinations.

(ii) The FEXT crosstalk loss between any pair combination of a cable shall not be less than 58 dB/km (63 dB/1000 ft) at a frequency of 150 kHz. If the loss K_o at a frequency F_o for length L_o is known, then K_x can be determined for any other frequency F_x or length L_x by:

$$\text{FEXT loss}\,(K_x) = K_o - 20\log 10\frac{F_x}{F_o} - 10\log 10\frac{L_x}{L_o}$$

(iii) The near-end crosstalk loss (NEXT) as measured within and between units of a completed cable in accordance with ASTM D 4566–90 at a frequency of 772 kHz shall not be less than the following mean minus sigma (M–S) crosstalk requirement for any unit within the cable:

Unit size	M–S decibel (dB)
Within Unit:	
12 and 13 pairs	56
18 and 25 pairs	60
Between Unit:	
Adjacent 13 pairs	65
Adjacent 25 pairs	66
Nonadjacent (all)	81

Where M–S is the Mean near-end coupling loss based on the combined total of all pair combinations, less one Standard Deviation. Sigma, of the mean value.

(5) *Insulation resistance.* Each insulated conductor in each length of completed cable, when measured with all other insulated conductors and the shield grounded, shall have an insulation resistance of not less than 152 megohm-kilometer (500 megohm-mile) at 20±1°C. The measurement shall be made in accordance with the procedures of ASTM D 4566–90.

(6) *High voltage test.* In each length of completed cable, the dielectric strength of the insulation between conductors shall be tested in accordance with ASTM D 4566–90 and shall withstand, for 3 seconds, a direct current (dc) potential whose value is not less than:

(A) 3.6 kilovolts for 22-gauge conductors; or

(B) 3.0 kilovolts for 24-gauge conductors.

(ii) In each length of completed cable, the dielectric strength between the shield and all conductors in the core shall be tested in accordance with ASTM D 4566–90 and shall withstand, for 3 seconds, a dc potential whose value is not less than 10 kilovolts.

(7) *Conductor resistance.* The dc resistance of any conductor shall be measured in the completed cable in accordance with ASTM D 4566–90 and shall not exceed the following values when measured at or corrected to a temperature of 20±1°C:

AWG	Maximum resistance	
	ohms/kilometer	(ohms/1000 ft)
22	60.7	(18.5)
24	95.1	(29.0)

(8) *Resistance unbalance.* (i) The difference in dc resistance between the two conductors of a pair in the completed cable shall not exceed the values listed in this paragraph when measured in accordance with the procedures of ASTM D 4566–90:

AWG	Resistance unbalance	Maximum for any reel
	Average percent	Individual pair percent
22	1.5	4.0
24	1.5	5.0

(ii) The resistance unbalance between tip and ring conductors shall be random with respect to the direction of unbalance. That is, the resistance of the tip conductors shall not be consistently higher with respect to the ring conductors and vice versa.

(9) *Electrical variations.* (i) Pairs in each length of cable having either a ground, cross, short, or open circuit condition shall not be permitted.

(ii) The maximum number of pairs in a cable which may vary as specified in paragraph (h)(9)(iii) of this section from the electrical parameters given in this section are listed in this paragraph. These pairs may be excluded from the arithmetic calculation:

Nominal pair count	Maximum No. of pairs with allowable electrical variation
12–100	1
101–300	2
301–400	3
401–600	4
601 and above	5

(iii) *Parameter variations*—(A) *Capacitance unbalance-to-ground.* If the cable fails either the maximum individual pair or average capacitance unbalance-to-ground requirement and all individual pairs are 3280 pF/km (1000 pF/1000 ft) or less the number of pairs specified in paragraph (h)(9)(ii) of this section may be eliminated from the average and maximum individual calculations.

(B) *Resistance unbalance.* Individual pair of not more than 7 percent for all gauges.

(C) *Far end crosstalk.* Individual pair combination of not less than 52 dB/km (57 dB/1000 ft).

Note: REA recognizes that in large pair count cables (600 pair and above) a cross, short, or open circuit condition occasionally may develop in a pair which does not affect the performance of the other cable pairs. In these circumstances rejection of the entire cable may be economically unsound or repairs may be impractical. In such circumstances the manufacturer may desire to negotiate with the customer for acceptance of the cable. No more than 0.5 percent of the pairs may be involved.

(i) *Mechanical requirements*—(1) *Cable cold bend test.* The completed cable shall be capable of meeting the requirements of ASTM D 4565–90a after conditioning at −20 ± 2 °C except the mandrel diameters shall be as specified below:

Cable outside diameter	Mandrel diameter
<40 mm (1.5 in.)	15x
≥40 mm (1.5 in.)	20x

(2) *Cable flame test.* The completed cable shall be capable of meeting a maximum flame height of 3.7 m (12.0 ft) when tested in accordance with Underwriters Laboratories (UL) 1666 dated January 22, 1991.

(3) *Cable listing.* All cables manufactured to the specification of this section at a minimum shall be listed as Communication Riser Cable (Type CMR) in accordance with Sections 800–50 and 800–51(b) of the 1993 National Electrical Code.

(j) *Sheath slitting cord* (optional). (1) Sheath slitting cords may be used in the cable structure at the option of the manufacturer.

(2) When a sheath slitting cord is used it shall be nonhygroscopic and nonwicking, continuous throughout a length of cable, and of sufficient strength to open the sheath without breaking the cord.

(3) Sheath slitting cords shall be capable of consistently slitting the jacket and/or shield for a continuous length of 0.6 m (2 ft) when tested in accordance with the procedure specified in Appendix B of this section.

(k) *Identification marker and length marker.* (1) Each length of cable shall be permanently identified as to manufacturer and year of manufacture

(2) The number of conductor pairs and their gauge size shall be marked on the jacket.

(3) The marking shall be printed on the jacket at regular intervals of not more than 1.5 m (5 ft).

(4) An alternative method of marking may be used if accepted by REA prior to its use.

(5) The completed cable shall have sequentially numbered length markers in FEET OR METERS at regular intervals of not more than 1.5 m (5 ft) along the outside of the jacket.

(6) The method of length marking shall be such that for any single length of cable, continuous sequential numbering shall be employed.

(7) The numbers shall be dimensioned and spaced to produce good legibility and shall be approximately 3 mm (0.125 in.) in height. An occasional illegible marking is permissible if there is a legible marking located not more than 1.5 m (5 ft) from it.

(8) The method of marking shall be by means of suitable surface markings producing a clear, distinguishable, contrasting marking acceptable to REA. Where direct or transverse printing is employed, the characters should be indented to produce greater durability of marking. Any other method of length marking shall be acceptable to REA as producing a marker suitable for the field. Size, shape and spacing of numbers, durability, and overall legibility of the marker shall be considered in acceptance of the method.

(9) The accuracy of the length marking shall be such that the actual length of any cable section is never less than the length indicated by the marking and never more than one percent greater than the length indicated by the marking.

(10) The color of the initial marking for a black colored jacket shall be either white or silver. The color of the initial marking for a dark grey colored jacket shall be either red or black. If the initial marking of the black colored jacket fails to meet the requirements of the preceding paragraphs, it will be permissible to either remove the defective marking and re-mark with the white or silver color or leave the defective marking on the cable and re-mark with yellow. If the initial marking of the dark grey colored jacket fails to meet the requirements of the preceding paragraphs, it will be permissible to either remove the defective marking and re-mark with the red or black color or leave the defective marking on the cable and re-mark with yellow. No further re-marking is permitted. Any re-marking shall be on a different portion of the cable circumference than any existing marking when possible and have a numbering sequence differing from any other existing marking by at least 5,000.

(11) Any reel of cable which contains more than one set of sequential markings shall be labeled to indicate the color and sequence of marking to be used. The labeling shall be applied to the reel and also to the cable.

(l) *Preconnectorized cable* (optional). (1) At the option of the manufacturer and upon request by the purchaser, cables 100 pairs and larger may be factory terminated in 25 pair splicing modules.

(2) The splicing modules shall meet the requirements of REA Bulletin 345–54, PE–52, REA Specification for Telephone Cable Splicing Connectors (Incorporated by Reference at § 1755.97), and be accepted by REA prior to their use.

(m) *Acceptance testing and extent of testing.* (1) The tests described in Appendix A of this section are intended for acceptance of cable designs and major modifications of accepted designs. REA decides what constitutes a major modification. These tests are intended to show the inherent capability of the manufacturer to produce cable products having long life and stability.

(2) For initial acceptance, the manufacturer shall submit:

(i) An original signature certification that the product fully complies with each section of the specification;

(ii) Qualification Test Data, per Appendix A of this section;

(iii) To periodic plant inspections;

(iv) A certification that the product does or does not comply with the domestic origin manufacturing provisions of the "Buy American" requirements of the Rural Electrification Act of 1938 (7 U.S.C. 901 *et seq.*);

(v) Written user testimonials concerning performance of the product; and

(vi) Other nonproprietary data deemed necessary by the Chief, Outside Plant Branch (Telephone).

(3) For requalification acceptance, the manufacturer shall submit an original signature certification that the product fully complies with each section of the specification, excluding the Qualification Section, and a certification that the product does or does not comply with the domestic origin manufacturing provisions of the "Buy American" requirements of the Rural Electrification Act of 1938 (7 U.S.C. 901 *et seq.*) for acceptance by June 30 every three years. The required data and certification shall have been gathered within 90 days of the submission.

(4) Initial and requalification acceptance requests should be addressed to: Chairman, Technical Standards Committee "A" (Telephone), Telecommunications Standards Division, Rural Electrification Administration, Washington, DC 20250–1500.

(5) *Tests on 100 percent of completed cable.* (i) The shield of each length of cable shall be tested for continuity using the procedures of ASTM D 4566–90.

(ii) Dielectric strength between all conductors and the shield shall be tested to determine freedom from grounds in accordance with paragraph (h)(6)(ii) of this section.

(iii) Each conductor in the completed cable shall be tested for continuity using the procedures of ASTM D 4566–90.

(iv) Dielectric strength between conductors shall be tested to ensure freedom from shorts and crosses in accordance with paragraph (h)(6)(i) of this section.

(v) Each conductor in the completed preconnectorized cable shall be tested for continuity.

(vi) Each length of completed preconnectorized cable shall be tested for split pairs.

(vii) The average mutual capacitance shall be measured on all cables. If the average mutual capacitance for the first 100 pairs tested from randomly selected groups is between 50 and 53 nF/km (80 to 85 nF/mile), the remainder of the pairs need not to be tested on the 100 percent basis. (See paragraph (h)(1) of this section).

(6) *Capability tests.* Tests on a quality assurance basis shall be made as frequently as is required for each manufacturer to determine and maintain compliance with:

(i) Performance requirements for conductor insulation and jacket material;

(ii) Bonding properties of coated or laminated shielding materials;

(iii) Sequential marking and lettering;

(iv) Capacitance unbalance and crosstalk;

(v) Insulation resistance;

(vi) Conductor resistance and resistance unbalance;

(vii) Cable cold bend and cable flame tests; and

(viii) Mutual conductance.

(n) *Summary of records of electrical and physical tests.* (1) Each manufacturer shall maintain a suitable summary of records for a period of at least 3 years for all electrical and physical tests required on completed cable by this section as set forth in paragraphs (m)(5) and (m)(6) of this section. The test data for a particular reel shall be in a form that it may be

readily available to the purchaser or to REA upon request.

(2) Measurements and computed values shall be rounded off to the number of places of figures specified for the requirement according to ASTM E 29–90.

(o) *Manufacturing irregularities.* (1) Repairs to the shield are not permitted in cable supplied to the end user under this section.

(2) No repairs or defects in the jacket are allowed.

(p) *Preparation for shipment.* (1) The cable shall be shipped on reels unless otherwise specified or agreed to by the purchaser. The diameter of the drum shall be large enough to prevent damage to the cable from reeling or unreeling. The reels shall be substantial and so constructed as to prevent damage to the cable during shipment and handling.

(2) A waterproof corrugated board or other means of protection acceptable to REA shall be applied to the reel and shall be suitably secured in place to prevent damage to the cable during storage and shipment.

(3) The outer end of the cable shall be securely fastened to the reel head so as to prevent the cable from becoming loose in transit. The inner end of the cable shall be securely fastened in such a way as to make it readily available if required for electrical testing. Spikes, staples, or other fastening devices which penetrate the cable jacket shall not be used. The method of fastening the cable ends shall be accepted by REA prior to it being used.

(4) Each length of cable shall be wound on a separate reel unless otherwise specified or agreed to by the purchaser.

(5) The arbor hole shall admit a spindle 63 mm (2.5 in.) in diameter without binding. Steel arbor hole liners may be used but shall be acceptable to REA prior to their use.

(6) Each reel shall be plainly marked to indicate the direction in which it should be rolled to prevent loosening of the cable on the reel.

(7) Each reel shall be stenciled or labeled on either one or both sides with the name of the manufacturer, year of manufacture, actual shipping length, an inner and outer end sequential length marking, description of the cable, reel number and the REA cable designation:

Cable Designation

CT
Cable Construction
Pair Count
Conductor Gauge
A = Coated Aluminum Shield
P = Preconnectorized Cable
Example: CTAP 100–22

Terminating Cable, Coated Aluminum Shield, Preconnectorized, 100 pairs, 22 AWG.

(8) When preconnectorized cable is shipped, the splicing modules shall be protected to prevent damage during shipment and handling. The protection method shall be acceptable to REA prior to its use.

Appendix A to 7 CFR 1755.870—Qualification Test Methods

(I) The test procedures described in this appendix are for qualification of initial designs and major modifications of accepted designs. Included in paragraph (V) of this appendix are suggested formats that may be used in submitting test results to REA.

(II) *Sample Selection and Preparation.* (1) All testing shall be performed on lengths removed sequentially from the same 25 pair, 22 gauge jacketed cable. This cable shall not have been exposed to temperatures in excess of 38 °C since its initial cool down after sheathing. The lengths specified are minimum lengths and if desirable from a laboratory testing standpoint longer lengths may be used.

(a) Length A shall be 12 ± 0.2 meters (40 ± 0.5 feet) long. Prepare the test sample by removing the jacket, shield, and core wrap for a sufficient distance on both ends to allow the insulated conductors to be flared out. Remove sufficient conductor insulation so that appropriate electrical test connections can be made at both ends. Coil the sample with a diameter of 15 to 20 times its sheath diameter. Two lengths are required.

(b) Length B shall be 300 millimeters (1 foot) long. Three lengths are required.

(c) Length C shall be 3 meters (10 feet) long and shall be maintained at 23 ± 3 °C for the duration of the test. Two lengths are required.

(2) *Data Reference Temperature.* Unless otherwise specified, all measurements shall be made at 23 ± 3 °C.

(III) *Environmental Tests*—(1) *Heat Aging Test*—(a) *Test Samples.* Place one sample each of lengths A and B in an oven or environmental chamber. The ends of sample A shall exit from the chamber or oven for electrical tests. Securely seal the oven exit holes.

(b) *Sequence of Tests.* Sample B referenced in paragraph (III)(1)(a) of this appendix shall be subjected to the insulation compression test outlined in paragraph (III)(2) of this appendix.

(c) *Initial Measurements.* (i) For sample A, measure the open circuit capacitance and conductance for each odd pair at 1. 150, and 772 kilohertz after conditioning the sample at the data reference temperature for 24 hours. Calculate the average and standard deviation for the data of the 13 pairs on a per kilometer (per mile) basis.

(ii) Record on suggested formats in paragraph (V) of this appendix or on other easily readable formats.

(d) *Heat Conditioning.* (i) Immediately after completing the initial measurements, condition the sample for 14 days at a temperature of 65 ± 2 °C.

(ii) At the end of this period. Measure and calculate the parameters given in paragraph (III)(1)(c) of this appendix. Record on suggested formats in paragraph (V) of this appendix or on other easily readable formats.

(e) *Overall Electrical Deviation.* (i) Calculate the percent change in all average parameters between the final parameters after conditioning with the initial parameters in paragraph (III)(1)(c) of this appendix.

(ii) The stability of the electrical parameters after completion of this test shall be within the following prescribed limits:

(A) *Capacitance.* The average mutual capacitance shall be within 10 percent of its original value;

(B) The change in average mutual capacitance shall be less than 10 percent over the frequency range of 1 to 150 kilohertz; and

(C) *Conductance.* The average mutual conductance shall not exceed 3.7 micromhos/kilometer (6 micromhos/mile) at a frequency of 1 kilohertz.

(2) *Insulation Compression Test*—(a) *Test Sample B.* Remove jacket, shield, and core wrap being careful not to damage the conductor insulation. Remove one pair from the core and carefully separate and straighten the insulated conductors. Retwist the two insulated conductors together under sufficient tension to form 10 evenly spaced 360 degree twists in a length of 100 millimeters (4 inches).

(b) *Sample Testing.* Center the mid 50 millimeters (2 inches) of the twisted pair between two smooth rigid parallel metal plates measuring 50 millimeters (2 inches) in length or diameter. Apply a 1.5 volt direct current potential between the conductors, using a light or buzzer to indicate electrical contact between the conductors. Apply a constant load of 67 newtons (15 pound-force) on the sample for one minute and monitor for evidence of contact between the conductors Record results on suggested formats in paragraph (V) of this appendix or on other easily readable formats.

(3) *Temperature Cycling.* (a) Repeat paragraphs (III)(1)(a) through (III)(1)(c)(ii) of this appendix for a separate set of samples A and B which have not been subjected to prior environmental conditioning.

(b) Immediately after completing the measurements, subject the test samples to 10 cycles of temperature between −40 °C and +60 °C. The test samples shall be held at each temperature extreme for a minimum of 1.5 hours during each cycle of temperature. The air within the temperature cycling chamber shall be circulated throughout the duration of the cycling.

(c) Repeat paragraphs (III)(1)(d)(ii) through (III)(2)(b) of this appendix.

(IV) *Control Sample*—(1) *Test Samples.* One length of sample B shall have been maintained at 23 ± 3 °C for at least 48 hours before the testing.

(2) Repeat paragraphs (III)(2) through (III)(2)(b) of this appendix.

(3) *Surge Test.* (a) One length of sample C shall be used to measure the breakdown between conductors while the other length of C shall be used to measure core to shield breakdown.

(b) The samples shall be capable of withstanding, without damage, a single surge voltage of 20 kilovolts peak between conductors, and 35 kilovolts peak between conductors and the shield as hereinafter described. The surge voltage shall be developed from a capacitor discharge through a forming resistor connected in parallel with the dielectric of the test sample. The surge generator constants shall be such as to produce a surge of 1.5 × 40 microseconds wave shape.

(c) The shape of the generated wave shall be determined at a reduced voltage by connecting an oscilloscope across the forming resistor with the cable sample connected in parallel with the forming resistor. The capacitor bank is charged to the test voltage and then discharged through the forming resistor and test sample. The test sample shall be considered to have passed the test if there is no distinct change in the wave shape obtained with the initial reduced voltage compared to that obtained after the application of the test voltage.

(V) The following suggested formats may be used in submitting the test results to REA:

Appendix B to 7 CFR 1755.870—Sheath Slitting Cord Qualification

(I) This test procedure described in this appendix is for qualification of initial and subsequent changes in sheath slitting cords.

(II) *Sample selection.* All testing shall be performed on two 1.2 m (4 ft) lengths of cable removed sequentially from the same 25 pair, 22 gauge jacketed cable. This cable shall not have been exposed to temperatures in excess of 38 °C since its initial cool down after sheathing.

(III) *Test procedure.* (1) Using a suitable tool, expose enough of the sheath slitting cord to permit grasping with needle nose pliers.

(2) The prepared test specimens shall be maintained at a temperature of 23 ± 1 °C for at least 4 hours immediately prior to and during the test.

(3) Wrap the sheath slitting cord around the plier jaws to ensure a good grip.

(4) Grasp and hold the cable in a convenient position while gently and firmly pulling the sheath slitting cord longitudinally in the direction away from the cable end. The angle of pull may vary to any convenient and functional degree. A small starting notch is permissible.

(5) The sheath slitting cord is considered acceptable if the cord can slit the jacket and/or shield for a continuous length of 0.6 m (2 ft) without breaking the cord.

Dated: June 2, 1994.

Bob J. Nash,

Under Secretary, Small Community and Rural Development.

DEPARTMENT OF JUSTICE

Immigration and Naturalization Service

8 CFR Part 103

[INS No. 1384–92; AG ORDER NO. 1893–94]

RIN 1115–AD18

Adjustment to the Examinations Fee Schedule

AGENCY: Immigration and Naturalization Service, Justice.

ACTION: Final rule.

SUMMARY: This rule adjusts the Immigration and Naturalization Service (INS) Examinations Fee schedule. The increases are necessary to generate sufficient revenue to recover the costs of providing adjudication and naturalization services. This rule ensures that funds will be available to continue providing services to users while keeping increases as small as possible.

EFFECTIVE DATE: July 14, 1994.

FOR FURTHER INFORMATION CONTACT: Donald L. Lowry, Staff Accountant, Fee Analysis and Operations Branch, Office of Finance; Immigration and Naturalization Service; 425 I Street, NW.; room 6240; Washington, DC 20536–0002; telephone 202–616–2754.

SUPPLEMENTARY INFORMATION:

I. Introduction

The INS published a proposed rule on January 10, 1994, at 59 FR 1308, to adjust the current Examinations Fee schedule. The proposed rule was initially published with a 30-day comment period. To ensure that the public had ample opportunity to review and comment on the proposed rule, the comment due date was extended from February 9, 1994 to March 11, 1994 (59 FR 5740, Feb. 8, 1994).

The fee adjustment is needed to comply with specific Federal immigration laws and the Federal user fee statute and regulations, which require the recipients of special benefits from Government services that are not directed to the public at large to bear the costs to the Government of providing those services. The fees amended in this rule result from an analysis of adjudication and naturalization services and associated costs for fiscal year 1993 and projected costs for fiscal year 1994. The revised fees are calculated to recover the costs of providing these special services and benefits.

Comments were received from 77 commenters, including 46 performing arts organizations, 15 agricultural organizations, 7 employers, 3 attorney organizations, 3 individual attorneys, 2 voluntary service organizations, and 1 member of Congress. The Department carefully considered all comments before preparing this final rule. Following is a discussion of the comments.

II. Summary of Comments

A. Petition for a Nonimmigrant Worker (Form I–129)

Sixty-six commenters, largely performing arts organizations and agricultural organizations, expressed dissatisfaction with the proposed fee schedule for the Petition for a Nonimmigrant Worker (Form I–129). The commenters opposed increasing the minimum fee from $80 ($70 base fee plus $10 fee per beneficiary) to $120 and the per worker fee from $10 to $20. Fifteen of these same commenters questioned the justification for assessing a per-worker fee for petitions with multiple unnamed beneficiaries.

In response to the public's comments, INS is making the following changes: Petitioners with multiple unnamed beneficiaries will no longer be assessed any per worker fee, and the base fee will increase from $70 to $75. The $5 increase is consistent with the general 7.5 percent increase to the current fee schedule, which was discussed in the notice of proposed rule.

On January 11, 1994, INS promulgated a final rule, 59 FR 1455, which allows a worker's dependents to be included in a petitioner's request for an extension of stay or change of status, where there is only one worker in the petition. That provision will go into effect at the time the form providing for this process becomes available. This rule sets a fee of $10 for each dependent included on an extension of stay or change of status request. Dependents of beneficiaries covered by multiple worker petitions must continue to file requests for an extension of stay or change of status on an Application to Extend/Change Nonimmigrant Status (Form I–539).

Accordingly, the new fee structure for the Petition for a Nonimmigrant Worker will be as follows:

Petition With Unnamed Beneficiaries

—Fee of $75 per petition.

Petition With Named Beneficiaries

—Base fee of $75 per petition plus either:
—$10 per worker if requesting consulate or port-of-entry notification for visa issuance or admission;
—$80 per worker if requesting a change of status; or
—$50 per worker if requesting an extension of stay. If filing an extension of stay or change of status for one worker, dependents may be included for a fee of $10 per dependent.

Two additional comments related to I–129 processing were received. One commenter stated that the current procedure includes Consulate or port-of-entry notification for visa issuance or admission purposes and the proposed procedure does not discuss this notification. The commenter questioned whether notification would continue. This rule amends only the Examination Fee schedule and does not change existing procedures; as noted above, this notification will continue.

One commenter also questioned the procedural change related to the $10 fee for each dependent of a beneficiary worker. The commenter stated that the beneficiary worker may be transferred to the United States several months in advance of that person's family members and questioned whether this delay between the two dates would present a problem for Consulate or port-of-entry processing.

Again, this rule only sets the fee for dependents included on an extension of stay or change of status request. The final rule promulgated at 59 FR 1455 provides for dependents to be included on a request for an extension of stay or change of status. An original petition is granted solely on behalf of the worker; the consular officer issues visas to dependents separately. Accordingly, the commenter's concerns are unfounded.

B. Application for Employment Authorization (Form I–765)

One commenter objected to the $10 increase for the employment authorization document (EAD). The commenter stated that EADs for asylum applicants are valid for only 6 months and that it is unfair and unreasonable to require an asylum applicant and dependent family members to pay a $70 fee every 6 months. The commenter suggests that if EAD cards were renewed for a significant period of time, such an increase would not be an unfair burden on the applicant.

The increase in the EAD fee is necessary to recover the costs of adjudicating the application. Under 8 CFR 208.7, an interim EAD for an asylum applicant may be granted for a period not to exceed 1 year. Although INS has the discretion to grant an EAD for a period of 6 months, most asylum EADs are valid for 1 year. Consequently, the situation described by the commenter should not arise frequently.

C. Application to Register Permanent Residence or Adjust Status (Form I–485)

One commenter objected to the $10 increase in fees for filing the I–485 and suggested a family ceiling on the fees charged. The commenter stated that the other costs associated with filing an I–485, such as the required physical examination, make the total costs prohibitive for a family.

The INS recognizes the commenter's concerns. However, it is not possible for INS to set a family ceiling and recover the costs of adjudicating applications through user fees, as required under section 286(m) of the Immigration and Nationality Act (INA). However, the fees for applicants under the age of 14 are $100, an increase of only $5. It should also be noted that fee waivers are available on a case-by-case basis, under 8 CFR § 103.7(c).

D. Application for Naturalization (N–400) and Application for Certificate of Citizenship (N–600)

One commenter criticized INS for increasing naturalization fees. The commenter opposed the increases stating that the income of many immigrant families is relatively low, that increased rates of naturalization are in our national interest, and that concerns about INS financial management and service delivery have yet to be resolved.

The INS recognizes the commenter's concern. However, as stated above, under section 286(m) of the INA, INS is required to recover the costs of adjudicating naturalization applications through user fees. Alternative revenue sources are not available. Increased naturalization fees are necessary to avoid applicants for other benefits paying higher fees to absorb the costs not recovered through the naturalization fees. In order to recover the costs, the naturalization fees must be increased.

E. Meaningful Opportunity To Comment on the Proposed Rule

One commenter stated that the public has been denied a meaningful opportunity to comment on the proposed rule because the proposed rule did not provide sufficient information to do so. The INS believes that sufficient information was provided in the proposed rule. Under the proposed rule, supporting documentation was available upon request and was provided to commenters who requested it. In addition, the comment period was extended an additional 30 days so that the public would have ample opportunity to fully review and comment on the proposed rule.

F. Indirect Costs Charged to the Examinations Fee Account

One commenter stated that certain functions in the legal proceedings program, such as adversary appearances, are not appropriately charged to the Examinations Fee Account. In 1992, INS performed a comprehensive review of the work that should be properly charged to the INS user fee accounts, and concluded that these legal costs are an appropriate and necessary expense of the adjudication and naturalization service process.

The same commenter stated that the proposed rule did not explain what management and administration (M&A) positions and functions are included in indirect costs, so that the commenter could not determine if they were appropriate. The proposed rule used the term management and administrative (M&A) in a descriptive sense. As commonly used, M&A refers to the costs of providing accounting, budget, personnel, equal employment opportunity, contracting and procurement, and general administration services. The proposed rule used the example of the costs of mail processing in discussing how the distribution-key concept works in allocating indirect costs among various accounts. From the example and from the general understanding of the term "M&A," INS believes that sufficient

information was given to allow a fair opportunity to comment on the appropriateness of charging M&A as indirect costs to the Examinations Fee Account.

G. Proportional Assignment of Indirect Costs to Each Examinations Fee

One commenter stated that INS did not explain why indirect costs are assigned in an "across-the-board" manner, rather than apportioning the indirect costs in the same ratio as the direct cost of the application. Various methods for allocating indirect costs exist; INS considers the current method to be reasonable. As INS continues to refine its fee structure, alternative allocation methodologies will be evaluated.

H. Plan to Improve Service

One commenter stated that the proposed rule did not discuss plans to improve service, such as expansion of INS service centers, elimination of backlogs, and acceleration of processing times.

Improvement efforts have been focused on processing more applications at the service centers and reducing the adjudicative work at the district offices. The expansion of centralized processing at the service centers is expected to result in expedited processing of routine cases. The district offices will retain adjudicative responsibilities for applications necessitating an interview or complex or unique adjudications where personal contact is necessary. The INS expects that staff will be shifted among district offices and service centers based on workload requirements.

Implementation of an automated system at district offices and continued improvement of that system for service center operations is also expected to improve productivity. This automated system, called CLAIMS, integrates many of the manual processes or discrete automated processes that adjudicators use now. The CLAIMS system is currently operational in the four INS service centers; in FY 1994, it will be installed at one district office. Plans for expansion to other sites and continued system enhancements are under constant review and dependent upon funding availability.

I. Fee Basis

One commenter stated that the proposed fees appear to be based on faulty or incomplete data and do not appear to be rationally related to the real work required to process any given application. As discussed in the proposed rule, INS examined the relevant costs of the Examinations Fee Account and computed the percentage revenue increase required to cover the costs, and that percentage, with limited exceptions, was applied to the existing fee schedule.

The INS also considered the feasibility of basing the proposed fees on 1992 costs measurements. The INS rejected this approach because of problems with 1992 data caused by the transition to a more automated system of productivity measurement. At this time, the current fee schedule, with specifically identified adjustments, reflects the best available data on costs, which is consistent with Office of Management and Budget and Department of Justice guidance. Future fee adjustments will reflect efforts to refine direct and indirect cost definitions and measurements.

The same commenter stated that the inclusion of inspection costs was not explained in the proposed rule. The costs of the Inspections program attributed to the Examinations Fee Account are exclusively related to examinations work performed by land border inspectors during periods in which they are not performing inspections. This allocation of adjudication workload to inspectors permits more efficient use of resources and results in reduced costs.

III. Fee Adjustments

The fee adjustments, as adopted in this rule, are shown in Exhibit 1.

Regulatory Flexibility Act

The Attorney General, in accordance with the Regulatory Flexibility Act (5 U.S.C. 605(b)), has reviewed this regulation and by approving it certifies that this rule will not have a significant economic impact on a substantial number of small entities. This rule adjusts the current Examinations Fee schedule. Its financial impact on users of the services is small. In most cases, the fee increase is $5.

Executive Order 12866

This rule is considered by the Department of Justice, Immigration and Naturalization Service, to be a "significant regulatory action" under Executive Order 12866, section 3(f), Regulatory Planning and Review, because approximately 4 million people per annum will be assessed a user fee to recover the costs of providing adjudication and naturalization services.

Executive Order 12612

The regulation will not have substantial direct effects on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

Executive Order 12606

The Attorney General certifies that she has assessed this rule in light of the criteria in Executive Order 12606 and has determined that it will not have a significant negative impact on family well-being.

The information collection requirements contained in this rule have been cleared by the Office of Management and Budget under the provisions of the Paperwork Reduction Act. Clearance numbers for these collections are contained in 8 CFR 299.5, Display of Control Numbers.

List of Subjects in 8 CFR Part 103

Administrative practice and procedure, Authority delegations (Government agencies), Fees, Forms, Freedom of information, Privacy, Reporting and recordkeeping requirements, Surety bonds.

Accordingly, part 103 chapter I of title 8 of the Code of Federal Regulations is amended as follows:

PART 103—POWERS AND DUTIES OF SERVICE OFFICERS; AVAILABILITY OF SERVICE RECORDS

1. The authority citation for part 103 continues to read as follows:

Authority: 5 U.S.C. 552, 552a; 8 U.S.C. 1101, 1103, 1201, 1252 note, 1252b, 1304, 1356; 31 U.S.C. 9701; E.O. 12356, 47 FR 14874, 15557, 3 CFR, 1982 Comp., p. 166; 8 CFR part 2.

2. Section 103.7, paragraph (b)(1) is amended by revising the entries listed to read as follows:

§ 103.7 Fees.

* * * * *

(b) * * *

(1) * * *

Form I–17. For filing an application for school approval, except in the case of a school or school system owned or operated as a public educational institution or system by the United States or a state or political subdivision thereof—$140.

Form I–90. For filing an application for Alien Registration Receipt Card

(Form I–551) in lieu of an obsolete card or in lieu of one lost, mutilated or destroyed, or in a changed name—$75.

Form I–102. For filing an application (Form I–102) for Arrival-Departure Record (Form I–94) or Crewman's Landing (Form I–95), in lieu of one lost, mutilated, or destroyed—$65.

Form I–129. For filing a petition for a nonimmigrant worker—If a petition with unnamed beneficiaries, a fee of $75 per petition. If a petition with named beneficiaries, a base fee of $75 plus: —$10 per worker if requesting consulate or port-of-entry notification for visa issuance or admission; —$80 per worker if requesting a change of status; or —$50 per worker if requesting an extension of stay. If filing an extension of stay or change of status for one worker, dependents may be included for a fee of $10 per dependent.

* * * * *

Form I–130. For filing a petition to classify status of alien relative for issuance of immigrant visa under section 204(a) of the Act—$80.

Form I–131. For filing an application for issuance of reentry permit—$70.

Form I–140. For filing a petition to classify preference status of an alien on basis of profession or occupation under section 204(a) of the Act—$75.

* * * * *

Form I–192. For filing an application for discretionary relief under section 212(d)(3) of the Act, except, in an emergency case, or where the approval of the application is in the interest of the United States Government—$90.

Form I–193. For filing an application for waiver of passport and/or visa—$95.

Form I–212. For filing an application for permission to reapply for an excluded or deported alien, an alien who has fallen into distress and has been removed as an alien enemy, or an alien who has been removed at Government expense in lieu of deportation—$95.

* * * * *

Form I–360. For filing a petition for an Amerasian, Widow(er), or Special Immigrant—$80, except there is no fee for a petition seeking classification as an Amerasian.

Form I–485. For filing an application for permanent residence status or creation of a record of lawful permanent residence—$130 for an applicant 14 years of age or older; $100 for an applicant under the age of 14 years.

* * * * *

Form I–526. For filing a petition for an alien enterpreneur—$155.

* * * * *

Form I–539. For filing an application to extend or change nonimmigrant status—$75 plus $10 per coapplicant.

* * * * *

Form I–600. For filing a petition to classify orphan as an immediate relative for issuance of immigrant visa under section 204(a) of the Act. (When more than one petition is submitted by the same petitioner on behalf of orphans who are brothers or sisters, only one fee will be required.)—$155.

Form I–600A. For filing an application for advance processing of orphan petition. (When more than one petition is submitted by the same petitioner on behalf of orphans who are brothers or sisters, only one fee will be required.—$155.

Form I–601. For filing an application for waiver of ground of excludability under section 212 (h) or (i) of the Act. (Only a single application and fee shall be required when the alien is applying simultaneously for a waiver under both those sub-sections.)—$95.

Form I–612. For filing an application for waiver of the foreign-residence requirement under section 212(e) of the Act—$95.

* * * * *

Form I–751. For filing a petition to remove the conditions on residence which is based on marriage—$80.

* * * * *

Form I–765. For filing an application for employment authorization pursuant to 8 CFR 274a.13—$70.

* * * * *

Form I–817. For filing an application for voluntary departure under the Family Unity Program—$80. The maximum amount payable by the members of a family filing their applications concurrently shall be $225.

* * * * *

Form N–300. For filing an application for declaration of intention—$75.

* * * * *

Form N–400. For filing an application for naturalization—$95. For filing an application for naturalization under section 405 of the Immigration Act of 1990, if the applicant will be interviewed in the Philippines—$120.

* * * * *

Form N–470. For filing an application for section 316(b) or 317 of the Act benefits—$115.

Form N–565. For filing an application for a certificate of naturalization or declaration of intention in lieu of a certificate or declaration alleged to have been lost, mutilated, or destroyed; for a certificate of citizenship in a changed name under section 343(b) or (d) of the Act; or for a special certificate of naturalization to obtain recognition as a citizen of the United States by a foreign state under section 343(c) of the Act—$65.

Form N–600. For filing an application for certificate of citizenship under section 309(c) or section 341 of the Act—$100.

Form N–643. For filing an application for a certificate of citizenship on behalf of an adopted child—$80.

Form N–644. For filing an application for posthumous citizenship—$80.

* * * * *

Dated: June 8, 1994.

Janet Reno,

Attorney General.

Office of the Attorney General

28 CFR Part 65

[INS No. 1449–92; AG Order No. 1892–94]

RIN 1115–AD40

Emergency Federal Law Enforcement Assistance: Immigration Emergency Fund

AGENCY: Department of Justice.

ACTION: Final rule.

SUMMARY: This final rule implements provisions in the Immigration and Nationality Act that establish an "Immigration Emergency Fund" and that provide for assistance to States and local governments for services provided, at the request of the Attorney General, to meet an immigration emergency declared by the President, to aid in the administration of the immigration laws of the United States, or to meet urgent demands arising from the presence of aliens in a State or local jurisdiction. This rule sets forth procedures governing: Requests for a Presidential declaration of an immigration emergency; requests from the Attorney General for state or local government assistance when the President has declared an immigration emergency and in certain other circumstances; and applications from States and local governments for assistance from the Immigration Emergency Fund.

EFFECTIVE DATE: June 14, 1994.

FOR FURTHER INFORMATION CONTACT: Michael J. Coster, Associate General Counsel, Immigration and Naturalization Service, 425 I Street, NW., room 6100, Washington, DC 20536, telephone (202) 514–2895.

SUPPLEMENTARY INFORMATION: The Department of Justice ("Department") promulgated a proposed rule on January 14, 1992, 57 FR 1439, which set forth procedures and requirements for reimbursement from the Immigration Emergency Fund to States and localities for assistance provided in the absence of a Presidential determination that an immigration emergency exists under paragraph (b)(2) of section 404 of the Immigration and Nationality Act ("INA"), 8 U.S.C. 1101, note (b)(2). After receiving several comments, the rule was expanded and amended significantly, and the Department promulgated another proposed rule on November 5, 1993, 58 FR 58994. The proposed rule set forth procedures and requirements for reimbursement from the Immigration Emergency Fund to States and local governments under all the provisions of section 404(b) of the INA as required by section 610 of the Departments of Commerce, Justice, and State, the Judiciary, and Related Agencies Appropriations Act, 1992, Public Law 102–140, 105 Stat. 782, 832. The Supplementary Information section of the publication at 58 FR 58994 contains an exhaustive history of the legislation.

The second proposed rule originally required written comments to be submitted by December 6, 1993. On January 5, 1994, at 59 FR 558, the Department extended the comment period to January 26, 1994, and three sets of comments were received. Two were from government entities while the third was from a public policy group. The Department received and evaluated the comments as follows:

Comment: The definition of "assistance" for which the fund could be used to reimburse State and local governments should be expanded to include direct and indirect costs, such as overhead and administrative costs, associated with providing services and resources to aliens, including those illegal aliens incarcerated in jails and prisons for violation of State criminal

laws. Additionally, assistance should also include providing for basic medical, cash, and social service needs in the short run, and housing, education, and human service needs in the longer rule. This type of social service assistance should not be tied to the establishment of large shelter facilities.

Response: These changes have not been adopted. The Immigration Emergency Fund provides only limited resources which must be allocated in a judicious fashion. The Department believes that the use of the funds should be limited to assistance provided to the Attorney General in the enforcement and administration of the immigration laws of the United States. This view is supported by the statutory language, which provides for reimbursement for "assistance as required *by the Attorney General* * * *." 8 U.S.C. 1101, note (b)(2)(A) (emphasis added). The Attorney General's mission does not include providing social services or providing costs of incarcerating persons for violating State criminal laws. Thus, only in limited circumstances do these types of services assist the Attorney General.

Comment: It should be made clear that any denial of funds is without prejudice, and that there may be an opportunity for the States or local governments to renew their request.

Response: This change is unnecessary and has not been adopted. The regulation contains no language which would limit the ability of a State or local government to renew an application.

Comment: For the purpose of determining the increase in the number of asylum applications in an Immigration and Naturalization Service ("INS") district for a given quarter, the number of Cuban nationals who remain in the INS district after the expiration of their visitors visas should be included as *de facto* asylum applicants, whether or not the Cuban nationals have formally applied for asylum.

Response: This change has not been adopted. The suggested method for calculating the number of asylum applications filed in a certain quarter is inconsistent with the plain language of the statute and other portions of the INA. However, the Attorney General may consider the concerns raised by the comment regarding Cubans who remain without filing asylum applications as "other circumstances" justifying access to the fund.

Comment: The definition of "other circumstances" is weak, thus making it difficult to understand what this may cover. This definition should be reconsidered and elaborated upon by the Department before final regulations are published.

Response: This change has not been adopted. The statutory language indicates that Congress intended to give the Attorney General broad discretion in determining which "other circumstances" would justify access to the fund. The regulation should not unnecessarily limit that discretion.

Comment: The regulation concerning application requirements should be more specific. The application process should be triggered by a phone call by the chief executive of the impacted jurisdiction to the Attorney General declaring his or her intention to apply to access the fund. This call would immediately be followed by a facsimile correspondence reiterating the chief executive's intent to apply. Within twenty-four hours of the call and facsimile, the Attorney General and the chief executive or their designees would meet to facilitate the negotiation of the application. The written application would need to be submitted within five calendar days of this meeting and would include: (a) A cover letter from the chief executive; (b) a written narrative of the emergency conditions and listing the state point of contact; (c) a listing of the broad service categories required by the aliens; (d) a description of the services; (e) the number or estimated number of aliens to be served; (f) the cost or estimated cost to be incurred; and (g) time parameters for service provision with a proviso that access to the funds could be extended without formal reapplication in the case of exigent circumstances.

Response: The specific procedures recommended would be a sound and welcome way for a State or local government to present its request for funding, but the regulation has not been amended to require adherence to those specific procedures. The flexible application process prescribed in the regulation is sufficiently specific without being unduly burdensome in the information requirements or overly confining in the formal requirements of the application. The rule has been amended to allow the Attorney General to use the grant or cooperative agreement process to provide funding, in addition to negotiating a separate reimbursement agreement. Accordingly, State and local governments may also use standard grant applications. The informal communication recommended by the commentator is already included in the regulation at § 65.85(b), and is strongly encouraged.

Comment: The regulation is currently promulgated under 28 CFR part 65, which is entitled "Emergency Federal Law Enforcement Assistance." The regulation should be retitled to reflect the overall intent of the statute and the contents of the regulation more accurately.

Response: This change has not been adopted. The regulation remains codified under 28 CFR part 65. However, subpart I is entitled "Immigration Emergency Fund," and the Department will consider redesignating the regulation in the future.

Procedural Matters

In accordance with 5 U.S.C. 605(b), the Attorney General certifies that this rule does not have a significant adverse economic impact on a substantial number of small entities. This rule is promulgated in accordance with the principles set forth in Executive Order 12866, and the Department considers the rule a "significant regulatory action" within the meaning of section 3(f) of E.O. 12866. Accordingly, the rule has been reviewed by the Office of Management and Budget ("OMB").

The regulation adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

The information collection requirements contained in this rule have been cleared by OMB under the provisions of the Paperwork Reduction Act. The OMB clearance number is 1115–0184.

List of Subjects in 28 CFR Part 65

Grant programs—law, Law enforcement, Reporting and recordkeeping requirements.

Accordingly, part 65 of chapter I of title 28 of the Code of Federal Regulations is amended as follows:

PART 65—[AMENDED]

1. The authority citation for part 65 is revised to read as follows:

Authority: The Comprehensive Crime Control Act of 1984, Title II, Chap. VI, Div. I, Subdiv. B, Emergency Federal Law Enforcement Assistance, Pub. L. 98–473, 98 Stat. 1837, Oct. 12, 1984 (42 U.S.C. 10501 et seq.); 8 U.S.C. 1101 note; Sec. 610, Pub. L. 102–140, 105 Stat. 832.

2. Part 65 is amended by adding a new subpart I to read as follows:

Subpart I—Immigration Emergency Fund

65.80 General.
65.81 General definitions.
65.82 Procedure for requesting a Presidential determination of an immigration emergency.
65.83 Assistance required by the Attorney General.
65.84 Procedures for the Attorney General seeking State or local assistance.
65.85 Procedures for State or local governments applying for reimbursement.

Subpart I—Immigration Emergency Fund

§ 65.80 General.

The regulations of this subpart set forth procedures for implementing section 404(b) of the Immigration and Nationality Act ("INA"), 8 U.S.C. 1101 note, by providing for Presidential determinations of the existence of an immigration emergency, and for payments from the Immigration Emergency Fund to State and local governments for assistance provided in meeting an immigration emergency. The regulations of this subpart also establish procedures by which the Attorney General may draw upon the Immigration Emergency Fund, without a Presidential determination that an immigration emergency exists, to provide funding to State and local governments for assistance provided as required by the Attorney General in certain specified circumstances.

§ 65.81 General definitions.

As used in this part:

Assistance means any actions taken by a State or local government directly relating to aiding the Attorney General in the administration of the immigration laws of the United States and in meeting urgent demands arising from the presence of aliens in the State or local government's jurisdiction, when such actions are taken to assist in meeting an immigration emergency or under any of the circumstances specified in section 404(b)(2)(A) of the INA. Assistance may include, but need not be limited to, the provision of large shelter facilities for the housing and screening of aliens, and, in connection with these activities, the provision of such basic necessities as food, water clothing, and health care.

Immigration emergency means an actual or imminent influx of aliens which either is of such magnitude or exhibits such other characteristics that effective administration of the immigration laws of the United States is beyond the existing capabilities of the Immigration and Naturalization Service ("INS") in the affected area or areas. Characteristics of an influx of aliens, other than magnitude, which may be considered in determining whether an immigration emergency exists include: the likelihood of continued growth in the magnitude of the influx; an apparent connection between the influx and increases in criminal activity; the actual or imminent imposition of unusual and overwhelming demands on law enforcement agencies; and other similar characteristics.

Other circumstances means a situation that, as determined by the Attorney General, requires the resources of a State or local government to ensure the proper administration of the immigration laws of the United States or to meet urgent demands arising from the presence of aliens in a State or local government's jurisdiction.

§ 65.82 Procedure for requesting a Presidential determination of an immigration emergency.

(a) The President may make a determination concerning the existence of an immigration emergency after review of a request from either the Attorney General of the United States or the chief executive of a State or local government. Such a request shall include a description of the facts believed to constitute an immigration emergency and the types of assistance needed to meet that emergency. Except when a request is made by the Attorney General, the requestor shall file the original application with the Office of the President and shall file copies of the application with the Attorney General and with the Commissioner of INS.

(b) If the President determines that an immigration emergency exists, the President shall certify that fact to the Judiciary Committees of the House of Representatives and of the Senate.

§ 65.83 Assistance required by the Attorney General.

The Attorney General may request assistance from a State or local government in the administration of the immigration laws of the United States, or in meeting urgent demands where the need for assistance arises because of the presence of aliens in that State or local jurisdiction, and may provide funding to a State or local government relating to such assistance from the Immigration Emergency Fund, without a Presidential determination of an immigration emergency, in any of the following circumstances:

(a) An INS district director certifies to the Commissioner of INS, who shall, in turn, certify to the Attorney General, that the number of asylum applications filed in that INS district during the relevant calendar quarter exceeds by at least 1,000 the number of such applications filed in that district during the preceding calendar quarter. For purposes of this paragraph, providing parole at a point of entry in a district shall be deemed to constitute an application for asylum in the district.

(b) The Attorney General determines that there exist circumstances involving the administration of the immigration laws of the United States that endanger the lives, property, safety, or welfare of the residents of a State or locality.

(c) The Attorney General determines that there exist any other circumstances, as defined in § 65.81 of this subpart, such that it is appropriate to seek assistance from a State or local government in administering the immigration laws of the United States or in meeting urgent demands arising from the presence of aliens in a State or local jurisdiction.

§ 65.84 Procedures for the Attorney General seeking State or local assistance.

(a) When the Attorney General determines to seek assistance from a State or local government under § 65.83 of this subpart or when the President has determined that an immigration emergency exists, the Attorney General shall negotiate the terms and conditions of that assistance with the State or local government, and shall set forth those terms and conditions. Funding related to such assistance can be provided by a reimbursement agreement, grant, or cooperative agreement.

(b) A reimbursement agreement shall contain the procedures under which the State or local government is to obtain reimbursement for its assistance. A reimbursement agreement shall include the title of the official to whom claims are to be submitted, the intervals at which claims are to be submitted, a description of the supporting documentation to be submitted, and any limitations on the total amount of reimbursement that will be provided. Grants and cooperative agreements shall be made and administered in accordance with the uniform procedures in Part 66 of this title.

(c) In exigent circumstances, the Attorney General may agree to provide funding to a State or local government without a written agreement. A reimbursement agreement, grant, or cooperative agreement conforming to the specifications in this section shall be reduced to writing as soon as practicable.

§ 65.85 Procedures for State or local governments applying for funding.

(a) In the event that the chief executive of a State or local government

determines that any of the circumstances set forth in § 65.83 of this subpart exists, he or she may pursue the procedures in this section to submit to the Attorney General an application for a reimbursement agreement, grant, or cooperative agreement as described in § 65.84 of this subpart.

(b) The Department strongly encourages chief executives of States and local governments, if possible, to consult informally with the Attorney General and the Commissioner of INS prior to submitting a formal application. This informal consultation is intended to facilitate discussion of the nature of the assistance to be provided by the State or local government, the requirements of the Attorney General, if any, for such assistance, the costs associated with such assistance, and the Department's preliminary views on the appropriateness of the proposed funding.

(c) The chief executive of a State or local government shall submit an application in writing to the Attorney General, and shall file a copy with the Commissioner of INS. The application shall set forth in detail the following information:

(1) The name of the jurisdiction requesting reimbursement;

(2) All facts supporting the application;

(3) The nature of the assistance which the State or local government has provided or will provide, as required by the Attorney General, for which funding is requested;

(4) The dollar amount of the funding sought;

(5) A justification for the amount of funding being sought;

(6) The expected duration of the conditions requiring State or local assistance;

(7) Information about whether funding is sought for past costs or for future costs;

(8) The name, address, and telephone number of a contact person from the requesting jurisdiction.

(d) If the Attorney General determines that the assistance for which funding is sought under paragraph (c) of this section is appropriate under the standards of this subpart, the Attorney General may enter into a reimbursement or cooperative agreement or may make a grant in the same manner as if the assistance had been requested by the Attorney General as described under § 65.84 of this subpart.

(e) The Attorney General will consider all applications from State or local governments until the Attorney General has expended the maximum amount authorized in section 404(b)(2)(B) of the INA. The Attorney General will make a decision with respect to any application submitted under this section, and containing the information described in paragraph (c) of this section, within 15 calendar days of receipt of such application.

(f) In exigent circumstances, the Attorney General may waive the requirements of this section concerning the form, contents, and order of consideration of applications, including the requirement in paragraph (c) of this section that applications be submitted in writing.

Dated: June 8, 1994.

Janet Reno,

Attorney General.

BILLING CODE 4410–01–M

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Parts 100 and 165

[CGD 94–007]

Safety Zones, Security Zones, and Special Local Regulations

AGENCY: Coast Guard, DOT.

ACTION: Notice of temporary rules issued.

SUMMARY: This document provides required notice of substantive rules adopted by the Coast Guard and temporarily effective between January 1, 1994 and March 31, 1994, which were not published in the **Federal Register**. This quarterly notice lists temporary local regulations, security zones, and safety zones, which were of limited duration and for which timely publication in the **Federal Register** was not possible.

DATES: This notice lists temporary Coast Guard regulations that become effective and were terminated between January 1, 1994 and March 31, 1994, as well as several regulations which were not included in the previous quarterly list.

ADDRESSES: The complete text of these temporary regulations may be examined at, and is available on request, from Executive Secretary, Marine Safety Council (G–LRA), U.S. Coast Guard Headquarters, 2100 Second Street, SW., Washington, DC 20593–0001.

FOR FURTHER INFORMATION CONTACT: Lieutenant Commander, Thomas R. Cahill, Executive Secretary, Marine Safety Council at (202) 267–1477 between the hours of 8 a.m. and 3 p.m., Monday through Friday.

SUPPLEMENTARY INFORMATION: District Commanders and Captains of the Port (COTP) must be immediately responsive to the safety needs of the waters within their jurisdiction; therefore, District Commanders and COTPs have been delegated the authority to issue certain local regulations. Safety zones may be established for safety or environmental purposes. A safety zone may be stationary and described by fixed limits or it may be described as a zone around a vessel in motion. Security zones limit access to vessels, ports, or waterfront facilities to prevent injury or damage. Special local regulations are issued to assure the safety of participants and spectators at regattas and other marine events. Timely publication of these regulations in the **Federal Register** is often precluded when a regulation responds to an emergency, or when an event occurs without sufficient advance notice. However, the affected public is informed of these regulations through Local Notices to Mariners, press releases, and other means. Moreover, actual notification is provided by Coast Guard patrol vessels enforcing the restrictions imposed by the regulation.

Because mariners are notified by Coast Guard officials on-scene prior to enforcement action, **Federal Register** notice is not required to place the special local regulation, security zone, or safety zone in effect. However, the Coast Guard, by law, must publish in the **Federal Register** notice of substantive rules adopted. To discharge this legal obligation without imposing undue expense on the public, the Coast Guard periodically publishes a list of these temporary special local regulations, security zones, and safety zones. Permanent regulations are not included in this list because they are published in their entirety in the **Federal Register**. Temporary regulations may also be published in their entirety if sufficient time is available to do so before they are placed in effect or terminated. These safety zones, special local regulations and security zones have been exempted from review under E.O. 12866 because of their emergency nature, or limited scope and temporary effectiveness.

The following regulations were placed in effect temporarily during the period January 1, 1994 and March 31, 1994, unless otherwise indicated.

Thomas R. Cahill,

Lieutenant Commander, Executive Secretary, Marine Safety Council.

33 CFR Part 117

[CGD01–94–063]

Drawbridge Operation Regulations; Manchester Harbor, MA

AGENCY: Coast Guard, DOT.

ACTION: Notice of temporary deviation from regulations; request for comments.

SUMMARY: Pursuant to 33 CFR 117.43, the Coast Guard is providing notice that it has, at the request of the Town of Manchester, Massachusetts, authorized a temporary deviation for ninety (90) days from the operating regulations governing the Manchester Amtrak Bridge over Manchester Harbor at mile 1.0 in Manchester, Massachusetts.

The permanent regulations are published at 33 CFR 117.603. This deviation authorizes the Manchester Amtrak Bridge to open on signal from June 3, 1994 through August 31, 1994 from 8 a.m. to 9 p.m. At all other times at least 2 hours advance notice is required by calling the number posted at the bridge. This temporary deviation is being implemented to evaluate the effects of the extended operating hours and the impact on marine traffic at the Manchester Bridge. This notice also solicits comments on these changes to the operation of the bridge.

DATES: The deviation is effective for 90 days from June 3, 1994 through August 31, 1994.

Comments on effects of the deviation must be received on or before October 31, 1994.

ADDRESSES: Comments may be mailed to Commander (obr), First Coast Guard District, room 628 at the Captain John Foster Williams Federal Building, 408 Atlantic Avenue, Boston, Massachusetts, 02110–3350. The comments and other materials referenced in this notice will be available for inspection and copying by appointment at the above address. Normal office hours are between 6:30 a.m. and 3 p.m., Monday through Friday, except federal holidays. Comments may also be hand-delivered to the above address.

FOR FURTHER INFORMATION CONTACT: William C. Heming, Bridge Administrator, First Coast Guard District, (212) 668–7170.

SUPPLEMENTARY INFORMATION:

Background and Purpose

The Manchester Amtrak Bridge over Manchester Harbor has a vertical clearance of 6′ above mean high water (MHW) and 15′ above mean low water (MLW).

The Town of Manchester has requested a change from the operating regulations governing the Manchester Amtrak Bridge in 33 CFR 117.603 which requires that the Amtrak Bridge open on signal from April 1 to November 1, 9 a.m. to 1 p.m. and 2 p.m. to 6 p.m. This ninety day deviation extends the operating hours to require the bridge to open on signal from 8 a.m. to 9 p.m. from June 3, 1994 to August 31, 1994. This change will allow vessels mooring in Manchester Harbor upstream of the bridge to leave port at a reasonably early time and return to their moorings after their evening racing and sailing. Many vessels were unable to get underway at an early enough time for a day trip and return before the 6 p.m. time period. They were forced to tie up at town facilities or at other moorings until the the bridge was opened. Additionally, the bridge owner (Amtrak) will be required to post regulation signs up and down stream of the bridge indicating the operating hours and the number to call for an off hour opening. The bridge owner will also be required to install and maintain in good condition clearance gages on the up and down stream sides of the bridge. This deviation also requires the bridge to open on signal as soon as possible for vessels of the United States, state and local vessels used for public safety and vessels in distress.

Request for Comments

The Coast Guard encourages interested persons to participate in evaluation of possible changes to the regulations by submitting written data, or arguments for or against this deviation. Persons submitting comments should include their name and address and identify this rulemaking (CGD01–94–063) and the specific section of this deviation to which each comment applies, and give reason for each comment. Persons wanting acknowledgment of receipt of comments should enclose a stamped self-addressed post card or envelope.

The Coast Guard will consider all comments received during the comment period. If it appears appropriate to propose a permanent change to the regulations, the Coast Guard will publish a notice of proposed rulemaking and request additional comments as part of the rulemaking process. All comments received regarding the deviation period will be considered as part of the rulemaking. Persons may submit comments by writing to the Commander (obr), First Coast Guard District listed under **ADDRESSES**.

Notice

Notice is hereby given that:

(1) The Coast Guard has granted the Town of Manchester, Massachusetts, a temporary deviation from the operating requirements listed in 33 CFR 117.603 governing the Manchester Amtrak Bridge over Manchester Harbor.

(2) This deviation from normal operating regulations is authorized in accordance with the provisions of 33 CFR 117.43 for the purpose of evaluating possible changes to the permanent regulations.

(3) The period of deviation is effective June 3, 1994 to August 31, 1994.

(4) During the deviation period the Manchester Amtrak Bridge shall operate as follows:

(i) The bridge shall open on signal 8 a.m. to 9 p.m.

(ii) From 9 p.m. to 8 a.m. the bridge shall open on signal if at least 2 hours advance notice is given by calling the number posted at the bridge.

(iii) The bridge shall open on signal as soon as possible for vessels of the United States, state and local vessels used for public safety and vessels in distress.

Dated: May 31, 1994.

K.W. Thompson,

Captain, U.S. Coast Guard, Acting Commander, First Coast Guard District.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 271

[FRL–4997–1]

Illinois: Final Authorization of State Hazardous Waste Management Program Revisions

AGENCY: Environmental Protection Agency.

ACTION: Immediate final rule.

SUMMARY: Illinois has applied for final authorization of revisions to its hazardous waste program under the Resource Conservation and Recovery Act of 1976 as amended (hereinafter RCRA). The Environmental Protection Agency (EPA) has reviewed Illinois' application and has made a decision, subject to public review and comment, that Illinois' hazardous waste program revisions satisfy all of the requirements necessary to qualify for final authorization. Thus, EPA intends to approve Illinois' hazardous waste program revisions, subject to authority retained by EPA under the Hazardous and Solid Waste Amendments of 1984 (hereinafter HSWA). Illinois' application for program revision is available for public review and comment.

EFFECTIVE DATE: Final authorization for Illinois shall be effective August 15, 1994 unless EPA publishes a prior **Federal Register** action withdrawing this immediate final rule. All comments on Illinois' program revision application must be received by the close of business July 14, 1994. If an adverse comment is received, EPA will publish either: (1) A withdrawal of the immediate final decision, or (2) a notice containing a response to comments which either affirms that the immediate final decision takes effect or reverses the decision.

ADDRESSES: Copies of Illinois' program revision application are available for inspection and copying, from 9 a.m. to 4 p.m., at the following addresses: Illinois Environmental Protection Agency, 2200 Churchill Road, Springfield, Illinois 62706, contact: Todd Marvel (217) 524–5024; USEPA, Region 5, 77 W. Jackson Blvd., Chicago, Illinois 60604, contact: Gary Westefer (312) 886–7450. Written comments should be sent to Mr. Gary Westefer, Illinois Regulatory Specialist, U.S. EPA, Office of RCRA, HRM–7J, 77 W. Jackson Blvd., Chicago, Illinois 60604, phone (312) 886–7450.

FOR FURTHER INFORMATION CONTACT: Mr. Gary Westefer, U.S. EPA Region 5, 77 West Jackson Boulevard, Chicago, Illinois 60624. Phone: 312/886–7450.

SUPPLEMENTARY INFORMATION:

A. Background

States with final authorization under section 3006(b) of RCRA, 42 U.S.C 6929(b), have a continuing obligation to maintain a hazardous waste program that is equivalent to, consistent with, and no less stringent than the Federal hazardous waste program.

In accordance with 40 CFR 271.21, revisions to State hazardous waste programs are necessary when Federal or State statutory or regulatory authority is modified or when certain other changes occur. Most commonly, State program revisions are necessitated by changes to EPA's regulations in 40 CFR parts 124, 260 through 266, 268, and 270.

B. Illinois

Illinois initially received final authorization for its program effective January 31, 1986. (51 FR 3778, January 30, 1986). Illinois received authorization for revisions to its program effective on March 5, 1988 (53 FR 126, January 5, 1988), April 30, 1990 (55 FR 7320, March 1, 1990), and June 3, 1991 (56 FR 13595, April 3, 1991). On December 17, 1993, Illinois submitted a program revision application for additional program approvals. Today, Illinois is seeking approval of its program revision in accordance with 40 CFR 271.21(b)(3).

EPA has reviewed Illinois' application, and has made an immediate final decision that Illinois' hazardous waste program revisions satisfy all of the requirements necessary to qualify for final authorization. Consequently, EPA intends to grant final authorization for the additional program modifications to Illinois. The public may submit written comments on EPA's immediate final decision up until July 14, 1994. Copies of Illinois' application for program revision are available for inspection and copying at the locations indicated in the "Addresses" section of this notice.

Approval of Illinois' program revision shall become effective in 60 days unless an adverse comment pertaining to the State's revision discussed in this notice is received by the end of the comment period. If an adverse comment is received, EPA will publish either: (1) A withdrawal of the immediate final decision; or (2) a notice containing a response to comments which either affirms that the immediate final decision takes effect or reverses the decision.

On August 15, 1994, Illinois will be authorized to carry out, in lieu of the Federal program, those provisions of the State's program which are analogous to the following provisions of the Federal program:

Federal requirement	Analogous State authority
HSWA codification rule—delisting correction 1, June 27, 1989, 54 *FR* 27114 [1]	Rules 35 IAC 720.122, effective June 16, 1990.
Listing of spent pickle liquor—correction 2, August 3, 1987, 52 *FR* 28697	Rules 35 IAC 721.132, effective June 16, 1988.
Liability coverage—Corporate guarantee, July 11, 1986, 51 *FR* 25350–25356	Rules 35 IAC 724.247; 724.251; 725.247, effective July 16, 1987.
Amendments to part B information requirements for disposal facilities, June 22, 1987, 52 *FR* 23447–23450. As amended on September 9, 1987, 52 *FR* 33936.	Rules 35 IAC 703.185, effective December 3, 1987.
California list waste restrictions, July 8, 1987, 52 *FR* 23447–23450.[1] As amended on October 27, 1987, 52 *FR* 41295–41296 [1].	Rules 35 IAC 720.111; 722.170; 724.113; 725.113; 728.102; 728.103; 728.104; 728.107; 728.130; 728.132; 728.140; 728.142; 728.150; section 728 appendix C, effective June 16, 1988.
List (phase 1) of hazardous constituents for ground-water monitoring, July 9, 1987, 52 *FR* 25942–25953.	Rules 35 IAC 703.185; 724.198; 724.199; section 724 appendix I, effective June 16, 1988.
Identification and listing of hazardous waste, July 10, 1987, 52 *FR* 26012	Rules 35 IAC721, effective June 16, 1988.
Exception reporting for small quantity generators of hazardous waste, September 23, 1987, 52 *FR* 35894–35899 [1].	Rules 35 IAC 722.142; 722.144, effective June 16, 1988.
Liability requirements for hazardous waste facilities; corporate guarantee, November 18, 1987, 52 *FR* 44314–44321.	Rules 35 IAC 724.247; 725.247, effective June 16, 1988.
HSWA codification rule 2—permit application requirements regarding corrective action, December 1, 1987, 52 *FR* 45788–45799 [1].	Rules 35 IAC 703.185; 703.187, effective June 16, 1988.
HSWA codification rule 2—corrective action beyond the facility boundary, December 1, 1987, 52 *FR* 45788–45799 [1].	Rules 35 IAC 724.200; 724.201, effective June 16, 1988.
HSWA codification rule 2—corrective action for injection wells, December 1, 1987, 52 *FR* 45788–45799 [1].	Rules 35 IAC 704.151; 704.161; 725.101; 703.141, effective June 16, 1988.
HSWA codification rule 2—permit modification, December 1, 1987, 52 *FR* 45788–45799 [1].	Rules 35 IAC 702.184, effective June 16, 1988.
HSWA codification rule 2—permit as a shield provision December 1, 1987, 52 *FR* 45788–45799 [1].	Rules 35 IAC 702.181, effective June 16, 1988.
HSWA codification rule 2—permit conditions to protect human health and the environment, December 1, 1987, 52 *FR* 45788–45799 [1].	Rules 35 IAC 703.181, effective June 16, 1988.
HSWA codification rule 2—post-closure permits, December 1, 1987, 52 *FR* 45788–45799 [1].	Rules 35 IAC 703.120; 703.121; 703.159; 703.160, effective June 16, 1988.

Sharing of Information with agency for toxic substances and disease registry, November 8, 1984, SWDA 3019(b).	Statute Ill. rev. stat. 11½, par. 1007, effective January 1, 1985.

[1] Indicates HSWA Provision.

EPA shall administer any RCRA hazardous waste permits or portions of permits, that contain conditions based upon the Federal program provisions for which the State is applying for authorization, and which were issued by EPA prior to the effective date of this authorization. EPA will suspend issuance of any further permits under the provisions for which the State is being authorized on the effective date of this authorization. EPA has previously suspended issuance of permits for the other provisions on January 31, 1986, March 5, 1988, April 30, 1990, and June 3, 1991, the effective dates of Illinois' final authorizations for the RCRA base program and for the subsequent program revisions, respectively.

This authorization includes authorization for Illinois to impose certain land disposal prohibitions. Under 40 CFR 268.6, EPA may grant petitions of specific duration to allow land disposal of certain hazardous wastes provided certain criteria are met. States that have authority to impose land disposal prohibitions may ultimately be authorized under RCRA Section 3006 to grant petitions for such exemptions. However, EPA is currently requiring that these petitions be handled at EPA Headquarters. It should be noted that Illinois has its own procedures for petition submission and approval to allow land disposal of a prohibited waste. Therefore, the petitioner must satisfy both Federal and Illinois requirements, and be granted approval by both EPA and the State.

Illinois is not authorized to operate the Federal program on Indian lands.

This authority remains with EPA unless provided otherwise in a future statute or regulation.

C. Decision

I conclude that Illinois' application for program revisions meets all of the statutory and regulatory requirements established by RCRA, and its amendments. Accordingly, Illinois is granted final authorization to operate its hazardous waste program as revised. Illinois now has responsibility for permitting treatment, storage, and disposal facilities within its borders and carrying out the aspects of the RCRA program described in its revised program application, subject to the limitations of the HSWA. Illinois also has primary enforcement responsibilities, although EPA retains the right to conduct inspections under section 3007 of RCRA and to take enforcement actions under sections 3008, 3013, and 7003 of RCRA.

D. Incorporation by Reference

EPA incorporates by reference, authorized State programs in 40 CFR part 272, to provide notice to the public of the scope of the authorized program in each State. Incorporation by reference of the Illinois program will be completed at a later date.

Compliance With Executive Order 12866

The Office of Management and Budget has exempted this rule from the requirements of section 6 of Executive Order 12866.

Certification Under the Regulatory Flexibility Act

Pursuant to the provisions of 4 U.S.C. 605(b), I hereby certify that this authorization will not have a significant economic impact on a substantial number of small entities. This authorization effectively suspends the applicability of certain Federal regulations in favor of Illinois' program, thereby eliminating duplicative requirements for handlers of hazardous waste in the State. It does not impose any new burdens on small entities. This rule, therefore, does not require a regulatory flexibility analysis.

Paperwork Reduction Act

Under the Paperwork Reduction Act, 44 U.S.C. 3501 *et seq.*, Federal agencies must consider the paperwork burden imposed by any information request contained in a proposed rule or a final rule. This rule will not impose any information requirements upon the regulated community.

List of Subjects in 40 CFR Part 271

Environmental protection, Administrative practice and procedure, Confidential business information, Hazardous materials transportation, Hazardous waste, Indian lands, Intergovernmental relations, Penalties, Reporting and recordkeeping requirements, Water pollution control, Water supply.

Authority: This notice is issued under the authority of sections 2002(a), 3006 and 7004(b) of the Solid Waste Disposal Act as amended 42 U.S.C. 6912(a), 6926, 6974(b).

Dated: May 18, 1994.

Valdas V. Adamkus,

Regional Administrator.

40 CFR Part 272

[FRL-4895-5]

Authorization of State Hazardous Waste Management Program: Kansas

AGENCY: Environmental Protection Agency (EPA).

ACTION: Immediate final rule.

SUMMARY: The Resource Conservation and Recovery Act of 1976, as amended (RCRA), provides for the U.S. Environmental Protection Agency (EPA) to grant authorization to State agencies to operate their hazardous waste management programs in lieu of the Federal program. The state of Kansas has applied for authorization of revisions to its previously authorized hazardous waste management program under RCRA. The EPA has reviewed the Kansas application and has made a decision, subject to public review and comment, that the Kansas hazardous waste management program revision satisfies all of the requirements necessary to qualify for final authorization. Thus, EPA is approving the state's hazardous waste management program revisions. Kansas' application for program revisions is available for public review and comment.

DATES: Final authorization for Kansas shall be effective August 15, 1994 unless EPA publishes a prior **Federal Register** action withdrawing this immediate final rule. All comments on the Kansas program revisions application must be received by the close of business July 14, 1994.

ADDRESSES: Copies of the Kansas program revision application are available for inspection and copying during normal business hours at the following addresses: Hazardous Waste Section, Bureau of Waste Management, Kansas Department of Health and Environment, Forbes Field, Topeka, Kansas 66620-0001, 913-296-1600; and, US EPA Region 7, Library, 726 Minnesota Avenue, Kansas City, Kans 66101, 913-551-7241. Written comments should be sent to Gary Bertram, RCRA Branch, U.S. Environmental Protection Agency, 726 Minnesota Avenue, Kansas City, Kansas 66101; 913-551-7533.

FOR FURTHER INFORMATION CONTACT: Gary Bertram, (913) 551-7533.

SUPPLEMENTARY INFORMATION:

A. Background

Section 3006 of RCRA (42 U.S.C. 6926) allows EPA to authorize state hazardous waste management programs to operate in the states in lieu of the Federal hazardous waste program. This is done when a state submits to EPA a request for authorization demonstrating that the state hazardous waste program is equivalent, consistent with and no less stringent than the Federal program.

Revisions to state hazardous waste programs are necessary whenever federal or state statutory or regulatory authority is modified or when certain other changes occur. States with final authorization under section 3006(b) of RCRA have a continuing obligation to maintain state programs that are equivalent to, consistent with, and no less stringent than the federal hazardous waste management program. Most commonly, state program revisions are necessitated by changes to EPA's regulations in 40 CFR parts 124 and 260 through 271 that require corresponding changes in the state program in order for the state to maintain its authorization.

B. Kansas

Kansas initially received final authorization effective October 17, 1985. Kansas received authorization for revisions to its program effective June 25, 1990. Kansas submitted a draft authorization application on March 1, 1990, and submitted the final revision application on February 24, 1994.

To meet its obligation to maintain a hazardous waste program that is equivalent to, consistent with, and no less stringent than the federal hazardous waste program, Kansas has submitted a request to be authorized for additional RCRA authorities which have been promulgated by EPA since the Kansas base program approval.

The EPA has reviewed the state's application with respect to the requirements for state authorization contained in 40 CFR part 271 and determined that its hazardous waste program revision satisfies all of the

requirements to qualify for final authorization. Consequently, EPA is granting final authorization for the additional program modifications to Kansas. Today's decision is being published as an "immediate final" rule in accordance with the provisions of 40 CFR 271.21(b)(3). The public may submit written comments on this immediate final decision until the date noted in the "Dates" section of this document. Approval of the Kansas program revision shall become effective 60 days from today unless an adverse comment pertaining to the State's revisions discussed in this notice is received by the end of the comment period. If an adverse comment is received, EPA will publish either: (1) A withdrawal of the immediate final decision; or (2) a notice containing a response to comments which either affirms that the immediate final decision takes effect or reverses the decision.

Those specific RCRA program portions which are being authorized today are listed below by their descriptive names and Federal Register citations.

Federal RCRA Provisions

Dioxin Waste Listing and Management Standards (50 FR 1978, January 14, 1985)
Paint Filter Test (50 FR 18370, April 30, 1985)
Codification Rule (50 FR 28702, July 15, 1985) (Only the following provisions: Household waste; Generator Requirements; Facility Permit Requirements; Permitting Requirements; Location Standards for Salt Domes, Salt Beds, Underground Mines and Caves; Liquids in Landfills; Dust Suppression; Double Liners; Ground-Water Monitoring; Cement Kilns; Fuel Labeling; Pre-construction Ban; Permit Life; Omnibus Provision; Interim Status; Research and Development Permits; Hazardous Waste Exports; and Exposure Information)
Listing of TDI, DNT, and TDA Wastes (50 FR 42936, October 23, 1985)
Burning of Waste Fuel and Used Oil Fuel in Boilers and Industrial Furnaces (50 FR 49164, November 29, 1985, (Amended on November 19, 1986 at 51 FR 41900 and April 13, 1987 at 52 FR 11822))
Listing of Spent Solvents (50 FR 53315, December 31, 1985)
Listing of EDB Wastes (51 FR 5330, February 13, 1986)
Listing of Four Spent Solvents (51 FR 6541, February 25, 1986)
Generators of 100 to 1000 kg Hazardous Waste (51 FR 10174, March 24, 1986)
Codification Rule, Technical Correction (51 FR 19176, May 28, 1986)
Standards for Hazardous Waste Storage and Treatment Tank Systems (51 FR 25470, July 14, 1986)
Exports of Hazardous Waste (51 FR 28686, August 8, 1986)
Standards for Generators—Waste Minimization Certifications (51 FR 55190, October 1, 1986)
Listing of EBDC (51 FR 37725, October 24, 1986)
Land Disposal Restrictions (51 FR 40572, November 7, 1986 (as amended on June 4, 1987, 52 FR 21010))
Revised Manual SW–846; Amended Incorporation by Reference (52 FR 8072, March 16, 1987)
Closure/Post-Closure Care for Interim Status Surface Impoundments (52 FR 8704, March 19, 1987)
Definition of Solid Waste, Technical Corrections (52 FR 21306, June 5, 1987)
Amendments to Part B Information Requirements for Disposal Facilities (52 FR 23447, June 22, 1987 (as amended on September 9, 1987, 52 FR 33936))
List (Phase 1) of Hazardous Constituents for Ground-Water Monitoring (52 FR 25942, July 9, 1987)
Identification and Listing of Hazardous Waste (52 FR 26012, July 10, 1987)
Liability Requirements for Hazardous Waste Facilities; Corporate Guarantee (52 FR 44314, November 18, 1987)
Hazardous Waste Miscellaneous Units (52 FR 46946, December 10, 1987)
Technical Corrections; Identification and Listing of Hazardous Waste (53 FR 13382, April 22, 1988)
Identification and Listing of Hazardous Waste; Technical Correction (53 FR 27162, July 19, 1988)
Farmer Exemptions; Technical Corrections (53 FR 27164, July 19, 1988)
Identification and Listing of Hazardous Waste; Treatability Studies Sample Exemption ([53 FR 27290, July 19, 1988)
Hazardous Waste Management System; Standards for Hazardous Waste Storage and Treatment Tank Systems (53 FR 34079, September 2, 1988)
Permit Modifications for Hazardous Waste Management Facilities (53 FR 37912, September 28, 1988 (as amended on October 24, 1988, 53 FR 41649))
Statistical Methods for Evaluating Ground-Water Monitoring Data from Hazardous Waste Facilities (53 FR 39720, October 11, 1988)
Identification and Listing of Hazardous Waste; Removal of Iron Dextran from the List of Hazardous Wastes([53 FR 43878, October 31, 1988)
Identification and Listing of Hazardous Waste; Removal of Strontium Sulfide from the List of Hazardous Wastes (53 FR 43881, October 31, 1988)
Standards for Generators of Hazardous Waste (53 FR 45089, November 8, 1988)
Hazardous Waste Miscellaneous Units; Standards Applicable to Owners and Operators (54 FR 615, January 9, 1989)
Amendment to Requirements for Hazardous Waste Incinerator Permits (54 FR 4286, January 30, 1989)
Changes to Interim Status Facilities for Hazardous Waste Management Permits; Procedures for Post-Closure Permitting (54 FR 9596, March 7, 1989)

The state will assume lead responsibility for issuing permits for those program areas authorized today. For those HSWA provisions for which the state is not authorized, EPA will retain lead responsibility. For those permits which will now change to state lead from EPA, EPA will transfer copies of any pending applications, completed permits or pertinent file information to the state within 30 days of the effective date of this authorization. The EPA will be responsible for enforcing the terms and conditions of federally issued permits while they remain in force. The EPA will also be responsible for enforcing the terms and conditions of RCRA permits regarding HSWA requirements until the state has the authority to address the HSWA requirements.

The state has agreed to review all State issued permits and to modify or reissue them as necessary to require compliance with the currently approved state law and regulations. When the state reissues federally issued permits as state permits, the state will take the lead in enforcing such permits, with the exception of those HSWA requirements for which the state has not received authorization.

C. Decision

I conclude that the Kansas application for program revisions meets all of the statutory and regulatory requirements established by RCRA. Accordingly, Kansas is granted final authorization to operate its hazardous waste management program, as revised. Kansas now has responsibility for the permitting of treatment, storage, and disposal facilities within its borders and carrying out other aspects of the RCRA program, subject to the limitation of its revised program application and previously approved authorities. Kansas also has primary enforcement responsibilities, although EPA retains

the right to conduct inspections under sections 3007, 3013 and 7003 of RCRA.

Certification Under the Regulatory Flexibility Act

Pursuant to the provisions of 4 U.S.C. 605(b), I hereby certify that this authorization will not have a significant economic impact on a substantial number of small entities. This authorization effectively suspends the applicability of certain federal regulations in favor of the Kansas program, thereby eliminating duplicative requirements for handlers of hazardous waste in the State. It does not impose any new burdens on small entities. This rule, therefore, does not require a regulatory flexibility analysis.

Compliance With Executive Order 12866

The Office of Management and Budget has exempted this rule from the requirements of section 6 of Executive Order 12866.

BILLING CODE 1505-01-D

NATIONAL TRANSPORTATION SAFETY BOARD

49 CFR Part 826

Equal Access To Justice Act Fees

AGENCY: National Transportation Safety Board.

ACTION: Final rules.

SUMMARY: The NTSB is adopting various housekeeping amendments to its Equal Access to Justice Act (EAJA) rules to reflect current law and practice.

DATES: The new rules will be effective on June 14, 1994.

FOR FURTHER INFORMATION CONTACT: Jane F. Mackall, (202) 382–1952.

SUPPLEMENTARY INFORMATION: The Board hereby adopts five editorial amendments to its rules at 49 CFR 826, each of which is explained below. Because these amendments are intended to make no changes but are intended only to reflect current law and practice; they are being made effective without notice and comment.

1. Section 826.2 is amended to remove outdated information that was responsive to the 1981 extension of EAJA and is no longer relevant.

2. By notice published in the **Federal Register** on April 22, 1992, the Board increased its cap on attorney fees contained at 49 CFR 826.6(b). We adopted a formula tied to the Consumer Price Index, All Urban Consumers, U.S. City Average, All Items, unless a more specific geographic index is published for the locality. This "CPI" is the generally understood "cost of living" index that is widely used as a price inflator in labor and contract matters. The rule contained U.S. City figures through 1992. Our amendment here adds the 1993 figure.

3. In 1985, EAJA was amended (Pub. L. No. 99–80) to reduce limitations on its application. The $1 million/$5 million net worth limits for individuals and businesses, respectively, contained in Title 5 U.S.C. 504(b) (1) were increased to $2 million/$7 million caps. We amended our rules at § 826.4(b) (1) and (2) to reflect this change, but failed to make a similar modification to § 826.21(b). We do so here, reflecting current law.[1]

4. We take this opportunity to codify our ruling in *Administrator* v. *Holloway*, NTSB Order EA–4155 (served May 3, 1994), by amending § 826.24 to indicate that the Board is without authority to grant extensions to file EAJA applications.

5. Lastly, we amend § 826.31 to provide that our rules of practice in part 821 apply to EAJA proceedings, to the extent not inconsistent with other, more specific rules in part 826.

As required by the Regulatory Flexibility Act, we certify that the adopted rules will not have a substantial impact on a significant number of small entities. What effect they may have, however, would be beneficial to small entities by clarifying our procedures. The rules are not major rules for the purposes of Executive Order 12291. We also conclude that this action will not significantly affect either the quality of the human environment or the conservation of energy resources, nor will this action impose any information collection requirements requiring approval under the Paperwork Reduction Act.

List of Subjects in 49 CFR Part 826

Claims, Equal access to justice, Lawyers.

Accordingly, 49 CFR part 826 is amended as set forth below.

PART 826—RULES IMPLEMENTING THE EQUAL ACCESS TO JUSTICE ACT OF 1980

1. The authority citation for part 826 continues to read as follows:

Authority: Section 203(a)(1) P. L. 99–80, 99 Stat. 186 (5 U.S.C. 504).

2. Section 826.2 is revised to read as follows:

§ 826.2 When the Act applies.

The Act applies to any adversary adjudication identified in § 826.3 as covered under the Act.

3. Section 826.6 is amended by revising paragraph (b)(1) to read as follows:

§ 826.6 Allowable fees and expenses.

* * * * *

(b)(1) No award for the fee of an attorney or agent under these rules may exceed $75 indexed as follows:

$$\frac{X}{\$75/hr} = \frac{CPI_New}{CPI_1981}$$

The CPI to be used is the annual average CPI, All Urban Consumers, U.S. City Average, All Items, except where a local, All Item index is available. Where a local index is available, but results in a manifest inequity vis-a-vis the U.S. City Average, the U.S. City Average may be used. The numerator of that equation is the yearly average for the year(s) the services were provided, with each year calculated separately. If an annual average CPI for a particular year is not yet available, the prior year's annual average CPI shall be used. This formula increases the $75 statutory cap by indexing it to reflect cost of living increases, as authorized in 5 U.S.C. 504(b)(1)(A)(ii). Application of these increased rate caps requires affirmative findings under § 821.6(c) of this chapter. For ease of application, available U.S. City figures are reproduced as follows:

1981	90.9
1982	96.5
1983	99.6
1984	103.9
1985	107.6
1986	109.6
1987	113.6
1988	118.3
1989	124.0
1990	130.7

[1] Lloyd Ericcson has petitioned for this change, which petition we here grant.

1991	136.2
1992	140.3
1993	144.5

* * * * *

4. Section 826.21 is amended by revising paragraph (b) introductory text to read as follows:

§ 826.21 Contents of application.

* * * * *

(b) The application shall also include a statement that the applicant's net worth does not exceed $2 million (if an individual) or $7 million (for all other applicants, including their affiliates). However, an applicant may omit this statement if:

* * * * *

5. Section 826.24 is amended by revising paragraph (a) to read as follows:

§ 826.24 When an application may be filed.

(a) An application may be filed whenever the applicant has prevailed in the proceeding, but in no case no later than the 30 days after the Board's final disposition of the proceeding. This 30-day deadline is statutory and the Board has no authority to extend it.

* * * * *

6. Section 826.31 is revised to read as follows:

§ 826.31 Filing and service of documents and general procedures.

The rules contained in 49 CFR part 821 apply to proceedings under the Act, unless they are superseded by or are inconsistent with a provision of this part.

Issued in Washington, DC on this 8th day of June, 1994.

Carl W. Vogt,

Chairman.

BILLING CODE 7533–01–P

Proposed Rules

Federal Register
Vol. 59, No. 113
Tuesday, June 14, 1994

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

OFFICE OF PERSONNEL MANAGEMENT

5 CFR Part 532

RIN 3206–AF90

Prevailing Rate Systems: Change of Lead Agency Responsibility for the Cleveland, Ohio, Wage Area for Pay-Setting Purposes

AGENCY: Office of Personnel Management.

ACTION: Proposed rule with request for comments.

SUMMARY: The Office of Personnel Management (OPM) is issuing a proposed rule to change the lead agency responsibility for the Cleveland, Ohio, Federal Wage System (FWS) wage area from the National Aeronautics and Space Administration (NASA) to the Department of Veterans' Affairs (VA) for pay-setting purposes. This change would recognize the fact that VA is now the major employer of FWS employees in the Cleveland, Ohio, FWS wage area.

DATES: Comments must be received on or before July 14, 1994.

ADDRESSES: Send or deliver comments to Donald J. Winstead, Acting Assistant Director for Compensation Policy, Personnel Systems and Oversight Group, Office of Personnel Management, room 6H31, 1900 E Street NW., Washington, DC 20415.

FOR FURTHER INFORMATION CONTACT: Mark Allen, (202) 606–2848.

SUPPLEMENTARY INFORMATION: The National Aeronautics and Space Administration (NASA) is the lead agency for the Cleveland, Ohio, Federal Wage System (FWS) wage area, and the NASA Lewis Research Center is the host activity for the local FWS wage survey. FWS employment at the Center has been declining in recent years. NASA has requested that the Department of Veterans' Affairs (VA) assume lead agency responsibility for the Cleveland wage survey. VA now has more FWS employees in the Cleveland wage area than any other agency, has the resources to carry out local wage surveys in the wage area. and is willing to assume responsibility as lead agency effective for the next full-scale wage survey scheduled to begin in the wage area in April 1995. The Federal Prevailing Rate Advisory Committee has reviewed and concurred with this proposed change.

Regulatory Flexibility Act

I certify that these regulations would not have a significant economic impact on a substantial number of small entities because they would affect only Federal agencies and employees.

List of Subjects in 5 CFR Part 532

Administrative practice and procedure, Freedom of information, Government employees, Reporting and recordkeeping requirements, Wages.

Office of Personnel Management.

Lorraine A. Green,

Deputy Director.

Accordingly, OPM proposes to amend 5 CFR part 532 as follows:

PART 532—PREVAILING RATE SYSTEMS

1. The authority citation for part 532 continues to read as follows:

Authority: 5 U.S.C. 5343, 5346; § 532.707 also issued under 5 U.S.C. 552.

2. Appendix A to subpart B is amended for Cleveland, Ohio, by removing the lead agency "NASA" and adding in its place "VA".

[FR Doc. 94–14275 Filed 6–13–94; 8:45 am]

BILLING CODE 6325–01–M

DEPARTMENT OF AGRICULTURE

Federal Crop Insurance Corporation

7 CFR Part 400

General Crop Insurance Regulations; Reinsurance Agreement—Standards for Approval

AGENCY: Federal Crop Insurance Corporation, USDA.

ACTION: Proposed rule.

SUMMARY: The Federal Crop Insurance Corporation (FCIC) proposes to amend the General Crop Insurance Regulations, effective for the 1995 and succeeding reinsurance years to revise the general qualifications for being awarded a Standard Reinsurance Agreement. This rule intends to provide additional information so that FCIC can more accurately identify those insurance companies at risk of bankruptcy.

DATES: Written comments pursuant to this rule must be received by June 29, 1994.

ADDRESSES: Comments pursuant to this proposal should be sent to Mari Dunleavy, Regulatory and Procedural Development Staff, Federal Crop Insurance Corporation, U.S. Department of Agriculture, Washington, DC, 20250. Hand messenger delivery may be made to, Suite 500, 2101 L Street, NW., Washington, DC. Comments received may be viewed and copied at Suite 503, 2101 L Street, NW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: Mari Dunleavy, Regulatory and Procedural Development Staff, Federal Crop Insurance Corporation, U.S. Department of Agriculture, Washington, DC, 20250, telephone (202) 254–8450.

SUPPLEMENTARY INFORMATION: This action has been reviewed under USDA procedures established by Departmental Regulation 1512–1. This action does not constitute a review as to the need, currency, clarity, and effectiveness of this regulation under those procedures. The sunset review date established for these regulations is March 31, 1999.

This rule has been determined not significant for purposes of Executive Order 12866 and, therefore, has not been reviewed by the Office of Management and Budget.

This action will not have a significant economic effect on a substantial number of small entities. This action does not increase the paperwork burden on the reinsured company because the reinsured company must already provide the additional information required by this regulation to the state in which it is licensed. Therefore, this action is determined to be exempt from the provisions of the Regulatory Flexibility Act and no Regulatory Flexibility Analysis was prepared.

This program is listed in the Catalog of Federal Domestic Assistance under No. 10.450.

This program is not subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with state and local officials. See the Notice related to 7 CFR part 3015, subpart V, published at 48 FR 29115, June 24, 1983.

This action is not expected to have any significant impact on the quality of the human environment, health, and safety. Therefore, neither an Environmental Assessment nor an Environmental Impact Statement is needed.

The Office of the General Counsel has determined that these regulations meet the applicable standards provided in subsections 2(a) and 2(b)(2) of Executive Order 12778. The provisions of this rule are not retroactive and will preempt state and local laws to the extent such state and local laws are inconsistent herewith. The administrative appeal provisions located at 7 CFR 400.169, must be exhausted before judicial action may be brought.

Since reinsured companies must already provide the additional information required by the proposed rule to the state which licenses them, this proposed rule does not contain information collections that require clearance by the Office of Management and Budget under the provisions of 44 U.S.C. chapter 35, the Paperwork Reduction Act.

It has been determined under section 6(a) of Executive Order 12612, Federalism, that this proposed rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment. The policies and procedures contained in this rule will not have substantial direct effects on states or their political subdivisions, or on the distribution of power and responsibilities among the various levels of government.

Background

The standard requirements for being eligible to obtain a Standard Reinsurance Agreement (Agreement) with FCIC are found in 7 CFR 400, subpart L, and currently require that a reinsured company pass eight out of eleven National Association of Insurance Commissioners (NAIC) Insurance Regulatory Information System (IRIS) ratios. These ratios are meant to be an early warning device, alerting state regulators to insurance companies that may be in financial distress. These ratios are indicators that evaluate changes in an insurance company's financial condition. This rule proposes that FCIC add six additional radios to the current eleven IRIS ratios to improve the overall evaluation of a reinsured company's financial condition, to require the reinsured company to explain discrepancies in all ratios, and to provide a financial plan to overcome each discrepancy. The additional ratios include one new IRIS ratio, Gross Premium to Surplus, three ratios used by A.M. Best (Combined Ratio After Policyholder Dividends, Quick Liquidity, and Return on Surplus) found in *Best's Key Rating Guide*, a Two-Year Change to Surplus Ratio developed by FCIC which calculates the same as the One-Year Change to Surplus IRIS ratio but for a two-year period; and a Net Change in Cash and Short-Term Investments ratio also developed by FCIC to measure net cash flow development.

Thirty-three profitability, leverage, liquidity, and loss reserve ratios were calculated by FCIC for each current reinsured company. These calculations include both (NAIC), (IRIS), and A.M. Best ratios representing the current industry standard with which the reinsured company should be familiar. While it is proposed that only selected ratios will be used to determine eligibility, all ratios are available for financial analysis. The data required to complete the ratio calculations are derived from the Statutory Annual Financial Statement submitted by the reinsured company to the state insurance departments and FCIC. However, FCIC may supplement financial information contained in the Statutory Annual Financial Statement with information obtained from other audited or unaudited financial statements prepared in accordance with Generally Accepted Accounting Principles.

The ratios were evaluated to determine which ratios within each category best represent Multiple Peril Crop Insurance (MPCI) liability and its impact on insurance companies. The selection criteria included factors such as the short-term nature and annual cash flow cycle of MPCI insurance, and the varying size and business mix of the insurance company. For each ratio an acceptable range was established to determine whether a company passed or failed the ratio.

The current surplus requirement utilizes a Minimum Surplus Factor which limits a reinsured company's liability under the MPCI program based on the surplus available to the reinsured company. The liabilities of other lines of business written by the reinsured company are generally not considered. However, if a reinsured company underwrites only MPCI and crop-hail insurance, both liabilities will be considered. Since much of FCIC's MPCI insurance is delivered by insurers that write considerable premium and policies in the crop-hail market, increased evaluation using additional ratios for evaluating and comparing each company's financial integrity is necessary.

Seventeen ratios were selected for the general qualifications, including the eleven present NAIC IRIS ratios. Company profitability is measured by the following six ratios: *Combined Ratio After Policyholder Dividends, Two-Year Overall Operating, One-Year Change in Surplus, Two-Year Change in Surplus, Return on Surplus, and Investment Yield*. The profitability on an MPCI reinsured company is dependent on company underwriting practices, catastrophic loss experience and recovery, and its ability to generate an adequate return on investments.

A reinsured company's liquidity and cash management are measured by the following four ratios: *Agents' Balances to Surplus, Quick Liquidity, Liabilities to Liquid Assets, and Net Change in Cash and Short-Term Investments*. The combination of varying annual loss experience, loss payout to premium collection time frame, and MPCI accounting procedures, require the company maintain sufficient liquidity. Cash and short-term investment management is a key factor in maintaining sufficient liquidity and meeting current obligations.

The four leverage ratios used are: *Gross Premium to Surplus, Net Written Premium to Surplus, Change in Net Writings, and Surplus Aid to Surplus*. These measures will indicate if a reinsured company may be overexposing their surplus to risk variation and reinsurance dependency. The three loss reserve ratios used are: *One-Year Reserve Development to Surplus, Two-Year Reserve Development to Surplus, and Estimated Current Reserve Deficiency to Surplus*. These ratios determine if reserves have been understated to increase surplus and to estimate current reserve adequacy.

Section 400.173 is removed as it is not necessary after revising Subpart L to determine if the insurer is otherwise financially sound. If an insurer does not pass the required ratios and submits a financial plan that does not alleviate discrepancies in the required ratios, the reinsured company will be considered not financially sound and will not be awarded a Standard Reinsurance Agreement.

All participating insurance companies in the crop insurance industry have been fully advised of the content of this proposed rule during the preparation stage and in fact have participated in developing this rule. Since the rule must be effective prior to the effective date of the Standard Reinsurance Agreement (July 1, 1994), it has been

determined that for good cause, a 15 day comment period is sufficient. In May, FCIC held a meeting for the express purpose to introduce and discuss the SRA and its standards for approval prior to its publication. All parties interested in the SRA were invited. Prior to its publication, a copy of this rule was sent to all persons interested in the crop insurance program.

List of Subjects in 7 CFR Part 400

Crop Insurance.

Proposed Rule

Accordingly, pursuant to the authority contained in the Federal Crop Insurance Act, as amended (7 U.S.C. 1501 *et seq.*) the Federal Crop Insurance Corporation hereby proposes to amend 7 CFR part 400, subpart L of the General Administrative Regulations effective for the 1995 and succeeding reinsurance years as follows:

1. The authority citation for 7 CFR part 400, subpart L is revised to read as follows:

Authority: 7 U.S.C. 1501–1520.

2. The heading for subpart L is revised to read as follows:

Subpart L—Reinsurance Agreement—Standards for Approval

3. Section 400.161 is amended by removing paragraph (f), redesignating paragraphs (a) through (e) as paragraphs (b) through (f), and adding a new paragraph (a) to read as follows:

§ 400.161 Definitions.

* * * * *

(a) *Annual Statutory Financial Statement* means the annual financial statement of an insurer prepared in accordance with Statutory Accounting Principles and submitted to the state insurance department if required by any state in which the insurer does business, and the subsequent Audited Financial Report filed with the state insurance department as prescribed in the National Association of Insurance Commissioners Property and Casualty Annual State Instructions. These statement are to be audited by an independent Certified Public Accountant.

* * * * *

4. Section 400.162 is revised to read as follows:

§ 400.162 Qualification ratios.

The seventeen qualification ratios include:

(a) Twelve National Association of Insurance Commissioner's (NAIC) Insurance Regulatory Information System (IRIS) ratios found in § 400.170(d)(1) (i) and (ii) and § 400.170(d)(2) (i), (ii), (iii), (vi), (vii), (ix), (xi), (xiii), (xiv), and (xv) and referenced in "Using the NAIC Insurance Regulatory Information System" distributed by NAIC, 120 West 12th St., Kansas City, MO, 64105–1925;

(b) Three ratios used by A.M. Best Company found in § 400.170(d)(2) (v), (viii), and (x) and referenced in *Best's Key Rating Guide*, A.M. Best, Ambest Road, Oldwick, N.J., 08858–0700;

(c) One ratio found in § 400.170(d)(2)(iv) which is formulated by FCIC and is calculated the same as the One-Year Change to Surplus IRIS ratio but for a two-year period; and

(d) One ratio found in § 400.170(d)(2)(xii) which is also formulated by FCIC by dividing the net change in cash and short-term investments by the cash and short-term investment balance for the prior year.

5. Section 400.170 is revised to read as follows:

§ 400.170 General qualifications.

To qualify initially or thereafter for a Standard Reinsurance Agreement with FCIC, an insurer must:

(a) Be a licensed or admitted insurer in any state, territory, or possession of the United States;

(b) Be licensed or admitted, or use as a policy-issuing Company an insurer that is licensed or admitted, in each state from which the insurer will cede policies to FCIC for reinsurance;

(c) Have surplus, as reported in its most recent Annual Statutory Financial Statement, that is at least equal to the MPUL for the gross premium proposed to be reinsured multiplied by the appropriate Minimum Surplus Factor, found in the Minimum Surplus Table. For the purposes of the Minimum Surplus Table, an insurer is considered to issue policies in a state if at least two and one-half percent (2.50%) of all its reinsured gross premium is written in that state;

(d) Have and meet the ratio requirement of Gross Premium to Surplus and Net Written Premium to Surplus and at least ten of the fifteen optional ratios in this section based on the most recent Annual Statutory Financial Statement, and comply with § 400.172:

Ratio	Ratio requirement
(1) Required:	
(i) Gross Premium to Surplus	Less than 900%.
(ii) Net Written Premium to Surplus	Less than 300%.
(2) Optional:	
(i) Two-Year Overall Operating Ratio	Less than 100%.
(ii) Agents' Balances to Surplus	Less than 40%.
(iii) One-Year Change in Surplus	Greater than −10% and less than 50%.
(iv) Two-Year Change in Surplus	Greater than −10%.
(v) Combined Ratio After Policyholder Dividends	Less than 115%.
(vi) Change in Writings	Greater than −33% and less than 33%.
(vii) Surplus Aid to Surplus	Less than 15%.
(viii) Quick Liquidity	Greater than 20%.
(ix) Liabilities to Liquid Assets	Less than 105%.
(x) Return on Surplus	Greater than −5%.
(xi) Investment Yield	Greater than 4.5% and less than 10%.
(xii) Net Change in Cash/Short-Term Investments	Greater than −20%.
(xiii) One-Year Reserve Development to Surplus	Less than 20%.
(xiv) Two-Year Reserve Development to Surplus	Less than 20%.
(xv) Estimated Current Reserve Deficiency to Surplus	Less than 25%.

(e) Submit to FCIC all of the following statements:

(1) Annual Statutory Financial Statements;

(2) Statutory Management Discussion & Analysis;

(3) Most recent State Insurance Department Examination Report;

(4) Actuarial Opinion of Reserves;

(5) Annual GAAP Statement or Form 10K (does not apply to Mutual Insurance Companies);

(6) Audited Annual Report to Shareholders; and

(7) Any other appropriate financial information or explanation of IRIS ratio discrepancies as determined by the company or as requested by FCIC.

6. Section 400.171 is revised to read as follows:

§ 400.171 Qualifying when a state does not require that an Annual Statutory Financial Statement be filed.

An insurer exempt by the insurance department of the state from submitting an Annual Statutory Financial Statement must, in addition to the requirements of § 400.170(a),(b),(c),(d), and (e), submit an Annual Statutory Financial Statement certified by a Certified Public Accountant, which if not exempted, would have been filed with the insurance department of any state in which it does business.

7. Section 400.172 is revised to read as follows.

§ 400.172 Qualifying with less than twelve ratios meeting the specified requirements.

An insurer with less than twelve ratios meeting the requirements contained in § 400.170 may qualify if, in addition to the requirements of § 400.170(a),(b),(c) and (e), the insurer:

(a) Submits a financial management plan, acceptable to FCIC, to eliminate each deficiency indicated by the ratios, or provide an acceptable explanation if any failed ratio is not relevant to the insurer's insurance operations; or

(b) Has a binding agreement with another insurer that qualifies such insurer under this subpart to assume financial responsibility in the event of the reinsured company's failure to meet its obligations on FCIC reinsured policies.

§ 400.173 [Removed]

8. Section 400.173 is removed and reserved.

§ 400.174 [Amended]

9. In Section 400.174, the words "financial statement" are removed and the words "Annual Statutory Financial Statement" are added in their place.

§ 400.175 [Amended]

10. In Section 400.175(a), the words "financial statement" are removed and the words "Annual Statutory Financial Statement or Financial Statement" are added in their place.

Done in Washington, DC on June 2, 1994.

Kenneth D. Ackerman,

Manager, Federal Crop Insurance Corporation.

BILLING CODE 3410-08-M

Federal Crop Insurance Corporation

7 CFR Part 406

Nursery Crop Insurance Regulations

AGENCY: Federal Crop Insurance Corporation, USDA.

ACTION: Proposed rule.

SUMMARY: The Federal Crop Insurance Corporation (FCIC) proposes to amend the Nursery Crop Insurance regulations effective for the 1995 and succeeding crop years, by allowing a six month delay in the payment of premiums. The premium billing date will be extended for up to six months from September 30, to March 31 of the subsequent year insurance attaches.

DATES: Written comments, data, and opinions on this rule must be submitted no later than June 29, 1994, to be sure of consideration.

ADDRESSES: Mari L. Dunleavy, Regulatory and Procedural Development, Federal Crop Insurance Corporation, U.S. Department of Agriculture, Washington, DC 20250, telephone (202) 254-8314. Hand messenger delivery may be made to, Suite 500, 2101 L Street, NW., Washington, DC. Comments received may be viewed and copied at Suite 503, 2101 L. Street, NW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: Mari L. Dunleavy, (202) 254-8314.

SUPPLEMENTARY INFORMATION: This action has been reviewed under USDA procedures established by Executive Order 12866 and Departmental Regulation 1512-1. This action does not constitute a review as to the need, currency, clarity, and effectiveness of the regulations affected by this rule under those procedures. The sunset review date established for these regulations is October 1, 1994.

This rule has been determined to be "not significant" for purposes of Executive Order 12866, and therefore has not been reviewed by the Office of Management and Budget (OMB).

This action will not increase the federal paperwork burden for individuals, small businesses, and other persons. The action will not have a significant economic effect on the producers served by this voluntary crop insurance program because this action liberalizes the terms of the nursery crop insurance contract for the insured. Extending credit to producers may have a minor economic effect on the insurer only if producers do no pay their premium. However, based on past experience, non-payment of nursery crop premiums has been insignificant. For years in which premium payment have been deferred, only two disputes over premium payment have occurred. This represents less than one percent of the total nursery crop policies purchased. As these disputes have not yet been resolved, all premiums may potentially be paid. Further FCIC will administratively extend the date for payment by the reinsured company when necessary to be consistent with the final date the insured is required to submit premium payment. Therefore, this action is determined to be exempt from the provisions of the Regulatory Flexibility Act and no Regulatory Flexibility Analysis was prepared.

This program is listed in the Catalog of Federal Domestic Assistance under No. 10.450.

This program is not subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with state and local officials. See the notice related to 7 CFR part 3015, subpart V, published at 48 FR 29115, June 24, 1983.

This action is not expected to have any significant impact on the quality of the human environment, health, and safety. Therefore, neither an Environmental Assessment nor an Environmental Impact Statement is needed.

This amendment does not contain information collections that require clearance by the Office of Management and Budget under the provisions of 44 U.S.C. chapter 35, the Paperwork Reduction Act.

It has been determined under section 6(a) of Executive Order 12612, Federalism, that the policies and procedures contained in this rule do not have sufficient federalism implications to warrant the preparation of a Federalism Assessment. The policies and procedures in this rule will not have an increased substantial direct effect on states or their political subdivisions, or on the distribution of power and responsibilities among the various levels of government.

This rule has been reviewed in accordance with Executive Order 12778. The provisions of this rule are not retroactive and will preempt state and local laws to the extent such state and local laws are inconsistent therewith. The administrative appeal provisions located at 7 CFR part 400, subpart J must be exhausted before judicial action may be brought for actions taken under this policy or before any proceedings for the imposition of civil penalties under 7 U.S.C. 1506 or under the Program Fraud Civil Remedies may be effective.

Because it is urgent that insurance companies and producers be notified as soon as possible, and because of the need to file actuarial tables on time, public comments will be accepted for 15 days after publication of this rule.

Background

The nursery crop insurance policy is the only Federal crop insurance policy that requires premium payment in full prior to insurance attachment. Premium for other Federal crop insurance policies can be paid later, usually at or near harvest. FCIC took such action for the 1993 and 1994 crop years. Discontinuing this practice would be burdensome to the insured, therefore, FCIC intends to continue to allow the later payment of premiums. The insurance premium will be changed from September 30 preceding the crop year, to March 31 of the crop year.

Written comments received pursuant to this proposed rule will be made available for public inspection and copying in suite 500, 2101 L Street, NW., Washington DC during regular business hours, Monday through Friday.

List of Subjects in 7 CFR Part 406

Crop Insurance, Nursery, Premium deferred.

Proposed Rule

Accordingly, pursuant to the authority contained in the Federal Crop Insurance Act, as amended (7 U.S.C. 1501 *et seq.*), the Federal Crop Insurance Corporation hereby proposes to amend the Nursery Crop Insurance Regulations (7 CFR part 406) effective for the 1995 and subsequent crop years, by amending the provisions for coverage. This rule amends the regulations set forth herein in the following instances:

1. The authority citation for 7 CFR part 406 continues to read as follows:

Authority: 7 U.S.C. 1506, 1516.

2. Section 406.7 is amended in the contract by revising subsection 5. (a) to read as follows:

§ 406.7 The application and policy.

* * * * *

5. Annual Premium.

a. The annual premium is earned and payable on or before September 30 preceding each crop year and will be earned in full when the policy becomes effective. The date for payment of the premium will be deferred until March 31 of the crop year.

BILLING CODE 3410-08-M

7 CFR Part 457

Common Crop Insurance Regulations; Regulations for the 1994 and Subsequent Crop Years

AGENCY: Federal Crop Insurance Corporation, USDA.

ACTION: Proposed rule.

SUMMARY: The Federal Crop Insurance Corporation (FCIC) proposes to amend the Common Crop Insurance Regulations. The number of years a policy does not earn a premium without policy termination is proposed to be changed from one year to three years. The intended effect of this amendment is to allow a producer to rotate crops without policy cancellation. The arbitration procedures would apply to all disagreements on factual determinations and be in accordance with the rules of the American Arbitration Association. Currently, the arbitration procedures apply only to disagreement on production to be counted. The intended effect of this amendment is to broaden the applicability of arbitration procedures to other possible disagreements under such policies.

DATES: Written comments, data, and opinions on this proposed rule must be submitted no later than August 15, 1994 to be sure of consideration.

ADDRESSES: Written comments on this proposed rule should be sent to Mari L. Dunleavy, Regulatory and Procedural Development Staff, Federal Crop Insurance Corporation, USDA, Washington, DC 20250 or delivered to suite 500, 2101 L Street, NW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: Mari L. Dunleavy, 202-254-8314.

SUPPLEMENTARY INFORMATION: This action has been reviewed under USDA procedures established by Executive Order 12866 and Departmental Regulation 1512-1. This action constitutes a review as to the need, currency, clarity, and effectiveness of these regulations under those procedures. The sunset review date established for these regulations is November 1, 1999.

A summary of this rule has been submitted to the Office of Management and Budget (OMB) to be determined if it meets the requirements of a "significant regulation" as defined by Executive Order 12866.

Executive Order 12612, Federalism. This proposal does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment. The policies and procedures contained in this rule will not have substantial direct effects on states or their political subdivisions, or on the distribution of power and responsibilities among the various levels of government.

Under Section 605 of the Regulatory Flexibility Act (5 U.S.C. 601 through 612) these regulations will not have a significant impact on a substantial number of small entities. The regulatory revision is limited to reinsured companies and their agents and crop producers insured under the Federal Crop Insurance Act, as amended (7 U.S.C. 1501 *et seq.*). Therefore, this action is determined to be exempt from the provisions of the Regulatory Flexibility Act and no Regulatory Flexibility Analysis was prepared.

This program is listed in the Catalog of Federal Domestic Assistance under No. 10.450.

This program is not subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with State and local officials. See the Notice related to 7 CFR part 3015, subpart V, published at 48 FR 29115, June 24, 1983.

The Office of General Counsel has certified to OMB that these regulations meet the applicable standards provided in subsections 2(a) and 2(b)(2) of Executive Order 12778. The provisions of this rule will preempt state and local laws to the extent such state and local laws are inconsistent herewith. The administrative appeal provisions located at 7 CFR part 400, subpart J must be exhausted before judicial action may be brought.

This action is not expected to have any significant impact on the quality of the human environment, health, and safety. Therefore, neither an Environmental Assessment nor an Environmental Impact Statement is needed.

List of Subjects in 7 CFR Part 457

Crop insurance.

Proposed Rule

Pursuant to the authority contained in the Federal Crop Insurance Act, as amended (7 U.S.C. 1501 *et seq.*), the Federal Crop Insurance Corporation hereby proposes to amend the Common Crop Insurance Regulations, (7 CFR part 457) as follows:

PART 457—[AMENDED]

1. The authority citation for 7 CFR part 457 continues to read as follows:

Authority: 7 U.S.C. 1506, 1516.

2. Section 457.8 is amended by revising subsection 2.(e) and section 17 of the Common Crop Insurance Policy to read as follows:

§ 457.8 The application and policy.

* * * * *

2. Life of Policy, Cancellation, and Termination

* * * * *

(e) Your Policy will terminate if no premium is earned for 3 consecutive years.

* * * * *

17. Arbitration

If you and we fail to agree on any factual determination, disagreement will be resolved, in accordance with the rules of the American Arbitration Association. Failure to agree with any factual determination made by the Federal Crop Insurance Corporation (FCIC) must be resolved through the FCIC appeal regulation at 7 CFR part 400, subpart J.

DEPARTMENT OF THE TREASURY

Office of Thrift Supervision

12 CFR Part 567

[No. 94–95]

RIN 1550–AA75

Risk-Based Capital Standards; Bilateral Netting Requirements

AGENCY: Office of Thrift Supervision (OTS), Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Office of Thrift Supervision (OTS) is proposing to amend its risk-based capital standards to recognize the risk-reducing benefits of netting arrangements. Under the proposal, savings associations would be permitted to net, for risk-based capital purposes, interest and exchange rate contracts (rate contracts) subject to legally enforceable bilateral netting contracts that meet certain criteria. The OTS is proposing these amendments on the basis of proposed revisions to the Basle Accord which would permit the recognition of such netting arrangements. These amendments parallel recent amendments proposed by the Board of Governors of the Federal Reserve System (FRB) and the Office of the Comptroller of the Currency (OCC). 59 FR 26456 (May 20, 1994). The effect of the proposed amendments would be to allow thrift institutions to net positive and negative mark-to-market values of rate contracts in determining the current exposure portion of the credit equivalent amount of such contracts to be included in risk-weighted assets.

DATES: Comments must be received on or before July 14, 1994.

ADDRESSES: Written comments should be submitted to the Director, Information Services Division, Public Affairs, Office of Thrift Supervision, 1700 G Street, NW., Washington, DC 20552, Attention Docket No. 94–95. These submissions may be hand delivered at 1700 G Street, NW., from 9 a.m. to 5 p.m. on business days; they may be sent by facsimile transmission to FAX Number (202) 906–7755. Submissions must be received by 5 p.m. on the day they are due in order to be considered by the OTS. Late filed, misaddressed or misidentified submissions will not be considered in this notice of proposed rulemaking. Comments will be available for public inspection at 1700 G Street, NW., from 1 p.m. until 4 p.m. on business days. Visitors will be escorted to and from the Public Reading Room at established intervals.

FOR FURTHER INFORMATION CONTACT: John F. Connolly, Senior Program Manager, Capital Policy (202) 906–6455; Lorraine E. Waller, Counsel (Banking and Finance) (202) 906–6458, Regulations & Legislation Division, Office of Thrift Supervision, 1700 G Street, NW., Washington, DC 20552.

SUPPLEMENTARY INFORMATION:

A. Background

The international risk-based capital standards (Basle Accord) [1] include a framework for calculating risk-weighted assets by assigning assets and off-balance sheet items, including interest and exchange rate contracts, to broad risk categories based primarily on credit risk. The OTS and the other banking agencies [2] each adopted in 1989 similar frameworks to assess the capital adequacy of the banking organizations under their supervision. Banking organizations and savings associations (institutions) must hold capital against their overall credit risk, that is, generally, against the risk that a loss will be incurred if a counterparty defaults on a transaction.

Under the risk-based capital framework, off-balance sheet items are incorporated into risk-weighted assets by first determining the on-balance sheet credit equivalent amounts for the items and then assigning the credit equivalent amounts to the appropriate risk category according to the obligor, or if relevant, the guarantor or the nature of the collateral. For many types of off-balance sheet transactions, the on-balance sheet credit equivalent amount is determined by multiplying the face amount of the item by a credit conversion factor. For interest and exchange rate contracts however, credit equivalent amounts are determined by summing two amounts: the current exposure and the estimated potential future exposure.[3]

The current exposure (sometimes referred to as replacement cost) of a contract is derived from its market value. In most instances the initial market value of a contract is zero.[4] An institution should mark-to-market all of its rate contracts to reflect the current market value of the transaction in light of changes in the market price of the

[1] The Basle Accord is a risk-based framework that was proposed by the Basle Committee on Banking Supervision (Basle Supervisors' Committee) and endorsed by the central bank governors of the Group of Ten (G–10) countries in July 1988. The Basle Supervisors' Committee is comprised of representatives of the central banks and supervisory authorities from the G–10 countries (Belgium, Canada, France, Germany, Italy, Japan, the Netherlands, Sweden, Switzerland, the United Kingdom, and the United States) and Luxembourg.

[2] The banking agencies are the Office of Thrift Supervision, the Office of the Comptroller of the Currency, the Board of Governors of the Federal Reserve System and the Federal Deposit Insurance Corporation.

[3] Exchange rate contracts with an original maturity of 14 calendar days or less and instruments traded on exchanges that require daily payment of variation margin are excluded from the risk-based ratio calculations.

[4] An options contract has a positive value at inception, which reflects the premium paid by the purchaser. The value of the option may be reduced due to market movements but it cannot become negative. Therefore, unless an option has zero value, the purchaser of the option contract will always have some credit exposure, which may be greater than or less than the original purchase price, and the seller of the option contract will never have credit exposure.

contracts or in the underlying interest or exchange rates. Unless the market value of a contract is zero, one party will always have a positive mark-to-market value for the contract, while the other party (counterparty) will have a negative mark-to-market value.

An institution holding a contract with a positive mark-to-market value is "in-the-money," that is, it would have the right to receive payment from the counterparty if the contract were terminated. Thus, an institution that is in-the-money on a contract is exposed to counterparty credit risk, since the counterparty could fail to make the expected payment. The potential loss is equal to the cost of replacing the terminated contract with a new contract that would generate the same expected cash flows under the existing market conditions. Therefore, the in-the-money institution's current exposure on the contract is equal to the market value of the contract.

An institution holding a contract with a negative mark-to-market value, on the other hand, is "out-of-the-money" on that contract, that is, if the contract were terminated, the institution would have an obligation to pay the counterparty. The institution with the negative mark-to-market value has no counterparty credit exposure because it is not entitled to any payment from the counterparty in the case of counterparty default. Consequently, a contract with a negative market value is assigned a current exposure of zero. A current exposure of zero is also assigned to a contract with a market value of zero, since neither party would suffer a loss in the event of contract termination. In summary, the current exposure of a rate contract equals either the positive market value of the contract or zero.

The second part of the credit equivalent amount for rate contracts, the estimated potential future exposure (often referred to as the add-on), is an amount that represents the potential future credit exposure of a contract over its remaining life. This exposure is calculated by multiplying the notional principal amount of the underlying contract by a credit conversion factor that is determined by the remaining maturity of the contract and the type of contract.[5] The potential future credit exposure is calculated for all contracts, regardless of whether the mark-to-market value is zero, positive, or negative.

The potential future exposure is added to the current exposure to arrive at a credit equivalent amount.[6] Each credit equivalent amount is then assigned to the appropriate risk category, according to the counterparty or, if relevant, the guarantor or the nature of the collateral. The maximum risk weight applied to such rate contracts is 50 percent.

B. Netting and Current Risk-Based Capital Treatment

The banking agencies and the Basle Supervisors' Committee have long recognized the importance and encouraged the use of netting arrangements as a means of improving interbank efficiency and reducing counterparty credit exposure. Netting arrangements are increasingly being used by institutions engaging in rate contracts. Often referred to as master netting contracts, these arrangements typically provide for both payment and close-out netting. Payment netting provisions permit an institution to make payments to a counterparty on a net basis by offsetting payments it is obligated to make with payments it is entitled to receive and, thus, to reduce its costs arising out of payment settlements.

Close-out netting provisions permit the netting of credit exposures if a counterparty defaults or upon the occurrence of another event such as insolvency or bankruptcy. If such an event occurs, all outstanding contracts subject to the close-out provisions are terminated and accelerated, and their market values are determined. The positive and negative market values are then netted, or set off, against each other to arrive at a single net exposure to be paid by one party to the other upon final resolution of the default or other event.

The potential for close-out netting provisions to reduce counterparty credit risk, by limiting an institution's obligation to the net credit exposure, depends upon the legal enforceability of the netting contract, particularly in insolvency or bankruptcy.[7] In this regard, the Basle Accord noted that while close-out netting could reduce credit risk exposure associated with rate contracts, the legal status of close-out netting in many of the G–10 countries was uncertain and insufficiently developed to support a reduced capital charge for such contracts.[8] There was particular concern that a bank's credit exposure to a counterparty was not reduced if liquidators of a failed counterparty might assert the right to "cherry-pick," that is, demand performance on those contracts that are favorable and reject contracts that are unfavorable to the defaulting party.

Concern over "cherry-picking" led the Basle Supervisors' Committee to limit the recognition of netting in the Basle Accord. The only type of netting that was considered to genuinely reduce counterparty credit risk at the time the Accord was endorsed was netting accomplished by novation.[9] Under legally enforceable netting by novation, "cherry-picking" cannot occur and, thus, counterparty risk is genuinely reduced. The Accord stated that the Basle Supervisors' Committee would continue to monitor and assess the effectiveness of other forms of netting to determine if close-out netting provisions could be recognized for risk-based capital purposes.

The banking agencies' risk-based capital standards provide for the same treatment of rate contracts as the Basle Accord, but require that institutions use the current exposure method. The banking agencies, in adopting their

[5] For interest rate contracts with a remaining maturity of one year or less, the factor is 0% and for those over one year, the factor is .5%. For exchange rate contracts with a maturity of one year of less, the factor is 1% and for those over one year the factor is 5%.

Because exchange rate contracts involve an exchange of principal upon maturity and are generally more volatile, they carry a higher conversion factor. No potential future credit exposure is calculated for single-currency interest-rate swaps in which payments are made based on two floating indices (basis swaps).

[6] This method of determining credit equivalent amounts for rate contracts is known as the *current exposure method*, which is used by most international banks. The Basle Accord permits, subject to each country's discretion, an alternative method for determining the credit equivalent amount known as the *original exposure method*. Under this method, the capital charge is derived by multiplying the notional principal amount of the contract by a credit conversion factor, which varies according to the original maturity of the contract and whether it is an interest or exchange rate contract. The conversion factors, which are greater than those used under the current exposure method, make no distinction between current exposure and potential future exposure.

[7] The primary criterion for determining whether a particular netting contract should be recognized in the risk-based capital framework is the enforceability of that netting contract in insolvency or bankruptcy. In addition, the netting contract as well as the individual contracts subject to the netting contract must be legally valid and enforceable under non-insolvency or non-bankruptcy law, as is the case with all contracts.

[8] While payment netting provisions can reduce costs and the credit risk arising out of daily settlements with a counterparty, such provisions are not relevant to the risk-based capital framework since they do not in any way affect the counterparty's gross obligations.

[9] Netting by novation is accomplished under a written bilateral contract providing that any obligation to deliver a given currency on a given date is automatically amalgamated with all other obligations for the same currency and value date. The previously existing contracts are extinguished and a new contract, for the single net amount, is legally substituted for the amalgamated gross obligations. Parties to the novation contract, in effect, offset their obligations to make payments on individual transactions subject to the novation contract with their right to receive payments on other transactions subject to the contract.

standards, generally stated they would work with the Basle Supervisors' Committee in its continuing efforts with regard to the recognition of netting provisions for capital purposes.

C. Basle Supervisors' Committee Proposal

Since the Basle Accord was adopted, a number of studies have confirmed that close-out netting provisions can serve to reduce counterparty risk. In response to the conclusions of these studies, as well as to industry support for greater acceptance of netting contracts under the risk-based capital framework, the Basle Supervisors' Committee issued a consultative paper on April 30, 1993, proposing an expanded recognition of netting arrangements in the Basle Accord.[10] Under the proposal, for purposes of determining the current exposure amount of rate contracts subject to legally enforceable bilateral close-out netting provisions (that is, close-out netting provisions with a single counterparty), an institution could net the contracts' positive and negative mark-to-market values.

Specifically, the Basle proposal states that a banking organization would be able to net rate contracts subject to a legally valid bilateral netting contract for risk-based capital purposes if it satisfied the appropriate national supervisor(s) that:

(1) In the event of a counterparty's failure to perform due to default, bankruptcy or liquidation, the banking organization's claim (or obligation) would be to receive (or pay) only the net value of the sum of unrealized gains and losses on included transactions;

(2) It has obtained written and reasoned legal opinions stating that in the event of legal challenge, the netting would be upheld in all relevant jurisdictions; and

(3) It has procedures in place to ensure that the netting arrangements are kept under review in light of changes in relevant law.

The Basle Supervisors' Committee agreed that if a national supervisor is satisfied that a bilateral netting contract meets these minimum criteria, the netting contract may be recognized for risk-based capital purposes without raising safety and soundness concerns. The Basle Supervisors' Committee proposal includes a footnote stating that if any of the relevant supervisors is dissatisfied with the status of the enforceability of a netting contract under its laws, the netting contract would not be recognized for risk-based capital purposes by either counterparty.

In addition, the Basle Supervisors' Committee is proposing that any netting contract that includes a *walkaway clause* be disqualified as an acceptable netting contract for risk-based capital purposes. A walkaway clause is a provision in a netting contract that permits the non-defaulting counterparty to make only limited payments, or no payments at all, to the estate of the defaulter even if the defaulter is a net creditor under the contract.

Under the proposal, a banking organization would calculate one current exposure under each qualifying bilateral netting contract. The current exposure would be determined by adding together (netting) the positive and negative market values for all individual interest rate and exchange rate transactions subject to the netting contract. If the net market value is positive, that value would equal the current exposure. If the net market value is negative or zero, the current exposure would be zero. The add-on for potential future credit exposure would be determined by calculating individual potential future exposures for each underlying contract subject to the netting contract in accordance with the procedure already in place in the Basle Accord.[11] A banking organization would then add together the potential future credit exposure amount (always a positive value) of each individual contract subject to the netting arrangement to arrive at the total potential future exposure it has under those contracts with the counterparty. The total potential future exposure would be added to the net current exposure to arrive at one credit equivalent amount that would be assigned to the appropriate risk category.

D. Description of the Proposal

The banking agencies concur with the Basle Supervisors' Committee determination that the legal status of close-out netting provisions has developed sufficiently to support the expanded recognition of such provisions for risk-based capital purposes. Therefore, the OTS is proposing to amend its risk-based capital standards in a manner consistent with the Basle Supervisors' Committee's proposed revision to the Basle Accord and the recently proposed amendments by the OCC and the FRB. These proposed amendments would allow institutions to net the positive and negative market values of interest and exchange rate contracts subject to a qualifying, legally enforceable bilateral netting contract to calculate one current exposure for that netting contract.

The proposed amendments would add provisions setting forth criteria for a qualifying bilateral netting contract and an explanation of how the credit equivalent amount should be calculated for such contracts. The risk-based capital treatment of an individual contract that is not subject to a qualifying bilateral netting contract would remain unchanged.

For interest and exchange rate contracts that are subject to a qualifying bilateral netting contract under the proposed standards, the credit equivalent amount would equal the sum of (i) the current exposure of the netting contract and (ii) the sum of the add-ons for all individual contracts subject to the netting contract. (As with all contracts, mark-to-market values for netted contracts would be measured in dollars, regardless of the currency specified in the contract.) The current exposure of the bilateral netting contract would be determined by adding together all positive and negative mark-to-market values of the individual contracts subject to the bilateral netting contract.[12] The current exposure would equal the sum of the market values if that sum is positive, or zero if the sum of the market values is zero or negative. The potential future exposure (add-on) for each individual contract subject to the bilateral netting contract would be calculated in the same manner as for non-netted contracts. These individual potential future exposures would then be added together to arrive at one total add-on amount.

---

[10] The paper is entitled "The Prudential Supervision of Netting, Market Risks and Interest Rate Risk." The section applicable to netting is subtitled "The Supervisory Recognition of Netting for Capital Adequacy Purposes." This paper is available for review through the OTS's public information office.

[11] Under the proposal, a banking organization could net in this manner for risk-based capital purposes if it uses, as all U.S. banking organizations are required to use, the current exposure method for calculating credit equivalent amounts of rate contracts. Organizations using the original exposure method would use revised conversion factors until market risk-related capital requirements are implemented, at which time the original exposure method will no longer be available for netted transactions.

[12] For regulatory capital purposes, the agencies would expect that institutions would normally calculate the current exposure of a bilateral netting contract by consistently including *all* contracts covered by that netting contract. In the event a netting contract covers transactions that are normally excluded from the risk-based ratio calculation—for example, exchange rate contracts with an original maturity of fourteen calendar days or less or instruments traded on exchanges that require daily payment of variation margin—institutions may elect to consistently either include or exclude all mark-to-market values of such transactions when determining net current exposures.

The proposed amendments provide that an institution may net, for risk-based capital purposes, interest and exchange rate contracts only under a written bilateral netting contract that creates a single legal obligation covering all included individual rate contracts and that does not contain a walkaway clause. In addition, if a counterparty fails to perform due to default, insolvency, bankruptcy, liquidation or similar circumstances, the institution must have a claim to receive a payment, or an obligation to make a payment, for only the net amount of the sum of the positive and negative market values on included individual contracts.

Today's proposal requires that a savings association obtain a written and reasoned legal opinion(s), representing that an organization's claim or obligation, in the event of a legal challenge, including one resulting from default, insolvency, bankruptcy, or similar circumstances, would be found by the relevant court and administrative authorities to be the net sum of all positive and negative market values of contracts included in the bilateral netting contract.[13] The legal opinion normally would cover (i) the law of the jurisdiction in which the counterparty is chartered or the equivalent location in the case of noncorporate entities and, if a branch of the counterparty is involved, the law of the jurisdiction in which the branch is located; (ii) the law that governs the individual contracts covered by the bilateral netting contract; and (iii) the law that governs the netting contract. The multiple jurisdiction requirement is designed to ensure that the netting contract would be upheld in any jurisdiction where the contract would likely be enforced or whose law would likely be applied in an enforcement action, as well as the jurisdiction where the counterparty's assets reside.

A legal opinion could be prepared by either an outside law firm or in-house counsel. If a savings association obtained an opinion on the enforceability of a bilateral netting contract that covered a variety of underlying contracts, it generally would not need a legal opinion for each individual underlying contract that is subject to the netting contract, so long as the individual underlying contracts were of the type contemplated by the legal opinion covering the netting contract.

The complexity of the legal opinions will vary according to the extent and nature of the organization's involvement in rate contracts. For instance, an institution that is active in the international financial markets may need opinions covering multiple foreign jurisdictions as well as domestic law. The OTS expects that in many cases a legal opinion will focus on whether a contractual choice of law would be recognized in the event of default, insolvency, bankruptcy or similar circumstances in a particular jurisdiction rather than whether the jurisdiction recognizes netting. For example, a U.S. institution might engage in interest rate swaps with a non-U.S. institution under a netting contract that includes a provision that the contract will be governed by U.S. law. In this case the U.S. institution should obtain a legal opinion as to whether the netting would be upheld in the U.S. and whether the foreign courts would honor the choice of U.S. law in default or in an insolvency, bankruptcy, or similar proceeding.

For a savings association that engages solely in domestic rate contracts, the process of obtaining a legal opinion may be much simpler. For example, for an institution that is an end-user of a relatively small volume of domestic rate contracts, the standard contracts used by the dealer bank may already have been subject to the mandated legal review. In this case the end-user institution may obtain a copy of the opinion covering the standard dealer contracts, supported by the bank's own legal opinion.

The proposed amendments require a savings association to establish procedures to ensure that the legal characteristics of netting contracts are kept under review in the light of possible changes in relevant law. This review would apply to any conditions that, according to the required legal opinions, are a prerequisite for the enforceability of the netting contract, as well as to any adverse changes in the law.

As with all of the provisions of the risk-based capital standards, a savings association must maintain in its files documentation adequate to support any particular risk-based capital treatment. In the case of a bilateral netting contract, a savings association must maintain in its files documentation adequate to support the bilateral netting contract. In particular, this documentation should demonstrate that the bilateral netting contract would be honored in all relevant jurisdictions as set forth in this rule. Typically, these documents would include a copy of the bilateral netting contract, legal opinions, and any related English translations.

The OTS would have the discretion to disqualify any or all contracts from netting treatment for risk-based capital purposes if the bilateral netting contract, individual contracts, or associated legal opinions do not meet the requirements set out in the applicable standards. In the event of such a disqualification, the affected individual contracts subject to the bilateral netting contract would be treated as individual non-netted contracts under the standards.

As a general matter, relevant legal provisions for institutions in the U.S. make it clear that netting contracts with close-out provisions enable such organizations to setoff included individual transactions and reduce the obligations to a single net amount in the event of default, insolvency, bankruptcy, liquidation, or similar circumstances.

Today's proposal provides that netting by novation arrangements would *not* be grandfathered under the standards if such arrangements do not meet all of the requirements proposed for qualifying bilateral netting contracts. Although netting by novation would continue to be recognized under the proposed standards, institutions may not have the legal opinions or procedures in place that would be required by the proposed amendments. The OTS believes that holding all bilateral netting contracts to the same standards will promote certainty as to the legal enforceability of the contracts and decrease the risks faced by counterparties in the event of a default.

E. Request for Comment

The OTS is seeking comment on all aspects of its proposed amendments to the risk-based capital standards. In addition, the OTS notes that under current risk-based capital standards for individual contracts, the degree to which collateral is recognized in assigning the appropriate risk weight is based on the market value of the collateral in relation to the credit equivalent amount of the rate contract. The OTS seeks comment on the nature of collateral arrangements and the extent to which collateral might be recognized in bilateral netting contracts, particularly taking into account legal implications of collateral arrangements (e.g., whether the collateral pledged for

---

[13] The Financial Accounting Standards Board (FASB) has issued Interpretation No. 39 (FIN 39) relating to the "Offsetting of Amounts Related to Certain Contracts." FIN 39 generally provides that assets and liabilities meeting specified criteria may be netted under generally accepted accounting principles (GAAP). However, FIN 39 does not specifically require a written and reasoned legal opinion regarding the enforceability of the netting contract in bankruptcy and other circumstances. Therefore, under this proposal a banking organization might be able to net certain contracts in accordance with FIN 39 for GAAP reporting purposes, but not be able to net those contracts for risk-based capital purposes.

an individual transaction would be available to cover the net counterparty exposure in the event of legal challenge) and procedural difficulties in monitoring collateral levels.

F. Regulatory Flexibility Act

Pursuant to section 605(b) of the Regulatory Flexibility Act, the OTS hereby certifies that this proposed rule will not have a significant impact on a substantial number of small business entities. Accordingly, a regulatory flexibility analysis is not required.

The OTS believes that a small institution is more likely than a large institution to enter into relatively uncomplicated transactions under standard bilateral netting contracts and may need only to review a legal opinion that has already been obtained by its counterparties.

G. Executive Order 12866

It has been determined that this proposal is not a significant regulatory action as defined in Executive Order 12866.

List of Subjects in 12 CFR Part 567

Capital, Reporting and recordkeeping requirements, Savings associations.

Authority and Issuance

For the reasons set out in the preamble, part 567, of chapter v, title 12 of the Code of Federal Regulations is proposed to be amended as set forth below.

SUBCHAPTER D—REGULATIONS APPLICABLE TO SAVINGS ASSOCIATIONS

PART 567—CAPITAL

1. The authority citation for part 567 continues to read as follows:

Authority: 12 U.S.C. 1462, 1462a, 1463, 1464, 1467a, 1828(note).

2. Section 567.6 is amended by revising paragraph (a)(2)(v) to read as follows:

§ 567.6 Risk-based capital credit risk-weight categories.

(a) * * *

(2) * * *

(v) *Off-balance sheet contracts: interest-rate and foreign exchange rate contracts (Group E)*—(A) *Calculation of credit equivalent amounts.* The credit equivalent amount of an off-balance sheet interest rate or foreign exchange rate contract that is not subject to a qualifying bilateral netting contract in accordance with paragraph (a)(2)(v)(B) of this section is equal to the sum of the current credit exposure, *i.e.*, the replacement cost of the contract, and the potential future credit exposure of the off-balance sheet rate contract. The calculation of credit equivalent amounts must be measured in U.S. dollars, regardless of the currency or currencies specified in the off-balance sheet rate contract.

(*1*) *Current credit exposure.* The current credit exposure is determined by the mark-to-market value of the off-balance sheet rate contract. If the mark-to-market value is positive, then the current credit exposure is equal to that mark-to-market value. If the mark-to-market value is zero or negative, then the current exposure is zero. In determining its current credit exposure for multiple off-balance sheet rate contracts executed with a single counterparty, a savings association may net positive and negative mark-to-market values of off-balance sheet rate contracts if subject to a bilateral netting contract as provided in paragraph (a)(2)(v)(B) of this section.

(*2*) *Potential future credit exposure.* The potential future credit exposure on an off-balance sheet rate contract, including contracts with negative mark-to-market values, is estimated by multiplying the notional principal[9] by one of the following credit conversion factors, as appropriate:[10]

Remaining maturity	Interest rate contracts (percents)	Foreign exchange rate contracts (percents)
One year or less	0	1.0
Over one year	0.5	5.0

(B) *Off-balance sheet rate contracts subject to bilateral netting contracts.* In determining its current credit exposure for multiple off-balance sheet rate contracts executed with a single counterparty, a savings association may net off-balance sheet rate contracts subject to a bilateral netting contract by offsetting positive and negative mark-to-market values, provided that:

(*1*) The bilateral netting contract is in writing;

(*2*) The bilateral netting contract creates a single legal obligation for all individual off-balance sheet rate contracts covered by the bilateral netting contract, and provides, in effect, that the savings association would have a single claim or obligation either to receive or pay only the net amount of the sum of the positive and negative mark-to-market values on the individual off-balance sheet rate contracts covered by the bilateral netting contract in the event that a counterparty, or a counterparty to whom the bilateral netting contract has been validly assigned, fails to perform due to any of the following events: default, insolvency, bankruptcy, or other similar circumstances;

(*3*) The savings association obtains a written and reasoned legal opinion(s) that represents that in the event of a legal challenge, including one resulting from default, insolvency, bankruptcy or similar circumstances, the relevant court and administrative authorities would find the savings association's exposure to be the net amount under:

(*i*) The law of the jurisdiction in which the counterparty is chartered or the equivalent location in the case of noncorporate entities, and if a branch of the counterparty is involved, then also under the law of the jurisdiction in which the branch is located;

(*ii*) The law that governs the individual off-balance sheet rate contracts covered by the bilateral netting contract; and

(*iii*) The law that governs the bilateral netting contract;

(*4*) The savings association establishes and maintains procedures to monitor possible changes in relevant law and to ensure that the bilateral netting contract continues to satisfy the requirements of this section; and

(*5*) The savings association maintains in its files documentation adequate to support the netting of an off-balance sheet rate contract.[11]

(C) *Walkaway clause.* A bilateral netting contract that contains a walkaway clause is not eligible for netting for purposes of calculating the current credit exposure amount. The term "walkaway clause" means a provision in a bilateral netting contract that permits a nondefaulting counterparty to make a lower payment than it would make otherwise under the bilateral netting contract, or no payment at all, to a defaulter or the estate of a defaulter, even if the defaulter or the estate of a defaulter is a net creditor under the bilateral netting contract.

(D) *Risk weighting.* Once the savings association determines the credit equivalent amount for off-balance sheet rate contracts, that amount is assigned to the risk-weight category appropriate to the counterparty, or, if relevant, the nature of any collateral or guarantee. However, the maximum weight that will be applied to the credit equivalent amount of such off-balance sheet rate contracts is 50 percent.

(E) *Exceptions.* The following off-balance sheet rate contracts are not subject to the above calculation, and therefore, are not considered part of the denominator of a savings association's risk-based capital ratio:

(*1*) A foreign exchange rate contract with an original maturity of 14 calendar days or less; and

(*2*) Any interest rate or foreign exchange rate contract that is traded on an exchange requiring the daily payment of any variations in the market value of the contract.

* * * * *

Dated: June 1, 1994

By the Office of Thrift Supervision

Jonathan L. Fiechter,

Acting Director.

[FR Doc. 94-14266 Filed 6-13-94; 8:45 am]

BILLING CODE 6720-01-P

[9] For purposes of calculating potential future credit exposure for foreign exchange contracts and other similar contracts, in which notional principal is equivalent to cash flows, total notional principal is defined as the net receipts to each party falling due on each value date in each currency.

[10] No potential future credit exposure is calculated for single currency interest rate swaps in which payments are made based upon two floating rate indices, so-called floating/floating or basis swaps; the credit equivalent amount is measured solely on the basis of the current credit exposure.

[11] By netting individual off-balance sheet rate contracts for the purpose of calculating its credit equivalent amount, a savings association represents that documentation adequate to support the netting of an off-balance sheet rate contract is in the savings association's files and available for inspection by the OTS. Upon determination by the OTS that a savings association's files are inadequate or that a bilateral netting contract may not be legally enforceable under any one of the bodies of law described in paragraph (a)(2)(v)(*3*)(*i*) through (*iii*) of this section, the underlying individual off-balance sheet rate contracts may not be netted for the purposes of this section.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 94-NM-30-AD]

Airworthiness Directives; Boeing Model 747 Series Airplanes Equipped With General Electric CF6 Series Engines

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This document proposes the supersedure of an existing airworthiness directive (AD), applicable to certain Boeing Model 747 series airplanes, that currently requires inspections of the strut skin in the area of the precooler exhaust vent for cracks on the inboard and outboard struts, and repair, if necessary. This action would require inspections of an expanded area for certain airplanes, and inspections of airplanes on which a skin doubler has been installed as terminating action for the existing AD. This proposal is prompted by reports of strut skin fatigue cracks and heat damage found aft of the edges of skin doublers installed on certain Model 747 series airplanes. The actions specified by the proposed AD are intended to prevent separation of an engine due to overheating and subsequent cracking of the engine strut

DATES: Comments must be received by August 8, 1994.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Transport Airplane Directorate, ANM-103, Attention: Rules Docket No. 94-NM-30-AD, 1601 Lind Avenue, SW., Renton, Washington 98055-4056. Comments may be inspected at this location between 9 a.m. and 3 p.m., Monday through Friday, except Federal holidays.

The service information referenced in the proposed rule may be obtained from Boeing Commercial Airplane Group, P.O. Box 3707, Seattle, Washington 98124-2207. This information may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington.

FOR FURTHER INFORMATION CONTACT: Tim Backman, Aerospace Engineer, Airframe Branch, ANM-120S, FAA, Transport Airplane Directorate, Seattle Aircraft Certification Office, 1601 Lind Avenue SW., Renton, Washington 98055-4056; telephone (206) 227-2776; fax (206) 227-1181.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 94-NM-30-AD." The postcard will be date stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Transport Airplane Directorate, ANM-103, Attention: Rules Docket No 94-NM-30-AD, 1601 Lind Avenue, SW., Renton, Washington 98055-4056.

Discussion

On January 28, 1987, the FAA issued AD 87-04-21, Amendment 39-5543 (52 FR 3793, February 6, 1987), applicable to certain Boeing Model 747 series airplanes, to require repetitive inspections of the strut skin in the area of the precooler exhaust vent to detect cracks on the inboard and outboard struts, and repair, if necessary. That action also provides for an optional terminating modification (installation of frame stiffeners and skin doublers) for the repetitive inspections. That action was prompted by reports of extensive damage to struts on several airplanes. The requirements of that AD are intended to prevent separation of an engine due to overheating and subsequent cracking of the engine strut.

Since the issuance of that AD, the FAA has received reports of fatigue cracks found in the strut skin and heat damage found aft of the edges of skin doublers. These skin doublers had been installed on certain Model 747 series airplanes as terminating action for certain requirements contained in AD 87-04-21 and AD 90-06-06, amendment 39-6490 (55 FR 8374, March 7, 1990). (AD 90-06-06 requires in part, incorporation of certain structural modifications specified in the original issue, Revision 1, or Revision 2 of Boeing Service Bulletin 747-54-2091.) Further, cracking of the skin doublers and the underlying number 3 stringer also was found on one of these airplanes.

Subsequently, the FAA has reviewed and approved Boeing Service Bulletin 747-54-2091, Revision 5, dated April 26, 1990, that describes procedures for a visual inspection of the strut skin and internal structure in the area of the precooler exhaust vent for cracks, heat discoloration, and wrinkles on the inboard and outboard struts of certain airplanes; and on the outboard struts of certain other airplanes. The service bulletin also describes procedures for

repetitive inspections if no crack, heat discoloration, or wrinkle is found; and installation of a skin doubler if any crack, heat discoloration, or wrinkle is found.

The FAA finds that the inspection areas specified in the Boeing service bulletin must be expanded since cracks and heat damage have been reported in locations beyond those inspection areas.

Since an unsafe condition has been identified that is likely to exist or develop on other products of this same type design, the proposed AD would supersede AD 87–04–21 to require the following:

1. For airplanes on which a frame stiffener and a skin doubler specified in certain revisions of Boeing Service Bulletin 747–54–2091 have been installed: Repetitive visual inspections to detect cracks, heat discoloration, or wrinkles of the strut skin and internal structure in the area of the precooler exhaust vent from the edge of the skin doubler to nacelle station (NAC STA) 300 on the inboard and outboard struts, and repair, if necessary. This inspection area has been expanded beyond the zone described in Revision 5 of the service bulletin to cover a 30-inch width from the doubler edge to NAC STA 300. (This inspection zone excludes the area covered by the skin doubler.)

2. For airplanes on which a frame stiffener and a skin doubler specified in certain revisions of Boeing Service Bulletin 747–54–2091 have not been installed: Repetitive visual inspections to detect cracks, heat discoloration, or wrinkles of the strut skin and internal structure in the area of the precooler exhaust vent from NAC STA 230 to NAC STA 300 on the inboard and outboard struts, and repair, if necessary. This inspection area has been expanded beyond the zone described in Revision 5 of the service bulletin to cover a 30-inch width from NAC STA 230 to NAC STA 300.

The actions would be required to be accomplished in accordance with procedures described in the service bulletin described previously.

There are approximately 250 Model 747 series airplanes of the affected design in the worldwide fleet. The FAA estimates that 4 airplanes of U.S. registry would be affected by this proposed AD.

The inspections that were previously required by AD 87–04–21, and retained in this AD, will take approximately 4 work hours per airplane to accomplish, at an average labor rate of $55 per work hour. Based on these figures, the total cost impact of that inspection requirement on U.S. operators is estimated to be $880, or $220 per airplane, per inspection cycle.

The new inspections that would be added by this AD action would take approximately 4 work hours per airplane to accomplish, at an average labor rate of $55 per work hour. Based on these figures, the total cost impact of the proposed inspection requirements of this AD on U.S. operators is estimated to be $880, or $220 per airplane.

The total cost impact figure discussed above is based on assumptions that no operator has yet accomplished any of the proposed requirements of this AD action, and that no operator would accomplish those actions in the future if this AD were not adopted.

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this proposed regulation (1) Is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption **ADDRESSES**.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. App. 1354(a), 1421, and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by removing amendment 39–5543 (52 FR 3793, February 6, 1987), and by adding a new airworthiness directive (AD), to read as follows:

Boeing: Docket 94–NM–30–AD. Supersedes AD 87–04–21, Amendment 39–5543.

Applicability: Model 747 series airplanes equipped with General Electric CF6 series engines, certificated in any category.

Compliance: Required as indicated, unless accomplished previously.

To prevent separation of an engine due to overheating and subsequent cracking of the engine strut, accomplish the following:

(a) For airplanes listed in Boeing Service Bulletin 747–54–2091, Revision 1, dated October 22, 1984: Prior to the accumulation of 10,000 total hours time-in-service, or within the next 7½ months after March 13, 1987 (the effective date of AD 87–04–21, Amendment 39–5543), whichever occurs later, perform a visual inspection to detect cracks of the strut skin in the area of the precooler exhaust vent on the inboard and outboard struts of Group 1 airplanes, and on the outboard struts of Group 2 airplanes, as defined in the service bulletin, in accordance with Boeing Service Bulletin 747–54–2091, Revision 1, dated October 22, 1984; Revision 2, dated March 24, 1988; Revision 3, dated July 27, 1989; Revision 4, dated December 14, 1989; or Revision 5, dated April 26, 1990. After the effective date of this AD, the inspection shall be accomplished in accordance with paragraph (b) of this AD.

(1) If no crack is found, repeat the inspection required by paragraph (a) of this AD thereafter at intervals not to exceed 15 months, until the inspection required by paragraph (b) or (c) of this AD, as applicable, is accomplished.

(2) If any crack is found, prior to further flight, repair in accordance with FAA-approved data, and repeat the inspection required by paragraph (a) of this AD thereafter at intervals not to exceed 15 months, until the inspection required by paragraph (b) or (c) of this AD, as applicable, is accomplished.

(b) For airplanes on which a frame stiffener and a skin doubler have not been installed during production or in accordance with Boeing Service Bulletin 747–54–2091, Revision 1, dated October 22, 1984; Revision 2, dated March 24, 1988; Revision 3, dated July 27, 1989; Revision 4, dated December 14, 1989; or Revision 5, dated April 26, 1990: Perform a visual inspection to detect cracks, heat discoloration, or wrinkles of the strut skin and internal structure in the area of the precooler exhaust vent from nacelle station (NAC STA) 230 to NAC STA 300 on the inboard and outboard struts of Group 1 airplanes and on the outboard struts of Group 2 airplanes, in accordance with the inspection procedures described in Figure 3 of Boeing Service Bulletin 747–54–2091, Revision 5, dated April 26, 1990; at the time specified in paragraph (b)(1) or (b)(2) of this AD, whichever occurs later. Accomplishment of this inspection terminates the repetitive inspections required by paragraph (a) of this AD.

(1) Prior to the accumulation of 10,000 total hours time-in-service on the airplane strut, or within 120 days after the effective date of this AD, whichever occurs later. Or

(2) Within 12 months after the immediately preceding inspection accomplished in accordance with paragraph (a) of this AD.

Note 1: Paragraph (b) of this AD specifies an inspection zone that is expanded beyond the zone described in Revision 5 of the service bulletin to cover a 30-inch width from NAC STA 230 to NAC STA 300.

(c) For airplanes on which a frame stiffener and a skin doubler have been installed during production or in accordance with Boeing Service Bulletin 747–54–2091, Revision 1, dated October 22, 1984; Revision 2, dated March 24, 1988; Revision 3, dated July 27, 1989; Revision 4, dated December 14, 1989; or Revision 5, dated April 26, 1990: Within 120 days after the effective date of this AD, perform a visual inspection to detect cracks, heat discoloration, or wrinkles of the strut skin and internal structure in the area of the precooler exhaust vent from the edge of the doubler to NAC STA 300 on the inboard and outboard struts of Group 1 airplanes and on the outboard struts of Group 2 airplanes, in accordance with the inspection procedures described in Figure 3 of Boeing Service Bulletin 747–54–2091, Revision 5, dated April 26, 1990.

Note 2: Paragraph (c) of this AD specifies an inspection zone that is expanded beyond the zone described in Revision 5 of the service bulletin to cover a 30-inch width from the doubler edge to NAC STA 300.

(d) If no crack, heat discoloration, or wrinkle is found during the inspection required by paragraph (b) or (c) of this AD, repeat that inspection thereafter at intervals not to exceed 15 months.

(e) If any crack, heat discoloration, wrinkle, or previously stop-drilled crack is found during the inspection required by paragraph (b) or (c) of this AD, prior to further flight, repair using either the small skin doubler and frame stiffener or the large skin doubler and frame stiffener specified in Boeing Service Bulletin 747–54–2901, Revision 5, dated April 26, 1990, in accordance with that service bulletin; or in accordance with a method approved by the Manager, Seattle Aircraft Certification Office (ACO), FAA, Transport Airplane Directorate. Thereafter, repeat that inspection at intervals not to exceed 15 months.

(f) Installation of a frame stiffener and a skin doubler referred to in Boeing Service Bulletin 747–54–2091 as "terminating action" does not constitute terminating action for the inspection requirements of this AD.

(g) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Seattle ACO. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Seattle ACO.

Note 3: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Seattle ACO.

(h) Special flight permits may be issued in accordance with §§ 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the airplane to a location where the requirements of this AD can be accomplished.

Issued in Renton, Washington, on June 8, 1994.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910–13–U

FEDERAL TRADE COMMISSION

16 CFR Part 803

Premerger Notification; Reporting and Waiting Period Requirements

AGENCY: Federal Trade Commission.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes amendments to the Premerger Notification and Report Form that parties to certain mergers or acquisitions are required to file with the Federal Trade Commission and the Assistant Attorney General in charge of the Antitrust Division of the Department of Justice before consummating such transactions. The reporting requirement and the waiting period that it triggers are intended to enable the enforcement agencies to determine whether a proposed merger or acquisition may violate the antitrust laws if consummated and, when appropriate, to seek a preliminary injunction in federal court to prevent consummation.

During the fifteen years the rules have been in effect, the Federal Trade Commission, with the concurrence of the Assistant Attorney General in charge of the Antitrust Division, has amended the premerger notification rules several times to improve the program's effectiveness and to lessen the burden of complying with the rules. The present proposed revisions to the Premerger Notification and Report Form (hereinafter "the Form") are also intended to improve the program's efficiency in insuring a prompt, thorough, initial investigation of the competitive implications of proposed acquisitions. The proposed amendments are designed to improve the premerger notification program by requiring persons to submit certain new and more up-to-date information. The proposed revisions will also reduce the burden of compliance by raising the thresholds of several items consistent with the agencies' information needs. The burden reduction proposals will decrease the amount of information that must be provided and the search costs associated with providing that information.

DATES: Comments must be received on or before July 12, 1994.

ADDRESSES: Written comments should be submitted to both (1) the Secretary, Federal Trade Commission, room 136, Washington, DC 20580, and (2) the Assistant Attorney General, Antitrust Division, Department of Justice, room 3214, Washington, DC 20530.

FOR FURTHER INFORMATION CONTACT: Victor L. Cohen, Attorney, or John M. Sipple, Jr., Assistant Director, Premerger Notification Office, Bureau of Competition, room 303, Federal Trade Commission, Washington, DC 20580, Telephone: (202) 326–3100.

SUPPLEMENTARY INFORMATION:

Regulatory Flexibility Act

Each of these proposed changes to the Form is designed to improve the effectiveness of the premerger notification program. The Commission has determined that none of the amendments is a major rule, as that term is defined in Executive Order 12291. The amendments will not result in: An annual effect on the economy of $100 million or more; a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or significant adverse effects on competition, employment, investment, productivity, innovation or the ability of United States-based enterprises to compete with foreign-based enterprises in the domestic market. None of the proposed amendments expands the coverage of the Form in a way that would affect small business. Therefore, pursuant to Section 605(b) of the Administrative Procedure Act, 5 U.S.C. 605(b), as added by the Regulatory Flexibility Act, Public Law 96–354 (September 19, 1980), the Federal Trade Commission certifies that these proposals will not have a significant economic impact on a substantial number of small entities. Section 603 of the Administrative Procedure Act, 5 U.S.C. 603, requiring a final regulatory flexibility analysis of some rules, is therefore inapplicable.

Paperwork Reduction Act

The Hart-Scott-Rodino Premerger Notification rules and Form contain information collection requirements as defined by the Paperwork Reduction Act, 44 U.S.C. 3501–3518. These requirements were reviewed and approved by the Office of Management and Budget (OMB Control No. 3084–0005). Because the proposed

amendments would affect the information collection requirement of the premerger notification program, the proposed amendments have been submitted to OMB for review under § 3504(h) of the Paperwork Reduction Act. These provisions are described more fully in the Notice of Application to OMB under the Paperwork Reduction Act, which also is being published in the **Federal Register** today. Comments on the Commission's submission may be directed to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503, Attention: Desk Officer for the Federal Trade Commission.

Background

Section 7A of the Clayton Act ("the Act"), 15 U.S.C. 18a, as added by Sections 201 and 202 of the Hart-Scott-Rodino Antitrust Improvements Act of 1976, requires parties to certain acquisitions of assets or voting securities to notify the Federal Trade Commission (hereafter referred to as "the Commission") and the Assistant Attorney General in charge of the Antitrust Division of the Department of Justice (hereafter referred to as "the Assistant Attorney General" or "the Department") before consummating the acquisition. The parties must then wait a certain designated period before the consummation of such acquisition. The transactions to which the advance notice requirement is applicable and the length of the waiting period required are set out respectively in subsections (a) and (b) of Section 7A. This amendment to the Clayton Act does not change the standards used in determining the legality of mergers and acquisitions under the antitrust laws.

The legislative history suggests several purposes underlying the act. Congress wanted to assure that large acquisitions were subjected to meaningful scrutiny under the antitrust laws prior to consummation. To this end, Congress clearly intended to eliminate the large "midnight merger," which is negotiated in secret and announced just before, or sometimes only after, the closing takes place. Congress also provided an opportunity for the Commission or the Assistant Attorney General (which are sometimes hereafter referred to collectively as the "antitrust agencies" or the "enforcement agencies") to seek a court order enjoining the completion of those transactions that either agency deems to present significant antitrust problems. Finally, Congress sought to facilitate an effective remedy when a challenge by one of the enforcement agencies proved successful. Thus, the Act requires that the antitrust agencies receive prior notification of significant acquisitions, provides certain tools to facilitate a prompt, thorough investigation of the competitive implications of these acquisitions, and assures the enforcement agencies an opportunity to seek a preliminary injunction before the parties to an acquisition are legally free to consummate it. The problem of unscrambling the assets after the transaction has taken place is thereby eliminated.

Subsection 7A(d)(1) of the act, 15 U.S.C. 18a(d)(1), directs the Commission, with the concurrence of the Assistant Attorney General, in accordance with 5 U.S.C. 553, to require that the notification be in such form and contain such information and documentary material as may be necessary and appropriate to determine whether the proposed transaction may, if consummated, violate the antitrust laws.

Subsection 7A(d)(2) of the act, 15 U.S.C. 18a(d)(2), grants the Commission, with the concurrence of the Assistant Attorney General, in accordance with 5 U.S.C. 553, the authority (A) to define the terms used in the act, (B) to exempt from the act's notification and waiting period requirements additional persons or transactions which are not likely to violate the antitrust laws and (C) to prescribe such other rules as may be necessary and appropriate to carry out the purposes of section 7A.

The Commission, with the concurrence of the Assistant Attorney General, promulgated implementing rules ("the rules") and a Notification and Report Form and issued an accompanying Statement of Basis and Purpose, all of which were published in the **Federal Register** of July 31, 1978, 43 FR 33450, and became effective on September 5, 1978.

The rules are divided into three parts, which appear at 16 CFR Parts 801, 802, and 803. Part 801 defines a number of the terms used in the Act and rules, and explains which acquisitions are subject to the reporting and waiting period requirements. Part 802 contains a number of exemptions from these requirements. Part 803 explains the procedures for complying with the act. The Notification and Report Form, which is completed by persons required to file notification, is an appendix to Part 803 of the rules.

Changes of a substantive nature have been made in the premerger notification rules or Form on ten occasions since they were first promulgated. See, 44 FR 60781 (November 21, 1979); 45 FR 14205 (March 5, 1980); 46 FR 38710 (July 29, 1981); 48 FR 34427 (July 29, 1983); 50 FR 38742 (September 24, 1985); 51 FR 10368 (March 26, 1986); 52 FR 7066 (March 6, 1987) (all of these changes included revisions in the Form); 52 FR 20058 (May 29, 1987); 54 FR 21427 (May 18, 1989) and 55 FR 31371 (August 2, 1990).

The current set of proposals to change the Form is designed to improve the program's effectiveness by requiring the submission of certain additional information that will be very useful to the agencies in the performance of their initial antitrust reviews of proposed transactions. The proposals also include several modifications that are intended to reduce the burden of completing the HSR Form consistent with the agencies' antitrust enforcement needs. The Commission invites interested persons to submit comments on the appropriateness of the proposed changes to the Form and its instructions.

Proposed Changes in the Instructions and Form

a. Transactions Subject to the Bankruptcy Code

Section 363(b) of the Bankruptcy Code, 11 U.S.C. 363(b), provides for a waiting period of ten days for transactions in which a trustee in bankruptcy files notification of a proposed acquisition as an acquired person. Since 11 U.S.C. 1107 provides that a debtor-in-possession essentially has the same powers as a trustee in bankruptcy, a debtor-in-possession also may file notification as an acquired person and thereby invoke the ten-day waiting period. Due to the very limited time provided for the initial review of such transactions, it is important that the Commission and the Department quickly and easily identify transactions to which the Bankruptcy Code provisions apply. For this reason, the Commission proposes to modify the preamble found on page one of the Form to include the question:

Is this filing being made as an acquired person by a trustee in bankruptcy or a debtor-in-possession subject to Section 363(b) of the Bankruptcy Code, 11 U.S.C. 363(b)? yes /_____/ no /_____/

b. Notification for an Acquisition That Has Taken Place

Several times each year, persons file premerger notifications for acquisitions that have been consummated prior to filing notification and observing the appropriate waiting period. Usually, such persons call the Commission's Premerger Notification Office ("PNO") promptly after discovering the violation. Many of these violations are determined to be inadvertent, the result of simple negligence. The PNO advises persons who have consummated an acquisition in violation of the Act to file a corrective filing as soon as possible and to submit a detailed, written explanation signed by a company official explaining how the violation occurred and the steps that will be taken to ensure future compliance with the filing requirements. The letter of explanation need not accompany the corrective filing. The submission of a corrective, compliant notification will, in most instances, stop the accruing of civil penalties after the waiting period has expired.

The PNO has established procedures for processing corrective filings and conducting an informal inquiry to determine whether to refer the violation to the appropriate litigation office for investigation and a possible civil penalty action. The PNO procedures are designed to monitor persons who have violated the Act to identify repeat offenders. For this reason, it is important that filings for acquisitions that have already been consummated be easily identified and assigned to the persons who monitor and process such violations. Sometimes, persons who file corrective filings do not identify them as pertaining to an acquisition that has already been consummated. Consequently, their filings are not always assigned to the persons who have the expertise to handle these matters. To identify corrective filings easily to ensure that they are assigned to the appropriate person for review, the Commission proposes to modify the preamble found on page one of the Form to include the question:

Is this filing being made for an acquisition that has already been consummated? yes /_____/ no /_____/

c. Transactions Subject to Foreign Governmental Regulation

To enforce their antitrust statutes, many foreign governments require, or provide for voluntary submission of, premerger notification comparable to that required by the Form. Their thresholds for notification overlap to varying degrees with those of section 7A. Accordingly, parties to a merger or acquisition may file notification with, and need clearance from, more than one sovereign authority. The potential for multiple notifications has grown because of the increase not only in merger enforcement organizations, but also in the number of transactions involving firms based in different countries and/or which do business in more than one country.

Bilateral and multilateral efforts have been undertaken to foster communication and cooperation between antitrust authorities in order to assist them in determining whether proposed acquisitions violate their respective antitrust laws and avoid conflict in enforcement of those laws. Bilateral agreements between the United States and Australia, Canada, the European Commission and Germany provide for, inter alia, timely notification of investigations which involve important interests of the signatories, sharing of non-confidential information, and, where possible, coordination of investigations. A 1986 Recommendation of the Organization for Economic Cooperation and Development (OECD) similarly provides for timely notification and information sharing among the OECD members. Further efforts toward cooperation and even convergence of premerger notification requirements have been recommended by the American Bar Association in the 1991 Report of its special Committee on International Antitrust.

Cooperation and potential coordination may be hindered by the inability of antitrust authorities to learn as early as possible of the fact of the submission of premerger notification to another jurisdiction. This deficiency is complicated by the lack of uniformity among the nations' premerger notification provisions as to the timing of the submission of notification. As a result, submission of notifications to different jurisdictions at different times often occurs.

To provide for timely alert of multiple notifications of a particular transaction in order to foster cooperation between the notified jurisdictions and thereby assist the Commission and the Department in determining whether such transaction would violate the antitrust laws, the Commission proposes to modify the preamble found on page one of the Form to require a listing of the name(s) of any foreign antitrust or competition authority that has been or will be notified of the proposed acquisition. The proposed language reads as follows:

If, to the knowledge or belief of the person filing notification, a foreign antitrust or competition authority has been or will be notified of the proposed acquisition, list the name and country or other jurisdiction of each such authority and the date notification was made or is anticipated to be made:

_____

_____

_____

d. Calculation of the Percentage of Assets in Item 3

At present, the instructions to item 3 require both the acquiring and acquired persons to state the percentage of assets, percentage of voting securities and the aggregate total dollar amount of assets and voting securities that will be held by the acquiring person as a result of the acquisition. Determining the percentage of assets held has proven to be difficult for acquiring persons because they generally are not aware of the book value of the assets or the total book value of the acquired person's assets, which is the information needed to make the required calculation. On the other hand, acquired persons can readily ascertain the percentage of their total assets being acquired. For this reason, the Commission proposes to amend item 3(a) to require only the acquired person to determine the percentage of assets of the acquired person that will be held as a result of the acquisition.

Some filing persons have expressed uncertainty regarding the information that item 3(b) requires. Item 3(b) seeks to obtain information regarding the percentage of voting securities of the issuer or issuers whose voting securities will be held as a result of the acquisition. Thus, if voting securities of more than one issuer will be held as a result of the acquisition, percentages should be provided for each issuer. The Commission proposes to add clarifying language to the instructions in item 3(b).

Accordingly, the Commission proposes to modify the instructions to item 3 to read as follows:

Assets and voting securities held as a result of the acquisition (item 3(a) to be completed by the acquired person only; items 3(b) and 3(c) to be completed by both the acquiring and acquired persons). State:

Item 3(a)—the percentage of assets of the acquired person (see § 801.12(d));

Item 3(b)—the percentage(s) of voting securities of each issuer (see § 801.12(a));

Item 3(c)—the aggregate total dollar amount of assets and voting securities of the acquired person to be held by each acquiring person as a result of the acquisition (see §§ 801.13 and 801.14)

e. Elimination of Document Identification in Item 4(a)

At present, the instructions to item 4(a) of the Form permit filing persons to merely identify documents filed with the Securities and Exchange Commission (SEC) in lieu of their actual submission as attachments to the Form when copies of the documents are not

"readily available." Fortunately, filing persons rarely use this proviso and generally submit the required SEC documents with their Forms. If filing persons failed to submit these documents, it would hinder the ability of the Commission and the Department to complete their antitrust reviews within the limited time periods provided by the act.

Accordingly, the Commission proposes to delete the following instruction presently included as the last sentence in item 4(a):

Alternatively, if the person filing notification does not have copies of responsive documents readily available, identification of such documents and citation to date and place of filing will constitute compliance.

f. Submission of 4(c) Documents Prepared by or for Partners

Item 4(c) of the Form requires reporting persons to submit all studies, surveys, analyses and reports that were prepared by or for any officer or director (or individuals exercising similar functions in the case of an unincorporated entity) for the purpose of evaluating or analyzing the proposed acquisition with respect to market shares, competition, competitors, markets, potential for sales growth or product or geographic market expansion. Item 4(c) also encompasses officers or directors of any entity included within the reporting person. See 43 FR 33450, 33525 (July 31, 1978).

Item 4(c) documents often provide valuable insights into possible product and geographic markets as well as the competitive purposes and projected competitive consequences of the proposed transaction. As such, item 4(c) documents are often essential to Commission and Department attorneys in making preliminary determinations of product and geographic markets and their initial evaluations of the potential competitive effects of a proposed acquisition. In addition, item 4(c) documents also have been very useful to the agencies in preparing requests for additional information and documentary material.

At present, the instructions to item 4(c) require the submission of documents "which were prepared by or for any officer(s) or director(s) (or, in the case of unincorporated entities, individuals exercising similar functions) * * *." Item 4(c) applies to all entities included within the reporting person and, thus, to partnerships. However, it has been argued that partnerships do not have item 4(c) documents because they contain no individuals exercising functions similar to officers or directors (partnership interests generally "do not entitle the owner of that interest to vote for a corporate "director" or "an individual exercising similar functions"). See 16 CFR 801.1(b), example 2, and 52 FR 20058, 20062 (May 29, 1987). The Commission believes that documents prepared by or for partners of a partnership and persons responsible for managing the affairs of a partnership are likely to contain the same types of market information found in documents prepared "by or for officers or directors" of a corporation. For this reason, the Commission proposes to amend item 4(c) to require the submission of documents prepared by or for partners of a partnership. However, the Commission is concerned about the burden that such a requirement may impose on limited partners in a limited partnership. There are often numerous limited partners in a limited partnership, and it is the Commission's understanding that limited partners are principally passive investors because, generally, they must refrain from participation in the conduct of the partnership in order to limit their liability. Uniform Limited Partnership Act (U.L.A.), section 1. Indeed, the Commission has observed that often the limited partners are pension funds, insurance companies and similar types of investors.

In contrast, general partners in a limited partnership and partners in a general partnership are normally the decisionmakers who participate in the day-to-day management of a partnership. Uniform Limited Partnership Act (U.L.A.), section 6. Consequently, they are likely to create, or have created for them, documents that meet the criteria of item 4(c). On the other hand, limited partners in a limited partnership are likely to have in their possession primarily item 4(c) documents which are also within the control of the general partners. The Commission believes that any benefit that may be derived from requiring a search for and submission of item 4(c) documents by limited partners is outweighed by the additional burden that such a requirement would impose.

Accordingly, the Commission proposes to amend item 4(c) to require the submission of documents prepared by or for general partners of a limited partnership and partners of a general partnership. These changes are contained in the proposed item 4(c) language that follows section g.

g. Submission of Documents Relating to Businesses or Products of Parties to the Transaction

The Commission and the Department have received certain types of documents in response to requests for additional information that the Commission believes would be very useful to the agencies in conducting their initial assessment of the possible competitive effects of a proposed transaction. These documents describe or analyze the businesses of, the products manufactured by or the services provided by the parties to the transaction or relate to the possible integration of operations.

In this regard, the Commission's experience with filings has demonstrated that it is sometimes difficult to identify the specific products produced by the filing persons using the information presently required by the Form. The SIC codes do not always provide the specificity needed to determine the products or services of the filing persons. As a result, the agency cleared to review the transaction may spend much of the waiting period trying to determine if the filing persons manufacture products that actually compete. The agency is then left with less time to reach conclusions about other antitrust issues, such as entry, that are necessary to determine whether the acquisition raises serious antitrust concerns. Documents that discuss or analyze the businesses, products or services of the parties to the transaction, if submitted when the filings are made, may, in some cases, obviate the need for the issuance of a request for additional information and documentary materials. Such request would otherwise be needed to resolve the competitive issues that the agency lacked the time to resolve during the initial waiting period.

To provide the agencies with additional documentary material to analyze the competitive effects of a proposed acquisition, to assist the agencies in resolving all competitive issues during the initial waiting period and, in some cases, to eliminate the need to issue a request for additional information and documentary materials, the Commission proposes to modify item 4(c) to require the submission of documents that discuss, describe or analyze (1) the businesses of, the products manufactured or the services provided by the acquiring person and the business enterprise being acquired (as represented by the assets or issuer whose voting securities are being acquired) or (2) the possible integration of the operations of the acquiring person and the business enterprise being

acquired. Documents covered by the change are limited to documents that are considered to be within the traditional criteria of item 4(c) noted above and are prepared by or for any officers or directors (or, in the case of unincorporated entities, individuals exercising similar functions or general partners of a limited partnership and partners of a general partnership) for the purpose of discussing, evaluating or analyzing the proposed acquisition.

Although the amendment expands the categories of documents that filing persons are required to submit, the Commission believes that the documents may help to clarify information that the parties report in item 7(a) concerning the SIC product code overlaps. For transactions that pose no antitrust concerns, these documents are likely to enhance the ability of the agencies to expedite their review and grant early termination of the waiting period when requested.

Accordingly, the Commission proposes to amend item 4(c) of the Form to read as follows:

Item 4(c)—All studies, surveys, analyses, or reports or documents which were prepared by or for any officer(s) or director(s) including officers or directors of any entity within the filing person (or, in the case of unincorporated entities, individuals exercising similar functions or, in the case of a limited partnership, any general partner(s) of such partnership and, in the case of a general partnership, the partners of such partnership) for the purpose of discussing, evaluating or analyzing the acquisition with respect to (i) market shares, competition, competitors, markets, potential for sales growth or expansion into product or geographic markets, (ii) the businesses of, products manufactured by or services provided by the acquiring person and the business enterprise being acquired (as represented by the assets or issuer whose voting securities are being acquired); or (iii) the integration of the operations of the acquiring person and the business enterprise to be acquired

ii. Submission of Solicitation Documents

Pursuant to the requirements of item 4(c), filing persons often submit a variety of documents, including offering memoranda, analyses by investment bankers and similar documents prepared by consultants and investment firms for the purpose of soliciting expressions of interest from prospective purchasers. These documents often provide detailed information on the operations and the market position of the acquired person.

On occasion, counsel for a filing person has contended that investment bankers' books or other types of offering documents prepared by third parties as general selling documents are not covered by item 4(c) because they were not prepared for the specific acquisition for which a filing is being made. This position appears to be based, in part, on the statement in the Statement of Basis and Purpose ("SBP") that the "reporting person must submit only those documents prepared in connection with the reported acquisition." 43 FR 33450, 33525 (July 31, 1978). The Commission did not intend, nor does it interpret, this language to mean that only documents prepared after the acquiror has been identified qualify as item 4(c) documents. Rather, it is the Commission's view that such documents were "prepared in connection with the reported acquisition" even though at the time of preparation the specific acquiror had not been identified. Similarly, if an acquiror is considering a number of acquisition candidates and prepares documents which analyze various aspects of competition prior to making its decision regarding which candidate(s) to pursue, those documents pertaining to the candidate(s) selected are item 4(c) documents.

Counsel for filing persons also have contended that investment bankers' books are not item 4(c) documents because it is not clear that such documents are prepared "by or for any officer(s) or director(s)." The Commission believes that such documents meet this requirement because they are usually prepared at the direction of an officer or director of the acquired person. Moreover, in the Commission's view such documents of the acquiring person qualify as 4(c) documents because they are prepared for the officers or directors—the decision-makers who will determine whether to pursue an acquisition. The fact that investment bankers' books usually are prepared by outside consultants also has no bearing on whether such documents are covered by item 4(c). As the Commission made clear in the SBP when the premerger notification rules were promulgated, item 4(c) documents include "documents prepared by any person, including consultants, for officers and directors." See 43 FR 33450, 33525 (July 31, 1978). The Commission proposes to amend item 4(c) by adding new item 4(c)(ii) which will make clear that the submission of investment bankers' books and similar documents prepared in connection with the sale of the acquired person or any portion of the acquired person is required. However, this new section is not limited to documents "prepared by or for any officer(s) or director(s)" of the acquiring or the acquired person. Documents of this type have provided valuable information to the agencies in connection with their antitrust reviews and the agencies should not be precluded from receiving these documents simply because they were not prepared expressly for officers or directors.

Accordingly, the Commission proposes to add a new subsection to item 4 to be identified as item 4(c)(ii) and to renumber item 4(c) to item 4(c)(i). Proposed item 4(c)(ii) will read as follows:

Item 4(c)(ii)—All investment bankers books, offering memoranda, and similar documents which have been prepared by any person for the purpose of soliciting expressions of interest from prospective purchasers of the assets or entity to be acquired.

i. Submission of an Index for Item 4(c) Documents

At present, persons filing documents required by item 4 of the Form may provide an optional index for the documents submitted. An index to item 4 documents has proven to be valuable to both the Premerger Notification Office staff as well as to litigation staff in expediting their reviews of proposed acquisitions, especially when numerous documents are submitted.

In order to facilitate the review process, the Commission proposes to require the submission of an index of documents submitted in response to items 4(c)(i) and 4(c)(ii). Such indices will better enable the Commission and the Department to keep track of item 4(c) documents. They also will enable the agencies to determine whether filing parties have inadvertently omitted any documents identified as item 4(c) documents.

Accordingly, the Commission proposes to add the following language to the general instructions to item 4, amended to require the submission of an index identifying all item 4(c)(i) and 4(c)(ii) documents:

Persons filing notification must provide an index of documents being submitted pursuant to Items 4(c)(i) and 4(c)(ii). With respect to each document provide the name of the document, the date of preparation, and the name and title of the document's authors and recipients.

j. Acquisition of the Assets of an Insurance Carrier

Item 5 of the Form requires insurance carriers, i.e., persons deriving revenues in 2-digit SIC major group 63, to supply revenue information only for industries not within SIC major group 63 and instructs such persons to complete the Insurance Appendix to the Form when voting securities of an insurance carrier are to be acquired. If the proposed acquisition is not of voting securities but of assets that generate insurance revenues within 2-digit SIC major group 63, the current instructions do not require the filing person to complete either item 5 or the Insurance Appendix. To correct this omission, the Commission proposes to modify item 5 and the Insurance Appendix to require insurance carriers to complete the Insurance Appendix if the acquisition is of assets that generate insurance revenues.

Accordingly, the Commission proposes to revise item 5 and the Insurance Appendix instructions to the Form to read as follows:

Item 5—Insurance Carriers (2-digit SIC major group 63) should supply the information requested only with respect to industries not within SIC major group 63. If voting securities of an insurance carrier or assets that generate insurance revenues in 2-digit SIC major group 63 are being acquired, the filing person should complete the Insurance Appendix to this Form.

Appendix To Notification and Report Form: Insurance

Insurance carriers (2-digit SIC major group 63) are required to complete this Appendix if voting securities of an insurance carrier or assets that generate insurance revenues in 2-digit SIC major group 63 are being acquired directly or indirectly

k. Products Added

Item 5(b)(ii) of the Form requires the filing person to identify (by 7-digit SIC code or in the manner ordinarily used by such person) each product within 2-digit SIC major groups 20–39 (manufactured products) which it has added or deleted subsequent to 1987 (the current base year), indicating the year of addition or deletion and stating the total dollar revenues it derived in the most recent year for each product added. Products added by reason of mergers or acquisitions of entities are not included and are reported in items 5(a) and 5(b)(i).

Some filing persons have asserted that item 5(b)(ii) does not require the inclusion of products added, either through new product innovation or through the purchase of assets including production facilities, after the most recent year for which the filing person reports revenues in item 5(b)(iii). For example, such persons assert that if the revenues reported in item 5(b)(iii) are for calendar year 1992, then they need not report in item 5(b)(ii) any new product developed in 1993 which generated revenues under an SIC code not previously used by the filing person. This interpretation of the current language of item 5(b)(ii) would permit filing persons to omit potentially important information that is not called for elsewhere on the Form. It might allow an SIC code overlap to go unreported, as well as information about the filing person's ability to manufacture the new product.

The Commission believes that the language of item 5(b)(ii) does not permit this limited reading. However, the Commission proposes to amend item 5(b)(ii) to make explicit that all manufactured products added or deleted after the base year must be reported. The amendment will alert filing persons that they must provide the "most current information available" about their production activities to enable the agencies to better assess the competitive effects of a proposed transaction. See 43 FR 33450, 33529 (July 31, 1978).

The Commission also proposes to modify item 5(b)(ii) to clarify the procedure for reporting revenues derived during the base year by entities acquired by filing persons after the base year The current instructions to item 5 require that a filing person report in response to items 5(a)-(c) any revenues derived during the base year by an entity that the filing person later acquires by merger or acquisition. However, the instructions to item 5(b)(ii) require only the reporting of products added by merger or acquisition in item 5(b)(i), which calls for revenues by 7-digit SIC manufacturing product codes, and not item 5(a), which asks for base year revenues by 4-digit SIC manufacturing and non-manufacturing industry codes. The amendment adds language to item 5(b)(ii) to indicate that base year revenues for these added products should be included in response to both items 5(a) and 5(b)(i).

Since the present language in item 5 applies only to the acquisition of an "entity", it does not cover asset acquisitions. However, the Commission's staff has adopted the position that if an asset is acquired after the base year and is accompanied by books and records sufficient to provide responses to items 5 (a) through (c), then such responses must be provided. If such books and records do not accompany the purchased asset, then, if the asset engages in manufacturing, it must be included in the response to item 5(b)(ii) as a product added by the reporting person. The Commission is in agreement with the staff's treatment of asset acquisitions and has modified item 5 to reflect this position.

Accordingly, the Commission proposes to modify the general instructions to item 5 and item 5(b)(ii) to read as follows:

Persons filing notification should include the total dollar revenues for 1987 derived by all entities, or generated by assets (for which books and records necessary to supply such revenues are available) even if such entities or assets have become included within the person since 1987. For example, if the person filing notification acquired assets in 1989, along with the books and records necessary to supply 1987 revenues generated by the assets, it must include those revenues in Item 5(a) and, if a manufactured product, in item 5(b)(i).

Item 5(b)(ii)—Products added or deleted. Within 2-digit SIC major groups 20–39 (manufacturing industries), identify each product of the person filing notification added or deleted subsequent to 1987, including products added after the most recent year for which period revenues are reported in the response to item 5(b)(iii). Indicate the year of addition or deletion and, for products added, state the total dollar revenues derived in the most recent year, and, for products added after the most recent year, for the time period, if any, the product has derived revenues. Also include products added by the acquisition of assets engaged in manufacturing (2-digit SIC major groups 20–39) for which books and records sufficient to provide revenues for the base year were not also acquired. Products added should be identified by the appropriate 7-digit SIC product code unless the person is unsure of the proper code, in which case the person can identify the product in the manner it ordinarily uses.

Do not include products added since 1987 by reason of the acquisition of an entity in operation in 1987 or of assets accompanied by the books and records sufficient to provide 1987 revenues for such assets. Dollar revenues derived from such products should be included in response to Items 5(a) and, if a manufactured product, 5(b)(i). However, if an entity acquired after 1987 by the person filing notification (and now included within the person) itself has added or deleted any manufactured products since 1987, these products should be listed in Item 5(b)(ii).

Products deleted by reason of dispositions of assets or voting securities since 1987 should also be listed in Item 5(b)(ii).

l. Foreign Manufactured Products

Section 803.2(c)(1) of the rules, 16 CFR 803.2(c)(1), instructs filing persons to provide information in response to items 5, 7, 8 and 9 and the Insurance Appendix "with respect to operations conducted within the United States." Areas included in the United States are defined in § 801.1(k), 16 CFR 801.1(k). Filing persons are not required to submit SIC code information on a detailed manufacturing basis for products they manufacture outside the United States even if they sell the products in the United States. For example, if a filing person manufactured a product in 1987 in Canada, imported it into the United States and sold that product at the wholesale or retail level, the filing person would report revenues derived from those sales in item 5(a) using a wholesale or retail 4-digit SIC code. The filing person would not be required to identify in either item 5(a) or item 5(b)(i) the product it manufactured in Canada using the descriptive 4-digit SIC code or the 7-digit SIC product code for manufactured products that would have been required if the product had been manufactured in the United States. Similarly, if the filing person derived revenues in the most recent year from sales of the product in the United States, the person would report those revenues in item 5(c) using the appropriate 4-digit wholesale or retail code. The filing person would not report those revenues in item 5(b)(iii) using the appropriate 5-digit SIC product class code for manufactured products as it would have if the product had been manufactured in the United States.

The 4-digit SIC wholesale and retail codes reported in items 5(a) and 5(c) do not identify the SIC manufacturing codes applicable to the products manufactured abroad that are sold by the manufacturer in the United States. Consequently, the agencies have found it very difficult, using the information presently required by the Form, to determine whether a filing person that manufactures products outside the United States but sells them in the United States may be involved in manufacturing activities similar to those of another party to the transaction.

The Commission believes that 7-digit SIC product code information concerning products manufactured outside the United States that are sold in or into the United States at the wholesale or retail level would be very helpful to the agencies in performing their initial antitrust review. This information has become more important over the last decade as foreign imports and their effect on the nation's economy have increased. For this reason, the Commission proposes to modify the Form to require filing persons to identify the 7-digit SIC product code (manufacturing industries) for each product they manufacture outside the United States and sell in the United States at wholesale or retail. Since this provision requires persons to identify codes and not report revenues, it should only impose a minimal additional burden on filing persons. The proposed revision would require filing persons to identify the 7-digit SIC product codes for such foreign manufactured products only for the most recent year.

Accordingly, the Commission proposes to add a new item 5(c)(ii) to the Form and to change the designation of present item 5(c) to 5(c)(i). New proposed item 5(c)(ii) reads as follows:

Item 5(c)(ii)—Identification of 7-digit SIC product codes for certain foreign manufactured products. Provide the 7-digit SIC product code for each product manufactured outside the United States by the person filing notification for which the person reported revenues in Item 5(c)(i). The 7-digit SIC product codes to be provided are those that the person would use to identify the products if the person had manufactured the product(s) in the United States. Revenues for such 7-digit codes need not be provided

m. Increases in Reporting Thresholds in Items 6(b) and 6(c)

At present, item 6(b) of the Form requires the reporting person to identify shareholders holding five percent or more of the voting stock of any entity included within the reporting person (including the ultimate parent entity) having total assets of $10 million or more. For each shareholder, the reporting person must list the issuer, the class, the number and the percentage of each class of voting securities held. Item 6(c) requires the reporting person to list its minority voting stock holdings of five percent or more in any issuer having total assets of $10 million or more.

Item 6 is designed to obtain information to "alert the enforcement agencies to situations in which the potential antitrust impact of the reported transaction does not result solely or directly from the acquisition, but may arise from direct or indirect shareholder relationships between the parties to the transaction." See 43 FR 33450, 33531 (July 31, 1978). For example, items 6(b) and 6(c) may reveal situations in which "a person known to be a competitor or customer or supplier of one of the parties is also a significant shareholder of the other party, or when the acquiring party holds stock in a competitor or customer or supplier of the acquired company or vice versa." Id

The Commission has reviewed its use of the information submitted in response to items 6(b) and (c) and has determined to propose an increase in the thresholds from five percent to ten percent. Subsection (c)(9) of the Act exempts most acquisitions of ten percent or less of an issuer's voting securities, so long as the acquisition is made solely for the purpose of investment. Although the Commission and the Department of Justice have issued requests for additional information to reporting persons who proposed to acquire less than ten percent of an issuer's voting securities, it does not appear that disclosures of stock holdings of less than ten percent by filing persons in response to items 6(b) and 6(c) of the Form have raised competitive concerns sufficient to result in the issuance of any second requests.

Increasing the reporting thresholds to ten percent is also likely to reduce significantly the compliance burden of certain filing persons, such as nonpublic and foreign firms. Generally, nonpublic and foreign firms are not required to report their holdings regularly as publicly-held companies in the United States are required to do. Consequently such firms appear to have difficulty gathering the information needed to respond accurately to items 6(b) and 6(c) at the five percent thresholds.

Accordingly, the Commission proposes to revise items 6(b) and 6(c) of the Form to read as follows:

Item 6(b)—Shareholders of person filing notification. For each entity (including the ultimate parent entity) included within the person filing notification the voting securities of which are held (See § 801.1(c)) by one or more other persons, list the issuer and class of voting securities, the name and headquarters mailing address of each other person which holds ten percent or more of the outstanding voting securities of the class, and the number and percentage of each class of voting securities held by that person Holders need not be listed for issuers with total assets of less than $10 million.

Item 6(c)—Holdings of person filing notification. If the person filing notification holds voting securities of any issuer not included within the person filing notification, list the issuer and class, the number and percentage of each class of voting securities held, and

(optional) the entity within the person filing notification which holds the securities. Holdings of less than ten percent of the outstanding voting securities of any issuer, and holdings of issuers with total assets of less than $10 million, may be omitted.

n. Reporting of 5-Digit SIC Code Overlaps

At present, item 7 of the Form requires the filing person who has knowledge or belief that it and any other party to the acquisition derived revenues in the most recent year from any of the same 4-digit SIC industry codes to list the overlapping SIC codes and to provide its description. If the transaction involves the formation of a joint venture or other corporation, the filing person must indicate the common 4-digit SIC codes in which it derives revenues and in which the joint venture will derive revenues as well as the common codes it has with other parties to the transaction. The Commission proposes to amend item 7 in two ways.

First, the Commission proposes to require filing persons to identify and provide geographic market information for overlapping 5-digit SIC product class codes as well as 4-digit SIC codes for manufacturing operations (SIC major groups 20–39). The Commission has found that many of the 4-digit SIC codes within SIC major groups 20–39 are too broad for proper product line determinations. Because many products are often included within a particular 4-digit SIC code, it is difficult to determine based on 4-digit information whether the parties to the transaction produce competing products. However, 5-digit SIC codes delineate specific product classes that are less inclusive than the 4-digit SIC codes that classify products by manufacturing industry. Modifying item 7 to include overlapping 5-digit SIC codes will provide more detailed geographic market information about a more narrowly defined class of products that the filing persons produce in common. For example, the 4-digit SIC code, 2834 - Pharmaceutical Preparations, is sub-categorized into nine different 5-digit SIC codes. Thus, for the most part, while the information received in response to item 7 has been very useful, the Commission believes that information regarding geographic markets at the 5-digit SIC code overlap level will improve the agencies' initial antitrust review.

Second, the Commission proposes to amend item 7 to require filing persons to include SIC code overlaps and geographic market information for products added and facilities that began operations after the period for which revenue information was provided in response to items 5(b)(iii) and 5(c). At present, Item 7 requires a filing person to identify overlaps from operations in which it derived revenues "in the most recent year." If a filing person interprets this language narrowly to mean only overlaps for operations in which it reported revenues in items 5(b)(iii) and 5(c) for the most recent year (for which it has compiled twelve months of revenue information), overlaps which exist due to products or facilities added after that period would not be identified. The Commission is aware of at least one instance in which a filing person failed to report geographic market information for a retail establishment it opened and from which it derived revenues after the year for which it reported revenues in item 5(c). The failure to disclose such locations in responding to item 7 compromises the agencies' ability to make a complete assessment of the potential competitive effects of a proposed acquisition. For this reason, the Commission proposes to amend item 7 to clarify that filing persons are required to report product overlap and geographic market information current to the date of filing.

In addition, consistent with the proposal described above, the Commission proposes to amend current item 7(c)(iv), which will be renumbered item 7(c)(v). This item requires filing persons to provide the street addresses, arranged by state, county and city or town, of establishments in certain industries, e.g., retail trade, for which the competitive effects in local geographic markets may be of concern. The Commission proposes to amend renumbered item 7(c)(v) to make clear that the listing of establishments must include establishments acquired or constructed since the end of the most recent year for which period revenues are reported in item 5(b)(iii).

The Commission therefore proposes to amend item 7 to require: (1) The disclosure of SIC code overlaps and geographic market information at the 5-digit product class level as well as the 4-digit industry level in SIC major groups 20–39; (2) the listing of SIC code overlaps and geographic markets resulting from products added or businesses entered into since the end of the most recent year for which revenues are reported in item 5(b)(iii) or item 5(c)(i); and (3) in newly numbered item 7(c)(v), the listing of establishments acquired or constructed since the end of the most recent year for which period revenue information was provided in response to items 5(b)(iii) and 5(c). The proposed amendments read as follows:

Item 7—If, to the knowledge or belief of the person filing notification, the person filing notification derived dollar revenues in the most recent year (and/or in the period from the end of the most recent year to the date of filing of this Notification and Report Form) from any 4-digit SIC code or, within SIC major groups 20–39 (manufacturing industries), from any 4-digit industry or 5-digit product class code in which any other person who is a party to the acquisition also derived dollar revenues in the most recent year or since the end of the most recent year (or in which a joint venture or other corporation will derive dollar revenues), then for each 4-digit (SIC code) industry and each 5-digit (SIC code) product class:

Item 7(a)—List the 4-digit (industry) and 5-digit (product class) SIC codes and the description for the industries and product classes;

Item 7(b)—List the name of each person who is a party to the acquisition who derived dollar revenues in the 4-digit industry and 5-digit product class code;

Item 7(c)(i)—For each 4-digit industry and 5-digit product class code within SIC major groups 20–39 (manufacturing industries) listed in Item 7(a) above, list the states (or, if desired, portions thereof) in which, to the knowledge or belief of the person filing notification, the products in that 4-digit industry and 5-digit product class produced by the person filing notification are sold without a significant change in their form, whether they are sold by the person filing notification or by others to whom such products have been sold or resold;

Item 7(c)(v)—For each 4-digit industry within SIC major groups 52–61, 70, 75, 78, and 80 (retail trade, banking, and certain services) listed in Item 7(a) above, provide the street address, arranged by state, county and city or town, of each establishment from which dollar revenues were derived in the most recent year or since the end of the most recent year, including establishments acquired or constructed by the filing person since the end of the most recent year.

o. Submission of Geographic Market Information for Health Care Facilities

At present, item 7 does not always provide the enforcement agencies with the geographic market information needed to assess the potential anticompetitive effects of acquisitions involving health care facilities. The problem results from the use of different 4-digit SIC codes to report the revenues derived from owned versus managed health care facilities. Persons who

their revenues in item 5 under one of six different 4-digit SIC codes in industry groups 805 and 806. In contrast, persons who manage health care facilities but do not own the facility report revenues derived from their management services under 4-digit SIC code 8741–Management Services. Consequently, since filing persons use different 4-digit SIC codes to report revenues derived from owned and managed health care facilities, they are not required to identify these operations as overlaps in item 7(a). Thus, if one party to an acquisition derived revenue from the ownership and operation of a general medical hospital (4-digit SIC code 8062) in the most recent year and the other party derived revenue from the management of a general medical hospital (4-digit SIC code 8741) in the same metropolitan area, the parties would not be required to identify these operations as an overlap in item 7 or to provide geographic market information.

The Commission believes that information concerning the operation of both owned and managed health care facilities is essential to the agencies' ability to perform an initial antitrust review of health care acquisitions. As the Commission found in *Hospital Corporation of America*, 106 F.T.C. 361 (1985), *aff'd, Hospital Corporation of America* v. *Federal Trade Commission*, 807 F.2d 1381 (7th Cir. 1986), *cert. denied*, 481 U.S. 1038 (1987), management contracts greatly enhance the ability of a firm to coordinate behavior between its owned hospitals and the hospitals it manages, thereby increasing the likelihood of anticompetitive consequences. For this reason, the Commission held that including the management contracts to be acquired from Hospital Affiliates within Hospital Corporation of America's market shares presented a more accurate picture of HCA's post-acquisition market power.

The importance of receiving information concerning management contracts in the health care area is further supported by the fact that approximately eight percent of the nation's community hospitals are operated under management contracts, often by hospital companies that both manage hospitals for others as well as operate hospitals which they own. See American Hospital Ass'n, Guide to the Health Care Field (1992) and Hospital Statistics (1992–1993 ed.). However, geographic information for managed health care facilities is not readily available on a current basis from these or any other published sources. Thus, it is important that the enforcement agencies receive with the HSR filing overlap and geographic market information concerning health care facilities that are owned, as well as those that are managed, by the filing parties.

Accordingly, the Commission proposes to amend item 7 to require reporting persons to identify managed and owned health care operations as overlaps and to provide appropriate geographic market information. To accomplish this, the Commission proposes to add a special instruction to item 7 that will treat reporting persons that operated a health care facility under a management contract in the most recent year as having derived revenues from that facility in that facility's 4-digit SIC code. For example, if the acquiring person in a reported transaction owned and operated a general medical hospital in the most recent year and reported revenues under 4-digit SIC code 8062 and the acquired person managed a general medical hospital under a management contract in the most recent year, the parties would be required to identify in item 7(a) an overlap in 4-digit SIC code 8062. In addition, each person would be required to provide, in response to renumbered item 7(c)(v), the street address, arranged by state, county and city or town, for each general medical hospital it owned or managed. This special instruction will apply only to establishments listed within SIC industry group 805, Nursing and Personal Care Facilities, and SIC industry group 806, Hospitals. Accordingly, the Commission proposes to add the following language to the instructions to item 7.

For purposes of Item 7, a person that operates, under a management contract an establishment included within SIC industry group 805, Nursing and Personal Care Facilities, or within industry group 806, Hospitals, shall be deemed to derive revenues from that establishment in the establishment's 4-digit SIC code, whether or not the person is entitled to share in the establishment's revenue, or is otherwise compensated for its management services. An establishment is deemed to be operated under a management contract by a person if that person has been delegated by another person, or governmental unit, the contractual authority and responsibility to administer or supervise the operations of all, or substantially all, of the establishment, whether or not the operator is subject to the supervision of that or any other person or unit.

p. Submission of County Geographic Market Information

Item 7(c)(ii) of the Form requires filing persons to identify the states in which they derive revenues for overlapping 4-digit SIC codes within major groups 01–17 (agriculture, forestry, fishing, mining, construction and transportation industries) and 40–49 (communications, electric, gas and sanitary services). Based on the agencies' review of past transactions in these industries, the Commission has determined that the agencies need more detailed geographic market information for the communications industry (major group 48), which includes cable television services. Many franchises and licenses in the communications industry are issued on a local (county or city) basis rather than on a state-wide basis. Comparison of county services will provide information as to whether competition exists or is likely to exist in this industry. Submission of county information will help the agencies in determining the possible competitive effects of a proposed transaction within the limited time provided by the act.

Accordingly, the Commission proposes that county as well as state information be provided by filing persons whenever a 4-digit SIC code within 2-digit major group 48 has been identified as an SIC code overlap in response to item 7(a) of the Form. To accomplish this, the Commission proposes that item 7(c)(ii) be changed to exclude SIC major group 48 and that (1) a new item 7(c)(iii) be added to the Form to require the filing person to identify the counties and states in which it derived revenues for 4-digit SIC codes in major group 48; and (2) present items 7(c)(iii), 7(c)(iv), 7(c)(v) and 7(c)(vi) be renumbered, respectively, 7(c)(iv), 7(c)(v), 7(c)(vi) and 7(c)(vii). The proposed modification of item 7(c)(ii) and the proposed new item 7(c)(iii) read as follows:

Item 7(c)(ii)—For each 4-digit industry within SIC major groups 01–17, 40–47 and 49 (agriculture, forestry and fishing, mining, construction, transportation, electric, gas and sanitary services) listed in Item 7(a) above, list the states (or, if desired, portions thereof) in which the person filing notification conducts such operations;

Item 7(c)(iii)—For each 4-digit industry within SIC major group 48 (communications) listed in Item 7(a) above, list the states and the counties within such states in which the person filing notification conducts such operations or, if the person filing notification conducts operations in all

counties within a state, the identity of such states.

q. Increase in Reporting Threshold for Vendor-Vendee Relationships

At present, item 8 of the Form requires filing persons that are also vendees to provide certain information if the acquiring and the acquired persons maintained a vendor-vendee relationship during the most recent year with respect to any manufactured product that the vendee either resells, consumes in, or incorporates into, the manufacture of a product. If the proposed acquisition involves the formation of a joint venture or other corporation, item 8 requires each person forming the entity to identify any manufactured product it purchased from any other such person which will be supplied to the joint venture or other corporation. If the aggregate annual sales of the manufactured product do not exceed $1 million, the filing person need not list the product in item 8. The intended purpose of item 8 is to "identify certain instances in which a reported acquisition may result in vertical foreclosure or an increase in vertical integration in an industry." See 43 FR 33450, 33533 (July 31, 1978).

The Commission is aware that the $1 million threshold can make complying with item 8 burdensome. Responding can be particularly difficult for a large firm without a centralized accounting system that tracks the sales and purchases of each of its many divisions and subsidiaries. Consequently, such a firm may need to undertake a significant records check to determine whether it had sales or purchases of over $1 million of product from the other person to the transaction in order to supply the data called for by item 8.

The Commission proposes to increase the threshold in item 8 to require the reporting of vendor-vendee relationships when aggregate annual sales or purchases of a manufactured product during the most recent year exceed $5 million. In 1978, the Commission declined to raise the threshold to $5 or $10 million because it was concerned that a reporting floor higher than $1 million would exclude some highly significant vertical relationships. See 43 FR 33450, 33534 (July 31, 1978). However, the Commission's experience in reviewing filings and investigating proposed transactions in recent years has indicated that acquisitions in which either party makes product purchases from the other party under $5 million rarely, if ever, present risks of vertical foreclosure or increased vertical integration in a given industry. In addition, this threshold should simplify filing persons' reporting obligations because even large firms with numerous operations are likely to be able easily to identify customers that purchase this volume of product. Vendees that must supply the data required by item 8 also will likely know if they acquired products exceeding $5 million from a single source of supply.

Accordingly, the Commission proposes to modify item 8 of the Form to read:

Manufactured products are those within 2-digit SIC major groups 20–39. Any product purchased from the vendor in the aggregate annual amount not exceeding $5 million, or the manufacture, consumption or use of which is not attributable to the assets to be acquired, or to the issuer whose voting securities are to be acquired (including entities controlled by the issuer), may be omitted.

r. Reporting of Prior Acquisitions

At present, item 9 requires the acquiring person to list certain prior acquisitions when both the acquiring person and the acquired issuer or the acquired assets had attributable to them revenues of $1 million or more in the most recent year in the same 4-digit SIC code. The acquiring person is required to list only prior acquisitions made within the previous five years of more than 50 percent of the voting securities or assets of entities which had annual net sales or total assets greater than $10 million in the year prior to the acquisition.

The purpose of item 9 is "to assist the agencies in identifying any prior acquisitions by the acquiring person that may suggest a pattern of acquisitions in a particular industry by that person." 43 FR 33450, 33534 (July 31, 1978). Item 9 has been useful to the agencies in monitoring competition within industries. Responses to this item have provided information relating to acquisitions for which a premerger filing was not made as well as information regarding possible violations of the Act for failure to file notification.

As stated above, item 9 currently requires information regarding prior acquisitions involving common 4-digit SIC codes in which both the acquiring person and the issuer or assets to be acquired derived revenues of $1 million or more in the most recent year. In 1987, the Commission decided not to adopt a suggestion to raise the $1 million threshold to $10 million "because the agencies sometimes find overlaps of less than $10 million in a given 4-digit SIC code to be of significance." 52 FR 7078 (March 6, 1987) The Commission explained that this is particularly true when the parties compete in small local markets and when the acquiror has a large market share. *Id.* However, based on the Commission's experience in reviewing acquisitions since 1987, the Commission has observed that acquisitions in which either party currently derives revenues of less than $5 million in the same 4-digit SIC industry code seldom present competitive concerns. Thus, information about the acquiring person's prior acquisitions involving such industries is of limited value, either in analyzing the transaction for which the acquiring person is currently filing notification, or for monitoring competition in the given industry. For this reason, the Commission proposes to raise the $1 million threshold presently found in item 9 to $5 million.

The Commission also proposes to clarify the language in item 9 which provides that "only acquisitions of more than 50 percent of the voting securities or assets of entities" need be listed. With respect to asset acquisitions, this language has been read to mean that only acquisitions of more than 50 percent of the assets of an entity need be listed. While the more than 50 percent threshold is justified for voting securities acquisitions, it appears to have no basis from an antitrust perspective as applied to assets. In many cases, filing parties often have recognized this incongruity and have included in their response to item 9 acquisitions of assets that did not constitute more than 50 percent of the acquired entity's assets; strict application of the more than 50 percent requirement to assets would permit nearly all prior acquisitions from large, multi-divisional corporations to go unreported in item 9. Accordingly, the Commission proposes to modify the instructions to item 9 to make clear that asset acquisitions are not subject to the 50 percent test.

In addition, the Commission proposes to modify the language of the "more than 50 percent" test as applied to the acquisition of voting securities to a "50 percent or more" test consistent with the Commission's definition of control of an issuer. See 16 CFR 801.1(b).

Accordingly, the Commission proposes that the instructions to item 9 be revised, in part, as follows:

Item 9—Previous acquisitions (to be completed by acquiring persons). Determine each 4-digit (SIC code) industry listed in Item 7(a) above, in which the person filing notification derived dollar revenues of $5 million or more in the most recent year and in which either (1) the issuer to be acquired derived revenue of $5 million or more in the most recent year (or in the case of the formation of a joint venture or other corporation, where the joint venture or other corporation can be expected to derive revenues of $5 million or more), or (2) revenues of $5 million or more in the most recent year are attributable to the assets to be acquired.

For each such 4-digit industry, list all acquisitions made by the person filing notification in the five years prior to the date of filing. List only acquisitions of (1) 50 percent or more of the voting securities of an issuer which had assets or annual net sales of $10 million or more in the year prior to the acquisition or (2) acquisitions of assets valued at $10 million or more at the time of their acquisition.

By direction of the Commission.

Donald S. Clark,

Secretary.

BILLING CODE 6750–01–P

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

21 CFR Part 1301

Registration of Manufacturers and Importers of Controlled Substances

AGENCY: Drug Enforcement Administration (DEA).

ACTION: Supplemental notice of proposed rulemaking (SNPRM).

SUMMARY: On October 7, 1993, DEA published a notice a proposed rulemaking (NPRM) in the **Federal Register** (58 FR 52246) to amend its regulations to eliminate the mandatory administrative hearing requirement for objections to the registration of certain bulk manufacturers and importers of controlled substances. This SNPRM revises the NPRM by proposing to eliminate the hearing provision relating to bulk manufacturers altogether and leave unaltered the hearing provision relating to registration of importers.

DATES: Written comments and objections to this SNPRM must be received on or before August 15, 1994.

ADDRESSES: Comments and objections should be submitted in quintuplicate to the Administrator, Drug Enforcement Administration, Washington, DC 20537, Attention: DEA Federal Register Representative/CCR.

FOR FURTHER INFORMATION CONTACT: Julie C. Gallagher, Associate Chief Counsel, Diversion and Regulatory Section, Office of Chief Counsel, Drug Enforcement Administration, Washington, DC 20537, telephone (202) 307–8010.

SUPPLEMENTARY INFORMATION: On October 7, 1993, DEA published a NPRM in the **Federal Register** (58 FR 52246). The DEA proposed to amend two sections of its regulations, specifically 21 CFR 1301.43(a) and 1311.42(a), in which the Administrator is required to hold an administrative hearing on an application for registration to manufacture or import a bulk Schedule I or II controlled substance when requested to do so by any current bulk manufacturer of the substance(s) or by any other applicant for a similar registration. Because the proposals in this SNPRM differ in some respects from the NPRM, DEA encourages interested persons to file comments in response to this SNPRM even if they have already commented on the NPRM. Comments previously received under the NPRM will be considered under the SNPRM to the extent they are relevant to the changes in the SNPRM.

Section 1311.42(a)

In the NPRM, DEA proposed to remove the provision which enabled a person registered as a bulk manufacturer of a controlled substance or applicant thereof to request a hearing on the application of an importer of that controlled substance. As several commentators argued, the proposed amendment to 21 CFR 1311.42, cannot be reconciled with the hearing provisions of 21 U.S.C. 958(i). The relevant portion of 21 U.S.C. 958(i) states: "prior to issuing a registration under this section . . . the Attorney General shall give manufacturers holding registrations for the bulk manufacture of the substance an opportunity for a hearing." In keeping with the above requirement, 21 CFR 1311.42, allows current bulk manufacturer registrants to request an administrative hearing regarding their objections to the registration of certain importers of Schedule I and II controlled substances. With an existing statute in effect, DEA is not empowered to adopt regulations that contravene the express language of that statute. Therefore, based on the hearing provisions under 21 U.S.C. 958(i), 21 CFR 1311.42, Application for importation of Schedule I and II controlled substances, shall remain unchanged.

Section 1301.43(a)

Unlike the registration of importers, the Controlled Substances Act (21 U.S.C. 801, et seq.) does not require that current registrants be allowed to request a hearing on an application for registration as a bulk manufacturer of a controlled substance. The NPRM proposed to modify § 1301.43(a) and provide for a hearing only when "the Administrator determines that a hearing is necessary to receive factual evidence and/or expert testimony with respect to issues raised by the application or objections thereto." The SNPRM goes one step further and eliminates this hearing provision entirely. However, the Administrator would still be required to hold hearings when requested by the applicant pursuant to an order to show cause, § 1301.44, and current registrants and applicants would still be permitted to submit comments or objections concerning an application for registration. In addition, current registrants and applicants would be granted an opportunity to participate in any hearings conducted pursuant to § 1301.44.

DEA recognizes that the antecedent for this hearing provision derives from statutory acknowledgement that limiting the number of registrants may increase the capability to control diversion. The regulations clearly state, however, that the Administrator is not required to limit the number of manufacturers even if the current registrants can provide an adequate supply, as long as DEA can maintain effective controls against diversion. 21 CFR 1301.43(b). In addition, as stated in the NPRM, the Administrator has never denied an application solely on the basis of increased danger of diversion or adverse impact upon domestic competition.

DEA also agrees that current registrants and applicants should be allowed to object to an additional registration by filing comments on grounds that it would adversely affect diversion or competition in a highly regulated industry. But DEA finds that registrants and applicants have abused the mandatory hearing requirement in the past and it remains a future source of abuse where these individuals defer or delay new registrations and retaliate by opposing annual renewals.

Most important, the proposed change as provided herein does not violate statutory intent but instead comports with sound principles of substantive and procedural due process. First, eliminating the hearing requirement except when requested by the applicant after issuance of an order to show cause supports the statutory and regulatory mandate that an applicant for registration as a bulk manufacturer shall have the burden of proof at "any hearing" that the requirements of

registration are met. See 21 CFR 1301.55. The Administrative Procedure Act (APA) which controls these matters further provides that "[e]xcept as otherwise provided by statute, the proponent of a rule or order has the burden of proof." See 5 U.S.C. 556(d).

Second, the proposed change eliminates the potential for multiple hearings which not only promotes judicial economy but also avoids the anomalous result of DEA conducting administrative hearings which are not dispositive of the ultimate issue of whether an applicant should be registered. For example, because DEA must issue an order to show cause whenever it takes action to deny an application, 21 U.S.C. 824(c), under the current regulation a second hearing would likely be required when DEA decided to deny an application after a hearing held pursuant to a "third-party" request. Further, this second hearing would involve many of the same issues raised in the prior proceeding.

Finally, the proposed change continues to permit current registrants and applicants to submit written comments and objections concerning an applicant's registration. There is no reason to believe that this procedure does not provide an adequate mechanism for these individuals to convey the substance and criticality of any objections or that DEA would fail to consider such evidence prior to making a final determination. Moreover, these individuals could still participate in any hearing conducted contemporaneous with an application, thereby providing an additional opportunity to present evidence.

Accordingly, the Deputy Assistant Administrator for Diversion Control is proposing to delete the hearing requirement from this regulation. The notice requirement and the opportunity to comment upon and oppose applications shall be retained, while current registrants and other applicants will retain the opportunity to participate in any hearing requested by the Applicant pursuant to an order to show cause.

The Deputy Assistant Administrator hereby certifies that the SNPRM will have no significant impact upon those entities whose interests must be considered under the Regulatory Flexibility Act, 5 U.S.C. 601, et seq. The registrants and applicants who use, or are affected by, the hearing covered by these regulations are typically not small entities.

The proposed rule is not a significant regulatory action pursuant to Executive Order 12866 and therefore, has not been submitted to the Office of Management and Budget centralized review. This action has been analyzed in accordance with the principles and criteria in E.O. 12612, and it has been determined that the proposed rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

List of Subjects in 21 CFR Part 1301

Administrative practice and procedure, Drug traffic control and security measures.

Therefore, pursuant to the authority vested in the Attorney General by 21 U.S.C. 821 and 871(b), as delegated to the Administrator of the Drug Enforcement Administration, and redelegated to the Deputy Assistant Administrator, Office of Diversion Control by 28 CFR 0.100 and 0.104, the Deputy Assistant Administrator, Office of Diversion Control hereby proposes that part 1301 of Title 21, Code of Federal Regulations be amended as follows:

PART 1301—[AMENDED]

1. The authority citation for part 1301 continues to read as follows:

Authority: 21 U.S.C. 821, 822, 823, 824, 871(b), 875, 877.

2. Section 1301.43 is proposed to be amended by revising paragraph (a) to read as follows:

§ 1301.43 Application for bulk manufacture of Schedule I and II substances.

(a) In the case of an application for registration or reregistration to manufacture in bulk a basic class of controlled substance listed in Schedule I or II, the Administrator shall, upon the filing of such application, publish in the **Federal Register** a notice naming the applicant and stating that such applicant has applied to be registered as a bulk manufacturer of a basic class of narcotic or nonnarcotic controlled substance, which class shall be identified. A copy of said notice shall be mailed simultaneously to each person registered as a bulk manufacturer of that basic class and to any other applicant therefor. Any such person may, within 30 days from the date of publication of the notice in the **Federal Register**, file with the Administrator written comments on or objections to the issuance of the proposed registration.

* * * * *

3. Section 1301.44 is proposed to be amended by redesignating paragraph (b) as paragraph (c) and adding a new paragraph (b) to read as follows:

§ 1301.44 Certificate of registration; denial of registration.

* * * * *

(b) If a hearing is requested by an applicant for registration or reregistration to manufacture in bulk a basic class of controlled substance listed in Schedule I or II, any person entitled to file comments or objections to the issuance of the proposed registration pursuant to § 1301.43(a) may participate in the hearing by filing a notice of appearance in accordance with § 1301.54. Notice of the hearing shall be published in the **Federal Register** and shall be mailed simultaneously to the applicant and to all persons to whom notice of the application was mailed. Notice of the hearing shall contain a summary of all comments and objections filed regarding the application and shall state the time and place for the hearing, which shall not be less than 30 days after the date of publication of such notice in the **Federal Register**.

* * * * *

4. Section 1301.54 is proposed to be amended by revising paragraphs (a), (b), (c) and (d) to read as follows:

§ 1301.54 Request for hearing or appearance; waiver.

(a) Any person entitled to a hearing pursuant to §§ 1301.42, 1301.44, or 1301.45 and desiring a hearing shall, within 30 days after the date of receipt of the order to show cause, file with the Administrator a written request for a hearing in the form prescribed in § 1316.47 of this chapter.

(b) Any person entitled to participate in a hearing pursuant to § 1301.44(b) and desiring to do so shall, within 30 days of the date of publication of notice of the hearing in the **Federal Register**, file with the Administrator a written notice of his intention to participate in such hearing in the form prescribed in § 1316.48 of this chapter. Any person filing a request for a hearing need not also file a notice of appearance.

(c) Any person entitled to a hearing or to participate in a hearing pursuant to §§ 1301.42, 1301.44, or 1301.45 may, within the period permitted for filing a request for a hearing or a notice of appearance, file with the Administrator a waiver of an opportunity for a hearing or to participate in a hearing, together with a written statement regarding his position on the matters of fact and law involved in such hearing. Such statement, if admissible, shall be made a part of the record and shall be considered in light of the lack of opportunity for cross-examination in determining the weight to be attached to matters of fact asserted therein.

(d) If any person entitled to a hearing or to participate in a hearing pursuant to §§ 1301.42, 1301.44, or 1301.45 fails to file a request for a hearing or a notice of appearance, or if he so files and fails to appear at the hearing, he shall be deemed to have waived his opportunity for the hearing or to participate in the hearing, unless he shows good cause for such failure.

* * * * *

5. Section 1301.55 is proposed to be amended by revising paragraph (a) to read as follows:

§ 1301.55 Burden of proof.

(a) At any hearing on an application to manufacture any controlled substance listed in Schedule I or II, the applicant shall have the burden of proving that the requirements for such registration pursuant to section 303(a) of the Act (21 U.S.C. 823(a)) are satisfied. Any other person participating in the hearing pursuant to § 1301.44(b) shall have the burden of proving any propositions of fact or law asserted by him in the hearing.

Office of the Assistant Secretary for Housing—Federal Housing Commissioner

24 CFR Parts 880, 881, 883, 884 and 886

[Docket No. R–94–1732; FR–2960–P–01]

RIN 2502–AG05

Drug-Related Rent Adjustments

AGENCY: Office of the Assistant Secretary for Housing—Federal Housing Commissioner, HUD.

ACTION: Proposed rule.

SUMMARY: This proposed rule would amend HUD regulations to authorize rent adjustments for certain privately owned Section 8 projects to combat drug-related criminal activities.

DATES: Comments due date: August 15, 1994.

ADDRESSES: Interested persons are invited to submit comments regarding this proposed rule to the Office of General Counsel, Rules Docket Clerk, room 10276, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, DC 20410. Facsimile (FAX) are not acceptable. A copy of each communication submitted will be available for public inspection and copying on weekdays between 7:30 a.m. and 5:30 p.m. at the above address.

FOR FURTHER INFORMATION CONTACT: James Tahash, Director, Planning and Procedures Division, room 6280, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, DC, 20410–0500; telephone: (voice) (202) 708–3944 and (TDD) (202) 708–4594. (These are not toll-free numbers).

SUPPLEMENTARY INFORMATION: This proposed rule would amend title 24 of the Code of Federal Regulations by adding new §§ 880.609(c), 881.609(c), 883.210(c), 884.109(d), 886.112(d) and 886.312(d), which would allow HUD to grant additional rental adjustments to privately owned Section 8 projects to combat drug-related criminal activity. The proposed rule would implement section 542 of the Cranston-Gonzalez National Affordable Housing Act, which amended section 8(c)(2)(B) of the U.S. Housing Act of 1937.

Other Matters

A Finding of No Significant Impact with respect to the environment has been made in accordance with HUD regulations at 24 CFR part 50, which implement section 102(2)(C) of the National Environmental Policy Act of 1969. The finding is available for public inspection between 7:30 a.m. and 5:30 p.m. weekdays in the office of the Rules Docket Clerk at the above address.

This proposed rule was listed as item 1581 in the Department's Semiannual Agenda of Regulations published on April 25, 1994 (59 FR 20424, 20446) in accordance with Executive Order 12866 and the Regulatory Flexibility Act.

In accordance with 5 U.S.C. 605(b) (the Regulatory Flexibility Act), the undersigned hereby certifies that this proposed rule does not have a significant economic impact on a substantial number of small entities. This proposed rule would have a minimal effect on small entities. It would not result in any windfall adjustments for owners because they have to substantiate to HUD the need to combat drug related crime to recoup expenses incurred.

The General Counsel, as the Designated Official under section 6(a) of Executive Order 12612, Federalism, has determined that the policies contained in this proposed rule will not have substantial direct effects on States or their political subdivisions, or the relationship between the Federal government and the States, or on the distribution of power and responsibilities among the various levels of government. As a result, the proposed rule is not subject to review under the Order. Specifically, the requirements of this proposed rule are directed to private owners of Section 8 projects and do not impinge upon the relationship between the Federal government and State and local governments.

The General Counsel, as the Designated Official under Executive Order 12606, The Family, has determined that this proposed rule does not have potential for significant impact on family formation, maintenance, and general well-being, and, thus, is not subject to review under the Order. The proposed rule involves additional rental adjustments which would be provided to private owners of Section 8 projects. Any effect on the family would likely be indirect and insignificant.

List of Subjects

24 CFR Part 880

Grant programs—housing and community development, Rent subsidies, Reporting and recordkeeping requirements.

24 CFR Part 881

Grant programs—housing and community development, Rent subsidies, Reporting and recordkeeping requirements.

24 CFR Part 883

Grant programs—housing and community development, Rent subsidies, Reporting and recordkeeping requirements.

24 CFR Part 884

Grant programs—housing and community development, Rent subsidies, Reporting and recordkeeping requirements, Rural areas.

24 CFR Part 886

Grant programs—housing and community development, Lead poisoning, Rent subsidies, Reporting and recordkeeping requirements.

Accordingly, title 24 of the Code of Federal Regulations, parts 880, 881, 883, 884, and 886, would be amended as follows:

PART 880—SECTION 8 HOUSING ASSISTANCE PAYMENTS PROGRAM FOR NEW CONSTRUCTION

1. The authority citation for part 880 would continue to read as follows:

Authority: 42 U.S.C. 1437a, 1437c, 1437f, 3535(d), and 13611–13619.

VOL
59
ISS
1
13
JE
14
994
UMI

2. Section 880.609 would be amended by revising the section heading, redesignating the existing paragraph (c) as paragraph (d), and adding a new paragraph (c), to read as follows:

§ 880.609 Rent adjustments.

* * * * *

(c) *Adjustments for drug-related criminal activity.* (1) HUD may (at the discretion of the Secretary and subject to the availability of appropriations), on a project by project basis, approve adjustments to the gross rent, to a level no greater than 120 percent of the monthly gross rents for the project (multiply 1.20 by the current gross rents for each unit size under Housing Assistance Payments Contract) to cover the cost of maintenance, security, capital repairs, and reserves required for the private owner to address the drug-related criminal activity problem.

(2)(i) HUD Field Offices or contract administrators shall approve special rent increases based on a written submission from the owner which is to include all supporting data as may be required by HUD. In order to be eligible for such an adjustment, the project rent increases must be determined by the Annual Adjustment Factors.

(ii) In order to be considered for a special adjustment, owners shall submit sufficient evidence, as required by HUD, to the Field Offices or contract administrator that will allow HUD to determine that:

(A) The project is located in a community where the drug-related criminal activity is community-wide and not project specific; and

(B) The drug-related criminal activity has resulted in substantial increases in the project's operating, maintenance and capital repair expenses.

(iii) Prior to approval of a special adjustment to cover the cost of physical improvements, HUD will perform an environmental review to the extent required by HUD's environmental regulations at 24 CFR part 50, including the applicable related authorities at 24 CFR 50.4.

(3)(i) The special adjustment remains in effect (subject to the availability of funds) until the security problems at the project are rectified or costs decrease.

(ii) HUD Field Offices or contract administrators are authorized to "back out" the special adjustment when the need for the special rent increase can no longer be justified. Prior to computing an annual adjustment of rents, all special rent increases approved should be reviewed by HUD Field Offices or contract administrators to determine if the special adjustment needs to be "backed out."

BILLING CODE 4210–27–P

DEPARTMENT OF THE TREASURY

27 CFR Part 4

[Notice No. 797; Ref: Notice No. 792]

RIN 1512–AB25

Use of the Term "Reserve" on Wine Labels (93F–033P)

AGENCY: Bureau of Alcohol, Tobacco and Firearms (ATF), Department of the Treasury.

ACTION: Advance notice of proposed rulemaking; extension of comment period.

SUMMARY: This notice extends the comment period for Notice No. 792, an advance notice of proposed rulemaking, published in the **Federal Register** on March 17, 1994. ATF has received a request to extend the comment period in order to provide sufficient time for all interested parties to respond to the complex issues addressed in the advance notice.

DATES: Written comments must be received on or before July 15, 1994.

ADDRESSES: Send written comments to: Chief, Wine and Beer Branch; Bureau of Alcohol, Tobacco and Firearms; P.O. Box 50221; Washington, DC 20091–0221; *ATTN: Notice No. 797.*

FOR FURTHER INFORMATION CONTACT: James P. Ficaretta, Wine and Beer Branch, Bureau of Alcohol, Tobacco and Firearms, 650 Massachusetts Avenue, NW., Washington, DC 20226 (202–927–8230).

SUPPLEMENTARY INFORMATION:

Background

On March 17, 1994, ATF published an advance notice of proposed rulemaking (ANPRM) in the **Federal Register** soliciting comments from the public and industry on whether the regulations should be amended to include a definition for the term "reserve" when used on wine labels (Notice No. 792; 59 FR 12566).

The comment period for Notice No. 792 was scheduled to close on June 15, 1994. Prior to the close of the comment period ATF received a request from a national trade association, the National Association of Beverage Importers, Inc. (NABI), to extend the comment period an additional 60 days. NABI, representing the companies that import 90 percent of all alcoholic beverages brought into the U.S., stated that it must coordinate the comments of its members, many of whom are foreign companies importing their products into the U.S. Additional time is needed in order to adequately analyze and communicate the impact that the ANPRM will have on NABI member companies.

In consideration of the above, ATF finds that an extension of the comment period is warranted. However, the comment period is being extended 30 days, until July 15, 1994. The Bureau believes that a comment period totaling 120 days is a sufficient amount of time for all interested parties to respond.

[Docket No. H–122]

RIN 1218–AB37

Indoor Air Quality; Proposed Rule

AGENCY: Occupational Safety and Health Administration (OSHA), Labor.

ACTION: Extension of Comment Period and Rescheduling of Public Hearing.

SUMMARY: By this document, the Occupational Safety and Health Administration (OSHA) is extending the comment period and dates for submitting notices of intention to appear, as well as hearing testimony and evidence, and is postponing the public hearing on the proposed rule on indoor air quality which was published on April 5, 1994 (59 FR 15968). The comment period was to end on June 29, 1994; public hearings were scheduled to begin on July 12, 1994. Following publication of the proposal, thirteen written requests to extend the comment period or postpone the public hearing were received. As a result of these requests, OSHA is extending the comment period to August 13, 1994.

Public hearings will be scheduled to begin on September 20, 1994.

DATES: Comments must be postmarked on or before August 13, 1994. Notices of Intention to Appear at the public hearing must be postmarked on or before August 5, 1994. Testimony and evidence to be submitted at the hearing must be postmarked by August 13, 1994. The hearing will begin at 9:30 a.m., Tuesday, September 20, 1994 in Washington, DC.

ADDRESSES: Comments are to be submitted in quadruplicate or 1 original (hard copy) and 1 disk (5–1/4 or 3–1/2) in WP 5.0, 5.1, 6.0 or Ascii to: Docket Office, Docket No. H–122, room N–2625, U. S. Department of Labor, 200 Constitution Avenue, NW., Washington, DC 20210; Telephone: (202) 219–7894. Any information not contained on disk, e.g., studies, articles, etc., must be submitted in quadruplicate.

Notices of intention to appear and testimony and evidence are to be submitted in quadruplicate to: Mr. Thomas Hall, Division of Consumer Affairs, Occupational Safety and Health Administration, 200 Constitution Avenue, NW., room N–3649, Washington, DC 20210; Telephone: (202) 219–8615.

The hearing will be held in the auditorium, of the U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: Mr. James F. Foster, Office of Public Affairs, Occupational Safety and Health Administration, room N–3649, U. S. Department of Labor, 200 Constitution Avenue, NW., Washington, DC 20210; Telephone: (202) 219–8151.

SUPPLEMENTARY INFORMATION:

Background

On April 5, 1994, OSHA published a notice of proposed rulemaking on indoor air quality (59 FR 15968 *et seq.*). The proposal covered a broad range of issues falling into two major categories: (1) General indoor air quality as manifested in sick building syndrome and building related illnesses; and (2) environmental tobacco smoke.

Extension of the Comment Period and Re-scheduling of the Public Hearings

Thus far OSHA has receive thirteen written requests to extend the comment period or re-schedule the public hearing to a later date. These requests have been received from: Business Council on Indoor Air (Exh. 9–121), Law firm of Paul, Hastings, Janofsky, and Walker (Exh. 9–2265), National Energy Management Institute (Exh. 9–229), Barrera Associates, Inc. (Exh. 9–539), R. J. Reynolds Tobacco Company (Exh. 9–540), Clean Air Device Manufacturers Coalition (Exh. 9–1610), ICF Kaiser Environment and Energy Group (Exh. 9–1612), Philip Morris (Exh. 9–2202), Total Indoor Environmental Quality Coalition (Exh. 9–541), American Nurses Association (Exh. 9–2263), National Licensed Beverage Association (Exh. 9–2264), United Technologies Carrier (Exh. 9–1613) and United Air Specialists, Inc (Exh. 9–2288). The requesters believe that a number of factors including the amount and complexity of information relied on in the proposal, the desire of interested persons to submit extensive comments and for various trade associations to coordinate among their members justify a modest extension of time. Based on these requests, the Agency has agreed to an extension of the comment period and has re-scheduled the public hearings to allow more time for interested persons to adequately prepare their response to the OSHA proposal. OSHA's rules for participating in its rulemaking were printed in the proposal (59 FR 16034). All persons interested in participating in this proceeding are requested to review these rules in their entirety. For public convenience these procedures are summarized below.

Notice of Intention to Appear at the Informal Hearing

Pursuant to section 6(b)(3) of the OSH Act, an informal public hearing will be held on the IAQ proposal in Washington, DC from September 20 through October 14, 1994. The hearing may be extended if this period is not adequate to accommodate all those filing valid notices of intention to appear at the public hearing or the hearing may be shortened if the schedule is completed earlier.

The hearing will begin at 9:30 a.m. on Tuesday, September 20, 1994 in the auditorium of the Frances Perkins Building, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, DC 20210.

Persons desiring to participate at the informal public hearing must file a notice of intention to appear by August 5, 1994. The notice of intention to appear must contain the following information:

1. The name, address, and telephone number of each person to appear;
2. The capacity in which the person will appear;
3. The approximate amount of time required for the presentation;
4. The issues that will be addressed;
5. A brief statement of the position that will be taken with respect to each issue; and
6. Whether the party intends to submit documentary evidence and, if so, a brief summary of it.

The notice of intention to appear shall be mailed to Mr. Thomas Hall, OSHA Division of Consumer Affairs, Docket No. H–122, U. S. Department of Labor, room N–3647, 200 Constitution Avenue, NW., Washington, DC 20210; Telephone: (202) 219–8615.

A notice of intention to appear may also be transmitted by facsimile to (202) 219–5986, by the same date, provided that the original and 3 copies are sent to the same address and postmarked by the due date.

Individuals with disabilities wishing to attend the hearing should contact the hearing management officer, Mr. Thomas Hall, to obtain appropriate accommodations at the hearing.

Filing of Testimony and Evidence Before the Hearing

Any party requesting to appear at the hearing or anyone who intends to submit documentary evidence, must provide in quadruplicate the testimony and evidence to be presented at the informal public hearing. One copy shall not be stapled or bound and must be suitable for copying. These materials must be provided to Mr. Thomas Hall, OSHA Division of Consumer Affairs at the address above and must be postmarked no later than August 13, 1994.

Each submission will be reviewed carefully in light of the amount of time requested in the notice of intention to appear. In instances where the information contained in the submission does not justify the amount of time requested, a more appropriate amount of time will be allocated and the participant will be notified of that fact prior to the informal public hearing.

Any party who has not complied with the above requirement may be denied an opportunity to participate or may be requested to return for questioning at a later time.

Any party who has not filed a notice of intention to appear may be allowed to testify for no more than 10 minutes as time permits, at the discretion of the Administrative Law Judge, but will not be allowed to question other witnesses. Because of the great amount of interest that the proposal has generated thus far, there may not be enough time to accommodate those individuals wishing to make short presentations who have not filed valid notices of intention to appear; however, efforts will be made to allow such short presentations.

Notices of intention to appear, testimony and evidence will be available for inspection and copying at

the Docket Office at the address noted above.

Conduct and Nature of Hearing

The hearing will begin at 9:30 a.m. on September 20, 1994. At that time, any procedural matters relating to the proceeding will be resolved.

The nature of an informal rulemaking hearing is established in the legislative history of section 6 of the OSH Act and is reflected by OSHA's rules of procedure for hearings (29 CFR 1911.15(a)). Although the presiding officer is an Administrative Law Judge and questioning by interested persons is allowed on crucial issues, the proceeding is informal and legislative in nature. The Agency's intent, in essence, is to provide interested persons with an opportunity to make effective oral presentation which can proceed expeditiously in the absence of procedural restraints which impede or protract the rulemaking process.

Additionally, since the hearing is primarily for information gathering and clarification, it is an informal administrative proceeding rather than an adjudicative one. The technical rules of evidence, for example, do not apply. The regulations that govern hearings (29 CFR part 1911) and the pre-hearing guidelines to be issued for this hearing will ensure fairness and due process and also facilitate the development of a clear, accurate and complete record. These rules and guidelines will be interpreted in a manner that furthers the development of a clear record. Thus, questions of relevance, procedure and participation generally will be decided so as to favor the development of the record.

The hearings will be conducted in accordance with 29 CFR part 1911. It should be noted that § 1911.4 specifies that the Assistant Secretary may, upon reasonable notice, issue alternative procedures to expedite proceedings or for other good cause. The hearing will be presided over by an Administrative Law Judge who makes no decision or recommendation on the merits of OSHA's proposal. The responsibility of the Administrative Law Judge is to ensure that the hearing proceeds at a reasonable pace and in an orderly manner. The Administrative Law Judge therefore, will have all powers necessary and appropriate to conduct a full and fair informal hearing as provided in 29 CFR Part 1911, including the powers:

1. To regulate the course of the proceedings;

2. To dispose of procedural requests, objections and comparable matters;

3. To confine the presentations to the matters pertinent to the issues raised;

4. To regulate the conduct of those present at the hearing by appropriate means;

5. In the judge's discretion, to question and permit the questioning of any witness and to limit the time for questioning; and

6. In the Judge's discretion, to keep the record open for a reasonable, stated time to receive written information and additional data, views and arguments from any person who has participated in the oral proceedings.

OSHA recognizes that there may be interested persons or organizations who, through their knowledge of the subject matter or their experience in the field, would wish to endorse or support the whole proposal or certain provisions of the proposal. OSHA welcomes such supportive comments, including any pertinent data and cost information which may be available, in order that the record of this rulemaking will present a balanced picture of the public response on the issues involved.

Authority and Signature

This document was prepared under the direction of Joseph A. Dear, Assistant Secretary of Labor for Occupational Safety and Health, U. S. Department of Labor, 200 Constitution Avenue, NW., Washington, DC 20210. It is issued pursuant to section 6(b) of the Occupational Safety and Health Act of 1970 (84 Stat. 1593, 29 U.S.C. 655).

Signed at Washington, DC, this 6th day of June 1994.

Joseph A. Dear,

Assistant Secretary of Labor

Approval and Promulgation of Implementation Plans California State Implementation Plan Revision Santa Barbara County Air Pollution Control District San Diego County Air Pollution Control District

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of proposed rulemaking

SUMMARY: EPA is proposing to approve revisions to the California State Implementation Plan (SIP) which concern the control of volatile organic compound (VOC) emissions from polyester resin operations. The intended effect of proposing approval of these rules is to regulate emissions of VOCs in accordance with the requirements of the Clean Air Act, as amended in 1990 (CAA or the Act). EPA's final action on this notice of proposed rulemaking (NPR) will incorporate these rules into the federally approved SIP. EPA has evaluated each of these rules and is proposing to approve them under provisions of the CAA regarding EPA action on SIP submittals, SIPs for national primary and secondary ambient air quality standards and plan requirements for nonattainment areas.

DATES: Comments must be received on or before July 14, 1994.

ADDRESSES: Comments may be mailed to: Daniel A. Meer, Rulemaking Section (A–5–3), Air and Toxics Division, U.S. Environmental Protection Agency, Region IX, 75 Hawthorne Street, San Francisco, CA 94105.

Copies of the rule revisions and EPA's evaluation report of each rule are available for public inspection at EPA's Region 9 office during normal business hours. Copies of the submitted rule revisions are also available for inspection at the following locations:

California Air Resources Board, Stationary Source Division, 2020 L Street, Sacramento, CA 95814.

Santa Barbara County Air Pollution Control District, 26 Castilian Drive, B–23, Goleta, CA 93117.

San Diego County Air Pollution Control District, 9150 Chesapeake Drive, San Diego, CA 92123–1096.

FOR FURTHER INFORMATION CONTACT: Christine Vineyard, Rulemaking Section (A–5–3), Air and Toxics Division, U.S. Environmental Protection Agency, Region IX, 75 Hawthorne Street, San Francisco, CA 94105; Telephone: (415) 744–1197.

SUPPLEMENTARY INFORMATION:

Applicability

The rules being proposed for approval into the California SIP include: Santa Barbara County Air Pollution Control District (SBCAPCD), Rule 349, Polyester Resin Operations; and San Diego County Air Pollution Control District (SDCAPCD), Rule 67.12, Polyester Resin Operations. These rules were submitted by the California Air Resources Board (CARB) to EPA on November 18, 1993.

Background

On March 3, 1978, EPA promulgated a list of ozone nonattainment areas under the provisions of the Clean Air Act, as amended in 1977 (1977 CAA or pre-amended Act), that included Santa

Barbara and San Diego Counties. 43 FR 8964, 40 CFR 81.305. Because these areas were unable to meet the statutory attainment date of December 31, 1982, California requested under section 172(a)(2), and EPA approved, an extension of the attainment date to December 31, 1987. 40 CFR 52.238. On May 26, 1988, EPA notified the Governor of California, pursuant to section 110(a)(2)(H) of the pre-amended Act, that the above districts' portions of the California SIP were inadequate to attain and maintain the ozone standard and requested that deficiencies in the existing SIP be corrected (EPA's SIP-Call). On November 15, 1990, the Clean Air Act Amendments of 1990 were enacted. Public Law 101–549, 104 Stat. 2399, codified at 42 U.S.C. 7401–7671q. In amended section 182(a)(2)(A) of the CAA, Congress statutorily adopted the requirement that nonattainment areas fix their deficient reasonably available control technology (RACT) rules for ozone and established a deadline of May 15, 1991 for states to submit corrections of those deficiencies.

Section 182(a)(2)(A) applies to areas designated as nonattainment prior to enactment of the amendments and classified as marginal or above as of the date of enactment. It requires such areas to adopt and correct RACT rules pursuant to pre-amended section 172(b) as interpreted in pre-amendment guidance.[1] EPA's SIP-Call used that guidance to indicate the necessary corrections for specific nonattainment areas. Santa Barbara County is classified as moderate and San Diego County is classified as severe;[2] therefore, these areas were subject to the RACT fix-up requirement and the May 15, 1991 deadline.

The State of California submitted many revised RACT rules for incorporation into its SIP on November 18, 1993, including the rules being acted on in this document. This document addresses EPA's proposed action for SBCAPCD's Rule 349, Polyester Resin Operations and SDCAPCD's Rule 67.12, Polyester Resin Operations. SBCAPCD adopted Rule 349 on April 27, 1993 and SDCAPCD adopted Rule 67.12 on April 6, 1993. These submitted rules were found to be complete on December 23, 1993 pursuant to EPA's completeness criteria that are set forth in 40 CFR part 51, appendix V[3] and are being proposed for approval into the SIP.

SBCAPCD Rule 349 and SDCAPCD Rule 67.12 control VOC emissions from polyester resin operations. VOCs contribute to the production of ground level ozone and smog. The rules were adopted as part of each district's efforts to achieve the National Ambient Air Quality Standard (NAAQS) for ozone and in response to EPA's SIP-Call and the section 182(a)(2)(A) CAA requirement. The following is EPA's evaluation and proposed action for these rules.

EPA Evaluation and Proposed Action

In determining the approvability of a VOC rule, EPA must evaluate the rule for consistency with the requirements of the CAA and EPA regulations, as found in section 110 and part D of the CAA and 40 CFR part 51 (Requirements for Preparation, Adoption, and Submittal of Implementation Plans). The EPA interpretation of these requirements, which forms the basis for today's action, appears in the various EPA policy guidance documents listed in footnote 1. Among those provisions is the requirement that a VOC rule must, at a minimum, provide for the implementation of RACT for stationary sources of VOC emissions. This requirement was carried forth from the pre-amended Act.

For the purpose of assisting state and local agencies in developing RACT rules, EPA prepared a series of Control Technique Guideline (CTG) documents. The CTGs are based on the underlying requirements of the Act and specify the presumptive norms for what is RACT for specific source categories. Under the CAA, Congress ratified EPA's use of these documents, as well as other Agency policy, for requiring States to "fix-up" their RACT rules. See section 182(a)(2)(A). For some source categories, such as polyester resin operations, EPA did not publish a CTG. In such cases, the District may determine what controls are required to satisfy the RACT requirement by reviewing the operations of facilities with the affected source category. Further interpretations of EPA policy are found in the Blue Book, referred to in footnote 1. In general, these guidance documents have been set forth to ensure that VOC rules are fully enforceable and strengthen or maintain the SIP.

SDCAPCD's Rule 67.12, Polyester Resin Operations, includes the following significant changes from the current SIP:

- A definition for exempt compounds was added and the VOC definition was revised.
- Standards for pigmented and clear gel coats were added.
- The recordkeeping section was revised to include maintenance of records for gel coats used, manufacturer's identification and VOC content of materials used.
- Several new test methods were added to correct previously identified deficiencies.

SBCAPCD's Rule 349, Polyester Resin Operations, is a new rule which was adopted to control VOC emissions from commercial and industrial polyester resin operations. Rule 349 includes:

- The use of control options.
- Requirements for spray equipment.
- Recordkeeping for resins and cleaning materials.
- The use of closed containers to store all unused materials.
- Test methods to determine compliance.

EPA has evaluated the submitted rules and has determined that they are consistent with the CAA, EPA regulations, and EPA policy. Therefore, SDCAPCD's Rule 67.12, Polyester Resin Operations and SBCAPCD's Rule 349, Polyester Resin Operations are being proposed for approval under section 110(k)(3) of the CAA as meeting the requirements of section 110(a) and part D.

Nothing in this action should be construed as permitting or allowing or establishing a precedent for any future request for revision to any state implementation plan. Each request for revision to the state implementation plan shall be considered separately in light of specific technical, economic, and environmental factors and in relation to relevant statutory and regulatory requirements.

Regulatory Process

Under the Regulatory Flexibility Act, 5 U.S.C. 600 *et seq.*, EPA must prepare a regulatory flexibility analysis assessing the impact of any proposed or final rule on small entities. 5 U.S.C. 603 and 604. Alternatively, EPA may certify that the rule will not have a significant impact on a substantial number of small entities. Small entities include small businesses, small not-for-profit enterprises and government entities

[1] Among other things, the pre-amendment guidance consists of those portions of the proposed Post–1987 ozone and carbon monoxide policy that concern RACT, 52 FR 45044 (November 24, 1987); "Issues Relating to VOC Regulation Cutpoints, Deficiencies, and Deviations, Clarification to Appendix D of November 24, 1987 **Federal Register** Notice" (Blue Book) (notice of availability was published in the **Federal Register** on May 25, 1988); and the existing control technique guidelines (CTGs).

[2] SBCAPCD and SDCAPCD retained their designation of nonattainment and were classified by operation of law pursuant to sections 107(d) and 181(a) upon the date of enactment of the CAA. See 55 FR 56694 (November 6, 1991).

[3] EPA adopted the completeness criteria on February 16, 1990 (55 FR 5830) and, pursuant to section 110(k)(1)(A) of the CAA, revised the criteria on August 26, 1991 (56 FR 42216).

with jurisdiction over populations of less than 50,000.

SIP approvals under sections 110 and 301 and subchapter I, part D of the CAA do not create any new requirements, but simply approve requirements that the State is already imposing. Therefore, because the Federal SIP approval does not impose any new requirements, it does not have a significant impact on any small entities affected. Moreover, due to the nature of the Federal-state relationship under the CAA, preparation of a regulatory flexibility analysis would constitute Federal inquiry into the economic reasonableness of state action The CAA forbids EPA to base its actions concerning SIPs on such grounds. T3Union Electric Co. v. *U.S. E.P.A.*, 427 U.S. 246, 256–66 (S.Ct. 1976); 42 U.S.C. 7410(a)(2).

This action has been classified as a Table 2 action by the Regional Administrator under the procedures published in the **Federal Register** on January 19, 1989 (54 FR 2214–2225), as revised by an October 4, 1993, memorandum from Michael H. Shapiro, Acting Assistant Administrator for Air and Radiation. A future document will inform the general public of these tables. On January 6, 1989, the Office of Management and Budget (OMB) waived Table 2 and Table 3 SIP revisions (54 FR 222) from the requirements of section 3 of Executive Order 12291 for 2 years. The EPA has submitted a request for a permanent waiver for Table 2 and Table 3 SIP revisions. The OMB has agreed to continue the waiver until such time as it rules on EPA's request. This request continues in effect under Executive Order 12866 which superseded Executive Order 12291 on September 30, 1993.

Approval and Promulgation of Title V, Section 507, Small Business Stationary Source Technical and Environmental Compliance Assistance Program for New Hampshire

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The EPA proposes to conditionally approve the State Implementation Plan (SIP) revision submitted by the State of New Hampshire for the purpose of establishing a small business stationary source technical and environmental compliance assistance program. The SIP revision was submitted by the State to satisfy the Federal mandate to ensure that small businesses have access to the technical assistance and regulatory information necessary to comply with the Clean Air Act (CAA). The rationale for the conditional approval is set forth in this proposal; additional information is available at the address indicated in the **ADDRESSES** section.

DATES: Comments must be received on or before July 14, 1994.

ADDRESSES: Comments may be mailed to Linda M. Murphy, Director, Air, Pesticides and Toxics Management Division, U.S. Environ- mental Protection Agency, Region I, JFK Federal Bldg., Boston, MA 02203.

Copies of the State submittal and EPA's technical support document are available for public inspection during normal business hours, by appointment at the Air, Pesticides and Toxics Management Division, U.S. Environmental Protection Agency, Region I, One Congress Street, 10th floor, Boston, MA and Air Resources Division, Department of Environmental Services, 64 North Main Street, Caller Box 2033, Concord, NH 03302–2033.

FOR FURTHER INFORMATION CONTACT: Emanuel Souza, Jr., (617) 565–3248

SUPPLEMENTARY INFORMATION:

I. Background

Implementation of the provisions of the Clean Air Act Amendments of 1990, will require regulation of many small businesses so that areas may attain and maintain the National ambient air quality standards (NAAQS) and reduce the emission of air toxics. Small businesses frequently lack the technical expertise and financial resources necessary to evaluate such regulations and to determine the appropriate mechanisms for compliance. In anticipation of the impact of these requirements on small businesses, the CAA requires that States adopt a small business stationary source technical and environmental compliance assistance program (PROGRAM), and submit this PROGRAM as a revision to the SIP. In addition, the CAA directs the Environmental Protection Agency (EPA) to oversee these small business assistance programs and report to Congress on their implementation. The requirements for establishing a PROGRAM are set out in section 507 of title V of the CAA. In February 1992, EPA issued *Guidelines for the Implementation of Section 507 of the 1990 Clean Air Act Amendments*, in order to delineate the Federal and State roles in meeting the new statutory provisions and as a tool to provide further guidance to the States on submitting acceptable SIP revisions

The State of New Hampshire has submitted a SIP revision to EPA in order to satisfy the requirements of section 507. In order to gain full approval, the State submittal must provide for each of the following PROGRAM elements: (1) The establishment of a small business assistance program (SBAP) to provide technical and compliance assistance to small businesses; (2) the establishment of a State small business ombudsman to represent the interests of small businesses in the regulatory process; and (3) the creation of a Compliance Advisory Panel (CAP) to determine and report on the overall effectiveness of the SBAP.

II. Analysis

1. Small Business Assistance Program

New Hampshire's Small Business Technical Assistance Program (SBTAP) will be located in the Department of Environmental Services (DES). The Program will require coordination with other DES programs to utilize their experience and to assess the potential cross-media impact of compliance alternatives.

Section 507(a) sets forth six requirements [1] that the State must meet to have an approvable SBAP. The first requirement is to establish adequate mechanisms for developing, collecting and coordinating information concerning compliance methods and technologies for small business stationary sources, and programs to encourage lawful cooperation among such sources and other persons to further comply with the Act. The State has met this requirement by offering a

[1] A seventh requirement of section 507(a) establishment of an Ombudsman office, is discussed in the next section.

proactive and reactive approach to gathering and disseminating information on compliance issues and control technologies. The State expects to use potential resources such as a technical library and an information clearinghouse. Program staff will proactively conduct workshops and presentations for potentially affected small businesses.

The second requirement is to establish adequate mechanisms for assisting small business stationary sources with pollution prevention and accidental release detection and prevention, including providing information concerning alternative technologies, process changes, products and methods of operation that help reduce air pollution. The State has met this requirement by stating that the SBTAP will work with small businesses to provide general engineering assistance. Pollution prevention efforts will be coordinated with the DES toxic use and waste reduction programs. SBTAP will work proactively to promote awareness of pollution prevention techniques and related issues.

The third requirement is to develop a compliance and technical assistance program for small business stationary sources which assists small businesses in determining applicable requirements and in receiving permits under the Act in a timely and efficient manner. The State has met this requirement. The SBTAP will develop materials explaining regulatory and permit requirements for small business stationary sources. Program staff will identify alternative methods and technologies for compliance with specific regulations. This will involve coordination with other DES programs; other state and Federal agencies; and trade associations and professional/ technical societies.

The fourth requirement is to develop adequate mechanisms to assure that small business stationary sources receive notice of their rights under the Act in such manner and form as to assure reasonably adequate time for such sources to evaluate compliance methods and any relevant or applicable proposed or final regulations or standards issued under the Act. The State has met this requirement by ensuring that small business sources are aware of their rights through outreach materials and ensuring that small businesses understand their rights when individual technical assistance is provided. Additionally, Program staff will ensure that small business stationary sources receive sufficient advance notice of their rights before applicable regulations take effect. The SBTAP will follow applicable Department rules. Program policy will be to provide as much notice as is reasonable and practicable, but never less than 30 calendar days.

The fifth requirement is to develop adequate mechanisms for informing small business stationary sources of their obligations under the Act, including mechanisms for referring such sources to qualified auditors or, at the option of the State, for providing audits of the operations of such sources to determine compliance with the Act. The SIP revision states that the Program staff will ensure that small business stationary sources receive sufficient advance notice of their obligations under the Act within 30 days or more. Additionally, the staff will develop a program of qualified auditors to provide compliance assessments for small business stationary sources. This Compliance Assessment Program will provide a source with an on-site determination of whether the facility complies with the applicable air quality regulations. Portions of section (5) of NH's January 12, 1993, SIP revision appeared to provide the State with enforcement discretion to allow small businesses an exemption from enforcement. Pursuant to EPA's request, the State submitted a letter to EPA on May 19, 1994 clarifying and revising this portion of the SIP revision. The letter deletes two portions of section (5) and explains that the portions were originally put into the January 12, 1993 SIP as examples of the type of issues that needed to be addressed, but which would not necessarily become final policies.

The sixth requirement is to develop procedures for consideration of requests from a small business stationary source for modification of: (A) Any work practice or technological method of compliance; or (B) the schedule of milestones for implementing such work practice or method of compliance preceding any applicable compliance date, based on the technological and financial capability of any such small business stationary source. The SIP revision states that the SBTAP, in coordination with other Division staff will develop standardized criteria and administrative procedures for considering requests for modifications, including provisions to ensure that granting such requests will not affect the status of the federally approved SIP and is consistent with applicable requirements of the CAA. The SIP revision lists the information that will be used in developing the criteria and procedures for consideration of requests for modifications of procedures.

2. Ombudsman

Section 507(a)(3) requires the designation of a State office to serve as the ombudsman for small business stationary sources. The State has partially met this requirement by outlining the responsibilities and duties of the small business ombudsman. The small business ombudsman responsibilities will be assigned to a proposed technical assistance coordinator position. It will be the state's central position for organizing technical assistance for environmental matters. The ombudsman will serve as an advocate for small business stationary sources in investigating and resolving complaints and disputes involving air quality regulations. Other activities of the ombudsman may include reviewing SBTAP services with trade associations and small business representatives. The ombudsman will help disseminate information to small businesses and encourage small businesses to participate in the development of regulations. The ombudsman will be the key contact person for the Governor's office for referrals of complaints and problems.

3. Compliance Advisory Panel

Section 507(e) requires the State to establish a Compliance Advisory Panel (CAP) that must include two members selected by the Governor who are not owners or representatives of owners of small businesses; four members selected by the State legislature who are owners, or represent owners, of small businesses; and one member selected by the head of the agency in charge of the Air Pollution Permit Program. The State has not fully met this requirement due to the lack of adequate statutory authority to establish the CAP. However, EPA expects New Hampshire to submit the legislative authority to EPA when it is passed by the New Hampshire legislature.

In addition to establishing the minimum membership of the CAP the CAA delineates four responsibilities for it: (1) To render advisory opinions concerning the effectiveness of the SBAP, difficulties encountered and the degree and severity of enforcement actions; (2) to periodically report to EPA concerning the SBAP's adherence to the principles of the Paperwork Reduction Act, the Equal Access to Justice Act, and the Regulatory Flexibility Act [2]; (3) to

[2] Section 507(e)(1)(B) requires the CAP to report on the compliance of the SBAP with these three

Continued

review and assure that information for small business stationary sources is easily understandable; and (4) to develop and disseminate the reports and advisory opinions made through the SBAP. The State has met these requirements in the SIP revision by authorizing the panel to: evaluate the effectiveness of the SBTAP and the Small Business Ombudsman, and issue advisory opinions to the Air Resources Division and EPA; prepare periodic reports to EPA on the status of the SBTAP with regard to the Paper Work Reduction Act, the Regulatory Flexibility Act, and the Equal Access to Justice Act; and review information for small business stationary sources to assure such information is understandable by the layperson. Additionally, the SIP revision states that the SBTAP staff will serve as the administrative staff for the panel.

4. Eligibility

Section 507(c)(1) of the CAA defines the term "small business stationary source" as a stationary source that:

(A) Is owned or operated by a person who employs 100 or fewer individuals;

(B) Is a small business concern as defined in the Small Business Act;

(C) Is not a major stationary source;

(D) Does not emit 50 tons per year (tpy) or more of any regulated pollutant; and

(E) Emits less than 75 tpy of all regulated pollutants.

New Hampshire's SIP revision states that assistance through the SBTAP will be available to all small business stationary sources, as defined in section 507 of the CAA. No source defined as eligible under the CAA will be excluded from the program without prior consultation with EPA. The SBTAP will also be available to small businesses which need help to comply with state air quality regulations other than Federal CAA requirements.

As allowed under section 507(c)(2) of the CAA, the State program may, under specific conditions listed in the SIP revision, include as a small business stationary source for purposes of receiving assistance a source that does not meet the criteria of subparagraphs (C), (D) or (E) above, provided that the source cannot emit more than 100 tons per year of all regulated pollutants.

Additionally, the State may exclude from assistance any category or subcategory of small business stationary sources, as allowed under section 507(c)(3)(B) of the CAA, which have been determined to have sufficient financial and technical resources to meet their regulatory obligations under the CAA.

III. Proposed Action

The State of New Hampshire has submitted a SIP revision implementing each of the required PROGRAM elements required by section 507 of the CAA. The State expects all the elements of the PROGRAM to be fully operational by November 15, 1994.

The State needs full adequate legal authority to implement the PROGRAM before EPA can fully approve this SIP revision. Therefore, EPA is proposing to conditionally approve the New Hampshire SIP revision for the small business stationary source technical and environmental compliance assistance program, submitted on January 12, 1993 and May 19, 1994, provided that New Hampshire submits in a timely manner the additional legal authority necessary to fully implement the PROGRAM and also submits the documentation designating a state agency to house the small business ombudsman.

EPA is soliciting public comments on the issues discussed in this proposal or on other relevant matters. These comments will be considered before EPA takes final action. Interested parties may participate in the Federal rulemaking procedure by submitting written comments to the EPA Regional office listed in the **ADDRESSES** section of this action.

EPA is proposing to conditionally approve the small business stationary source technical and environmental compliance assistance program submitted on January 12, 1993 with revisions on May 19, 1994. The two outstanding issues with this SIP revision concern New Hampshire's lack of a designated state agency to house the small business ombudsman and the lack of adequate legal authority to establish and implement the compliance advisory panel and small business ombudsman. For this reason, EPA is proposing to conditionally approve this SIP revision provided that the State meets its commitment to submit the legislative authority allowing a compliance advisory panel and small business ombudsman to be established and implemented. Additionally, the state must demonstrate through documentation which state agency will house the state small business ombudsman. Under section 110(k)(4) of the Act, EPA may conditionally approve a plan based on a commitment from the State to adopt specific enforceable measures by a date certain, but not later than 1 year from the date of approval. If EPA conditionally approves the commitment in a final rulemaking action, the State must meet its commitment to have the program fully operational by November 15, 1994. If the State fails to do so, this approval will become a disapproval on that date. EPA will notify the State by letter that this action has occurred. At that time, this commitment will no longer be a part of the approved New Hampshire SIP. EPA subsequently will publish a document in the **Federal Register** notifying the public that the conditional approval automatically converted to a disapproval. If the State meets its commitment, within the applicable time frame, the conditionally approved submission will remain a part of the SIP until EPA takes final action approving or disapproving the new legislative authority. If EPA disapproves the new submittal, the conditionally approved small business program will also be disapproved at that time. If EPA approves the submittal, the small business program will be fully approved in its entirety and replace the conditionally approved program in the SIP.

If EPA determines that it cannot issue a final conditional approval or if the conditional approval is converted to a disapproval, such action will trigger EPA's authority to impose sanctions under section 110(m) of the CAA at the time EPA issues the final disapproval or on the date the State fails to meet its commitment. In the latter case, EPA will notify the State by letter that the conditional approval has been converted to a disapproval and that EPA's sanctions authority has been triggered. In addition, the final disapproval triggers the Federal implementation plan (FIP) requirement under section 110(c). Pursuant to section 507(b)(3), EPA will provide for implementation of the program provisions required under section 507(a)(4) in any State that fails to submit such a program under that subsection. Therefore, EPA would have to provide for a compliance assistance program which assists small business stationary sources in determining applicable requirements and in receiving permits under the CAA.

This action has been classified as a Table 2 Action by the Regional Administrator under the procedures published in the **Federal Register** on January 19, 1989 (54 FR 2214–2225), as revised by an October 4, 1993, memorandum from Michael H. Shapiro, Acting Assistant Administer for Air and Radiation. A future document will

---

Federal statutes. However, since State agencies are not required to comply with them, EPA believes that the State PROGRAM must merely require the CAP to report on whether the SBAP is adhering to the general principles of these Federal statutes.

inform the general public of these tables. On January 6, 1989 the Office of Management and Budget (OMB) waived Table 2 and 3 SIP revisions (54 FR 2222) from the requirement of section 3 of Executive Order 12291 for a period of two years. EPA has submitted a request for a permanent waiver for Table 2 and Table 3 SIP revisions. The OMB has agreed to continue the waiver until such time as it rules on EPA's request. This request continues in effect under Executive Order 12866 which superseded Executive Order 12291 on September 30, 1993.

Under the Regulatory Flexibility Act, 5 U.S.C. 600 *et seq.*, EPA must prepare a regulatory flexibility analysis assessing the impact of any proposed or final rule on small entities. 5 U.S.C. 603 and 604. Alternatively, EPA may certify that the rule will not have a significant impact on a substantial number of small entities. Small entities include small businesses, small not-for-profit enterprises, and government entities with jurisdiction over populations of less than 50,000.

By today's action, EPA is conditionally approving a State program created for the purpose of assisting small businesses in complying with existing statutory and regulatory requirements. The program being proposed for conditional approval today does not impose any new regulatory burden on small businesses; it is a program under which small businesses may elect to take advantage of assistance provided by the state. Therefore, because the EPA's conditional approval of this program does not impose any new regulatory requirements on small businesses, I certify that it does not have a significant economic impact on any small entities affected.

The Regional Administrator's decision to approve or disapprove the SIP revision will be based on whether it meets the requirements of section 110(a)(2)(A)-(K) and 110(a)(3) of the Clean Air Act, as amended, and EPA regulations in 40 CFR part 51.

Financial Responsibility Requirements for Nonperformance of Transportation

AGENCY: Federal Maritime Commission.

ACTION: Proposed rule; extension of comment period.

SUMMARY: By Notice of Proposed Rulemaking published March 31, 1994 (59 FR 15149), as corrected by notice published April 18, 1994 (59 FR 18443), the Federal Maritime Commission proposed various charges to its passenger vessel financial responsibility requirements for nonperformance of transportation, to ensure that cruise passengers are adequately protected in the event of nonperformance. The Commission subsequently extended the comment period in response to requests from affected parties. The International Council of Cruise Lines now has requested that the comment period be extended further to June 24, 1994. The Delta Queen Steamboat Co. supports this request. The Commission has determined to grant the request.

DATES: Comments due on or before June 24, 1994.

Research and Special Programs Administration

49 CFR Parts 192 and 195

Underground Storage of Gas and Hazardous Liquids

AGENCY: Research and Special Programs Administration, DOT.

ACTION: Notice of meeting.

SUMMARY: The Research and Special Programs Administration (RSPA) invites representatives of industry, state and local government, and the public to an open meeting on underground storage of gas and hazardous liquids. The purpose of this meeting is to gather information on the extent of current regulation, and to help determine the proper action for RSPA to take regarding federal regulation of underground storage of gas and hazardous liquids, other than in tankage.

DATES: The meeting will be held on July 20, 1994, from 9 a.m until 4 p.m., local time.

ADDRESSES: The meeting will be held in the Doubletree Hotel, Intercontinental Airport, 15747 JFK Boulevard, Houston, Texas 77032 [Telephone 713–442–8000 or 800–810–8001]. The transcript of the meeting will be available for inspection and copying in Room 8421, Nassif Building, 400 Seventh Street, SW., Washington, DC 20590 between the hours of 8:30 a.m. and 5 p.m. each working day.

FOR FURTHER INFORMATION CONTACT: Jack Willock, (202) 366–2392, regarding the subject matter of this notice, or the Dockets Unit, (202) 366–4453, regarding copies of this notice or other material in the docket that is referenced in this notice.

SUPPLEMENTARY INFORMATION: Approximately 1,400 liquid and 400 natural gas underground storage facilities are located in the contiguous United States. These storage facilities include aquifers, depleted oil and gas fields, and solution mined formations and salt domes. The number of gas facilities in operation is increasing rapidly [mostly in salt domes due to low cost and high gas output from storage (deliverability)]. Many facilities are not regulated by the states.

The hazards of operating such facilities include subsidence, subsurface communication between storage reservoirs, blowouts, fractures, deficient design, improper operation and maintenance, and salt flows. Any of these hazards can result in death, injury, property damage, and environmental damage. For example, 3 people died and 21 were injured in an explosion at a salt dome storage site near Brenham, Texas on April 7, 1992. The National Transportation Safety Board (NTSB) determined that the accident resulted from deficiencies in the design of the Brenham facility, the most important being the lack of a fail-safe cavern shut-down system. NTSB made a broad recommendation that RSPA develop safety requirements for underground storage of gas and highly volatile liquids.

The American Petroleum Institute (API) is developing standards for solution-mined storage caverns, Recommended Practice (RP) 1114, *Design of Solution Mined Underground Storage Facilities*, and RP 1115, *Operation of Solution Mined Underground Storage Facilities*). API anticipates publishing both standards in 1994. The American Gas Association (AGA) is developing a standard, in coordination with API, for other geologic underground facilities.

RSPA is holding a public meeting to seek information and comment from the public for consideration in determining whether rulemaking is needed and, if so, the proper regulatory action to take. Anticipated topics to be discussed by commenters at the meeting include, but are not limited to the following:

1. A description of the types of storage configurations and the problems and risks associated with each.

2. Should federal regulations be issued to address the potential hazards of underground storage of gas and hazardous liquids?

3. Would API RP 1114 and 1115 and other standards under development address the risks and should they be incorporated into federal regulations?

4. If regulations are needed, should these regulations be federal or state? Should the underground storage of both gas and hazardous liquids be regulated?

5. If regulations are needed, should the regulations cover only surface requirements: i.e., equipment, O&M and safety procedures? Or, should both surface and subsurface regulations be issued?

6. Which states have (1) authority to regulate underground storage and (2) regulations covering such storage?

Interested persons are invited to attend the meeting and present oral or written statements on the matters set for the meeting. Any person who wishes to make oral statements at the meeting should notify Daphéne Floyd (202–366–1640) before July 2, 1994, stating the time needed for the statement.

Interested parties that are not scheduled to comment will have an opportunity to comment only after approval of the meeting officer.

(49 App. U.S.C. 1672 and 1804; 49 CFR 1.53.)

Issued in Washington, DC on June 7, 1994.

George W. Tenley, Jr.,

Associate Administrator for Pipeline Safety

Vol. 59, No. 113
Tuesday, June 14, 1994

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

[Docket No. 94–052–1]

Calgene, Inc.; Receipt of Petition for Determination of Nonregulated Status of Genetically Engineered Canola

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Notice.

SUMMARY: We are advising the public that the Animal and Plant Health Inspection Service (APHIS) has received a petition from Calgene, Inc., seeking a determination of nonregulated status for its Laurate canola (*Brassica napus*). In accordance with our regulations, we are soliciting public comments on whether such canola presents a plant pest risk. This action is necessary to enable interested persons to advise APHIS on any plant pest issues raised by this petition.

DATES: Written comments must be received on or before August 15, 1994.

ADDRESSES: Please send an original and three copies of your comments to Chief, Regulatory Analysis and Development, PPD, APHIS, USDA, room 804, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782. Please state that your comments refer to Docket No. 94–052–1. A copy of the Calgene petition and any comments received may be inspected at USDA, room 1141, South Building, 14th Street and Independence Avenue SW., Washington, DC, between 8 a.m. and 4:30 p.m. Monday through Friday, except holidays. Persons wishing access to this room are asked to call in advance of visiting at (202) 690–2817. To obtain a copy of the Calgene petition, contact Ms. Kay Peterson at (301) 436–7601.

FOR FURTHER INFORMATION CONTACT: Dr. Sivramiah Shantharam, Chief, Microorganisms Branch, Biotechnology Permits, BBEP, APHIS, USDA, room 850, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, (301) 436–7612.

SUPPLEMENTARY INFORMATION: On March 31, 1994, the Animal and Plant Health Inspection Service (APHIS) received a "Petition for Determination of Nonregulated Status under 7 CFR part 340" from Calgene, Inc. (Calgene), of Davis, CA. The Calgene petition seeks a determination that its Laurate canola (*Brassica napus*) is not a "regulated article" under regulations at 7 CFR part 340 (the regulations).

The Calgene petition states that Laurate canola should not be regulated by APHIS because it does not present a plant pest risk. Laurate canola has been defined by Calgene as any *Brassica napus* cultivar or progeny of a *B. napus* line containing the 12:0 ACP thioesterase gene from California bay (*Umbellularia californica*) (bay TE gene) with its associated napin promoter and napin terminator regions. The bay TE gene encodes the 12:0 ACP thioesterase enzyme. Activity of the bay TE enzyme results in the accumulation of the 12 carbon, saturated fatty acid, laurate, in the canola seed. The bay TE gene is controlled by a seed specific, napin promoter from *Brassica rapa*. Laurate canola may also contain the *kan*^{r} gene with its associated 35S promoter and *tml* 3′ terminator, the ori pRi, the left T-DNA border and right T-DNA border, a Tn*5* transposon segment, and a Lac Z′ polylinker sequence. Laurate canola has been field tested since 1992 in 16 field trials under 5 permits granted by APHIS.

Calgene states that laurate (lauric acid) is a major component of consumer products such as laundry detergent and shampoo, and that edible uses of high laurate oils include nondairy coffee whitener and whipped toppings. Current sources of laurate are coconut and palm kernel oils.

Laurate canola is currently considered a regulated article under the regulations because it contains gene sequences (vectors, promoters, and terminators) derived from plant pathogenic sources. In the process of reviewing applications for field trials with Laurate canola, APHIS determined that the vectors and other elements were disarmed and that the trials did not present a risk of plant pest introduction or dissemination.

In the Federal Plant Pest Act (7 U.S.C. 150aa *et seq.*), "plant pest" is defined as "any living stage of: Any insects, mites, nematodes, slugs, snails, protozoa, or other invertebrate animals, bacteria, fungi, other parasitic plants or reproductive parts thereof, viruses, or any organisms similar to or allied with any of the foregoing, or any infectious substances, which can directly or indirectly injure or cause disease or damage in any plants or parts thereof, or any processed, manufactured or other products of plants." APHIS views this definition very broadly. The definition covers direct or indirect injury, disease or damage not just to agricultural crops, but also to plants in general, for example, native species, as well as to organisms that may be beneficial to plants, for example, honeybees, rhizobia, etc.

Food or animal feed uses of Laurate canola may be subject to regulation by the Food and Drug Administration (FDA) under the authority of the Federal Food, Drug and Cosmetic Act (21 U.S.C. 201 *et seq.*). FDA's policy statement concerning regulation of plants derived from new plant varieties was published in the **Federal Register** on May 29, 1992 (57 FR 22984–23005).

Under § 340.6 of the regulations, any person may submit a petition to seek a determination that a particular regulated article should not be regulated by APHIS. In accordance with the regulations, this notice establishes that comments on the petition will be accepted for a period of 60 days from the date of this notice. After reviewing the data submitted by the petitioner, written comments received during the comment period, and other relevant information, APHIS will prepare a decision document on the regulatory status of Laurate canola.

Authority: 7 U.S.C. 150aa–150jj, 151–167, 1622n; 31 U.S.C. 9701; 7 CFR 2.17, 2.51, and 371.2(c).

Done in Washington, DC, this 8th day of June 1994.

Bobby R. Acord,

Acting Administrator, Animal and Plant Health Inspection Service.

[FR Doc. 94–14413 Filed 6–13–94; 8:45 am]

BILLING CODE 3410–34–P

[Docket No. 94–048–1]

Availability of Environmental Assessments and Findings of No Significant Impact

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Notice.

SUMMARY: We are advising the public that six environmental assessments and findings of no significant impact have been prepared by the Animal and Plant Health Inspection Service relative to the issuance of permits to allow the field testing of genetically engineered organisms. The environmental assessments provide a basis for our conclusion that the field testing of these genetically engineered organisms will not present a risk of introducing or disseminating a plant pest and will not have a significant impact on the quality of the human environment. Based on its findings of no significant impact, the Animal and Plant Health Inspection Service has determined that environmental impact statements need not be prepared.

ADDRESSES: Copies of the environmental assessments and findings of no significant impact are available for public inspection at USDA, room 1141, South Building, 14th Street and Independence Avenue SW., Washington, DC, between 8 a.m. and 4:30 p.m., Monday through Friday, except holidays. Persons wishing to inspect those documents are encouraged to call ahead on (202) 690–2817 to facilitate entry into the reading room.

FOR FURTHER INFORMATION CONTACT: Dr. Arnold Foudin, Deputy Director, Biotechnology Permits, BBEP, APHIS, USDA, room 850, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, (301) 436–7612. For copies of the environmental assessments and findings of no significant impact, write to Mr. Clayton Givens at the same address. Please refer to the permit numbers listed below when ordering documents.

SUPPLEMENTARY INFORMATION: The regulations in 7 CFR part 340 (referred to below as the regulations) regulate the introduction (importation, interstate movement, and release into the environment) of genetically engineered organisms and products that are plant pests or that there is reason to believe are plant pests (regulated articles). A permit must be obtained before a regulated article may be introduced into the United States. The regulations set forth the procedures for obtaining a limited permit for the importation or interstate movement of a regulated article and for obtaining a permit for the release into the environment of a regulated article. The Animal and Plant Health Inspection Service (APHIS) has stated that it would prepare an environmental assessment and, when necessary, an environmental impact statement before issuing a permit for the release into the environment of a regulated article (see 52 FR 22906).

In the course of reviewing each permit application, APHIS assessed the impact on the environment that releasing the organisms under the conditions described in the permit application would have. APHIS has issued permits for the field testing of the organisms listed below after concluding that the organisms will not present a risk of plant pest introduction or dissemination and will not have a significant impact on the quality of the human environment. The environmental assessments and findings of no significant impact, which are based on data submitted by the applicants and on a review of other relevant literature, provide the public with documentation of APHIS' review and analysis of the environmental impacts associated with conducting the field tests.

Environmental assessments and findings of no significant impact have been prepared by APHIS relative to the issuance of permits to allow the field testing of the following genetically engineered organisms:

Permit No.	Permittee	Date issued	Organisms	Field test location
94–054–06, renewal of permit 93–090–01, issued on 06–14–93	AgrEvo	04–28–94	Sugar beet plants genetically engineered to express tolerance to the herbicide glufosinate.	California, Illinois, North Dakota
94–054–07, renewal of permit 93–049–02, issued on 05–04–93.	University of Idaho	04–28–94	Canola plants genetically engineered to express tolerance to the herbicide glufosinate.	Idaho.
94–055–04, renewal of permit 92–049–02, issued on 06–05–92.	Inter:Mountain Canola	04–28–94	Canola plants genetically engineered to express resistance to the herbicide glyphosate.	Idaho
94–055–05	DuPont Agricultural Products.	04–28–94	Canola plants genetically engineered to express altered fatty acid composition.	Idaho.
94–060–02, renewal of permit 93–074–03, issued on 07–12–93.	Upjohn Company	04–28–94	Cucumber plants genetically engineered to express resistance to cucumber mosaic virus, watermelon mosaic virus 2, and zucchini yellow mosaic virus.	Georgia
94–070–01, renewal of permit 93–165–03, issued on 09–28–93.	Betaseed, Incorporated	04–28–94	Sugar beet plants genetically engineered to express resistance to beet necrotic yellow vein virus.	California

The environmental assessments and findings of no significant impact have been prepared in accordance with: (1) The National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4321 *et seq.*), (2) Regulations of the Council on Environmental Quality for Implementing the Procedural Provisions of NEPA (40 CFR parts 1500–1508), (3) USDA Regulations Implementing NEPA (7 CFR part 1b), and (4) APHIS Guidelines Implementing NEPA (44 FR 50381–50384, August 28, 1979, and 44 FR 51272–51274, August 31, 1979).

Done in Washington, DC, this 8th day of June 1994.

Bobby R. Acord,

Acting Administrator, Animal and Plant Health Inspection Service.

BILLING CODE 3410–34–P

[Docket No. 94-049-1]

Availability of List of U.S. Veterinary Biological Product and Establishment Licenses and U.S. Veterinary Biological Product Permits Issued, Suspended, Revoked, or Terminated

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Notice

SUMMARY: This notice pertains to veterinary biological product and establishment licenses and veterinary biological product permits that were issued, suspended, revoked, or terminated by the Animal and Plant Health Inspection Service during the month of April 1994. These actions have been taken in accordance with the regulations issued pursuant to the Virus-Serum-Toxin Act. The purpose of this notice is to inform interested persons of the availability of a list of these actions and advise interested persons that they may request to be placed on a mailing list to receive the list.

FOR FURTHER INFORMATION CONTACT: Ms. Maxine Kitto, Program Assistant, Veterinary Biologics, BBEP, APHIS, USDA, room 838, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, (301) 436-8245. For a copy of this month's list, or to be placed on the mailing list, write to Ms. Kitto at the above address.

SUPPLEMENTARY INFORMATION: The regulations in 9 CFR part 102, "Licenses For Biological Products," require that every person who prepares certain biological products that are subject to the Virus-Serum-Toxin Act (21 U.S.C. 151 *et seq.*) shall hold an unexpired, unsuspended, and unrevoked U.S. Veterinary Biological Product License. The regulations set forth the procedures for applying for a license, the criteria for determining whether a license shall be issued, and the form of the license.

The regulations in 9 CFR part 102 also require that each person who prepares biological products that are subject to the Virus-Serum-Toxin Act (21 U.S.C. 151 *et seq.*) shall hold a U.S. Veterinary Biologics Establishment License. The regulations set forth the procedures for applying for a license, the criteria for determining whether a license shall be issued, and the form of the license.

The regulations in 9 CFR part 104, "Permits for Biological Products," require that each person importing biological products shall hold an unexpired, unsuspended, and unrevoked U.S. Veterinary Biological Product Permit. The regulations set forth the procedures for applying for a permit, the criteria for determining whether a permit shall be issued, and the form of the permit.

The regulations in 9 CFR parts 102 and 105 also contain provisions concerning the suspension, revocation, and termination of U.S. Veterinary Biological Product Licenses, U.S. Veterinary Biologics Establishment Licenses, and U.S. Veterinary Biological Product Permits.

Each month, the Veterinary Biologics section of Biotechnology, Biologics, and Environmental Protection prepares a list of licenses and permits that have been issued, suspended, revoked, or terminated. This notice announces the availability of the list for the month of April 1994. The monthly list is also mailed on a regular basis to interested persons. To be placed on the mailing list you may call or write the person designated under **FOR FURTHER INFORMATION CONTACT.**

Done in Washington, DC, this 8th day of June 1994.

Bobby R. Acord,

Acting Administrator, Animal and Plant Health Inspection Service.

[FR Doc. 94-14412 Filed 6-13-94; 8:45 am]

BILLING CODE 3410-34-P

Forest Service

California Spotted Owl EIS

AGENCY: Forest Service, USDA.

ACTION: Notice of meeting.

SUMMARY: This notice announces a meeting in which the public is invited to provide information concerning the effects of the alternatives being considered in the California Spotted Owl Draft Environmental Impact Statement on Small Forest Carnivores (furbearers).

DATES AND TIME: July 6-7, 1994, beginning at 1 p.m.

ADDRESSES: CA Owl EIS Office, 2999 Fulton Ave., Sacramento, CA 95821.

CONTACT PERSON FOR FURTHER INFORMATION: Ed Toth, EIS Team, 2999 Fulton Ave., Sacramento, CA 95821. (916) 978-4304.

SUPPLEMENTARY INFORMATION: The Forest Service is currently preparing a Draft Environmental Impact Statement (DEIS) to amend the Pacific Southwest Regional Guide and Sierran Province Forest Plans with new management direction for the California Spotted Owl. The purpose of this meeting is gather information concerning the effects of the alternatives being considered on small forest carnivores.

The meeting will begin with a brief overview of the DEIS and proposed alternatives. In order to have a productive and meaningful meeting the Forest Service asks that speakers focus their presentations on scientifically-based information. This meeting will not replace the public comment period on the DEIS.

Janice Gauthier,

CA OWL EIS Team Leader

BILLING CODE 3410-11-M

California Spotted Owl EIS

AGENCY: Forest Service, USDA.

ACTION: Notice of meeting.

SUMMARY: This notice announces a meeting in which the public is invited to provide information concerning the effects of the alternatives being considered in the California Spotted Owl Draft Environmental Impact Statement on individuals or groups of wildlife vertebrate species.

DATES AND TIME: July 19-21, 1994, beginning at 9 a.m.

ADDRESSES: Fountain Suites Hotel, 321 Bercut Dr., Sacramento, CA 95814.

CONTACT PERSON FOR FURTHER INFORMATION: Ed Toth, EIS Team, 2999 Fulton Ave., Sacramento, CA 95821, (916) 978-4304.

SUPPLEMENTARY INFORMATION: The Forest Service is currently preparing a Draft Environmental Impact Statement (DEIS) to amend the Pacific Southwest Regional Guide and Sierran Province Forest Plans with new management direction for the California Spotted Owl. The purpose of this meeting is to gather information concerning the effects of the alternatives being considered on individuals or groups of vertebrate wildlife species.

The meeting will begin with a brief overview of the DEIS and proposed alternatives. The general meeting will then divide into thirteen simultaneous meetings covering the following individuals or groups of vertebrate species: California Spotted Owls, Avian Migrant Species, Avian Cavity Nesters, Raptors, Avian Riparian/Wetland Specialists, Other Avian Specialists, Large Mammals, Small Mammals (except Small Forest Carnivores which will be the subject of a separate meeting), Bats, Anurans, Terrestrial Salamanders, Reptiles, and Fish and Aquatic Species.

In order to have a productive and meaningful meeting the Forest Service asks that participants focus their presentations on scientifically-based information. This meeting will not

replace the public comment period on the DEIS.

BILLING CODE 3410–11–M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[I.D. 060994E]

Pacific Fishery Management Council; Public Meetings

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of emergency public meeting.

SUMMARY: The Pacific Fishery Management Council (Council) will hold an emergency meeting by telephone conference call on June 17, 1994, beginning at 8 a.m. (Pacific Daylight Time) to address a problem with the West Coast groundfish trawl fishery.

Public listening stations will be set up at various ports along the Washington, Oregon, and California coast.

At the April Council meeting, the Groundfish Management Team (GMT) projected that landings of several groundfish species, among these thornyheads and trawl-caught sablefish, were likely to reach their designated harvest guidelines before the end of the year. No action was taken to slow the rate of landings at that time due to uncertainty about the effects of the license limitation program, the Pacific whiting fishery, and the West Coast shrimp fishery. Since the April meeting the landed catch of thornyheads and trawl-caught sablefish has increased substantially, and harvest guidelines are expected to be attained by August 7 (thornyheads) and August 26 (trawl-caught sablefish).

The Council will consider action to slow these rates prior to the regularly scheduled meeting of August 2–5. The GMT will report on projected landings of thornyheads and trawl-caught sablefish and present a list of management options for the Dover sole/thornyhead/trawl-caught sablefish (DTS) complex fishery. The Council will accept comments from its advisors and the public and then adopt a management recommendation which probably will take effect July 1. The Council will review this action at its regularly scheduled meeting August 2–5.

Because of the urgent nature of this issue and the need for the Council to address the matter immediately, this **Federal Register** notice may appear after the meeting.

This meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Michelle Perry Sailer at (503) 326–6352 at least 5 days prior to the meeting date.

FOR FURTHER INFORMATION CONTACT: Lawrence D. Six, Executive Director, Pacific Fishery Management Council, 2000 SW. First Avenue, Suite 420, Portland, OR 97201; telephone: (503) 326–6352.

Dated: June 9, 1994.

David S. Crestin,

Acting Director, Office of Fisheries Conservation and Management, National Marine Fisheries Service.

BILLING CODE 3510–22–P

[I.D. 051794A]

Endangered Species; Permits

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Issuance of an Enhancement Permit (P504D), and a Scientific Research Permit (P503M).

On December 16, 1993, notice was published that an application had been filed by the U.S. Army Corps of Engineers (P504D), to collect and transport juvenile Snake River sockeye salmon (*Oncorhynchus nerka*) and juvenile Snake River spring/summer and fall chinook salmon (*O. tshawytscha*) for the purpose of increasing their chances of survival, as authorized by the Endangered Species Act of 1973 (ESA) (16 U.S.C. 1531-1543) and the NMFS regulations governing listed fish and wildlife permits (50 CFR parts 217-222).

Notice is hereby given that on April 1, 1994, as authorized by the provisions of the ESA, NMFS issued Permit Number 895 for the above taking, subject to certain conditions set forth therein.

On January 26, 1994, notice was published (59 FR 3667) that an application had been filed by Idaho Department of Fish and Game (IDFG) to enumerate and collect length information on adult and juvenile chinook salmon in Chamberlain Creek and West Fork Chamberlain Creek as authorized by the ESA.

Notice is hereby given that on June 2, 1994, as authorized by the provisions of the ESA, NMFS issued Permit Number 909 for the above taking, subject to certain conditions set forth therein.

Issuance of these permits, as required by the ESA, were based on a findings that such permits: (1) Were applied for in good faith; (2) will not operate to the disadvantage of the listed species which are the subject of these permits; (3) are consistent with the purposes and policies set forth in section 2 of the ESA. These permits were also issued in accordance with and are subject to parts 217-222 of Title 50 CFR, the NMFS regulations governing listed species permits.

The applications, permits, and supporting documentation are available for review by interested persons in the following offices by appointment:

Office of Protected Resources, NMFS, 1335 East-West Highway, Silver Spring, MD 20910–3226 (301–713–2322); and

Environmental and Technical Services Division, NMFS, NOAA, 911 North East 11th Ave., Room 620, Portland, OR 97232 (503-230-5400).

Dated: June 2, 1994.

William W. Fox, Jr., Ph.D.,

Director, Office of Protected Resources, National Marine Fisheries Service.

BILLING CODE 3510–22–F

DEPARTMENT OF DEFENSE

Department of the Navy

Intent To Reopen Scoping for an Environmental Impact Statement for Proposed Facilities for Homeporting Up to Three Future Replacement Nimitz-Class Aircraft Carriers at Naval Air Station, North Island, San Diego, CA

Pursuant to Section 102(2)(c) of the National Environmental Policy Act of 1969 as implemented by the Council on Environmental Quality regulations (40 CFR parts 1500–1508), the Department of the Navy announces its intent to reopen scoping for an Environmental Impact Statement (EIS) for homeporting up to three future replacement NIMITZ-class aircraft carriers at Naval Air Station (NAS), North Island, San Diego, California.

Dredging requirements for the proposed project have changed since the Notice of Intent (NOI) and Public Scoping Meeting of August 17, 1993, held in Coronado, California. In August 1993, the scope of the EIS was identified

to include dredging the pier areas, the turning basin, and its approach. The purpose of this notice is to identify that the scope of the EIS will include dredging the San Diego Bay channel to a depth greater than the existing −42 feet Mean Lower Low Water (MLLW)

NIMITZ-class aircraft carriers are heavier and draw a deeper draft than the aircraft carriers currently homeported at Naval Air Station (NAS) North Island; therefore, to meet operational considerations, the San Diego Bay channel needs to be dredged to a depth greater than the existing maintained depth of −42 feet MLLW. This requirement is in addition to the dredging identified in the two previous public notices of August 1993 and March 1994.

The maximum dredge depths being considered are −50 feet MLLW for the channel between NAS North Island and Ballast Point and −55 feet MLLW for the channel south of Ballast Point. The supporting technical information for dredging the San Diego Bay channel, including dredge depths, will be included in the EIS being prepared for this project.

In providing an opportunity to comment on this change in scope, the anticipated time for having a Draft EIS available for your review and comment is early October 1994 instead of July 1994.

For more information regarding this project, please call NAS North Island Public Affairs Officer at (619) 545–8167. Please submit written comments regarding this notice no later than July 18, 1994, to: Commanding Officer, NAS North Island (Code 00B), P.O. Box 357033, San Diego, CA 92135–7033.

Dated: June 9, 1994.

Lewis T. Booker, Jr.,

LCDR, JAGC, USN, Federal Register Liaison Officer.

Etrema Products, Inc.; Partially Exclusive Patent

AGENCY: Department of the Navy, DOD

ACTION: Intent to grant partially exclusive patent license; Etrema Products, Inc., a wholly owned subsidiary of Edge Technologies, Inc.

SUMMARY: The Department of the Navy hereby gives notice of its intent to grant to Etrema Products, Inc., a wholly owned subsidiary of Edge Technologies Inc., a revocable, nonassignable, partially exclusive license in the United States to practice the Government-owned inventions described in U.S. Patents No. 4,158,368, entitled "Magnetostrictive Transducer," and 4,375,372, entitled "Use of Cubic Rare Earth-Iron Laves Phase Intermetallic Compounds as Magnetostrictive Transducer Materials".

Anyone wishing to object to the grant of this license has 60 days from the date of this notice to file written objections along with supporting evidence, if any. Written objections are to be filed with the Office of Naval Research (ONR 00CC3), Ballston Tower One, 800 North Quincy Street, Arlington, Virginia 22217–5660.

FOR FURTHER INFORMATION CONTACT: Mr. R.J. Erickson, Staff Patent Attorney, Office of Naval Research (ONR 00CC3), Ballston Tower One, 800 North Quincy Street, Arlington, Virginia 22217–5660, telephone (703) 696–4001.

Dated: June 9, 1994.

Lewis T. Booker, Jr.,

LCDR, JAGC, USN, Federal Register Liaison Officer.

BILLING CODE 3810–AE–M

DEPARTMENT OF ENERGY

[Docket No. 6450–01]

Certification of the Radiological Condition of the Granite City Site, Granite City, IL, June 1993

AGENCY: Department of Energy.

ACTION: Notice of certification.

SUMMARY: The Department of Energy (DOE) has completed radiological surveys of the Granite City Site in Granite City, Illinois. The property was found to contain residual quantities of radioactive material from Atomic Energy Commission (AEC) activities. Cleanup activities have occurred at this site sufficient to remediate it to Departmental guidelines.

FOR FURTHER INFORMATION CONTACT: Mr. James J. Fiore, Director, Office of Eastern Area Programs, Office of Environmental Restoration, Mail Stop, EM–42, U.S. Department of Energy, Washington, DC 20585, (301) 903–8141.

SUPPLEMENTARY INFORMATION: The DOE Office of Environmental Restoration, Office of Eastern Area Programs (EM–42), Off-Site/Savannah River Program Division, has conducted a remedial action project at the Granite City Site in Granite City, Illinois (Parcel No. 301–001 filed in Deed/Plat Book 19–24–14, Page 22–1 in the records of Madison County, Illinois), as part of the Formerly Utilized Sites Remedial Action Program (FUSRAP). The objective of the program is to identify and clean up or otherwise control sites where residual radioactive contamination remains from activities carried out under contract to the Manhattan Engineer District (MED) and AEC statutory predecessors to DOE during the early years of the nation's atomic energy program. In September 1992, the Granite City Site was designated for cleanup under FUSRAP.

In the late 1950's and early 1960's, uranium metal bars (uranium-238 ingots) were x-rayed for AEC in the Betatron Building to detect metallurgical flaws. X-ray services were provided by General Steel Castings Corporation (currently Granite City Steel) under purchase orders from Mallinckrodt Chemical Works, a prime AEC contractor. Purchase orders were issued by Mallinckrodt from 1950 to 1966 on an "as required" basis.

At DOE's request, the Oak Ridge National Laboratory conducted a preliminary radiological survey in 1989 to determine whether the site met newer, stricter cleanup guidelines. The survey indicated that the site contained residual radioactive contamination from AEC activities. As a result, on September 25, 1992, the site was designated for inclusion in FUSRAP. In June 1993, Bechtel National, Inc., conducted remedial action in accordance with DOE Orders, at the Granite City Site.

Post-remedial action surveys have demonstrated, and DOE has certified, that the subject property is in compliance with DOE residual radioactive contamination criteria and standards. The standards are established to protect members of the general public and occupants of the site and to ensure that future use of the property will result in no radiological exposure above applicable guidelines. These findings are supported by the DOE Certification Docket for the Remedial Action Performed at the Granite City Site in Granite City, Illinois, June 1993. Accordingly, this property is released from FUSRAP.

The certification docket will be available for review between 9 a.m. and 4 p.m., Monday through Friday (except Federal Holidays), in the DOE Public Reading Room located in Room 1E–190 of the Forrestal Building, 1000 Independence Avenue, SW., Washington, DC. Copies will also be available in the DOE Public Document Room, Federal Building, 200 Administration Road, Oak Ridge, Tennessee, and will be provided to the property owner and to appropriate local officials.

DOE, through the Oak Ridge Operations Office, Former Sites

Restoration Division, has issued the following statement:

Statement of Certification: Granite City Site Former AEC Operations

The U.S. DOE, Oak Ridge Operations Office, Former Sites Restoration Division, has reviewed and analyzed the radiological data obtained following remedial action at the Granite City Site (Parcel No. 301–001 filed in Deed/Plat Book 19–24–14, Page 22–1 in the records of Madison County, Illinois). Based on analysis of all data collected, DOE certifies that the following property is in compliance with DOE radiological decontamination criteria and standards. For radiological exposure resulting from past AEC subcontract activities at the site, this certification of compliance provides assurance that future use of the property will result in no radiological exposure above applicable guidelines established to protect members of the general public or site occupants.

Property owned by National Steel Corporation: Granite City Steel Division, 1417 State Street, Granite City, Illinois 62040.

Issued in Washington, DC, on June 7, 1994.

John E. Baublitz,

Acting Deputy Assistant Secretary for Environmental Restoration

BILLING CODE 6450–01–P

Availability of Draft Strategic Plan for the Office of Energy Efficiency and Renewable Energy

AGENCY: Office of Energy Efficiency and Renewable Energy, DOE

ACTION: Notice.

SUMMARY: This notice announces the availability for public comment of a draft strategic plan for the Office of Energy Efficiency and Renewable Energy (EE). The draft strategic plan presents EE's mission and vision, goals and objectives, and strategies to achieve those goals and objectives.

DATES: Individuals wishing to present their views on the draft report should do so in writing by September 30, 1994.

ADDRESSES: A copy of the draft strategic plan is available for inspection and reproduction at the public reading room of the U.S. Department of Energy, Forrestal Building, 1000 Independence Avenue SW., Washington, DC. The public reading room is open from 9 a.m. to 4 p.m.; you may contact reading room staff at (202) 586–6020. If you wish to have a copy of the draft report mailed to you directly, please contact Jerry Dion at the address below.

Written comments should be addressed to Jerry Dion, Office of Planning and Assessment, Office of Energy Efficiency and Renewable Energy, U.S. Department of Energy, 1000 Independence Avenue SW., EE–72, Washington, DC 20585. Receipt of comments on diskette, formatted in WordPerfect 5.1, will facilitate the process.

FOR FURTHER INFORMATION CONTACT: Jerry Dion, Office of Planning and Assessment, Office of Energy Efficiency and Renewable Energy, U.S. Department of Energy, 1000 Independence Avenue SW., EE–72, Washington, DC 20585, (202) 586–9470.

SUPPLEMENTARY INFORMATION: The U.S. Department of Energy is issuing this draft strategic plan for public review and comment. The plan sets forth EE's goals, objectives, and strategies for program implementation. EE will use this draft document to begin a comprehensive planning process involving stakeholders and oriented toward careful identification and thorough analysis of strategic issues. The outcome of the effort will be a final version of the strategic plan and a five-year program plan.

The draft strategic plan is divided into four sections: overview, mission and vision, goals and objectives, and EE strategy. The EE goals and objectives are aligned with those expressed in the Department of Energy's strategic plan, Fueling a Competitive Economy. The strategy section addresses EE's technology, market, and organizational strategies. A series of short appendices is also included in the draft strategic plan: situation analysis, description of EE stakeholder categories, description of EE sectors' individualized missions, and evolution of EE's strategic planning process.

Respondents are welcome to express their views on any aspect of the draft strategic plan. Areas which commenters might want to address include whether the themes and content are aligned with your assessment of EE priorities; whether there are ideas that should be added or receive special emphasis; and what issues require further analysis.

Christine A. Ervin,

Assistant Secretary for Energy Efficiency and Renewable Energy.

BILLING CODE 6450–01–P

Notice of Issuance of Proposed Decision and Order by the Office of Hearings and Appeals; Week of May 16 Through May 20, 1994

During the week of May 16 through May 20, 1994, the proposed decision and order summarized below was issued by the Office of Hearings and Appeals of the Department of Energy with regard to an application for exception.

Under the procedural regulations that apply to exception proceedings (10 C.F.R. Part 205, subpart D), any person who will be aggrieved by the issuance of a proposed decision and order in final form may file a written notice of objection within ten days of service. For purposes of the procedural regulations, the date of service of notice is deemed to be the date of publication of this Notice or the date an aggrieved person receives actual notice, whichever occurs first.

The procedural regulations provide that an aggrieved party who fails to file a Notice of Objection within the time period specified in the regulations will be deemed to consent to the issuance of the proposed decision and order in final form. An aggrieved party who wishes to contest a determination made in a proposed decision and order must also file a detailed statement of objections within 30 days of the date of service of the proposed decision and order. In the statement of objections, the aggrieved party must specify each issue of fact or law that it intends to contest in any further proceeding involving the exception matter.

Copies of the full text of this proposed decision and order are available in the Public Reference Room of the Office of Hearings and Appeals, Room 1E–234, Forrestal Building, 1000 Independence Avenue, S.W., Washington, D.C. 20585, Monday through Friday, between the hours of 1:00 p.m. and 5:00 p.m., except federal holidays.

Dated: June 8, 1994.

George B. Breznay,

Director, Office of Hearings and Appeals.

Wells Oil Co., Tucson, AZ, LEE–0108, Reporting Requirements

Wells Oil Co. filed an Application for Exception from the provisions of the reporting requirement of Form EIA–782B. The exception request, if granted, would permit Wells Oil Co. to stop filing Form EIA–782B, entitled "Resellers'/Retailers' Monthly Petroleum Product Sales Report." On May 20, 1994, the Department of Energy issued a Proposed Decision and Order which determined that the exception request be denied.

[FR Doc. 94–14436 Filed 6–13–94; 8:45 am]

BILLING CODE 6450–01–P

Notice of Issuance of Proposed Decisions and Orders by the Office of Hearings and Appeals; Week of May 23 Through May 27, 1994

During the week of May 23 through May 27, 1994, the proposed decisions and orders summarized below were issued by the Office of Hearings and Appeals of the Department of Energy with regard to applications for exception.

Under the procedural regulations that apply to exception proceedings (10 CFR Part 205, Subpart D), any person who will be aggrieved by the issuance of a proposed decision and order in final form may file a written notice of objection within ten days of service. For purposes of the procedural regulations, the date of service of notice is deemed to be the date of publication of this Notice or the date an aggrieved person receives actual notice, whichever occurs first.

The procedural regulations provide that an aggrieved party who fails to file a Notice of Objection within the time period specified in the regulations will be deemed to consent to the issuance of the proposed decision and order in final form. An aggrieved party who wishes to contest a determination made in a proposed decision and order must also file a detailed statement of objections within 30 days of the date of service of the proposed decision and order. In the statement of objections, the aggrieved party must specify each issue of fact or law that it intends to contest in any further proceeding involving the exception matter.

Copies of the full text of these proposed decisions and orders are available in the Public Reference Room of the Office of Hearings and Appeals, Room 1E–234, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585, Monday through Friday, between the hours of 1 p.m. and 5 p.m., except federal holidays.

Dated: June 8, 1994

George B. Breznay,

Director, Office of Hearings and Appeals

Consolidated Oil & Gas, Inc., Denver CO LEE–0109, Reporting Requirements

Consolidated Oil & Gas, Inc. filed an Application for Exception from the Energy Information Administration (EIA) requirement that it file Form EIA-23, the "Annual Survey of Domestic Oil and Gas Reserves." In considering this request, the DOE found that the firm was not experiencing a serious hardship, gross inequity or unfair distribution of burdens as a result of the filing requirement. Accordingly, on May 24, 1994, the DOE issued a Proposed Decision and Order determining that the exception request should be denied.

Las Energy Corporation, Winter Park, FL LEE–0113, Reporting Requirements

Las Energy Corporation (Las Energy) filed an Application for Exception from the provision of filing Form EIA–782B, entitled "Resellers'/Retailers' Monthly Petroleum Product Sales Report." The Exception request, if granted, would permit Las Energy to be exempted from filing Form EIA–782B. On May 26, 1994, the Department of Energy issued a Proposed Decision and Order which determined that the Exception request be denied.

Office of Energy Efficiency and Renewable Energy

[Case No. F–070]

Energy Conservation Program for Consumer Products: Decision and Order Granting a Waiver From the Furnace Test Procedure to Armstrong Air Conditioning Inc.

AGENCY: Office of Energy Efficiency and Renewable Energy, Department of Energy.

ACTION: Decision and Order.

SUMMARY: Notice is given of the Decision and Order (Case No. F–070) granting a Waiver to Armstrong Air Conditioning Inc. (Armstrong) from the existing Department of Energy (DOE) test procedure for furnaces. The Department is granting Armstrong's Petition for Waiver regarding blower time delay in calculation of Annual Fuel Utilization Efficiency (AFUE) for its GUK and GCK condensing gas furnaces, and GUJ, GCJ, and GHJ non-condensing gas furnaces.

FOR FURTHER INFORMATION CONTACT:

Cyrus H. Nasseri, U.S. Department of Energy, Office of Energy Efficiency and Renewable Energy, Mail Station EE–431, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586–9138.

Eugene Margolis, Esq., U.S. Department of Energy, Office of General Counsel, Mail Station GC–32, Forrestal Building, 1000 Independence Avenue SW., Washington, DC 20585, (202) 586–9507.

SUPPLEMENTARY INFORMATION: In accordance with 10 CFR 430.27(g), notice is hereby given of the issuance of the Decision and Order as set out below. In the Decision and Order, Armstrong has been granted a Waiver for its GUK and GCK condensing gas furnaces, and GUJ, GCJ, and GHJ non-condensing gas furnaces, permitting the company to use an alternate test method in determining AFUE.

Issued in Washington, DC, on June 6, 1994.

Christine A. Ervin,

Assistant Secretary, Energy Efficiency and Renewable Energy

Decision and Order

In the Matter of: Armstrong Air Conditioning Inc. (Case No. F–070)

Background

The Energy Conservation Program for Consumer Products (other than automobiles) was established pursuant to the Energy Policy and Conservation Act (EPCA), Public Law 94–163, 89 Stat. 917, as amended by the National Energy Conservation Policy Act (NECPA), Public Law 95–619, 92 Stat. 3266, the National Appliance Energy Conservation Act of 1987 (NAECA), Public Law 100–12, the National Appliance Energy Conservation Amendments of 1988 (NAECA 1988) Public Law 100–357, and the Energy Policy Act of 1992 (EPAct), Public Law 102–486, 106 Stat. 2776, which requires DOE to prescribe standardized test procedures to measure the energy consumption of certain consumer products, including furnaces. The intent of the test procedures is to provide a comparable measure of energy consumption that will assist consumers in making purchasing decisions. These test procedures appear at 10 CFR part 430, subpart B.

The Department amended the prescribed test procedures by adding 10 CFR 430.27 to create a waiver process 45 FR 64108, September 26, 1980. Thereafter, DOE further amended its appliance test procedure waiver process to allow the Assistant Secretary for Energy Efficiency and Renewable Energy (Assistant Secretary) to grant an Interim Waiver from test procedure requirements to manufacturers that have petitioned DOE for a waiver of such prescribed test procedures. 51 FR 42823, November 26, 1986.

The waiver process allows the Assistant Secretary to waive temporarily test procedures for a particular basic model when a petitioner shows that the

basic model contains one or more design characteristics which prevent testing according to the prescribed test procedures or when the prescribed test procedures may evaluate the basic model in a manner so unrepresentative of its true energy consumption as to provide materially inaccurate comparative data. Waivers generally remain in effect until final test procedure amendments become effective, resolving the problem that is the subject of the waiver.

The Interim Waiver provisions added by the 1986 amendment allow the Assistant Secretary to grant an Interim Waiver when it is determined that the applicant will experience economic hardship if the Application for Interim Waiver is denied, if it appears likely that the Petition for Waiver will be granted, and/or the Assistant Secretary determines that it would be desirable for public policy reasons to grant immediate relief pending a determination on the Petition for Waiver. An Interim Waiver remains in effect for a period of 180 days or until DOE issues its determination on the Petition for Waiver, whichever is sooner, and may be extended for an additional 180 days, if necessary.

Armstrong filed a "Petition for Waiver," dated March 11, 1994, and the addendum of April 6, 1994, in accordance with section 430.27 of 10 CFR part 430. The Department published in the **Federal Register** on May 3, 1994, Armstrong's petition and solicited comments, data and information respecting the petition. 59 FR 22841. Armstrong also filed an "Application for Interim Waiver" under § 430.27(g) which DOE granted on April 20, 1994. 59 FR 22841, May 3, 1994.

No comments were received concerning either the "Petition for Waiver" or the "Interim Waiver." The Department consulted with the Federal Trade Commission (FTC) concerning the Armstrong Petition. The FTC did not have any objections to the issuance of the waiver to Armstrong.

Assertions and Determinations

Armstrong's Petition seeks a waiver from the DOE test provisions that require a 1.5-minute time delay between the ignition of the burner and the starting of the circulating air blower. Armstrong requests the allowance to test using a 30-second blower time delay when testing its GUK and GCK condensing gas furnaces, and GUJ, GCJ, and GHJ non-condensing gas furnaces. Armstrong states that since the 30-second delay is indicative of how these models actually operate and since such a delay results in an increase in AFUE of 1.2 percentage points for GUK and GCK condensing gas furnaces, and 0.8 percentage points for GUJ, GCJ, and GHJ non-condensing gas furnaces, the petition should be granted.

Under specific circumstances, the DOE test procedure contains exceptions which allow testing with blower delay times of less than the prescribed 1.5-minute delay. Armstrong indicates that it is unable to take advantage of any of these exceptions for its GUK and GCK condensing gas furnaces, and GUJ, GCJ, and GHJ non-condensing gas furnaces.

Since the blower controls incorporated on the Armstrong furnaces are designed to impose a 30-second blower delay in every instance of start up, and since the current provisions do not specifically address this type of control, DOE agrees that a waiver should be granted to allow the 30-second blower time delay when testing the Armstrong GUK and GCK condensing gas furnaces, and GUJ, GCJ, and GHJ non-condensing gas furnaces. Accordingly, with regard to testing the GUK and GCK condensing gas furnaces, and GUJ, GCJ, and GHJ non-condensing gas furnaces, today's Decision and Order exempts Armstrong from the existing provisions regarding blower controls and allows testing with the 30-second delay.

It is, therefore, ordered that:

(1) The "Petition for Waiver" filed by Armstrong Air Conditioning Inc. (Case No. F–070) is hereby granted as set forth in paragraph (2) below, subject to the provisions of paragraphs (3), (4), and (5).

(2) Notwithstanding any contrary provisions of appendix N of 10 CFR part 430, subpart B, Armstrong Air Conditioning Inc., shall be permitted to test its GUK and GCK condensing gas furnaces, and GUJ, GCJ, and GHJ non-condensing gas furnaces on the basis of the test procedure specified in 10 CFR part 430, with modifications set forth below:

(i) Section 3.0 of appendix N is deleted and replaced with the following paragraph:

3.0 Test Procedure. Testing and measurements shall be as specified in section 9 in ANSI/ASHRAE Standard 103–82 with the exception of sections 9.2.2, 9.3.1, and 9.3.2, and the inclusion of the following additional procedures:

(ii) Add a new paragraph 3.10 to appendix N as follows:

3.10 Gas- and Oil-Fueled Central Furnaces. The following paragraph is in lieu of the requirement specified in section 9.3.1 of ANSI/ASHRAE Standard 103–82. After equilibrium conditions are achieved following the cool-down test and the required measurements performed, turn on the furnace and measure the flue gas temperature, using the thermocouple grid described above, at 0.5 and 2.5 minutes after the main burner(s) comes on. After the burner start-up, delay the blower start-up by 1.5 minutes (t-), unless: (1) The furnace employs a single motor to drive the power burner and the indoor air circulating blower, in which case the burner and blower shall be started together; or (2) the furnace is designed to operate using an unvarying delay time that is other than 1.5 minutes, in which case the fan control shall be permitted to start the blower; or (3) the delay time results in the activation of a temperature safety device which shuts off the burner, in which case the fan control shall be permitted to start the blower. In the latter case, if the fan control is adjustable, set it to start the blower at the highest temperature. If the fan control is permitted to start the blower, measure time delay, (t-), using a stopwatch. Record the measured temperatures. During the heat-up test for oil-fueled furnaces, maintain the draft in the flue pipe within ±0.01 inch of water column of the manufacturer's recommended on-period draft.

(iii) With the exception of the modifications set forth above, Armstrong Air Conditioning Inc. shall comply in all respects with the test procedures specified in appendix N of 10 CFR part 430, subpart B.

(3) The Waiver shall remain in effect from the date of issuance of this Order until DOE prescribes final test procedures appropriate to the GUK and GCK condensing gas furnaces, and GUJ, GCJ, and GHJ non-condensing gas furnaces manufactured by Armstrong Air Conditioning Inc.

(4) This Waiver is based upon the presumed validity of statements, allegations, and documentary materials submitted by the petitioner. This Waiver may be revoked or modified at any time upon a determination that the factual basis underlying the petition is incorrect.

(5) Effective June 6, 1994, this Waiver supersedes the Interim Waiver granted the Armstrong Air Conditioning Inc. on April 20, 1994. 59 FR 22841, May 3, 1994 (Case No. F–070).

Issued In Washington, DC, June 6, 1994.

Christine A. Ervin,

Assistant Secretary, Energy Efficiency and Renewable Energy.

[FR Doc. 94–14431 Filed 6–13–94; 8:45 am]

BILLING CODE 6450–01–P

[Case No. F–071]

Energy Conservation Program for Consumer Products: Decision and Order Granting a Waiver From the Furnace Test Procedure to Rheem Manufacturing Company

AGENCY: Office of Energy Efficiency and Renewable Energy, Department of Energy.

ACTION: Decision and order.

SUMMARY: Notice is given of the Decision and Order (Case No. F–071) granting a Waiver to Rheem Manufacturing Company (Rheem) from the existing Department of Energy (DOE) test procedure for furnaces. The Department is granting Rheem Petition for Waiver regarding blower time delay in calculation of Annual Fuel Utilization Efficiency (AFUE) for its GDG upflow, GLH downflow, GVH horizontal, and GPH upflow/horizontal gas furnaces.

FOR FURTHER INFORMATION CONTACT:

Cyrus H. Nasseri, U.S. Department of Energy, Office of Energy Efficiency and Renewable Energy, Mail Station EE–431, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586–9138

Eugene Margolis, Esq., U.S. Department of Energy, Office of General Counsel, Mail Station GC–72, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586–9507

SUPPLEMENTARY INFORMATION: In accordance with 10 CFR 430.27(g), notice is hereby given of the issuance of the Decision and Order as set out below. In the Decision and Order, Rheem has been granted a Waiver for its GDG upflow, GLH downflow, GVH horizontal, and GPH upflow/horizontal gas furnaces, permitting the company to use an alternate test method in determining AFUE.

Issued in Washington, DC, on June 6, 1994.

Christine A. Ervin,

Assistant Secretary, Energy Efficiency and Renewable Energy.

In the Matter of: Rheem Manufacturing Company. (Case No. F–071)

Background

The Energy Conservation Program for Consumer Products (other than automobiles) was established pursuant to the Energy Policy and Conservation Act (EPCA), Public Law 94–163, 89 Stat. 917, as amended by the National Energy Conservation Policy Act (NECPA), Public Law 95–619, 92 Stat. 3266, the National Appliance Energy Conservation Act of 1987 (NAECA), Public Law 100–12, the National Appliance Energy Conservation Amendments of 1988 (NAECA 1988), Public Law 100–357, and the Energy Policy Act of 1992 (EPAct), Public Law 102–486, 106 Stat. 2776, which requires DOE to prescribe standardized test procedures to measure the energy consumption of certain consumer products, including furnaces. The intent of the test procedures is to provide a comparable measure of energy consumption that will assist consumers in making purchasing decisions. These test procedures appear at 10 CFR part 430, subpart B.

The Department amended the prescribed test procedures by adding 10 CFR 430.27 to create a waiver process. 45 FR 64108, September 26, 1980. Thereafter, DOE further amended its appliance test procedure waiver process to allow the Assistant Secretary for Energy Efficiency and Renewable Energy (Assistant Secretary) to grant an Interim Waiver from test procedure requirements to manufacturers that have petitioned DOE for a waiver of such prescribed test procedures. 51 FR 42823, November 26, 1986.

The waiver process allows the Assistant Secretary to waive temporarily test procedures for a particular basic model when a petitioner shows that the basic model contains one or more design characteristics which prevent testing according to the prescribed test procedures or when the prescribed test procedures may evaluate the basic model in a manner so unrepresentative of its true energy consumption as to provide materially inaccurate comparative data. Waivers generally remain in effect until final test procedure amendments become effective, resolving the problem that is the subject of the waiver.

The Interim Waiver provisions added by the 1986 amendment allow the Assistant Secretary to grant an Interim Waiver when it is determined that the applicant will experience economic hardship if the Application for Interim Waiver is denied, if it appears likely that the Petition for Waiver will be granted, and/or the Assistant Secretary determines that it would be desirable for public policy reasons to grant immediate relief pending a determination on the Petition for Waiver. An Interim Waiver remains in effect for a period of 180 days or until DOE issues its determination on the Petition for Waiver, whichever is sooner, and may be extended for an additional 180 days, if necessary.

Rheem filed a "Petition for Waiver," dated March 23, 1994, in accordance with section 430.27 of 10 CFR part 430. The Department published in the **Federal Register** on May 3, 1994, Rheem's petition and solicited comments, data and information respecting the petition. 59 FR 22846. Rheem also filed an "Application for Interim Waiver" under section 430.27(g) which DOE granted on April 19, 1994. 59 FR 22846, May 3, 1994.

No comments were received concerning either the "Petition for Waiver" or the "Interim Waiver." The Department consulted with The Federal Trade Commission (FTC) concerning the Rheem Petition. The FTC did not have any objections to the issuance of the waiver to Rheem.

Assertions and Determinations

Rheem's Petition seeks a waiver from the DOE test provisions that require a 1.5-minute time delay between the ignition of the burner and the starting of the circulating air blower. Rheem requests the allowance to test using a 20-second blower time delay when testing its GDG upflow, GLH downflow, GVH horizontal, and GPH upflow/horizontal gas furnaces. Rheem states that since the 20-second delay is indicative of how these models actually operate and since such a delay results in an average increase in AFUE of 2.0 percentage points, the petition should be granted.

Under specific circumstances, the DOE test procedure contains exceptions which allow testing with blower delay times of less than the prescribed 1.5-minute delay. Rheem indicates that it is unable to take advantage of any of these exceptions for its GDG upflow, GLH downflow, GVH horizontal, and GPH upflow/horizontal gas furnaces.

Since the blower controls incorporated on the Rheem furnaces are designed to impose a 20-second blower delay in every instance of start up, and since the current provisions do not specifically address this type of control, DOE agrees that a waiver should be granted to allow the 20-second blower time delay when testing the Rheem GDG upflow, GLH downflow, GVH horizontal, and GPH upflow/horizontal gas furnaces. Accordingly, with regard to testing the GDG upflow, GLH downflow, GVH horizontal, and GPH upflow/horizontal gas furnaces, today's Decision and Order exempts Rheem from the existing provisions regarding blower controls and allows testing with the 20-second delay.

It is, therefore, ordered that:

(1) The "Petition for Waiver" filed by Rheem Manufacturing Company (Case No. F–071) is hereby granted as set forth

in paragraph (2) below, subject to the provisions of paragraphs (3), (4), and (5).

(2) Notwithstanding any contrary provisions of Appendix N of 10 CFR Part 430, Subpart B, Rheem Manufacturing Company, shall be permitted to test its GDG upflow, GLH downflow, GVH horizontal, and GPH upflow/horizontal gas furnaces on the basis of the test procedure specified in 10 CFR Part 430, with modifications set forth below:

(i) Section 3.0 of Appendix N is deleted and replaced with the following paragraph:

3.0 Test Procedure. Testing and measurements shall be as specified in section 9 in ANSI/ASHRAE Standard 103–82 with the exception of sections 9.2.2, 9.3.1, and 9.3.2, and the inclusion of the following additional procedures:

(ii) Add a new paragraph 3.10 to Appendix N as follows:

3.10 Gas- and Oil-Fueled Central Furnaces. The following paragraph is in lieu of the requirement specified in section 9.3.1 of ANSI/ASHRAE Standard 103–82. After equilibrium conditions are achieved following the cool-down test and the required measurements performed, turn on the furnace and measure the flue gas temperature, using the thermocouple grid described above, at 0.5 and 2.5 minutes after the main burner(s) comes on. After the burner start-up, delay the blower start-up by 1.5 minutes (t-), unless: (1) The furnace employs a single motor to drive the power burner and the indoor air circulating blower, in which case the burner and blower shall be started together; or (2) the furnace is designed to operate using an unvarying delay time that is other than 1.5 minutes, in which case the fan control shall be permitted to start the blower; or (3) the delay time results in the activation of a temperature safety device which shuts off the burner, in which case the fan control shall be permitted to start the blower. In the latter case, if the fan control is adjustable, set it to start the blower at the highest temperature. If the fan control is permitted to start the blower, measure time delay, (t-), using a stopwatch. Record the measured temperatures. During the heat-up test for oil-fueled furnaces, maintain the draft in the flue pipe within ±0.01 inch of water column of the manufacturer's recommended on-period draft.

(iii) With the exception of the modifications set forth above, Rheem Manufacturing Company shall comply in all respects with the test procedures specified in Appendix N of 10 CFR part 430, subpart B.

(3) The Waiver shall remain in effect from the date of issuance of this Order until DOE prescribes final test procedures appropriate to the GDG upflow, GLH downflow, GVH horizontal, and GPH upflow/horizontal gas furnaces manufactured by Rheem Manufacturing Company.

(4) This Waiver is based upon the presumed validity of statements, allegations, and documentary materials submitted by the petitioner. This Waiver may be revoked or modified at any time upon a determination that the factual basis underlying the petition is incorrect.

(5) Effective June 6, 1994, this Waiver supersedes the Interim Waiver granted the Rheem Manufacturing Company on April 19, 1994. 59 FR 22846, May 3, 1994 (Case No. F–071).

Issued In Washington, DC, on June 6, 1994.

Christine A. Ervin,

Assistant Secretary, Energy Efficiency and Renewable Energy.

Eugene Margolis, Esq., U.S. Department of Energy, Office of General Counsel, Mail Station GC–72, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586–9507.

SUPPLEMENTARY INFORMATION: In accordance with 10 CFR 430.27(g), notice is hereby given of the issuance of the Decision and Order as set out below. In the Decision and Order, Bard has been granted a Waiver for its DCC and DCL series central furnaces, permitting the company to use an alternate test method in determining AFUE.

Issued in Washington, DC, June 6, 1994.

Christine A. Ervin,

Assistant Secretary, Energy Efficiency and Renewable Energy.

Decision and Order

In The Matter Of: Bard Manufacturing Company. (Case No. F–068)

Background

The Energy Conservation Program for Consumer Products (other than automobiles) was established pursuant to the Energy Policy and Conservation Act (EPCA), Public Law 94–163, 89 Stat. 917, as amended by the National Energy Conservation Policy Act (NECPA), Public Law 95–619, 92 Stat. 3266, the National Appliance Energy Conservation Act of 1987 (NAECA), Public Law 100–12, the National Appliance Energy Conservation Amendments of 1988 (NAECA 1988), Public Law 100–357, and the Energy Policy Act of 1992 (EPAct), Public Law 102–486, 106 Stat. 2776, which requires DOE to prescribe standardized test procedures to measure the energy consumption of certain consumer products, including furnaces. The intent of the test procedures is to provide a comparable measure of energy consumption that will assist consumers in making purchasing decisions. These test procedures appear at 10 CFR part 430, subpart B.

The Department amended the prescribed test procedures by adding 10 CFR 430.27 to create a waiver process. 45 FR 64108, September 26, 1980. Thereafter, DOE further amended its appliance test procedure waiver process to allow the Assistant Secretary for Energy Efficiency and Renewable Energy (Assistant Secretary) to grant an Interim Waiver from test procedure requirements to manufacturers that have petitioned DOE for a waiver of such prescribed test procedures. 51 FR 42823, November 26, 1986.

The waiver process allows the Assistant Secretary to waive temporarily test procedures for a particular basic model when a petitioner shows that the basic model contains one or more design characteristics which prevent testing according to the prescribed test procedures or when the prescribed test procedures may evaluate the basic model in a manner so unrepresentative of its true energy consumption as to provide materially inaccurate

comparative data. Waivers generally remain in effect until final test procedure amendments become effective, resolving the problem that is the subject of the waiver.

The Interim Waiver provisions added by the 1986 amendment allow the Assistant Secretary to grant an Interim Waiver when it is determined that the applicant will experience economic hardship if the Application for Interim Waiver is denied, if it appears likely that the Petition for Waiver will be granted, and/or the Assistant Secretary determines that it would be desirable for public policy reasons to grant immediate relief pending a determination on the Petition for Waiver. An Interim Waiver remains in effect for a period of 180 days or until DOE issues its determination on the Petition for Waiver, whichever is sooner, and may be extended for an additional 180 days, if necessary.

Bard filed a "Petition for Waiver," dated March 8, 1994, in accordance with § 430.27 of 10 CFR part 430. The Department published in the **Federal Register** on April 25, 1994, Bard's petition and solicited comments, data and information respecting the petition. 59 FR 19710. Bard also filed an "Application for Interim Waiver" under § 430.27(g) which DOE granted on April 1, 1994. 59 FR 19710, April 25, 1994.

No comments were received concerning either the "Petition for Waiver" or the "Interim Waiver." The Department consulted with The Federal Trade Commission (FTC) concerning the Bard Petition. The FTC did not have any objections to the issuance of the waiver to Bard.

Assertions and Determinations

Bard's Petition seeks a waiver from the DOE test provisions that require a 1.5-minute time delay between the ignition of the burner and the starting of the circulating air blower. Bard requests the allowance to test using a 60-second blower time delay when testing its DCC and DCL series central furnaces. Bard states that since the 60-second delay is indicative of how these models actually operate and since such a delay results in an improvement in efficiency of 0.6 to 1.0 percent, the petition should be granted.

Under specific circumstances, the DOE test procedure contains exceptions which allow testing with blower delay times of less than the prescribed 1.5-minute delay. Bard indicates that it is unable to take advantage of any of these exceptions for its DCC and DCL series central furnaces.

Since the blower controls incorporated on the Bard furnaces are designed to impose a 60-second blower delay in every instance of start up, and since the current provisions do not specifically address this type of control, DOE agrees that a waiver should be granted to allow the 60-second blower time delay when testing the Bard DCC and DCL series central furnaces. Accordingly, with regard to testing the DCC and DCL series central furnaces, today's Decision and Order exempts Bard from the existing provisions regarding blower controls and allows testing with the 60-second delay.

It is, therefore, ordered that:

(1) The "Petition for Waiver" filed by Bard Manufacturing Company (Case No. F–068) is hereby granted as set forth in paragraph (2) below, subject to the provisions of paragraphs (3), (4), and (5).

(2) Notwithstanding any contrary provisions of Appendix N of 10 CFR Part 430, Subpart B, Bard Manufacturing Company, shall be permitted to test its DCC and DCL series central furnaces on the basis of the test procedure specified in 10 CFR Part 430, with modifications set forth below:

(i) Section 3.0 of Appendix N is deleted and replaced with the following paragraph:

3.0 Test Procedure. Testing and measurements shall be as specified in section 9 in ANSI/ASHRAE Standard 103–82 with the exception of sections 9.2.2, 9.3.1, and 9.3.2, and the inclusion of the following additional procedures:

(ii) Add a new paragraph 3.10 to Appendix N as follows:

3.10 Gas- and Oil-Fueled Central Furnaces. The following paragraph is in lieu of the requirement specified in section 9.3.1 of ANSI/ASHRAE Standard 103–82. After equilibrium conditions are achieved following the cool-down test and the required measurements performed, turn on the furnace and measure the flue gas temperature, using the thermocouple grid described above, at 0.5 and 2.5 minutes after the main burner(s) comes on. After the burner start-up, delay the blower start-up by 1.5 minutes (t–), unless: (1) The furnace employs a single motor to drive the power burner and the indoor air circulating blower, in which case the burner and blower shall be started together; or (2) the furnace is designed to operate using an unvarying delay time that is other than 1.5 minutes, in which case the fan control shall be permitted to start the blower; or (3) the delay time results in the activation of a temperature safety device which shuts off the burner, in which case the fan control shall be permitted to start the blower. In the latter case, if the fan control is adjustable, set it to start the blower at the highest temperature. If the fan control is permitted to start the blower, measure time delay, (t-), using a stopwatch. Record the measured temperatures. During the heat-up test for oil-fueled furnaces, maintain the draft in the flue pipe within ±0.01 inch of water column of the manufacturer's recommended on-period draft.

(iii) With the exception of the modifications set forth above, Bard Manufacturing Company shall comply in all respects with the test procedures specified in Appendix N of 10 CFR Part 430, Subpart B.

(3) The Waiver shall remain in effect from the date of issuance of this Order until DOE prescribes final test procedures appropriate to the DCC and DCL series central furnaces manufactured by Bard Manufacturing Company.

(4) This Waiver is based upon the presumed validity of statements, allegations, and documentary materials submitted by the petitioner. This Waiver may be revoked or modified at any time upon a determination that the factual basis underlying the petition is incorrect.

(5) Effective June 6, 1994, this Waiver supersedes the Interim Waiver granted the Bard Manufacturing Company on April 1, 1994. 59 FR 19710, April 25 1994 (Case No. F–068).

Issued In Washington, DC, on June 6, 1994.

Christine A. Ervin,

Assistant Secretary, Energy Efficiency and Renewable Energy

BILLING CODE 6450–01–P

[Case No. F–069]

Energy Conservation Program for Consumer Products: Decision and Order Granting a Waiver From the Furnace Test Procedure to DMO Industries

AGENCY: Office of Energy Efficiency and Renewable Energy, Department of Energy.

ACTION: Decision and order

SUMMARY: Notice is given of the Decision and Order (Case No. F–069) granting a Waiver to DMO Industries (DMO) from the existing Department of Energy (DOE) test procedure for furnaces. The Department is granting DMO's Petition for Waiver regarding blower time delay in calculation of Annual Fuel Utilization Efficiency (AFUE) for its HDS series gas furnaces.

FOR FURTHER INFORMATION CONTACT:

Cyrus H. Nasseri, U.S. Department of Energy, Office of Energy Efficiency and Renewable Energy, Mail Station EE–431, Forrestal Building, 1000 Independence Avenue, SW Washington, DC 20585, (202) 586–9138

Eugene Margolis, Esq., U.S. Department of Energy, Office of General Counsel

Mail Station GC–72, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586–9507

SUPPLEMENTARY INFORMATION: In accordance with 10 CFR 430.27(g), notice is hereby given of the issuance of the Decision and Order as set out below. In the Decision and Order, DMO has been granted a Waiver for its HDS series gas furnaces, permitting the company to use an alternate test method in determining AFUE.

Issued in Washington, DC, June 6, 1994.

Christine A. Ervin,

Assistant Secretary, Energy Efficiency and Renewable Energy.

Decision and Order

In the Matter of: DMO Industries. (Case No. F–069)

Background

The Energy Conservation Program for Consumer Products (other than automobiles) was established pursuant to the Energy Policy and Conservation Act (EPCA), Public Law 94–163, 89 Stat. 917, as amended by the National Energy Conservation Policy Act (NECPA), Public Law 95–619, 92 Stat. 3266, the National Appliance Energy Conservation Act of 1987 (NAECA), Public Law 100–12, the National Appliance Energy Conservation Amendments of 1988 (NAECA 1988), Public Law 100–357, and the Energy Policy Act of 1992 (EPAct), Public Law 102–486, 106 Stat. 2776, which requires DOE to prescribe standardized test procedures to measure the energy consumption of certain consumer products, including furnaces. The intent of the test procedures is to provide a comparable measure of energy consumption that will assist consumers in making purchasing decisions. These test procedures appear at 10 CFR Part 430, subpart B.

The Department amended the prescribed test procedures by adding 10 CFR 430.27 to create a waiver process. 45 FR 64108, September 26, 1980. Thereafter, DOE further amended its appliance test procedure waiver process to allow the Assistant Secretary for Energy Efficiency and Renewable Energy (Assistant Secretary) to grant an Interim Waiver from test procedure requirements to manufacturers that have petitioned DOE for a waiver of such prescribed test procedures. 51 FR 42823, November 26, 1986.

The waiver process allows the Assistant Secretary to waive temporarily test procedures for a particular basic model when a petitioner shows that the basic model contains one or more design characteristics which prevent testing according to the prescribed test procedures or when the prescribed test procedures may evaluate the basic model in a manner so unrepresentative of its true energy consumption as to provide materially inaccurate comparative data. Waivers generally remain in effect until final test procedure amendments become effective, resolving the problem that is the subject of the waiver.

The Interim Waiver provisions added by the 1986 amendment allow the Assistant Secretary to grant an Interim Waiver when it is determined that the applicant will experience economic hardship if the Application for Interim Waiver is denied, if it appears likely that the Petition for Waiver will be granted, and/or the Assistant Secretary determines that it would be desirable for public policy reasons to grant immediate relief pending a determination on the Petition for Waiver. An Interim Waiver remains in effect for a period of 180 days or until DOE issues its determination on the Petition for Waiver, whichever is sooner, and may be extended for an additional 180 days, if necessary.

DMO filed a "Petition for Waiver," dated March 4, 1994, in accordance with section 430.27 of 10 CFR Part 430. The Department published in the **Federal Register** on May 3, 1994, DMO's petition and solicited comments, data and information respecting the petition. 59 FR 22844. DMO also filed an "Application for Interim Waiver" under section 430.27(g) which DOE granted on April 20, 1994. 59 FR 22844, May 3, 1994.

No comments were received concerning either the "Petition for Waiver" or the "Interim Waiver." The Department consulted with The Federal Trade Commission (FTC) concerning the DMO Petition. The FTC did not have any objections to the issuance of the waiver to DMO.

Assertions and Determinations

DMO's Petition seeks a waiver from the DOE test provisions that require a 1.5-minute time delay between the ignition of the burner and the starting of the circulating air blower. DMO requests the allowance to test using a 30-second blower time delay when testing its HDS series gas furnaces. DMO states that since the 30-second delay is indicative of how these models actually operate and since such a delay results in an increase in AFUE of 2.0 percentage points for HDS series gas furnaces, the petition should be granted.

Under specific circumstances, the DOE test procedure contains exceptions which allow testing with blower delay times of less than the prescribed 1.5-minute delay. DMO indicates that it is unable to take advantage of any of these exceptions for its HDS series gas furnaces.

Since the blower controls incorporated on the DMO furnaces are designed to impose a 30-second blower delay in every instance of start up, and since the current provisions do not specifically address this type of control, DOE agrees that a waiver should be granted to allow the 30-second blower time delay when testing the HDS series gas furnaces. Accordingly, with regard to testing the HDS series gas furnaces, today's Decision and Order exempts DMO from the existing provisions regarding blower controls and allows testing with the 30-second delay.

It is, therefore, ordered that:

(1) The "Petition for Waiver" filed by DMO Industries (Case No. F–069) is hereby granted as set forth in paragraph (2) below, subject to the provisions of paragraphs (3), (4), and (5).

(2) Notwithstanding any contrary provisions of Appendix N of 10 CFR Part 430, Subpart B, DMO Industries, shall be permitted to test its HDS series gas furnaces on the basis of the test procedure specified in 10 CFR Part 430, with modifications set forth below:

(i) Section 3.0 of Appendix N is deleted and replaced with the following paragraph:

3.0 Test Procedure. Testing and measurements shall be as specified in section 9 in ANSI/ASHRAE Standard 103–82 with the exception of sections 9.2.2, 9.3.1, and 9.3.2, and the inclusion of the following additional procedures:

(ii) Add a new paragraph 3.10 to Appendix N as follows:

3.10 Gas- and Oil-Fueled Central Furnaces. The following paragraph is in lieu of the requirement specified in section 9.3.1 of ANSI/ASHRAE Standard 103–82. After equilibrium conditions are achieved following the cool-down test and the required measurements performed, turn on the furnace and measure the flue gas temperature, using the thermocouple grid described above, at 0.5 and 2.5 minutes after the main burner(s) comes on. After the burner start-up, delay the blower start-up by 1.5 minutes (t-), unless: (1) The furnace employs a single motor to drive the power burner and the indoor air circulating blower, in which case the burner and blower shall be started together; or (2) the furnace is designed to operate using an unvarying delay time that is other than 1.5 minutes, in which case the fan control shall be permitted to start the blower; or (3) the delay time results in the activation of a temperature safety device which shuts off the burner, in which case the fan control shall be permitted to start the blower. In the latter case, if the fan control is adjustable, set it to start the blower at the

highest temperature. If the fan control is permitted to start the blower, measure time delay, (t-), using a stopwatch. Record the measured temperatures. During the heat-up test for oil-fueled furnaces, maintain the draft in the flue pipe within ±0.01 inch of water column of the manufacturer's recommended on-period draft.

(iii) With the exception of the modifications set forth above, DMO Industries shall comply in all respects with the test procedures specified in Appendix N of 10 CFR Part 430, Subpart B.

(3) The Waiver shall remain in effect from the date of issuance of this Order until DOE prescribes final test procedures appropriate to the HDS series gas furnaces manufactured by DMO Industries

(4) This Waiver is based upon the presumed validity of statements, allegations, and documentary materials submitted by the petitioner. This Waiver may be revoked or modified at any time upon a determination that the factual basis underlying the petition is incorrect.

(5) Effective June 6, 1994, this Waiver supersedes the Interim Waiver granted the DMO Industries on April 20, 1994. 59 FR 22844, May 3, 1994 (Case No. F-069).

Issued In Washington, DC, June 6, 1994

Christine A. Ervin,

Assistant Secretary, Energy Efficiency and Renewable Energy.

BILLING CODE 6450-01-P

Federal Energy Regulatory Commission

[Project No. 2666 Maine]

Bangor Hydro-Electric Company; Intent to File an Application for a New License

June 8, 1994.

Take notice that Bangor Hydro-Electric Company, the existing licensee for the Medway Hydroelectric Project No. 2666, filed a timely notice of intent to file an application for a new license, pursuant to 18 CFR 16.6 of the Commission's Regulations. The original license for Project No. 2666 was issued effective April 1, 1962, and expires March 31, 1999.

The project is located on the West Branch of the Penobscot River in Penobscot County, Maine. The principal works of the Medway Project include a 343-foot long, 20-foot high concrete gravity dam with flashboards and with an integral powerhouse containing generating units having an installed capacity of 3,440 Kw; a reservoir with a surface area of 120 acres at a normal pond elevation of 259.3 feet m.s.l.; 46-Kv transmission facilities connecting to the Medway substation; and appurtenant facilities.

Pursuant to 18 CFR 16.7, the licensee is required henceforth to make available certain information to the public. This information is now available from the licensee at 33 State Street, P.O. Box 932, Bangor, Maine 04402, telephone (207) 945-5621.

Pursuant to 18 CFR 16.8, 16.9 and 16.10, each application for a new license and any competing license applications must be filed with the Commission at least 24 months prior to the expiration of the existing license. All applications for license for this project must be filed by March 31, 1997.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Docket No. RP91-47-007, et al.]

National Fuel Gas Supply Corporation; Compliance Filing

June 8, 1994.

Take notice that on June 3, 1994, National Fuel Gas Supply Corporation ("National") tendered for filing as part of its FERC Gas Tariff, Third Revised Volume No. 1, proposed Original Sheet No. 216-A; First Revised Sheet Nos. 213, 214, 215 and 216; Third Revised Sheet No. 222; and Fifth Revised Sheet No. 225, with an effective date of June 4, 1994.

National states that these tariff sheets are filed in compliance with Ordering Paragraph (A) of the Federal Energy Regulatory Commission's May 4, 1994, order in the above-captioned proceeding. National further states that these proposed tariff sheets reflect the allocation of all of the fixed take-or-pay charges billed to it by Tennessee Gas Pipeline Company, and some of the fixed charges billed to it by CNG Transmission Corporation, on the basis of its customers' "Winter Requirements Quantities ("WRQ") determinants.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rule 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.214). All such protests should be filed on or before June 15, 1994. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Docket No. RP94-282-000]

Paiute Pipeline Co.; Notice of Proposed Changes in FERC Gas Tariff

June 8, 1994.

Take notice that on May 31, 1994, Paiute Pipeline Company (Paiute) tendered for filing to be part of its FERC Gas Tariff, Second Revised Volume No. 1-A, First Revised Sheet No. 161, with an effective date of June 1, 1994.

Paiute states that it is submitting the proposed tariff sheet in order to implement an element of a settlement agreement in principle recently reached by the active parties in Paiute's pending general rate case proceeding in Docket No. RP93-6-000. According to Paiute, as part of that resolution, the parties have agreed in principle to a realignment of the summer period billing deterimants over a period of several years, including the summer period for 1994. Paiute indicates, however, that because its customers' monthly billing determinants are treated as their contract demands, the revised billing determinants agreed to by the firm shippers for the 1994 summer period need to be filed and made effective immediately. Paiute states, therefore, that it is submitting the proposed tariff sheet to reflect the agreed-upon billing determinants to be in effect as of June 1994.

Paiute requests that the tendered tariff sheet be accepted for filing to become effective June 1, 1994.

Paiute states that copies of the filing were served upon all of Paiute's customers and interested state regulatory commissions, and upon all parties on the service list in Docket No. RP93–6–000.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with 18 CFR 385.214 or 385.211 of the Commission's Rules and Regulations. All such motions or protests should be filed on or before June 15, 1994. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the public reference room.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

[Project No. 2017 California]

Southern California Edison Co.; Notice of Intent To File an Application for a New License

June 8, 1994.

Take notice that Southern California Edison Company, the existing licensee for the Big Creek No. 4 Hydroelectric Project No. 2017, filed a timely notice of intent to file an application for a new license, pursuant to 18 CFR 16.6 of the Commission's Regulations. The original license for Project No. 2017 was issued effective March 1, 1949, and expires March 1, 1999.

The project is located on the San Joaquin River in Fresno and Madera Counties, California. The principal works of the Big Creek No. 4 Project include a concrete gravity dam about 228 feet high and about 954 feet long; a reservoir of approx. 11, 275 acre-feet storage; an intake structure to a pressure tunnel about 11,275 feet long; a penstock and surge tank to a powerhouse with 84 MW installed capacity; a substation and 220-kilovolt transmission line connection; and appurtenant facilities.

Pursuant to 18 CFR 16.7, the licensee is required henceforth to make available certain information to the public. This information is now available from the licensee at 2244 Walnut Grove Avenue, Rosemead, California 91770, telephone (818) 302–8944.

Pursuant to 18 CFR 16.8, 16.9 and 16.10, each application for a new license and any competing license applications must be filed with the Commission at least 24 months prior to the expiration of the existing license. All applications for license for this project must be filed by March 1, 1997.

BILLING CODE 6717–01–M

[Docket No. RP94–183–001]

Southern Natural Gas Co., South Georgia Natural Gas Co.; Notice of Filing of Revised Tariff Sheets

June 8, 1994.

Take notice that on June 3, 1994, Southern Natural Gas Company (Southern) tendered for filing the tariff sheets to its FERC Gas Tariff, Original Revised Volume No. 2a listed on Exhibit A hereto, to be effective August 1, 1994. Also, South Georgia Natural Gas Company (South Georgia) tendered for filing the tariff sheets to its FERC Gas Tariff, Original Volume No. 2 listed on Exhibit B hereto, to be effective August 1, 1994.

Southern and South Georgia state that the purpose of this filing is to revise the Rate Schedules applicable to the offsystem storage service they provide through use of storage facilities and services rendered by ANR Pipeline Company and ANR Storage Company. The changes to the Rate Schedules on the tariff sheets filed reflect the elimination of the requirement that the customers purchase the gas to be injected into storage from Southern and/or South Georgia. Southern and South Georgia also request the necessary authority to implement the changes under their certificates of public convenience and necessity in Docket No. CP79–374 and Docket No. CP79–382, respectively. Such filing has been made in compliance with the Federal Energy Regulatory Commission's (Commission) order issued on May 4, 1994, in the above captioned proceeding. Southern and South Georgia have requested that the revised tariff sheets be made effective as of August 1, 1994.

Southern and South Georgia state that copies of the filing will be served upon their shippers, interested state commissions and all parties to this proceeding.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rule 211 of the Commission's Rules of Practice and Procedure 18 CFR 385.211. All such protests should be filed on or before June 15, 1994. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. CP94–586–000]

Williams Natural Gas Co.; Notice of Request Under Blanket Authorization

June 8, 1944.

Take notice that on June 3, 1994, Williams Natural Gas Company (WNG), P.O. Box 3288, Tulsa, Oklahoma 74101, filed in Docket No. CP94–586–000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to install a total of approximately 12 miles of 16-inch lateral pipeline, measuring, regulating and appurtenant facilities for the delivery of transportation gas to Empire District Electric Company (Empire) at two locations in Jasper County, Missouri under WNG's blanket certificate issued in Docket No. CP82–479–000 pursuant to Section 7 of the Natural Gas Act, all as more fully set forth in the request that is on file with the Commission and open to public inspection.

WNG states that the total projected volume of delivery is estimated to be approximately 9.5 Bcf annually with a total peak day volume estimated to be 30 Mmcf. WNG further states that the estimated cost of construction is $4,315,680 which would be paid with available funds.

WNG says that this charge is not prohibited by an existing tariff and it has sufficient capacity to accomplish the deliveries specified without detriment or disadvantage to its other customers.

Any person or the Commission's staff may, within 45 days after issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefor, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to Section 7 of the Natural Gas Act.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

Office of Hearings and Appeals

Issuance of Proposed Decisions and Orders; Week of May 9 Through May 13, 1994

During the week of May 9 through May 13, 1994, the proposed decisions and orders summarized below were issued by the Office of Hearings and Appeals of the Department of Energy with regard to applications for exception.

Under the procedural regulations that apply to exception proceedings (10 CFR part 205, subpart D), any person who will be aggrieved by the issuance of a proposed decision and order in final form may file a written notice of objection within ten days of service. For purposes of the procedural regulations, the date of service of notice is deemed to be the date of publication of this Notice or the date an aggrieved person receives actual notice, whichever occurs first.

The procedural regulations provide that an aggrieved party who fails to file a Notice of Objection within the time period specified in the regulations will be deemed to consent to the issuance of the proposed decision and order in final form. An aggrieved party who wishes to contest a determination made in a proposed decision and order must also file a detailed statement of objections within 30 days of the date of service of the proposed decision and order. In the statement of objections, the aggrieved party must specify each issue of fact or law that it intends to contest in any further proceeding involving the exception matter.

Copies of the full text of these proposed decisions and orders are available in the Public Reference Room of the Office of Hearings and Appeals, room 1E–234, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585, Monday through Friday, between the hours of 1 p.m. and 5 p.m., except federal holidays.

Dated: June 8, 1994

George B. Breznay,

Director, Office of Hearings and Appeals

Fitch Oil Company, Inc., Holly Springs Mississippi, LEE–0101 Reporting Requirements

Fitch Oil Company, Inc., (Fitch) filed an Application for Exception from the provision of filing Form EIA–782B, entitled "Resellers'/Retailers' Monthly Petroleum Product Sales Report." The exception request, if granted, would permit Fitch to be exempted from filing Form EIA–782B. In considering the request, the DOE found that the firm was suffering a gross inequity due to the firm's personnel shortage. On May 11, 1994, the DOE issued a Proposed Decision and Order which determined that the exception request be granted in part and that Fitch be relieved of the reporting requirement from April 1994 through December 1994.

Saupe' Enterprises, Inc., Fairbanks Alaska, LEE–0105 Reporting Requirements

Saupe' Enterprises, Inc., (Saupe') filed an Application for Exception from the provision of filing Form EIA–782B, entitled "Reseller/Retailer's Monthly Petroleum Product Sales Report." The exception request, if granted, would permit Saupe' to be exempted from filing Form EIA–782B. On May 11, 1994, the Department of Energy issued a Proposed Decision and Order which determined that the exception request be denied.

BILLING CODE 6450–01–P

Southwestern Power Administration

Integrated System

AGENCY: Southwestern Power Administration, DOE.

ACTION: Notice of proposed extension of integrated system power rates and opportunities for public review and comment.

SUMMARY: The Current Integrated System Rates were approved by the Federal Energy Regulatory Commission (FERC) on September 18, 1991, [EF91–4011–000, 56 FERC 61, 398]. These rates were effective October 1, 1990, and will expire September 30, 1994. The Administrator, Southwestern, has prepared Current and Revised 1994 Power Repayment Studies for the Integrated System which show the need for a minor rate adjustment of $726,051 (0.8 percent increase) in annual revenues. In accordance with Southwestern's rate adjustment threshold, dated June 23, 1987, the Administrator, Southwestern, may determine, on a case by case basis, that for a revenue decrease or increase in the magnitude of plus-or-minus two percent, deferral of a formal rate filing is in the best interest of the Government. Also, the Deputy Secretary of Energy has the authority to extend rates, previously confirmed and approved by FERC, on an interim basis, pursuant to 10 CFR 903.22(h) and 903.23(a). In accordance with DOE rate extension authority and Southwestern's rate adjustment threshold, the Administrator is proposing that the rate adjustment be deferred and that the current rates be extended for a one-year period effective through September 30, 1995.

DATES: Written comments are due on or before June 29, 1994

ADDRESSES: Written comments should be submitted to the Administrator, Southwestern Power Administration U.S. Department of Energy, P.O. Box 1619, Tulsa, Oklahoma 74101.

FOR FURTHER INFORMATION CONTACT: George C. Grisaffe, Assistant Administrator, Office of Administration and Rates, Southwestern Power Administration, Department of Energy, P.O. Box 1619, Tulsa, Oklahoma 74101 (918) 581–7419.

SUPPLEMENTARY INFORMATION: The U.S. Department of Energy was created by an

Act of the U.S. Congress, Department of Energy Organization Act, Public Law 95–91, dated August 4, 1977, and Southwestern's power marketing activities were transferred from the Department of the Interior to the Department of Energy, effective October 1, 1977.

Southwestern markets power from 24 multiple-purpose reservoir projects with power facilities constructed and operated by the U.S. Army Corps of Engineers. These projects are located in the States of Arkansas, Missouri, Oklahoma and Texas. Southwestern's marketing area includes these states plus Kansas and Louisiana. Of the total, 22 projects comprise an Integrated System and are interconnected through Southwestern's transmission system and exchange agreements with other utilities. The other two projects (Sam Rayburn and Robert Douglas Willis) are not interconnected with Southwestern's Integrated System. Instead, their power is marketed under separate contracts through which the two customers purchase the entire power output of the projects at the dams.

Following Department of Energy Order Number RA 6120.2, the Administrator, Southwestern, prepared a 1994 Current Power Repayment Study (PRS) using existing system rate schedules. The Study shows the actual status of repayment through FY 1993 at $288,259,891 on a total investment of $971,634,103. The FY 1994 Revised PRS indicates the need for an increase in annual revenues of $726,051, or 0.8 percent, over and above the present annual revenues.

As a matter of practice, Southwestern would defer an indicated rate adjustment that falls within Southwestern's plus-or-minus two percent rate adjustment threshold. The threshold, which was established in 1987, was developed to add efficiency to the process of maintaining adequate rates and is consistent with cost recovery criteria within DOE Order Number RA 6120.2 regarding rate adjustment plans. The Integrated System's FY 1993 (last year's) PRS concluded that the annual revenues needed to be decreased by 1.1 percent. At that time, it was determined prudent to defer the decrease in accordance with the established threshold. As previously cited, the FY 1994 (this year's) PRS indicates that revenues would need to be increased by 0.8 percent, or $726,051 per year. It once again seems prudent to defer a rate adjustment in accordance with Southwestern's rate adjustment threshold and reevaluate the ability of the existing rate to provide sufficient revenues to satisfy costs projected in the FY 1995 (next year's) PRS.

On September 18, 1991, the current rate schedules for the Integrated System were confirmed and approved by the FERC on a final basis for a period that ends on September 30, 1994. In accordance with 10 CFR 903.22(h) and 903.23(a), the Deputy Secretary may extend existing rates on an interim basis beyond the period specified by the FERC. As a result of the benefits obtained by a rate adjustment deferral and the Deputy Secretary's authority to extend a previously approved rate, Southwestern's Administrator is proposing to extend the current Integrated System rate schedules for the one-year period beginning October 1, 1994, and extending through September 30, 1995.

Opportunity is presented for customers and interested parties to receive copies of the study data for the Integrated System. If you desire a copy of the Repayment Study Data Package for the Integrated System, please submit your request to: Mr. George Grisaffe, Assistant Administrator, Office of Administration and Rates, P.O. Box 1619, Tulsa, OK 74101, (918) 581–7419.

Following review of the written comments, the Administrator will submit the rate extension proposal for the Integrated System to the Deputy Secretary of Energy for confirmation and approval.

Issued in Tulsa, Oklahoma, this 6th day of June, 1994.

J. M. Shafer,

Administrator.

ENVIRONMENTAL PROTECTION AGENCY

[FRL–4998–4]

Proposed Settlement Agreement; Refrigerant Recycling Regulations

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of proposed settlement agreement; request for public comment.

SUMMARY: In accordance with section 113(g) of the Clean Air Act ("Act"), notice is hereby given of a proposed settlement agreement concerning litigation instituted against the Environmental Protection Agency ("EPA") regarding refrigerant recycling regulations promulgated by EPA under section 608 of the Clean Air Act. The proposed settlement agreement provides that EPA will undertake rulemaking regarding revisions to provisions of those regulations concerning the repair of leaks of refrigerant from industrial process refrigeration equipment and the identity of persons subject to the technician certification requirements of the regulations. The proposed settlement agreement provides that EPA is to propose certain revisions by September 1, 1994, and take final action on the proposal by June 1, 1995. It also provides that EPA will undertake proceedings regarding the stay of the leak repair regulations as they apply to industrial process refrigeration equipment during the pendency of the rulemaking to revise the regulations.

For a period of thirty [30] days following the date of publication of this notice, the Agency will receive written comments relating to the settlement. EPA or the Department of Justice may withhold or withdraw consent to the proposed settlement agreement if the comments disclose facts or circumstances that indicate that such consent is inappropriate, improper, inadequate, or inconsistent with the requirements of the Act.

Copies of the settlement agreement are available from Jerry Ellis, Air and Radiation Division (2344R), Office of General Counsel, U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460, (703) 235–5330. Written comments should be sent to Kevin W. McLean at the above address and must be submitted on or before July 14, 1994.

Dated: June 6, 1994.

Jean C. Nelson,

General Counsel.

BILLING CODE 6714–01–M

FEDERAL MARITIME COMMISSION

[Docket No. 94–11]

Trans Ocean-Pacific Forwarding, Inc., Possible Violations of Section 10(b)(1) of the Shipping Act of 1984; Order of Investigation

Trans Ocean-Pacific Forwarding, Inc. ("TOP") is a non-vessel-operating common carrier ("NVOCC") which has a tariff on file at the Federal Maritime Commission ("Commission"). TOP transports property between United States Atlantic and Pacific Coast ports and ports in the Far East, Southeast and Southwest Asia, Europe, the Mediterranean, Australia, New Zealand and Oceania.

Section 10(b)(1) of the Shipping Act of 1984 ("1984 Act"), 46 U.S.C. app. 1709(b)(1), prohibits a common carrier from charging, demanding, collecting or receiving greater, less or different compensation for transportation of property than the rates shown in its tariffs or service contracts. TOP appears to have violated section 10(b)(1) of the 1984 Act by transporting shipments subsequent to September 30, 1990 at rates less than the applicable rates filed in its tariff.

Now therefore it is ordered, That pursuant to sections 10, 11, and 13 of the 1984 Act, 46 U.S.C. app. 1709, 1710 and 1712, an investigation is hereby instituted to determine:

1. Whether TOP violated section 10(b)(1) of the 1984 Act by transporting shipments in connection with which it charged rates less than those filed in its tariff; and

2. Whether, in the event TOP violated section 10(b)(1) of the 1984 Act, civil penalties should be assessed against TOP and, if so, the amount of such penalties; whether a cease and desist order should be issued; or whether TOP's tariff should be suspended:

It is further ordered, That a public hearing will be held in this proceeding and that this matter be assigned for hearing before an Administrative Law Judge ("ALJ") of the Commission's Office of Administrative Law Judges at a date and place to be hereafter determined by the ALJ in compliance with Rule 61 of the Commission's Rules of Practice and Procedure, 46 CFR 502.61. The hearing shall include oral testimony and cross-examination in the discretion of the ALJ only after consideration has been given by the parties and the ALJ to the use of alternative forms of dispute resolution, and upon proper showing that there are genuine issues of material fact that cannot be resolved on the basis of sworn statements, affidavits, depositions, or other documents, or that the nature of the matter in issue is such that an oral hearing and cross-examination are necessary for the development of an adequate record;

It is further ordered, That Trans Ocean-Pacific Forwarding, Inc. be named a Respondent in this proceeding;

It is further ordered, That the Commission's Bureau of Hearing Counsel is designated a party to this proceeding;

It is further ordered, That notice of this Order be published in the **Federal Register**, and a copy be served on parties of record;

It is further ordered, That other persons having an interest in participating in this proceeding may file

petitions for leave to intervene in accordance with Rule 72 of the Commission's Rules of Practice and Procedure, 46 CFR 502.72;

It is further ordered, That all further notices, orders, and/or decisions issued by or on behalf of the Commission in this proceeding, including notice of the time and place of hearing or prehearing conference, shall be served on parties of record;

It is further ordered, That all documents submitted by any party of record in this proceeding shall be directed to the Secretary, Federal Maritime Commission, Washington, DC 20573, shall comply with Subpart H of the Commission's Rules of Practice and Procedure, 46 CFR 502.111–119, and shall be served on parties of record; and

It is further ordered, That in accordance with Rule 61 of the Commission's Rules of Practice and Procedure, 46 CFR 502.61, the initial decision of the ALJ shall be issued by June 9, 1995, and the final decision of the Commission shall be issued by October 9, 1995.

By the Commission.

Joseph C. Polking,

Secretary.

BILLING CODE 6730–01–M

Ocean Freight Forwarder License; Reissuance of License

By Order of Revocation served September 17, 1993, the ocean freight forwarder license (FMC–1910) of Vene-Embarques, Inc., P.O. Box 521127, Miami, Florida 33152–1127, was revoked because of the licensee's failure to maintain a valid surety bond on file with the Commission. Notice of this action was published on October 4, 1993 at 58 FR 51631.

By letter dated October 14, 1993, the licensee's surety advised the Commission that it had elected to rescind its earlier request to cancel the licensee's surety coverage and that bond No. 2918 was to remain in full force and effect, with no lapse in coverage. Similarly, by letter dated October 14, 1993, Vene-Embarques, Inc. requested that its license be reissued.

Through administrative oversight, notice of the reissuance of the license of Vene-Embarques, Inc. was not published. Therefore, notice is hereby published that the license (FMC–1910) of Vene-Embarques, Inc. was reissued effective September 11, 1993.

Bryant L. VanBrakle,

Director, Bureau of Tariffs, Certification and Licensing.

BILLING CODE 6730–01–M

FEDERAL RESERVE SYSTEM

Banco Santander, S.A., et al.; Acquisitions of Companies Engaged in Permissible Nonbanking Activities

The organizations listed in this notice have applied under § 225.23(a)(2) or (f) of the Board's Regulation Y (12 CFR 225.23(a)(2) or (f)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to acquire or control voting securities or assets of a company engaged in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Unless otherwise noted, comments regarding each of these applications must be received at the Reserve Bank indicated for the application or the offices of the Board of Governors not later than June 30, 1994.

A. Federal Reserve Bank of New York (William L. Rutledge, Senior Vice President) 33 Liberty Street, New York, New York 10045:

1. Banco Santander, S.A., Santander, Spain; to acquire all of the voting stock of First Inter-Bancorp, and its subsidiary, Mid-Hudson Savings Bank FSB both of Fishkill, New York, and thereby engage in operating a savings association pursuant to § 225.25(b)(9) of the Board's Regulation Y.

B. Federal Reserve Bank of St. Louis (Randall C. Sumner, Vice President) 411 Locust Street, St. Louis, Missouri 63166:

1. National Commerce Bancorporation, Memphis, Tennessee; to acquire NBC Bank, FSB, Knoxville, Tennessee, and thereby engage in operating a federally-chartered savings bank and engage in only those activities permitted to federal savings bank subsidiaries of bank holding companies pursuant to § 225.25(b)(9) of the Board's Regulation Y. **Comments on this application must be received by July 8, 1994.**

Board of Governors of the Federal Reserve System, June 8, 1994.

Jennifer J. Johnson,

Associate Secretary of the Board

BILLING CODE 6210-01-F

FEDERAL RESERVE SYSTEM

BNCCORP, Inc; Notice of Application to Engage de novo in Permissible Nonbanking Activities

The company listed in this notice has filed an application under § 225.23(a)(1) of the Board's Regulation Y (12 CFR 225.23(a)(1)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to commence or to engage *de novio*, either directly or through a subsidiary, in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Comments regarding the application must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than July 5, 1994.

A. Federal Reserve Bank of Minneapolis (James M. Lyon, Vice President) 250 Marquette Avenue, Minneapolis, Minnesota 55480:

1. BNCCORP, INC., Bismarck, North Dakota; to engage *de novo* in providing management consulting to nonaffiliated bank and nonbank depository institutions pursuant to § 225.25(b)(11) of the Board's regulation Y. These activities will be conducted in North Dakota, South Dakota, Minnesota, and Montana.

Board of Governors of the Federal Reserve System, June 7, 1994.

BILLING CODE 6210-01-F

Northwest Illinois Bancorp; Formation of, Acquisition by, or Merger of Bank Holding Companies; and Acquisition of Nonbanking Company

The company listed in this notice has applied under § 225.14 of the Board's Regulation Y (12 CFR 225.14) for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) to become a bank holding company or to acquire voting securities of a bank or bank holding company. The listed company has also applied under § 225.23(a)(2) of Regulation Y (12 CFR 225.23(a)(2)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to acquire or control voting securities or assets of a company engaged in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies, or to engage in such an activity. Unless otherwise noted,

these activities will be conducted throughout the United States.

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Comments regarding the application must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than July 8, 1994.

A. Federal Reserve Bank of Chicago (James A. Bluemle, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. Northwest Illinois Bancorp, Freeport, Illinois; to acquire 100 percent of the voting shares of Tri-State Bank and Trust Company, East Dubuque, Illinois.

In connection with this application, Applicant also proposes to acquire Tri-State Insurance Agency, Inc., East Dubuque, Illinois, and thereby engage in general insurance agency and underwriting activities pursuant to § 225.25(b)(8)(i), (ii), (iii), and (iv) of the Board's Regulation Y.

Board of Governors of the Federal Reserve System, June 8, 1994.

Jennifer J. Johnson,

Associate Secretary of the Board.

BILLING CODE 6210-01-F

FEDERAL TRADE COMMISSION

Rules, Regulations, Statements and Interpretations Under the Hart-Scott-Rodino Antitrust Improvements Act of 1976

AGENCY: Federal Trade Commission.

ACTION: Notice of application of OMB under the Paperwork Reduction Act (44 U.S.C. 3501–3522) for clearance of information collection requirements contained in proposed changes to the Antitrust Improvements Act

Notification and Report Form that implements the notification requirement contained in the premerger notification rules and Section 7A of the Clayton Act ("the Act").

SUMMARY: The FTC is seeking OMB clearance for information collection requirements contained in proposed changes to the Antitrust Improvements Act Notification and Report Form ("the Form"). Under the Clayton Act and its associated rules, certain parties contemplating acquisitions of a specified size must notify the FTC and the Assistant Attorney General in charge of the Antitrust Division of the Department of Justice and wait for 30 days (or, in the case of a cash tender offer, 15 days) before consummating the transaction. The FTC has established the Form as the means for accomplishing the notification mandated by the Act. The Form provides the Commission and the Antitrust Division ("the enforcement agencies") with the information needed to make a prompt, preliminary determination of the antitrust implications of the reported transactions.

DATES: Comments on this application must be submitted on or before July 12, 1994.

ADDRESSES: Send comments to Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, room 3228, Washington, DC 20503, ATN: Desk Officer for the Federal Trade Commission and to the Office of the General Counsel, Federal Trade Commission, Washington, DC 20580. Copies of the submission to OMB, including the application, may be obtained from the Public Reference Section, room 130, Federal Trade Commission, Washington, DC 20580.

FOR FURTHER INFORMATION CONTACT: Victor Cohen, Office of Premerger Notification, Federal Trade Commission, Washington, DC 20580 (202) 326–2849.

SUPPLEMENTARY INFORMATION:

Estimate of Information Collection Burden

For the most part, the burden of completing the Form should remain the same for the majority of respondents. The changes that require the submission of more information will be offset by the changes that require less information. The burden of reporting for a particular respondent will vary depending on factors such as the extent of the respondent's U.S. operations and whether the respondent has previously filed. Thus, while in some instances, particular respondents may have an increase or a decrease in reporting burden, overall, the reporting requirements should remain unchanged. Much of the required information is kept by filers in the ordinary course of business and burden for OMB purposes is defined to exclude any effort that would be expended regardless of any regulatory requirements. See 5 CFR 1320.7(b)(1). Thus, as indicated in the application, no "recordkeeping burden" would be imposed by the proposed changes. Further, in a "collection of information" such as this, the total burden figure fluctuates from year to year according to the number of respondents, a number which is controlled by the marketplace, not by the Commission. Thus, any increase or decrease in burden hours from previous FTC estimates is a function of the number of filers, and not a result of the proposed changes to the Form.

Based on our experience with the program's requirements and discussions with attorneys who prepare Forms for various clients, we believe that the time needed to complete the Form varies from as little as 8 hours to as much as 160 hours. On average, it appears to take about 39 hours to complete the Form. In certain circumstances, only an index or copies of filings made with a regulatory agency need be submitted (in lieu of the Form). We estimate that reporting in such cases usually requires about 2 hours.

In fiscal year 1993, 1,529 transactions were reported under the premerger notification program, resulting in a total of 2,914 filings. Of these transactions, 153 required only one party to file, because they were regulated by other federal agencies. In those cases, an index or copies of filings made to the regulatory agency were submitted in place of the Form. Using the previous estimates of 39 hours for filings that required a complete Form and 2 hours for filings that required only an index or copies of materials, we estimate the total burden of completing the Form during fiscal year 1993 to have been 107,985 hours (2751 × 39 = 107,679) + (153 × 2 = 306). Accordingly, we propose a current burden estimate of 107,985 hours.

Donald S. Clark,

Secretary.

BILLING CODE 6750–01–M

Granting of Request for Early Termination of the Waiting Period Under the Premerger Notification Rules

Section 7A of the Clayton Act, 15 U.S.C. 18a, as added by Title II of the Hart-Scott-Rodino Antitrust Improvements Act of 1976, requires persons contemplating certain mergers or acquisitions to give the Federal Trade Commission and the Assistant Attorney General advance notice and to wait designated periods before consummation of such plans. Section 7A(b)(2) of the Act permits the agencies, in individual cases, to terminate this waiting period prior to its expiration and requires that notice of this action be published in the **Federal Register.**

The following transactions were granted early termination of the waiting period provided by law and the premerger notification rules. The grants were made by the Federal Trade Commission and the Assistant Attorney General for the Antitrust Division of the Department of Justice. Neither agency intends to take any action with respect to these proposed acquisitions during the applicable waiting period.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of the Secretary

Notice of Meeting of the Commission on Research Integrity

Pursuant to Public Law 92-463, notice is hereby given of the meeting of the Commission on Research Integrity, on Monday, June 20, from 9 a.m. to 5 p.m., in the Hubert H. Humphrey Building, room 800, 200 Independence Avenue SW., Washington, DC 20201. The meeting will be open to the public.

The mandate of the Commission is to develop recommendations for the Secretary of Health and Human Services and the Congress on the administration of Section 493 of the Public Health Service Act as amended by and added to by Section 161 of the NIH Revitalization Act of 1993.

The purpose of this inaugural meeting will be to review the history of scientific misconduct issues in the Public Health Service (PHS) and to develop an approach to satisfy the mandate of the Commission. Discussion items may include but will not be limited to the definition of scientific misconduct, conclusions of the Advisory Committee on Research Integrity, the role of the Office of Research Integrity, and related issues.

Henrietta D. Hyatt-Knorr, Executive Secretary, Commission on Research Integrity, Office of Research Integrity, Division of Policy and Education, Rockwall II, suite 700, 5515 Security Lane, Rockville MD 20852, (301) 443-5300, will furnish the meeting agenda, the Committee charter, and a roster of the Committee members upon request. Members of the public wishing to make presentations should contact the Executive Secretary. Depending on the number of presentations and other considerations, the Executive Secretary will allocate a time frame for each speaker.

Lyle W. Bivens,

Director, Office of Research Integrity.

BILLING CODE 4160-17-M

Centers for Disease Control and Prevention

[Announcement Number 459]

RIN 0905-ZA58

National Institute for Occupational Safety and Health; Health and Safety Interventions in the Construction Industry

Introduction

The Centers for Disease Control and Prevention (CDC), announces the availability of fiscal year (FY) 1994 funds for a cooperative agreement program to create health and safety interventions in the construction industry. The Public Health Service (PHS) is committed to achieving the health promotion and disease prevention objectives of Healthy People 2000, a PHS-led national activity to reduce morbidity and mortality and improve the quality of life. This announcement is related to the priority area of Occupational Safety and Health. (For ordering Healthy People 2000 see the section "Where To Obtain Additional Information.")

Authority

This program is authorized under section 20 of the Occupational Safety and Health Act of 1970 (29 U.S.C. 669). Applicable program regulations are found in 42 CFR part 87—National Institute for Occupational Research and Demonstration Grants.

Smoke-Free Workplace

The PHS strongly encourages all grant recipients to provide a smoke-free workplace and promote the non-use of all tobacco products. This is consistent with the PHS mission to protect and advance the physical and mental health of the American people.

Eligible Applicants

Applications may be submitted by public and private, nonprofit and for-profit organizations and governments and their agencies. Thus, universities, colleges, research institutions, hospitals, other public and private organizations, State and local health departments or their bona fide agents, federally recognized Indian tribal governments, Indian tribes or Indian tribal organizations, and small, minority- and/or women-owned businesses are eligible to apply.

Availability of Funds

Approximately $1,400,000 will be available in FY 1994 to fund one award. The award is expected to begin on or about September 30, 1994, for a 12-month budget period within a project period of up to five years. Funding estimates may vary and are subject to change.

Continuation awards within the project period will be made on the basis of satisfactory progress and the availability of funds.

Purpose

The purpose of this cooperative agreement is to develop and implement a nationally coordinated construction industry health and safety intervention program for the building trades.

Program Requirements

In conducting activities to achieve the purpose of this program, the recipient shall be responsible for the activities under A., below, and CDC/NIOSH shall be responsible for the activities under B., below:

A. Recipient Activities

Sector Specific Interventions

1. Develop, implement and evaluate intervention initiatives targeted at specific industry sectors and/or operations within individual sectors.

2. Identify supporting data to target interventions; develop detailed plans for the introduction of interventions based on data, including sites for pilot and support from employers and unions representing workers; evaluate the pilot; and, based on results, include detailed approach for the implementation of the effective intervention throughout the targeted industry sector in future years of the cooperative agreement.

Targeted Hazards

1. Identify hazard(s) that account for injury/illness across many industry sectors, whereby a successful intervention for a particular exposure/hazard in one sector can be applied to other industry sectors and/or operations.

2. Develop a detailed plan for the development of interventions targeting specific hazards, with a focus on the implementation and evaluation of developed, hazard specific interventions.

Innovative Pilots

1. Develop and introduce an innovative pilot in order to evaluate their effectiveness in reducing injury/illness in construction.

2. With evidence of strong industry support, pilot possible interventions that include the introduction of new technologies, tools, equipment or materials on the job site, or the introduction of control strategies targeting hazards known to cause injury/illness.

3. Based on the evaluation of pilots, include plans for the introduction of successful interventions to the construction industry.

Conference

1. Convene a national conference for the purpose of sharing information, establishing priorities, and facilitating joint approaches in the development of construction industry interventions. Participants will include construction unions, employers, owners, government, insurance and academia engaged in construction-related safety and health activities.

2. Develop a national, industry-wide intervention program for construction based on recommendations from the conference.

Economic Analysis

Conduct research efforts designed to characterize the industry economically, and demonstrate how the adoption of safety and health interventions will increase profits through the reduction of injury/illness rates.

Joint Labor/Management Initiatives

1. Recipient's program should focus on the development and implementation of joint labor/management safety and health intervention approaches and should include evaluation of joint activities, from the evaluation of joint job site safety and health committees to the development of standardized training or the success of voluntary construction industry compliance standards.

2. As part of this activity, recipient should have direct access to a joint labor/management advisory group representing industry employers and employee representatives.

Safety and Health Training

Working in cooperation with labor and management, assess the state of existing training programs and/or develop standardized safety and health training for the industry, targeting either specific trades, groups of workers or issues of concern.

B. CDC/NIOSH Activities

1. Provide technical assistance through site visits and correspondence in the areas of program development, implementation, maintenance, and priority setting related to the cooperative agreement.
2. Provide collaboration for appropriate aspects of the program as requested by the grantee.
3. Assist in the dissemination of relevant health and safety information to the employers and employees involved in construction work.

Evaluation Criteria

The applications will be reviewed and evaluated according to the following criteria:

1. Responsiveness to the purpose of the cooperative agreement program, including the applicant's understanding of the purpose of the cooperative agreement and the relevance of the proposal to the purpose of the cooperative agreement. (20%)
2. Feasibility of meeting the proposed goals of the cooperative agreement including the proposed schedule for initiating and accomplishing each of the activities and the proposed methods for evaluating the accomplishments. (20%)
3. Strength of the program design in addressing the distinct characteristics and needs of construction workers. (30%)
4. Efficiency of resources and novelty of program including the efficient use of existing and proposed personnel with assurances of a major time commitment of the Project Director to the program and the novelty of the program approach. (20%)
5. Training and experience of Program Director and staff with training or experience sufficient to accomplish the proposed program. (10%)
6. The budget will be evaluated to the extent to which it is reasonable, clearly justified, and consistent with the use of funds. (Not Scored)

Executive Order 12372 Review

This program is not subject to review by Executive Order 12372.

Public Health System Reporting Requirements

This program is not subject to the Public Health System Reporting Requirements.

Catalog of Federal Domestic Assistance Number

The Catalog of Federal Domestic Assistance number for this program is 94 262.

Other Requirements

Paperwork Reduction Act

Projects that involve the collection of information from 10 or more individuals and funded by this cooperative agreement will be subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act.

Human Subjects

If the proposed project involves research on human subjects, the applicant must comply with the Department of Health and Human Services Regulations, 45 CFR Part 46, regarding the protection of human subjects. Assurance must be provided to demonstrate that the project will be subject to initial and continuing review by an appropriate institutional review committee.

In addition to other applicable committees, Indian Health Service (IHS) institutional review committees also must review the project if any component of IHS will be involved or will support the research. If any Native American community is involved, its tribal government must also approve that portion of the project applicable to it. The applicant will be responsible for providing assurance in accordance with the appropriate guidelines and form provided in the application kit.

Application Submission and Deadline

The original and two copies of the application PHS Form 5161–1 must be submitted to Henry S. Cassell, III, Grants Management Officer, Grants Management Branch, Procurement and Grants Office, Centers for Disease Control and Prevention (CDC), Mailstop E–13, 255 East Paces Ferry Road, NE., Room 300, Atlanta, Georgia 30305, on or before July 25, 1994.

1. Deadline

Applicants shall be considered as meeting the deadline if they are either:

(a) Received on or before the deadline date, or

(b) Sent on or before the deadline date and received in time for submission to the objective review group. (Applicants must request a legibly dated U.S. Postal Service postmark or obtain a legibly dated receipt from a commercial carrier or the U.S. Postal Service. Private metered postmarks shall not be acceptable as proof of timely mailing.)

2. Late Applicants

Applications which do not meet the criteria in 1.(a) or 1.(b) above are considered late applications. Late applications will not be considered in the current competition and will be returned to the applicant.

Where To Obtain Additional Information

A complete program description, information on application procedures, and business management technical assistance may be obtained from Oppie M. Byrd, Grants Management Specialist, Grants Management Branch, Procurement and Grants Office, Centers for Disease Control and Prevention (CDC), Mailstop E–13, 255 East Paces Ferry Road, NE., Room 300, Atlanta, Georgia 30305, or by calling (404) 842–6630. Programmatic technical assistance may be obtained from Melvin L. Myers, Office of the Director, National Institute for Occupational Safety and Health, Centers for Disease Control and Prevention (CDC), 1600 Clifton Road, Mailstop D–26, Atlanta, Georgia 30333, or by calling (404) 639–1530.

Please refer to Announcement Number 459 when requesting information and submitting an application.

Potential applicants may obtain a copy of Healthy People 2000 (Full Report, Stock No. 017–001–00474–0) or Healthy People 2000 (Summary Report, Stock No. 017–001–00473–1) referenced in the "Introduction" through the Superintendent of Documents, Government Printing Office, Washington, DC 20402–9325, telephone (202) 783–3238.

Dated: January 8, 1994.

Richard A. Lemen,

Acting Director, National Institute for Occupational Safety and Health Centers for Disease Control and Prevention (CDC).

[FR Doc. 94–14358 Filed 6–13–94; 8:45 am]

BILLING CODE 4163–19–P

[Announcement No. 101A]

Addendum to Announcement 101; Hepatitis B Vaccination Demonstration Projects in Asian/Pacific Island Children

Introduction

The Centers for Disease Control and Prevention (CDC), through the National

Immunization Program (NIP) and the National Center for Infectious Diseases (NCID), announces the availability of supplemental funds to demonstrate the most effective method of providing hepatitis B vaccine to children 2–13 years of age in the Asian and/or Pacific Island (API) populations within the United States. This is an addendum to Program Announcement Number 101.

The Public Health Service (PHS) is committed to achieving the health promotion and disease prevention objectives of "Healthy People 2000," a PHS-led national activity to reduce morbidity and mortality and improve the quality of life. This announcement is related to the priority area of Immunization and Infectious Diseases. (For ordering a copy of "Healthy People 2000," see the section entitled WHERE TO OBTAIN ADDITIONAL INFORMATION.)

Authority

This program is authorized under Section 317 of the Public Health Service Act (42 U.S.C. 247b), as amended. Regulations governing the implementation of this legislation are covered under 42 CFR part 51b, subparts A and B.

Smoke-Free Workplace

The Public Health Service strongly encourages all grant recipients to provide a smoke-free workplace and promote the non-use of all tobacco products. This is consistent with the PHS mission to protect and advance the physical and mental health of the American people.

Eligible Applicants

Eligible applicants for these supplemental funds are the official public health agencies who are current recipients of project grants for Preventive Health Services—Immunization.

Availability of Funds

Approximately $500,000 will be available in fiscal year (FY) 1994 to fund up to five demonstration projects through supplemental grant awards to current recipients of immunization project grants. These demonstration projects are expected to begin on or about September 30, 1994, for a twelve-month activity period within a twenty-four-month period of performance. Funding estimates may vary and are subject to change. Continuation award(s) within the project period will be made on the basis of satisfactory progress and availability of funds.

Purpose

The purpose of the hepatitis B vaccination (HBV) demonstration projects in API children is to demonstrate the most effective method of providing hepatitis B vaccine to children 2–13 years of age in the API populations within the United States and create a practical model to be considered for implementation nationwide.

The goals of this demonstration project are:

A. To demonstrate and compare the effectiveness (including cost-effectiveness) of different methods of providing hepatitis B vaccine to API children age 2–13 years by: (1) Conducting baseline assessments of vaccination rates (coverage), (2) developing and applying the interventions, and (3) measuring the effectiveness of the interventions.

B. To determine the factors that are most predictive of acceptance/completion and the barriers associated with non-acceptance/non-completion of the hepatitis B vaccination series in a defined target group of API children age 2–13 years.

Program Requirements

To achieve the purpose of this demonstration the successful applicant(s) will show in their proposal that they have the following:

A. A population of at least 10,000 API people within a community or geographic area that is well defined and can be approached in total with an immunization outreach program.

B. Established links to the target population (including culturally appropriate and sensitive outreach methods).

C. A history of successful completion of research projects (by the Immunization Project or through sub-contracts they have made with outside contractors) in medical or public health outreach programs within the API communities.

D. Established and effective perinatal and universal infant hepatitis B vaccination programs within the target population.

In addition, the successful applicant(s) shall be responsible for conducting the following activities:

A. Adhere to the detailed time-line provided by the recipient and approved by CDC which includes each step necessary to accomplish the recipient activities listed below.

B. Divide the target API community of at least 10,000 people in which effective fully operational perinatal hepatitis B and universal infant hepatitis B vaccination programs are being conducted into two groups—a study and comparison group—that are similar on all relevant characteristics such as demographic, geographic, social economic status, and health care profiles.

C. Follow published scientifically valid methods of sample size and power calculations, sample selection, survey design, data collection, data management and data analysis.

D. After completing the design, pretest and approval phases, conduct a baseline survey of health care providers serving the target population to measure knowledge, attitudes, practices and barriers related to hepatitis B vaccination of API children age 2–13.

E. After completing the design, pretest and approval phases, conduct the baseline household survey to measure hepatitis B vaccination coverage and knowledge, attitudes, behaviors, and barriers related to hepatitis B vaccination in the target population.

F. Effectively inform all individuals in the target group, their parents, and their medical care providers of the availability of free hepatitis B vaccinations for all API children age 2–13.

G. Provide effective culturally appropriate education on the risks of HBV infection and benefits of hepatitis B vaccination to all individuals in the target group, their parents, and their medical care providers. Through development and/or use during this demonstration project effective information materials will be available for use in similar populations throughout the United States.

H. Devise and implement an enhanced campaign in the study group within the target population. This enhancement should include outreach efforts in addition to those in the basic campaign which have been shown in the literature to be effective in the target population. The enhancement may cost more but must (1) have a strong chance of being more cost effective, and (2) be practical for other comparable immunization projects or communities to implement across the United States.

I. Properly provide the federally required hepatitis B vaccine Important Information Statement (IIS) (consent form) and obtain informed consent signatures prior to administration of each dose of hepatitis B vaccine.

J. Deliver hepatitis B vaccine to all eligible API children age 2–13 within the target communities through a network which may include public and private clinics, hospitals, and private doctors offices; Women Infant Children (WIC) and Aid to Families with

Dependent Children (AFDC) sites as well as in day care centers, pre-schools, and elementary and high school based clinics; religious and community organizations; and in-home visitation and mobile vans.

K. Utilize a computerized tracking, reminder and recall system in the entire target population but add an enhanced system of tracking, follow-up and reminder/recall in the study group, including, for example, more personnel contact and additional home visits and incentives.

L. After completing the design, pretest and approval phases, conduct post intervention Knowledge Attitudes and Practices (KAP) surveys of medical care providers in each comparison group.

M. At the conclusion of the first 12 months of funding determine within each comparison group what proportion of eligible API children age 2–13 who were not vaccinated with at least one hepatitis B vaccine dose, who received only dose 1 or doses 1 and 2, and who completed the series (dose 3).

N. At the conclusion of the first 12 months of funding, after completing the design, pretest and approval phases, conduct post intervention surveys of a sample in each comparison group of those who did not accept the hepatitis B vaccine, those that accepted dose 1 or doses 1 and 2 only, and those who accepted dose 3. The survey will be designed to provide a demographic and hepatitis B vaccination related knowledge, attitude, behavior, and barrier profile for children and parents.

CDC will provide consultation and technical assistance in planning, conducting and evaluating this project. CDC will assist with data management analysis and writing the final reports.

Review and Evaluation Criteria

The application will be evaluated according to the following criteria:

A. The applicant's understanding of the purpose of the study and the feasibility of producing the required results.

B. The extent to which background information and other data demonstrate that the applicant has the appropriate organizational structure, administrative support and accessibility to an adequate number of participants in the target populations to accomplish study objectives, including culturally appropriate outreach activities.

C. The degree to which the applicants's plan is consistent with study goals and is realistic, specific, measurable and time-phased.

D. The quality of the plan of operation for conducting the proposed activities and the degree to which the plan covers the "Program Requirements" and specifies the what, who, where, how, and the timing for start and completion of each.

E. The degree to which the applicant's plan will be able to achieve the goals and the quality of the methods and instruments to be used.

F. The extent to which methods and strategies proposed are financially feasible.

G. The extent to which qualified and experienced personnel are available to carry out the proposed activities.

Site visits may be conducted before final funding decisions are made by CDC. Only the organizations with high ranking applications will be visited. During the visit, CDC staff will ensure that all necessary components for start up of the project are in place. This meeting will be conducted by the NIP/NCID representatives with participation of the appropriate regional program consultant, project coordinator, local staff and others who may have interest in this project. Visits will be made to the local medical care providers, local public health departments, administrators of WIC and AFDC, local clinics, schools, and with community leaders. Periodic site visits will be held thereafter to monitor progress and problems.

Executive Order 12372 Review

Applications are subject to review as governed by Executive Order (E.O.) 12372, Intergovernmental Review of Federal Programs. E.O. 12372 sets up a system for State and local government review of proposed Federal assistance applications. Applicants should contact their State Single Point of Contact (SPOC) as early as possible to alert them to the prospective applications and receive any necessary instructions on the State process. A current SPOC list is included in the application kit. The SPOC should send any State process recommendations to Ms. Elizabeth M Taylor, Grants Management Officer, Grants Management Branch, Procurement and Grants Office, Centers for Disease Control and Prevention (CDC), 255 East Paces Ferry Road, NE., Mailstop E–16, Room 300, Atlanta, GA 30305, no later than 60 days after the application deadline. CDC does not guarantee to "accommodate or explain State process recommendations it receives after that date.

Public Health System Reporting Requirements

This program is not subject to the Public Health System Reporting Requirements.

Catalog of Federal Domestic Assistance Number

The Catalog of Federal Domestic Assistance Number for this project grant is 93.268, Preventive Health Services—Childhood Immunization Grants.

Other Requirements

Paperwork Reduction Act

Projects that involve collection of information from 10 or more individuals and funded by the grant will be subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act.

Human Subjects

If the proposed project involves research on human subjects, the applicant must comply with the Department of Health and Human Services Regulations (45 CFR part 46) regarding the protection of human subjects. Assurance must be provided which demonstrates that the project will be subject to initial and continuing review by an appropriate institutional review committee. The applicant will be responsible for providing evidence of this assurance in accordance with the appropriate guidelines and forms provided in the application kit.

Application Submission and Deadline

The applicant must submit an original and two copies of the application form PHS–5161–1 (including forms SF 424 and SF 424a), on or before July 8, 1994, to Elizabeth M. Taylor, Grants Management Officer, Grants Management Branch, Procurement and Grants Office, Centers for Disease Control and Prevention (CDC), 255 East Paces Ferry Road, NE., Mailstop E–16 Atlanta, GA 30305.

A. *Deadline:* Applications will meet the deadline if they are:

1. Received on or before the deadline date, or

2. Sent on or before the deadline date and received in time to submit the application to an independent objective review group. (Applicants must request a legibly dated U.S. Postal Service postmark or obtain a legibly dated receipt from a commercial carrier or the U.S. Postal Service. Private metered postmarks are not acceptable as proof of timely mailing.)

B. *Late Applications:* Late applications will not be considered in the current funding cycle and will be returned to the applicant.

Where To Obtain Additional Information

A complete program description, information on application procedures

an application package, and business management technical assistance may be obtained from Eddie L. Wilder, Senior Grants Management Specialist, Grants Management Branch, Procurement and Grants Office, Centers for Disease Control and Prevention (CDC), 255 East Paces Ferry Road, NE., Mailstop E–16, Atlanta, GA 30305, telephone (404) 842–6805. Programmatic technical assistance may be obtained from Dennis O'Mara, Chief, Program Operations Section, National Immunization Program, Centers for Disease Control and Prevention (CDC), 1600 Clifton Road, NE., Mailstop E–52, Atlanta, GA 30333, telephone (404) 639–8215, or Edith Gary, Hepatitis B Prevention Coordinator, National Immunization Program, Centers for Disease Control and Prevention (CDC), 1600 Clifton Road, NE., Mailstop E–52, Atlanta, GA 30333, telephone (404) 639–8222, or Gary L. Euler, Dr.P.H., Epidemiologist, Surveillance, Investigations and Research Branch, National Immunization Program, Centers for Disease Control and Prevention (CDC), 1600 Clifton Road, NE., Mailstop E–61, Atlanta, GA 30333, telephone (404) 639–8257.

Announcement number 101A, "Supplemental Funds for Hepatitis B Vaccination Demonstration Projects in Asian/Pacific Island Children," must be referenced in all requests for information for these projects.

Potential applicants may obtain a copy of "Healthy People 2000" (Full Report; Stock No. 017–001–00474–0) or "Healthy People 2000" (Summary Report; Stock No. 017–001–00473–1) referenced in the introduction through the Superintendent of Documents, Government Printing Office, Washington, DC 20402–9325, telephone (202) 783–3238.

Dated: June 7, 1994

Ladene H. Newton,

Acting Associate Director for Management and Operations, Centers for Disease Control and Prevention (CDC).

BILLING CODE 4163–18–P

Food and Drug Administration

[Docket No. 94N–0203]

Animal Drug Export; Hyaluronate Sodium Injection

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing that GP Associates, Inc., has filed an application requesting approval for export of the bulk animal drug Hyaluronate Sodium Injection to Canada.

ADDRESSES: Relevant information on this application may be directed to the Dockets Management Branch (HFA–305), Food and Drug Administration, rm. 1–23, 12420 Parklawn Dr., Rockville, MD 20857, and to the contact person identified below. Any future inquiries concerning the export of nonfood animal drugs under the Drug Export Amendments of 1986 should also be directed to the contact person.

FOR FURTHER INFORMATION CONTACT: Gregory S. Gates, Center for Veterinary Medicine (HFV–114), Food and Drug Administration, 7500 Standish Pl., Rockville, MD 20855, 301–594–1617.

SUPPLEMENTARY INFORMATION: The drug export provisions in section 802 of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 382) provide that FDA may approve applications for the export of drugs that are not currently approved in the United States. Section 802(b)(3)(B) of the act sets forth the requirements that must be met in an application for approval. Section 802(b)(3)(C) of the act requires that the agency review the application within 30 days of its filing to determine whether the requirements of section 802(b)(3)(B) have been satisfied. Section 802(b)(3)(A) of the act requires that the agency publish a notice in the **Federal Register** within 10 days of the filing of an application for export to facilitate public participation in its review of the application. To meet this requirement, the agency is providing notice that GP Associates, Inc., 22 Bucknell Dr., RD 9, Bethlehem, PA 18015, has filed application number 8584 requesting approval for the export of the bulk animal drug Hyaluronate Sodium Injection to Canada. The drug will be used for the treatment of equine carpal and fetlock joint dysfunction caused by traumatic and/or degenerate joint disease of mild to moderate severity. The application was received and filed in the Center for Veterinary Medicine on May 31, 1994, which shall be considered the filing date for purposes of the act.

Interested persons may submit relevant information on the application to the Dockets Management Branch (address above) in two copies (except that individuals may submit single copies) and identified with the docket number found in brackets in the heading of this document. These submissions may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

The agency encourages any person who submits relevant information on the application to do so by June 24, 1994 and to provide an additional copy of the submission directly to the contact person identified above, to facilitate consideration of the information during the 30-day period.

This notice is issued under the Federal Food, Drug, and Cosmetic Act (sec. 802 (21 U.S.C. 382)) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10) and redelegated to the Center for Veterinary Medicine (21 CFR 5.44).

Dated: June 3, 1994.

Robert C. Livingston,

Director, Office of New Animal Drug Evaluation, Center for Veterinary Medicine.

[FR Doc. 94–14314 Filed 6–13–94; 8:45 am]

BILLING CODE 4160–01–F

[Docket No. 94F–0185]

Great Lakes Chemical Corp.; Filing of Food Additive Petition

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing that Great Lakes Chemical Corp. has filed a petition proposing that the food additive regulations be amended to provide for the safe use of 1-bromo-3-chloro-5,5-dimethylhydantoin as a slimicide for use in the manufacture of paper and paperboard intended to contact food.

DATES: Written comments on the petitioner's environmental assessment by July 14, 1994.

ADDRESSES: Submit written comments to the Dockets Management Branch (HFA–305), Food and Drug Administration, rm. 1–23, 12420 Parklawn Dr., Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Mitchell A. Cheeseman, Center for Food Safety and Applied Nutrition (HFS–216), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202–254–9511.

SUPPLEMENTARY INFORMATION: Under the Federal Food, Drug, and Cosmetic Act (sec. 409(b)(5) (21 U.S.C. 348(b)(5))), notice is given that a food additive petition (FAP 4B4418) has been filed by Great Lakes Chemical Corp., P.O. Box 2200, West Lafayette, IN 47906–0200. The petition proposes to amend the food additive regulations in § 176.300 *Slimicides* (21 CFR 176.300) to provide

for the safe use of 1-bromo-3-chloro-5,5-dimethylhydantoin (CAS Reg. No. 16079–88–2) as a slimicide in the manufacture of paper and paperboard intended to contact food.

The potential environmental impact of this action is being reviewed. To encourage public participation consistent with regulations promulgated under the National Environmental Policy Act (40 CFR 1501.4 (b)), the agency is placing the environmental assessment submitted with the petition that is the subject of this notice on public display at the Dockets Management Branch (address above) for public review and comment. Interested persons may, on or before July 14, 1994, submit to the Dockets Management Branch (address above) written comments. Two copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the docket number found in brackets in the heading of this document. Received comments may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday. FDA will also place on public display any amendments to, or comments on, the petitioner's environmental assessment without further announcement in the **Federal Register**. If, based on its review, the agency finds that an environmental impact statement is not required and this petition results in a regulation, the notice of availability of the agency's finding of no significant impact and the evidence supporting that finding will be published with the regulation in the **Federal Register** in accordance with 21 CFR 25.40(c).

Dated: June 2, 1994.

Janice F. Oliver,

Deputy Director, Center for Food Safety and Applied Nutrition.

BILLING CODE 4160–01–F

[Docket No. 93E–0099]

Determination of Regulatory Review Period for Purposes of Patent Extension; Mycobutin™; Correction

AGENCY: Food and Drug Administration. HHS.

ACTION: Notice; correction.

SUMMARY: The Food and Drug Administration (FDA) is correcting a notice that appeared in the **Federal Register** of April 15, 1994 (59 FR 18133), that announced its determination of the regulatory review period for purposes of patent extension for Mycobutin™ (rifabutin). The document was published with some mathematical errors. The document incorrectly stated, "FDA has determined that the applicable regulatory review period for Mycobutin™ is 2,831 days. Of this time, 2,124 days occurred during the testing phase of the regulatory review period, while 707 days occurred during the approval phase." It should have stated, "FDA has determined that the applicable regulatory review period for Mycobutin™ is 2,469 days. Of this time, 2,127 days occurred during the testing phase of the regulatory review period, while 342 days occurred during the approval phase." This document corrects those errors.

FOR FURTHER INFORMATION CONTACT: Brian J. Malkin, Office of Health Affairs (HFY–20), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–1382.

In FR Doc. 94–9099, appearing on page 18133 in the **Federal Register** of April 15, 1994, the following corrections are made: On page 18134, in the first column, in the second complete paragraph, in line 3, "2,831" is corrected to read "2,469"; in line 4, "2,124" is corrected to read "2,127"; and in line 6, "707" is corrected to read "342".

Dated: June 8, 1994.

Stuart L. Nightingale,

Associate Commissioner for Health Affairs.

[FR Doc. 94–14446 Filed 6–13–94; 8:45 am]

BILLING CODE 4160–01–F

[Docket No. 94M–0180]

Sigmedics, Inc.; Premarket Approval of Parastep® I System

AGENCY: Food and Drug Administration. HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing its approval of the application by Sigmedics, Inc., Northfield, IL, for premarket approval, under section 515 of the Federal Food, Drug, and Cosmetic Act (the act), of the Parastep® I System. After reviewing the recommendation of the Orthopedic and Rehabilitation Devices Panel, FDA's Center for Devices and Radiological Health (CDRH) notified the applicant, by letter of April 20, 1994, of the approval of the application.

DATES: Petitions for administrative review by July 14, 1994.

ADDRESSES: Written requests for copies of the summary of safety and effectiveness data and petitions for administrative review to the Dockets Management Branch (HFA–305), Food and Drug Administration, rm. 1–23, 12420 Parklawn Dr., Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Marie A. Schroeder, Center for Devices and Radiological Health (HFZ–410), Food and Drug Administration,1390 Piccard Dr., Rockville, MD 20850, 301–594–1296.

SUPPLEMENTARY INFORMATION: On September 30, 1992, Sigmedics, Inc., One Northfield Plaza, suite 410, Northfield, IL 60093–3016, submitted to CDRH, an application for premarket approval of the Parastep® I System. The device is a noninvasive functional neuromuscular stimulator for ambulation and is indicated for enabling appropriately selected skeletally mature spinal cord injured patients (levels C6–T12) to stand and to attain limited ambulation and/or take steps, with assistance if required, following a prescribed period of physical therapy training in conjunction with rehabilitation management of spinal cord injury.

On August 19, 1993, the Orthopedic and Rehabilitation Devices Panel, an FDA advisory committee, reviewed and recommended approval of the application. On April 20, 1994, CDRH approved the application by a letter to the applicant from the Acting Director of the Office of Device Evaluation, CDRH.

A summary of the safety and effectiveness data on which CDRH based its approval is on file in the Dockets Management Branch (address above) and is available from that office upon written request. Requests should be identified with the name of the device and the docket number found in brackets in the heading of this document.

Opportunity for Administrative Review

Section 515(d)(3) of the act (21 U.S.C. 360e(d)(3)) authorizes any interested person to petition, under section 515(g) of the act, for administrative review of CDRH's decision to approve this application. A petitioner may request either a formal hearing under part 12 (21 CFR part 12) of FDA's administrative practices and procedures regulations or a review of the application and CDRH's action by an independent advisory committee of experts. A petition is to be in the form of a petition for reconsideration under § 10.33(b) (21 CFR 10.33(b)). A petitioner shall identify the form of review requested (hearing or independent advisory committee) and shall submit with the petition supporting data and

information showing that there is a genuine and substantial issue of material fact for resolution through administrative review. After reviewing the petition, FDA will decide whether to grant or deny the petition and will publish a notice of its decision in the **Federal Register**. If FDA grants the petition, the notice will state the issue to be reviewed, the form of review to be used, the persons who may participate in the review, the time and place where the review will occur, and other details.

Petitioners may, at any time on or before July 14, 1994, file with the Dockets Management Branch (address above) two copies of each petition and supporting data and information, identified with the name of the device and the docket number found in brackets in the heading of this document. Received petitions may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

This notice is issued under the Federal Food, Drug, and Cosmetic Act (secs. 515(d), 520(h) (21 U.S.C. 360e(d), 360j(h))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10) and redelegated to the Center for Devices and Radiological Health (21 CFR 5.53).

Dated: May 31, 1994.

Joseph A. Levitt,

Deputy Director for Regulations Policy, Center for Devices and Radiological Health.

[FR Doc. 94-14315 Filed 6-13-94; 8:45 am]

BILLING CODE 4160-01-F

[Docket No. 93E-0290]

Determination of Regulatory Review Period for Purposes of Patent Extension; Reality™ Female Condom

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) has determined the regulatory review period for Reality™ Female Condom and is publishing this notice of that determination as required by law. FDA has made the determination because of the submission of an application to the Commissioner of Patents and Trademarks, Department of Commerce, for the extension of a patent which claims that medical device.

ADDRESSES: Written comments and petitions should be directed to the Dockets Management Branch (HFA-305), Food and Drug Administration, rm. 1-23, 12420 Parklawn Dr., Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Brian J. Malkin, Office of Health Affairs (HFY-20), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-1382.

SUPPLEMENTARY INFORMATION: The Drug Price Competition and Patent Term Restoration Act of 1984 (Pub. L. 98-417) and the Generic Animal Drug and Patent Term Restoration Act (Pub. L. 100-670) generally provide that a patent may be extended for a period of up to 5 years so long as the patented item (human drug product, animal drug product, medical device, food additive, or color additive) was subject to regulatory review by FDA before the item was marketed. Under these acts, a product's regulatory review period forms the basis for determining the amount of extension an applicant may receive.

A regulatory review period consists of two periods of time: a testing phase and an approval phase. For medical devices, the testing phase begins with a clinical investigation of the device and runs until the approval phase begins. The approval phase starts with the initial submission of an application to market the device and continues until permission to market the device is granted. Although only a portion of a regulatory review period may count toward the actual amount of extension that the Commissioner of Patents and Trademarks may award (half the testing phase must be subtracted as well a any time that may have occurred before the patent was issued), FDA's determination of the length of a regulatory review period for a medical device will include all of the testing phase and approval phase as specified in 35 U.S.C. 156(g)(3)(B).

FDA recently approved for marketing the medical device Reality™ Female Condom. The Reality™ Female Condom is indicated for use to help prevent pregnancy and sexually transmitted diseases, including the human immunodeficiency virus (HIV) infection, during vaginal intercourse. Subsequent to this approval, the Patent and Trademark Office received a patent term restoration application for the Reality™ Female Condom (U.S. Patent No. 4,735,621) from Chartex International Plc, and the Patent and Trademark Office requested FDA's assistance in determining this patent's eligibility for patent term restoration. FDA, in a letter dated August 10, 1993, advised the Patent and Trademark Office that this medical device had undergone a regulatory review period, and that the approval of the Reality™ Female Condom represented the first commercial marketing or use of the product. Shortly thereafter, the Patent and Trademark Office requested that the FDA determine the product's regulatory review period.

FDA has determined that the applicable regulatory review period for Reality™ Female Condom is 2,017 days. Of this time, 1,460 days occurred during the testing phase of the regulatory review period, while 557 days occurred during the approval phase. These periods of time were derived from the following dates:

1. *The date on which the first clinical trial on the device was begun:* October 31, 1987. The clinical trial cited by the applicant was conducted outside the United States and was not subject to FDA's requirement for an investigational device exemption (IDE) under section 520(g) of the Federal Food, Drug and Cosmetic Act (the act) nor FDA's requirement for an institutional review board (IRB) approval under section 520(g) (3) of the act. Therefore, the testing phase begins on the date the device is first used with human subjects as part of a clinical investigation to be filed with FDA to secure premarket approval of the device (21 CFR 60.22(c)(1)(iii)). The applicant has stated that the date on which the device was first used with human subjects as part of a clinical investigation to be filed with FDA to secure premarket approval of the device was October 31, 1987. Because of the circumstances previously described for the clinical trial cited by the applicant, FDA has no record in which to review this date (21 CFR 60.20(c)(6)). Although FDA cannot, therefore, confirm that testing began as stated by the applicant, FDA is using this date as the start of the testing phase.

2. *The date the application was initially submitted with respect to the device under section 515 of the Federal Food, Drug, and Cosmetic Act:* October 29, 1991. FDA has verified the applicant's claim that the premarket approval application (PMA) for the Reality™ Female Condom (PMA P910064) was initially submitted on October 29, 1991.

3. *The date the application was approved:* May 7, 1993. FDA has verified the applicant's claim that PMA P910064 was approved on May 7, 1993.

This determination of the regulatory review period establishes the maximum potential length of a patent extension. However, the U.S. Patent and Trademark Office applies several statutory limitations in its calculations of the actual period for patent extension. In its application for patent extension, this applicant seeks 762 days of patent term extension.

Anyone with knowledge that any of the dates as published is incorrect may, on or before August 15, 1994, submit to the Dockets Management Branch (address above) written comments and ask for a redetermination. Furthermore, any interested person may petition FDA, on or before December 12, 1994, for a determination regarding whether the applicant for extension acted with due diligence during the regulatory review period. To meet its burden, the petition must contain sufficient facts to merit an FDA investigation. (See H. Rept. 857, part 1, 98th Cong., 2d sess., pp. 41–42, 1984.) Petitions should be in the format specified in 21 CFR 10.30.

Comments and petitions should be submitted to the Dockets Management Branch (address above) in three copies (except that individuals may submit single copies) and identified with the docket number found in brackets in the heading of this document. Comments and petitions may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

Dated: June 8, 1994.

Stuart L. Nightingale,

Associate Commissioner for Health Affairs.

National Institutes of Health

National Institute on Deafness and Other Communication Disorders; Meeting

Pursuant to Public Law 92–463, notice is hereby given of the meeting of the National Institute on Deafness and Other Communication Disorders Special Emphasis Panel.

The meeting will be closed in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5, U.S.C. and section 10(d) of Public Law 92–463, for the review, discussion and evaluation of individual grant applications, contract proposals, and/or cooperative agreements. These applications and/or proposals and the discussions could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the applications and/or proposals, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Panel: National Institute on Deafness and Other Communication Disorders Special Emphasis Panel

Dates of Meeting: June 28, 1994

Time of Meeting: 8 a.m. until adjournment.

Place of Meeting: Bethesda Marriott, Bethesda, MD.

Agenda: Review of Small Grant applications.

Contact Person: Dr. Mary Nekola, Scientific Review Administrator, NIDCD/SRB, Executive Plaza South, room 400C, Bethesda, Maryland 20892, (301) 496–8683.

(Catalog of Federal Domestic Assistance Program No. 93.173 Biological Research Related to Deafness and Other Communication Disorders)

Dated: June 6, 1994.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Public and Indian Housing

[Docket No. N–94–3739; FR–3640–N–02]

Amendment to Notice of Funding Availability (NOFA) for Comprehensive Improvement Assistance Program (CIAP)

AGENCY: Office of the Assistant Secretary for Public and Indian Housing, HUD.

ACTION: Amendment to notice of funding availability for fiscal year (FY) 1994.

SUMMARY: This Notice informs Public Housing Agencies (PHAs) with less than 250 units under the jurisdictions of the Houston and Ft. Worth, Texas Field Offices that the deadline date for CIAP Application submission has been extended from June 20 to July 6, 1994. Applications are due on or before 3 p.m. local time on July 6, 1994. This extension does not apply to PHAs or Indian Housing Authorities under the jurisdictions of other HUD Field Offices.

FOR FURTHER INFORMATION CONTACT: Janice D. Rattley, Director, Office of Construction, Rehabilitation and Maintenance, Department of Housing and Urban Development, 451 Seventh Street, SW., room 4140, Washington, DC 20410. Telephone (202) 708–1800; TDD (202) 708–0850. (These are not toll-free numbers.)

SUPPLEMENTARY INFORMATION: The CIAP NOFA, published April 19, 1994, at 59 FR 18642, stated that of the $291,925,067 available for Public Housing CIAP, 1 percent, or $2,919,251, had been set aside to carry out goals related to pending civil rights litigation (e.g., Young v. *Cisneros*), which is subject to judicial oversight. The Department wishes to clarify that these funds will be used to fund eligible work at the 64 CIAP eligible PHAs involved in *Young* v. *Cisneros*, C.A. No. P–80–8–CA (E.D. Tex.), as well as at the CIAP eligible PHA involved in *NAACP* v. *Housing Authority of City of Commerce*, C.A. No. CA–3–88–0154–R (N.D. Tex.). In order to give the 64 PHAs involved in *Young* v. *Cisneros* additional time to include in their CIAP Applications work items proposed in their revised desegregation plans submitted to the court on February 4, 1994, the Department is extending the deadline for CIAP Application submission to all PHAs under the jurisdictions of the Houston and Fort Worth, Texas Field Offices. The application deadline is

extended from June 20, 1994 to July 6, 1994.

The 64 PHAs involved in *Young* v. *Cisneros* shall identify, in their CIAP Applications, those work items which are included in their revised desegregation plans. These 64 PHAs shall submit one CIAP Application, which may include both work items included in their revised desegregation plans and other work items not related to *Young* v. *Cisneros*.

All CIAP Applications received (including those limited to work items related to the specified civil rights cases) will be processed in accordance with the April 19, 1994 NOFA; i.e., completeness review, eligibility review, technical review (rating and ranking) and selection for Joint Review. The application from the Housing Authority of the City of Commerce will be considered for funding from the set-aside. Then the highest ranked of the 64 PHAs involved in *Young* v. *Cisneros* which apply for work items included in their revised desegregation plans will be funded from the set-aside for those items. To the extent that the set-aside cannot fund all proposed work related to the specified civil rights cases, the Field Office shall merge the rankings of any of the 65 PHAs with work items remaining unfunded from the set-aside and/or with work items not related to the set-aside, with the rankings of other PHAs to create one ranking list for purposes of Joint Review selection and funding from the Field Office's regular subassignment of CIAP funds.

Dated: June 8, 1994.

Michael B. Janis,

General Deputy Assistant Secretary for Public and Indian Housing.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management Alaska

[AK–964–4230–05P]

Notice for Publication F–14869–B and F–14869–D Alaska Native Claims Selections

In accordance with Departmental regulation 43 CFR 2650.7(d), notice is hereby given that a decision to issue conveyance under the provisions of Sec. 14(a) of the Alaska Native Claims Settlement Act of December 18, 1971, 43 U.S.C. 1601, 1613(a), will be issued to Inalik Native Corporation for approximately 7,117.46 acres. The lands involved are in the vicinity of Little Diomede, Alaska, within T. 1 S., R. 41 W. and Tps. 1 and 2 N., Rs. 42 W., Kateel River Meridian, Alaska.

A notice of the decision will be published once a week, for four (4) consecutive weeks, in The Nome Nugget. Copies of the decision may be obtained by contacting the Alaska State Office of the Bureau of Land Management, 222 West Seventh Avenue, #13, Anchorage, Alaska 99513–7599 [(907) 271–5960].

Any party claiming a property interest which is adversely affected by the decision, an agency of the Federal government or regional corporation, shall have until July 14, 1994 to file an appeal. However, parties receiving service by certified mail shall have 30 days from the date of receipt to file an appeal. Appeals must be filed in the Bureau of Land Management at the address identified above, where the requirements for filing an appeal may be obtained. Parties who do not file an appeal in accordance with the requirements of 43 CFR part 4, Subpart E, shall be deemed to have waived their rights.

Ana M. Stafford,

Land Law Examiner, Branch of Northern Adjudication.

Temporary Closure

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of temporary closure of public lands in Mesa County to parking for longer than thirty minutes, camping and shooting from midnight June 19, 1994 until midnight June 27, 1994.

SUMMARY: Notice is hereby given that effective midnight June 19, 1994, public lands described below are closed to: (1) "Parking for longer than 30 minutes", except at the designated Loma Boat Launch and Trailhead parking area (for river-related and trail use activities), (2) camping, and (3) shooting. This action is under the authority and requirement of 43 Code of Federal Regulations 8364 part 1 (a) and (d) and in conformance with the principles established by the National Environmental Act of 1969 and the Federal Land Policy Management Act of 1976. The restrictions affect public lands in Mesa County located in:

T. 10 S., R. 103 W., 6th PM, Secs. 3, 4, 5, 8, 9, 10;
T. 2 N., R. 3 W., Ute PM Secs. 30, 31, 32;
T. 1 N., R. 3 W., Ute PM Secs. 4, 5, 6, 7, 8, 9, 10, 11, 13, 14, 15, 16.

The closure and restriction orders are to protect persons, property, and public lands and resources. These restrictions do not apply to emergency, law enforcement and Federal, State or other government personnel who are in the area for official or emergency purposes and who are expressly authorized or otherwise officially approved by BLM. Any person who fails to comply with this closure order may be subject to the penalties provided by 43 CFR 8360.0–7 which includes fines not to exceed $1000 and/or imprisonment not to exceed 12 months. Notice of this closure will be posted at the described area and at the Grand Junction District Office.

DATES: This temporary closure is in effect from midnight June 19, 1994 until midnight June 27, 1994.

ADDRESSES: Comments can be directed to the Area Manager, Bureau of Land Management, Grand Junction Resource Area, 2815 H Road, Grand Junction, CO 81506 or District Manager, Bureau of Land Management, Grand Junction District, 2815 H Road, Grand Junction, CO 81506.

FOR FURTHER INFORMATION CONTACT: Brian Hopkins, Outdoor Recreation Planner, Bureau of Land Management, Grand Junction District, 2815 H Road, Grand Junction, Colorado 81506; (303) 244–3000.

Dated: June 1, 1994.

BILLING CODE 4310–JB–P

[WY–040–04–4110–03]

Environmental Impact Statement; Enron Burly Field Enhanced Oil Recovery Project

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Availability of Enron's Burley Field Enhanced Oil Recovery Project Abbreviated Final Environmental Impact Statement and Record of Decision.

SUMMARY: The Bureau of Land Management announces the availability of the abbreviated Final Environmental Impact Statement and Record of Decision for Enron Burly Field Enhanced Oil Recovery Project. The proposed project area is located in Sections 18, 19, 20, and 29 of Township 28 North, Range 133 West, 6th Principal Meridian, Sublette County, Wyoming.

DATES: If an appeal is filed, your Notice of Appeal must be filed within 30 days of the date that the Environmental Protection Agency publishes their notice in the **Federal Register** to the address listed below.

ADDRESSES: If an appeal is filed, your Notice of Appeal must be filed with the State Director, Bureau of Land Management, P.O. Box 1828, Cheyenne, Wyoming 82003–1828.

FOR FURTHER INFORMATION CONTACT: Arlan Hiner, Area Manager, Pinedale Resource Area, 432 E. Mill Street, P.O. Box 768, Pinedale, Wyoming 82941, telephone 307–367–4358.

SUPPLEMENTARY INFORMATION: This abbreviated Final Environmental Statement contains copies of substantive comments received on the draft, responses to those comments, and an errata section with specific modifications and corrections to the Draft Environmental Impact Statement in response to comments received. No rewriting or reprinting of the Draft Environmental Statement is necessary.

Given the low level of comment and the lack of controversy or opposition to the project expressed during public scoping and the comment period on the Draft Environmental Impact Statement, BLM has decided to issue the Record of Decision concurrent with the Final Environmental Impact Statement. Concurrent filing is provided for in 40 CFR 1506.10(b)(2). The Record of Decision outlines the decision and rationale including key management consideration for Enron's Burly project.

Dated: June 7, 1994.

BILLING CODE 4310–22–M

[CO–920–94–4110–03; COC47428 and COC55420]

Colorado; Proposed Reinstatement of Terminated Oil and Gas Leases

Under the provisions of Public Law 97–451, a petition for reinstatement of oil and gas leases COC47428 and COC55420, Rio Blanco County, Colorado, was timely filed and was accompanied by all required rentals and royalties accruing from August 1, 1993, the date of termination.

No valid leases have been issued affecting the lands. The lessee has agreed to new lease terms for rentals and royalties at rates of $10 per acre and 16⅔ percent, respectively. The lessee has paid the required $500 administrative fee for each lease and has reimbursed the Bureau of Land Management for the cost of this **Federal Register** notice.

Having met all the requirements for reinstatement of each lease as set out in Section 31 (d) and (e) of the Mineral Leasing Act of 1920, as amended, (30 U.S.C. 188 (d) and (e), the Bureau of Land Management is proposing to reinstate the leases effective August 1, 1993, subject to the original terms and conditions of each lease and the increased rental and royalty rates cited above.

Questions concerning this notice may be directed to Joan Gilbert of the Colorado State Office at (303) 239–3783.

Dated: June 1, 1994.

Minerals Management Service

Information Collection Submitted to the Office of Management and Budget for Review Under the Paperwork Reduction Act

The collection of information listed below has been submitted to the Office of Management and Budget for approval under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35). Copies of the information collection requirement and related explanatory material may be obtained by contacting Jeane Kalas at (303) 231–3046. Comments and suggestions on the requirement should be made directly to the Bureau Clearance Officer at the telephone number listed below, and to the Office of Management and Budget Paperwork Reduction Project, Washington, DC, 20503, telephone (202) 395–7340.

Title: Dual Accounting Information Collection.

OMB Approval Number: None.

Abstract: The Minerals Management Service (MMS), acting as agent of the United States Government, has a trust responsibility in the administration of Indian oil and gas leases. In carrying out this trust responsibility the MMS is conducting an inquiry into compliance with dual accounting requirements contained in regulations at 30 CFR 206.155. These regulations require that, where lease terms provide, accounting for comparison (dual accounting) must be performed in determining the value of natural gas production for royalty purposes. The inquiry will initially involve approximately 90 lessees and royalty payors on leases on Jicarilla Apache Tribal lands. Royalty payors on these leases will be required to submit a statement that as a matter of actual practice and company policy, company personnel did or did not each year since March 1, 1988, compare the value of unprocessed wet gas with the combined value of dry methane and extracted products derived from processing, less the allowed cost of processing, compare those values with gross proceeds accruing from disposition of production, and then select the highest of these measures as the value of production on which the company paid royalties. Upon conclusion of this inquiry, MMS may undertake further audit or other investigation of company records.

Frequency: One time only.

Description of Respondents: 90 Indian lease royalty payors.

Estimated Completion Time: 5 hours.

Estimated Responses: 90.

Estimated Burden Hours: 450.

Bureau Clearance Officer: Arthur Quintana (703) 787–1101.

Dated: May 5, 1994.

BILLING CODE 4310–MR–M

Minerals Management Service (MMS)

Information Collection Submitted to the Office of Management and Budget (OMB) for Review Under the Paperwork Reduction Act

The proposal for the collection of information listed below has been submitted to OMB for approval under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35). Copies of the proposed collections of information and related forms may be obtained by contacting the Bureau's Clearance Officer at the telephone number listed below. Comments and suggestions on the proposal should be made directly to the Bureau Clearance Officer and to the Office of Management and Budget; Paperwork Reduction Project (1010–0030); Washington, DC 20503, telephone (202) 395–7340, with copies to Chief, Engineering and Standards Branch; Engineering and Technology Division; Mail Stop 4700; Minerals Management Service; 381 Elden Street; Herndon, Virginia 22070–4817.

Title: 30 CFR part 250, subpart A, General.

OMB Approval Number: 1010–0030.

Abstract: The MMS proposes to amend the regulations at 30 CFR part 250 by adding a proposed section, § 250.27, Safety of operations communication. This proposed requirement will require operators of offshore production platforms to notify incoming or new personnel arriving on the platform of the status of repairs of process equipment, safety systems, or other systems that are out of service. This will require operators to maintain records of all communications.

Bureau Form Number: None.

Frequency: On occasion.

Description of Respondents: Federal Outer Continental Shelf oil and gas lessees.

Estimated Completion Time: 27.41 hours (rounded).

Annual Responses: 4,605 (rounded).

Recordkeeping Hours: 8,738.

Annual Burden Hours: 13,343.

Bureau Clearance Officer: Arthur Quintana (703) 787–1239.

Dated: May 12, 1994.

National Park Service

Change for the Management and Operation of the Presidio Child Development Center

AGENCY: National Park Service, Interior.

NOTICE: Notice of change.

In February the National Park Service released a notice of its intent to issue a Prospectus for a Concessions Contract to operate the Presidio Child Development Center located in the Golden Gate National Recreation Area. In place of the Prospectus a *Request for Proposal (RFP)* for the operation of the facility under a Special Use Permit will be released. The *RFP* will be the initial process where by organizations wishing to operate the Presidio Child Development Center will be reviewed in regards to their capabilities and prior experience. From the results of the *RFP* the National Park Service will enter into negotiations with the most qualified respondent for the management of the facility.

If you responded to our initial notice you do not need to respond to this change. We will be sending you the *RFP* in the near future.

If you did not respond to the original notice, and wish to receive a copy of the *RFP*, please write to the address below. You may also call to add your name to the list.

National Park Service, Office of the General Manager, Attention: Child Development Center RFP, Main Post, Building 102, P.O. Box 29022, Presidio of San Francisco, California 94129–0022, or call: (415) 556–1388.

Please distribute this notice to others who may have an interest in this project.

Dated: June 2, 1994.

Patricia Neubacher,

Acting Regional Director, Western Region.

National Register of Historic Places; Notification of Pending Nominations

Nominations for the following properties being considered for listing in the National Register were received by the National Park Service before June 4, 1994. Pursuant to § 60.13 of 36 CFR part 60 written comments concerning the significance of these properties under the National Register criteria for evaluation may be forwarded to the National Register, National Park Service P.O. Box 37127, Washington, DC 20013–7127. Written comments should be submitted by June 29, 1994.

INTERSTATE COMMERCE COMMISSION

[Finance Docket No. 32509]

Luzerne County Rail Corporation—Lease, Operation, and Acquisition Exemption—Certain Rail Lines and Operating Rights of F&L Realty and Pocono Northeast Railway, Inc.

Luzerne County Rail Corporation (LCRC), a noncarrier subsidiary of the Redevelopment Authority of Luzerne County, has filed a notice of exemption to lease and operate certain rail lines owned by Pocono Northeast Railway, Inc. (PNER) and F&L Realty (F&L) in Luzerne and Lackawanna Counties, PA as follows: (1) The Dunmore Secondary Track, between milepost 6.5, at Avoca and milepost 8.6 at Rocky Glen, a distance of about 2.1 miles; (2) The Avoca Industrial Track, between milepost 1.8, at No. 7 Junction, and milepost 6.5 at Avoca, a distance of 4.7 miles, including the connection with the track of CR, between "LB" Junction and the switch of the Dunmore Secondary Track, a distance of 0.123 miles, and the Langcliff Connecting Track, between milepost 0.0, at Duryea and the connection with DH in the middle of York Avenue, at milepost 0.867, a distance of 0.867 miles; (3) The West Pittston Running Track, between milepost 0.0 at West Pittston, and milepost 3.0, at Harding, a distance of 3.0 miles, and between milepost 186.4 at West Pittston, and milepost 194.4 in Kingston, a distance of 0.2 miles; (4) The Suscon Running Track, between milepost 154.5 at Suscon, and milepost 156.6, at Suscon, a distance of 2.1 miles; (5) The Wilkes-Barre Secondary, between milepost 169.2, at Ashley, and milepost 185.5, at Pittston, a distance of 16.3 miles; (6) The Nanticoke Industrial Track, between milepost 0.0 at Ashley and milepost 2.6 at Central Scrap, a distance of 2.6 miles; (7) The Harry E. Breaker Spur, between milepost 0.1, at Maltby Junction, and milepost 0.5, a distance of 0.4 miles; (8) The APC line, between milepost 0.0 and milepost 0.6 in Wilkes-Barre, a distance of 0.6 miles; (9) The Brownsville Industrial Track, between milepost 0.0 at Hillside, and milepost 1.0 at Brownsville, a distance of 1.0 miles; (10) The Wilkes-Barre Industrial Track, between milepost 59.9 at Ferry Street, and milepost 62.9, at Wilkes-Barre, a distance of 3.0 miles; (11) The Miner's Mills Industrial Track between milepost 173.6, at N. Wilkes-Barre, and Milepost 176.1 at Hudson, a distance of 2.5 miles; (12) The Pettibone Branch, between milepost 0.0 and milepost 0.759, at Dorranceton, a distance of 0.759 miles; (13) The Kingston Industrial Track, between milepost 142.7, at Pittston Junction, and Railroad Station 8594+58, a distance of 8.1 miles; and (14) The DH Wilkes-Barre Connector, from milepost A–208.08, Hudson Yard, to Conyngham Avenue, City of Wilkes-Barre, a distance of 2.5 miles.[1]

LCRC also will acquire PNER's operating rights over two segments of rail line owned by Greater Wilkes-Barre Partnership, Inc. (GWBP), and IR, Inc. (IR): (1) GWBP's Hanover Industrial Track, between milepost 0.0 at Ashley, and milepost 0.5, at Hanover Industrial Park, a distance of 0.5 miles; and (2) IR's Suscon Industrial Track, between milepost 154.5 at Suscon, and milepost 158.7, at Hillside, a distance of 4.2 miles.

The rail line LCRC will lease and operate totals approximately 55.55 miles.

LCRC expected to consummate its lease of the involved lines on May 26, 1994. As part of the transaction, LCRC will acquire an option to acquire the leased lines (except those owned by GWBP and IR), and it expects to exercise that option by September 1, 1994.

This proceeding is related to *Delaware-Lackawanna Railroad Co., Inc.—Trackage Rights Exemption—Luzerne County Rail Corporation,* Finance Docket No. 32510, wherein D-L has concurrently filed a notice of exemption under 49 CFR 1180.2(d)(7) regarding its acquisition of local trackage rights over the 16 segments described herein.

Any comments must be filed with the Commission and served on: Kevin M. Sheys, Oppenheimer, Wolff & Donnelly, 1020 19th Street, NW, Suite 400, Washington, DC 20036.

The notice is filed under 49 CFR 1150.31. If the notice contains false or misleading information, the exemption is void *ab initio.* Petitions to revoke the exemption under 49 U.S.C. 10505(d) may be filed at any time. The filing of a petition to revoke will not automatically stay the transaction.

Decided: June 6, 1994.

[1] The described lines are among those previously operated by PNER, which ceased all rail operations on September 17, 1993. Pursuant to *Delaware-Lackawanna Railroad Company, Inc.—Directed Service—Pocono Northeast Railway, Inc.,* Directed Service Order No. 1513 (ICC served Sept. 28 and Nov. 26, 1993), Delaware-Lackawanna Railroad Company, Inc. (D-L) performed interim uncompensated directed service over the described lines and other PNER/F&L lines between September 29, 1993, and May 23, 1994.

By the Commission, David M. Konschnik, Director, Office of Proceedings.

Sidney L. Strickland, Jr.,

Secretary.

[Finance Docket No. 32510]

Delaware-Lackawana Railroad Co., Inc.—Trackage Rights Exemption—Luzerne County Rail Corporation

Luzerne County Rail Corporation (LCRC) has agreed to grant local trackage rights to Delaware-Lackawanna Railroad Co., Inc. (D-L) to operate over the following segments of line in Luzerne and Lackawanna Counties, PA: (1) The Dunmore Secondary Track, between milepost 6.5, at Avoca, and milepost 8.6 at Rocky Glen, a distance of about 2.1 miles; (2) The Avoca Industrial Track, between milepost 1.8, at No. 7 Junction, and milepost 6.5 at Avoca, a distance of 4.7 miles, including the connection with the track of CR, between "LB" Junction and the switch of the Dunmore Secondary Track, a distance of 0.123 miles, and the Langcliff Connecting Track, between milepost 0.0, at Duryea, and the connection with DH in the middle of York Avenue, at milepost 0.867, a distance of 0.867 miles; (3) The West Pittston Running Track, between milepost 0.0 at West Pittston, and milepost 3.0, at Harding, a distance of 3.0 miles, and between milepost 186.4, at West Pittston, and milepost 194.4 in Kingston, a distance of 0.2 miles; (4) The Suscon Running Track, between milepost 154.5 at Suscon, and milepost 156.6, at Suscon, a distance of 2.1 miles; (5) The Wilkes Barre Secondary, between milepost 169.2, at Ashley, and milepost 185.5, at Pittston, a distance of 16.3 miles; (6) The Nanticoke Industrial Track, between milepost 0.0 at Ashley, and milepost 2.6 at Central Scrap, a distance of 2.6 miles; (7) The Harry E. Breaker Spur, between milepost 0.1, at Maltby Junction, and milepost 0.5, a distance of 0.4 miles; (8) The APC line, between milepost 0.0 and milepost 0.6 in Wilkes-Barre, a distance of 0.6 miles; (9) The Brownsville Industrial Track, between milepost 0.0 at Hillside, and milepost 1.0 at Brownsville, a distance of 1.0 miles; (10) The Wilkes-Barre Industrial Track, between milepost 59.9, at Ferry Street, and milepost 62.9, at Wilkes-Barre, a distance of 3.0 miles; (11) The Pettibone Branch, between milepost 0.0 and milepost 0.759, at Dorranceton, a distance of 0.759 miles; (12) The Kingston Industrial Track, between milepost 142.7, at Pittston Junction, and Railroad Station 8594+58 a distance of 8.1 miles; (13) The DH Wilkes-Barre Connector, from milepost A–208.08, Hudson Yard, to Conyngham Avenue, City of Wilkes-Barre, a distance of about 2.5 miles; (14) The Hanover Industrial Track, between milepost 0.0, at Ashley, and milepost 0.5, at Hanover Industrial Park, a distance of 0.5 miles; and (15) The Suscon Industrial Track, between milepost 154.5 at Suscon, and milepost 158.7, at Hillside, a distance of 4.2 miles. The trackage rights were to become effective on or after May 26, 1994.

This proceeding is related to *Luzerne County Rail Corporation—Lease, Operation, and Acquisition Exemption—Certain Rail Lines and Operating Rights of F&L Realty and Pocono Northeast Railway, Inc.,* Finance Docket No. 32509, wherein LCRC has concurrently filed a notice of exemption under 49 CFR 1150.31 regarding its lease, operation, and acquisition of certain rail lines including those involved here.

This notice is filed under 49 CFR 1180.2(d)(7). If the notice contains false or misleading information, the exemption is void *ab initio.* Petitions to revoke the exemption under 49 U.S.C. 10505(d) may be filed at any time. The filing of a petition to revoke will not stay the transaction. Pleadings must be filed with the Commission and served on: Robert R. Wimbish, Gerst & Heffner, 1700 K Street, NW, Suite 301, Washington, DC 20006.

As a condition to use of this exemption, any employees adversely affected by the trackage rights will be protected pursuant to *Norfolk and Western Ry. Co.—Trackage Rights—BN,* 354 I.C.C. 605 (1978), as modified in *Mendocino Coast Ry., Inc.—Lease and Operate,* 360 I.C.C. 653 (1980).

Decided: June 6, 1994.

By the Commission, David M. Konschnik, Director, Office of Proceedings.

BILLING CODE 7035–01–P

DEPARTMENT OF JUSTICE

Lodging of Settlement Agreement Pursuant to the Comprehensive Environmental Response Compensation and Liability Act of 1980 as Amended

In accordance with Department of Justice policy, 28 CFR 50.7, notice is hereby given that a proposed settlement agreement in In re Valley Steel Products

Company, Inc., No. 92–40778–293, (Bankr. E.D. Mo.) was lodged on June 2, 1994 with the United States Bankruptcy Court for the Eastern District of Missouri. The agreement resolves claims of the United States against Debtor Valley Steel Products Company, Inc. ("Valley Steel") in the above-referenced bankruptcy under the Comprehensive Environmental Response, Compensation, and Liability Act ("CERCLA") and under the Resource Conservation and Recovery Act ("RCRA") for contamination at Valley Steel's former manufacturing facility in Louisiana, Missouri (the "Site"). In the proposed settlement agreement Valley Steel agrees to give the United States an allowed general unsecured pre-petition claim of $1,900,000 in settlement of the United States' claims for response costs incurred or to be incurred by the Environmental Protection Agency at the Site.

The Department of Justice will receive, for a period of thirty (30) days from the date of this publication, comments relating to the proposed consent decree. Comments should be addressed to the Assistant Attorney General for the Environment and Natural Resources Division, Department of Justice, Washington, DC 20530, and should refer to In re Valley Steel Products Company, Inc., No. 92–40778–293, DOJ Ref. #90–11–2–298B.

The proposed settlement agreement may be examined at the Office of the United States Attorney, 1114 Market Street, St. Louis, Missouri, 63101; the Region VII Office of the Environmental Protection Agency, 726 Minnesota Avenue, Kansas City, Kansas, 66101; and the Consent Decree Library, 1120 G Street NW., 4th Floor, Washington, DC 20005, (202) 624–0892. A copy of the proposed settlement agreement may be obtained in person or by mail from the Consent Decree Library, 1120 G Street NW., 4th Floor, Washington, DC 20005. In requesting a copy, please refer to the referenced case and enclose a check in the amount of $2.75 (25 cents per page reproduction costs), payable to the Consent Decree Library.

John C. Cruden, Chief,

Environmental Enforcement Section, Environment and Natural Resources Division

BILLING CODE 4410–01–M

Antitrust Division

United States v. Pilkington plc and Pilkington Holdings Inc.; Proposed Final Judgment and Competitive Impact Statement

Notice is hereby given pursuant to the Antitrust Procedures and Penalties Act, 15 U.S.C. 16(b)–(h), that a proposed Final Judgment, Stipulation, and Competitive Impact Statement have been filed with the United States District Court for the District of Arizona at Tucson in *United States* v. *Pilkington plc and Pilkington Holdings Inc.*, Civil No. *94–345 TUC–WDB* as to both defendants.

The Complaint alleges that the defendants violated Sections 1 and 2 of the Sherman Act by restraining exports of float glass design and construction services by enforcing territorial and other restraints in license agreements entered into long ago that are now unjustified by sufficiently valuable intellectual property rights. Most of the agreements are more than 20 years old.

The proposed Final Judgment enjoins defendants from enforcing license provisions that restrain their United States-based licensees' freedom to use float glass technology anywhere in the world, and from enforcing license restrictions against their other licensees that restrain the licensees' freedom to use float glass technology in the United States. It also enjoins defendants from asserting any proprietary know-how rights in such technology against individuals or firms in the United States who are not licensees.

Float glass technology is used to make over 90 percent of the glass used for windows, windshields, architectural panels, and mirrors.

Public comment on the proposed Final Judgment is invited within the statutory 60-day comment period. Such comments and responses thereto will be published in the **Federal Register** and filed with the Court. Comments should be directed to Gail Kursh, Chief, Professions and Intellectual Property Section, room 9903, U.S. Department of Justice, Antitrust Division, 555 4th Street, NW., Washington, DC 20001 (telephone: 202/307–5799).

Constance K. Robinson,

Director of Operations, Antitrust Division

United States District Court for the District of Arizona

United States of America, Plaintiff, v. *Pilkington plc and Pilkington Holdings Inc.*, Defendants. Civil Action No. 94–345. Filed May 25, 1994. Judge Browning

Stipulation

It is stipulated by and between the undersigned parties, by their respective attorneys, that:

1. The Court has jurisdiction over the subject matter of this action and over each of the parties hereto, and venue of this action is proper in the District of Arizona;

2. The parties consent that a Final Judgment in the form hereto attached may be filed and entered by the Court, upon the motion of any party or upon the Court's own motion, at any time after compliance with the requirements of the Antitrust Procedures and Penalties Act (15 U.S.C. 16), and without further notice to any party or other proceedings, provided that Plaintiff has not withdrawn its consent, which it may do at any time before the entry of the proposed Final Judgment by serving notice thereof on Defendants and by filing that notice with the Court; and

3. Defendants agree to be bound by the provisions of the proposed Final Judgment pending its approval by the Court. If the Plaintiff withdraws its consent or if the proposed Final Judgment is not entered pursuant to this Stipulation, this Stipulation shall be of no effect whatsoever, and the making of this Stipulation shall be without prejudice to any party in this or in any other proceeding.

Dated this 25th day of May, 1994.

For Plaintiff The United States of America

Robert E. Litan,

Deputy Assistant Attorney General

Mark C. Schechter,

Deputy Director of Operations,

Gail Kursh,

Chief, Professions & Intellectual Property Section,

David C. Jordan,

Assistant Chief Professions & Intellectual Property Section,

K. Craig Wildfang,

Special Counsel to the Assistant Attorney General, Antitrust Division,

Kurt Shaffert,

Thomas H. Liddle,

Molly DeBusschere,

John B. Arnett, Sr.

M. Lee Doane,

Attorneys, U.S. Dep't. of Justice, Antitrust Division, room 9903, J.C.B. 555 4th Street, N.W., Washington D.C. 20001, 202/307–0467

For the Defendants:

Rober E. Leverton,

Chief Executive, Pilkington plc,

Peter H. Grunwell,

Director, Plikington Holdings Inc.

Counsel for Defendants, Pilkington plc and Pilkington Holdings, Inc

United States District Court for the District of Arizona

United States of America, Plaintiff, v. *Pilkington plc; and Pilkington Holdings Inc.*, Defendants. Civil Action No. 94–345. Filed: May 25, 1994, Judge Browning.

Final Judgment

Plaintiff, the United States of America, having filed its Complaint on May 25, 1994, and plaintiff and defendants, by their respective attorneys, having consented to the entry of this Final Judgment without trial or adjudication of any issue of fact or law, and before the taking of any testimony in this action, and without this Final Judgment constituting any evidence against or an admission by any defendant to any such issue;
And defendants having agreed to be bound by the provisions of this Final Judgment pending its approval by the Court;

Therefore, before the taking of any testimony and without trial or adjudication of any such issue of fact or law herein, and upon consent of the parties hereto, it is hereby

ORDERED, ADJUDGED, and DECREED as follows:

I

Jurisdiction

This Court has jurisdiction of the subject matter of this action and of each of the parties consenting hereto. The Complaint states a claim upon which relief may be granted against defendants under sections 1, 2 and 6a of the Sherman Antitrust Act, 15 U.S.C. 1, 2, 6a.

II

Definitions

As used in this Final Judgment:

A. "Agreement" means any contract, agreement or understanding, whether oral or written, or any term or provision thereof.

B. "Confidentiality" means the non-disclosure of information under an agreement, undertaking or obligation arising under applicable law to maintain its secrecy and/or limit its use.

C. "Fees" means money paid to the defendants for the right to use FLOAT TECHNOLOGY, including, but not limited to, royalties, lump sum payments and line fees.

D. "Final Award" means the Final Award dated August, 1992 in the arbitration proceedings between PPG Industries, Inc. and PILKINGTON.

E. "Flat Glass" means glass formed in a flat shape and glass formed flat and then bent or curved.

F. "Float Glass" means FLAT GLASS manufactured by floating molten glass on the surface of a bath of molten metal.

G. "Float Technology" means float process technology in existence on or before the date of the STIPULATION that is appropriate and useful for the design, construction, and/or operation of a float bath used in making FLOAT GLASS.

H. "Foreign Licensee" means any LICENSEE that is not a U.S. LICENSEE.

I. "Licensee" means any person, company, or entity that has entered into a LICENSE AGREEMENT with PILKINGTON.

J. "License Agreement" means any AGREEMENT, whether or not denominated as such, in being as of the date of the STIPULATION, that provided or provides for, or acknowledges or recognizes, the licensing of, or the right to use, FLOAT TECHNOLOGY for the manufacture of FLOAT GLASS, including, without limitation, any AGREEMENT (i) For sublicensing or (ii) for settling any dispute regarding rights to FLOAT TECHNOLOGY.

K. "Limitations" means: (1) Any limitation, or restriction of territories, fields, markets, or customers for the design and construction, or supervision of construction, of FLOAT GLASS plants, or the manufacture of FLOAT GLASS; and/or (2) any restriction or limitation, or purported restriction or limitation of the use of FLOAT TECHNOLOGY, whether the result of an affirmative prohibition or a limited authorization.

L. "Non-licensee" means any person, company, or entity which has not entered into a LICENSE AGREEMENT with PILKINGTON.

M. "North America" means the United States of America, Canada and the Republic of Mexico.

N. "Pilkington" means Defendant Pilkington plc.

O. "Stipulation" means the stipulation entered into by the parties to this action dated May 25, 1994.

P. "Subject Float Technology" means FLOAT TECHNOLOGY that in relation to any given LICENSEE was disclosed to that LICENSEE under its LICENSE AGREEMENT other than FLOAT TECHNOLOGY disclosed by PILKINGTON to any U.S. LICENSEE while PILKINGTON owned 50% or more of that U.S. LICENSEE.

Q. "U.S. Licensee" means any LICENSEE that was or is incorporated in the United States or had or has its principal place of business in the United States, but shall not include any subsidiaries, affiliates or parents of any such LICENSEE nor any person while it is a subsidiary, affiliate or parent of any defendant. For purposes of this definition, an "affiliate" is an entity in which a person has an equity interest, directly or indirectly, of 50% or less; a "subsidiary" is an entity in which a person has an equity interest, directly or indirectly, of more than 50%; a "parent" is an entity that has, directly or indirectly, more than 50% of the equity interest of another entity.

R. "U.S. Non-Licensee" means any NON-LICENSEE that is domiciled or incorporated in the United States and that has its principal place of business in the United States.

III

Applicability

This Final Judgment applies to defendants and to each of their officers, directors, agents, employees, subsidiaries, successors and assigns; and to all other persons in active concert or participation with any of them who shall have received actual notice of this Final Judgment by personal service or otherwise.

IV

Injunction

Defendants are enjoined and prohibited as follows:

A. U.S. Licensees

1. Except as provided in subparagraph A.4. hereof, no defendant shall enter into, maintain, enforce or claim any right under any AGREEMENT to the extent such AGREEMENT requires, or purports to require, any U.S. LICENSEE to pay FEES, observe LIMITATIONS, or maintain CONFIDENTIALITY (subject to subparagraph A.3.) with respect to the use or sublicensing of any SUBJECT FLOAT TECHNOLOGY.

2. Except as provided in subparagraph A.4. hereof, no defendant shall assert against any U.S. LICENSEE any proprietary FLOAT TECHNOLOGY know-how rights (including any claim of CONFIDENTIALITY, subject to subparagraph A.3.) that it may have or claim with respect to any:

(a) Subject Float Technology; or

(b) FLOAT TECHNOLOGY not disclosed directly to that U.S. LICENSEE but otherwise in the possession of that U.S. LICENSEE unless for each item or combination of items thereof

(i) it has a good faith argument that such item, or combination of items, is a trade secret under applicable law, and

(ii) it has a good faith argument that it has been acquired in breach of CONFIDENTIALITY or otherwise unlawfully.

3. Defendants may assert against U.S. LICENSEES a claim of breach of CONFIDENTIALITY in respect of SUBJECT FLOAT TECHNOLOGY, but only if the claim is made as to that which is a trade secret under applicable law and is either:

(a) Based upon a U.S. LICENSEE's failure to make lawful and commercially reasonable efforts to preserve the CONFIDENTIALITY of SUBJECT FLOAT TECHNOLOGY; or

(b) Based upon a U.S. LICENSEE'S failure to include in any AGREEMENT transferring FLOAT TECHNOLOGY a lawful and commercially reasonable provision requiring the transferee to maintain the CONFIDENTIALITY of the transferred FLOAT TECHNOLOGY.

4. The provisions of subparagraphs A.1. and A.2. hereof shall not preclude in any way defendants from pursuing fully any claims for an account of profits, damages or any other monetary relief based on conduct occurring before the date of the STIPULATION in any proceedings instituted before that date.

B. U.S. Non-Licensees

1. No defendant shall enter into or enforce any AGREEMENT with any employee, contractor, supplier, consultant, or the like who is a U.S. NON-LICENSEE that contains any obligation of CONFIDENTIALITY to or for the benefit directly or indirectly of PILKINGTON with respect to FLOAT TECHNOLOGY, or any covenant to refrain from competing or engaging in any line of business relative to FLOAT TECHNOLOGY, that is of longer duration or greater scope than permitted under applicable law, provided that plaintiff agrees that defendants shall not be in contempt of this Final Judgment if they enter into or seek to enforce any such AGREEMENT based on a good faith argument that such AGREEMENT is permitted by applicable law.

2. No defendant shall assert against U.S. NON-LICENSEES (other than in respect of AGREEMENTS referred to in subparagraph B.1. above) any proprietary FLOAT TECHNOLOGY know-how rights (including any claim of CONFIDENTIALITY) that it may have or claim with respect to any FLOAT TECHNOLOGY disclosed by PILKINGTON to any U.S. LICENSEE, unless for each item or combination of items thereof:

(a) Defendant has a good faith argument that such item, or combination of items, is a trade secret under applicable law;

(b) Defendant has a good faith argument that such item, or combination of items, has been acquired in breach of CONFIDENTIALITY or otherwise unlawfully;

(c) Defendant has, within fourteen (14) days after any such assertion:

(i) Made a showing in writing to the Department of Justice, Antitrust Division in support of the arguments described in subparagraphs 2(a) and 2(b), above;

(ii) Identified, enumerated, and described such item or combination of items (in sufficient detail and with sufficient clarity to distinguish them from information not a trade secret under applicable law) on a list submitted to the Antitrust Division and to the U.S. NON-LICENSEE against whom such right is asserted; and

(d) Such U.S. NON-LICENSEE is unwilling to make lawful and commercially reasonable efforts to maintain the CONFIDENTIALITY of any such item or combination of items for which it has received actual notice of a defendant's claim of proprietary rights therein pursuant to subparagraph 2(c)(ii), above, and for which a defendant has made the requisite showing pursuant to subparagraph 2(c)(i), above.

C. Agreements with Foreign Licensees

No defendant shall enter into, maintain, enforce or claim any right under any AGREEMENT to the extent such AGREEMENT contains any LIMITATIONS on a FOREIGN LICENSEE regarding its use or sublicensing of any FLOAT TECHNOLOGY that would have the effect of prohibiting or limiting the manufacture of FLOAT GLASS in NORTH AMERICA, provided that defendants may charge commercially reasonable and non-discriminatory FEES for the use or sublicensing of FLOAT TECHNOLOGY other than that disclosed by PILKINGTON to a U.S. LICENSEE; and provided further that a defendant may enforce CONFIDENTIALITY against any FOREIGN LICENSEE for use of FLOAT TECHNOLOGY, but, with respect to FLOAT TECHNOLOGY disclosed by PILKINGTON to a U.S. LICENSEE, only to the extent that the defendant has a good faith argument that the items or combination of items of such FLOAT TECHNOLOGY involved are trade secrets under applicable law.

D. Exports to the United States

No defendant shall, with the intent of restraining or limiting the amount of exports of FLOAT GLASS to the United States:

1. assert any proprietary FLOAT TECHNOLOGY know-how rights with respect to SUBJECT FLOAT TECHNOLOGY or

2. enter into, maintain, enforce or claim any right under any AGREEMENT with any LICENSEE.

E. Price of Float Technology

No defendant shall enter into, maintain or enforce any AGREEMENT that fixes, maintains or stabilizes the price to be charged for the use of any FLOAT TECHNOLOGY in the United States.

F. Representations

With respect to all FLOAT TECHNOLOGY disclosed by PILKINGTON to any U.S. LICENSEE, no defendant shall represent to any person anywhere in the world that the person will or may incur liability to any defendant as a result of that person using, or contracting for the use of, or financing, facilitating, or promoting another person's use of such FLOAT TECHNOLOGY insofar as the same is acquired directly from any U.S. LICENSEE or any U.S. NON-LICENSEE provided that nothing shall limit or restrict any defendant from representing, claiming or enforcing any right to which either defendant may now or hereafter be entitled other than as is expressly enjoined by this Final Judgment.

G. Public Domain

1. Within sixty (60) days of the entry of this Final Judgment, PILKINGTON shall identify the FLOAT TECHNOLOGY found to be public knowledge in the FINAL AWARD to the Department of Justice, Antitrust Division; to all U.S. LICENSEES; and to all U.S. NON-LICENSEES who shall request the same in writing.

2. In the event that SUBJECT FLOAT TECHNOLOGY is: (a) Formally acknowledged in writing by PILKINGTON to be in the public domain, or (b) is determined to be in the public domain in a final award in any arbitration proceedings to which PILKINGTON is a party or (c) is held to be in the public domain in any proceedings to which PILKINGTON is a party conducted in a court of competent jurisdiction and provided that any such determination or holding is an essential relevant part of a final non-appealable decision or judgment binding upon PILKINGTON, then within sixty (60) days of such acknowledgment, award for judgment PILKINGTON shall send notice thereof identifying such public domain FLOAT TECHNOLOGY to the Department of Justice, Antitrust Division; to all U.S. LICENSEES; and to all U.S. NON-LICENSEES who previously made a request pursuant to subparagraph G.1. above.

H. Patents

Nothing in this Paragraph IV shall be construed to apply to any lawful use of any patent or any patent right to which defendants may now or hereafter be entitled.

I. Construction

Nothing in this Paragraph IV shall be considered by implication either to permit or to prohibit any agreements, conduct or practices not expressly covered by this Final Judgment. Nothing in this Paragraph IV shall be construed as permission to engage in conduct that is not lawful, or as legalizing otherwise unlawful conduct nor as a determination that any conduct affected or subject to this Paragraph IV is unlawful. The legality or illegality of any conduct not expressly covered by this Final Judgment is left unaffected by the entry of this Final Judgment.

J. Records

During the term of this Final Judgment defendants shall maintain a file in the United States at the offices of defendant Pilkington Holdings Inc. containing the documents created or received after the date of this Final Judgment and identified further in this paragraph and during the term of this Final Judgment shall produce the same to the Department of Justice, Antitrust Division within sixty (60) days of a written request given to defendants at the principal office of Pilkington Holdings Inc., subject to any lawful privilege:

1. A copy of each LICENSE AGREEMENT entered into or amended;

2. A copy of each complaint (or its equivalent) filed in any proceeding, and each other document in which defendants asserted against any U.S. LICENSEE or U.S. NON-LICENSEE any proprietary FLOAT TECHNOLOGY know-how rights (including any claim of CONFIDENTIALITY);

3. A copy of each document constituting or containing a determination in any proceeding, or any acknowledgement by defendants that any item or combination of items of FLOAT TECHNOLOGY is, or has become, publicly known.

4. A copy of each document constituting or containing: (a) Any request for the communication of FLOAT TECHNOLOGY or a grant of rights to FLOAT TECHNOLOGY for the manufacture of FLOAT GLASS or sublicensing from any U.S. LICENSEE or U.S. NON-LICENSEE, and (b) defendant's response to any such request.

V

Notification

Within sixty (60) days after the entry of this Final Judgment, defendants shall either: (a) Deliver by certified or registered mail to each person to whom it has granted a LICENSE, or with whom it has entered into any confidentiality agreement pertaining to FLOAT GLASS, including without limitation equipment fabricators, suppliers, and employees a copy of this Final Judgment and the accompanying Competitive Impact Statement; or (b) cause to be published in one or more journals a copy of this Final Judgment or a summary of this Final Judgment, which journals and summary shall be agreed upon by plaintiff and defendants, and defendants shall promptly certify in writing to plaintiff the fact of their compliance with this provision.

VI

Reporting

A. To determine or secure compliance with this Final Judgment, duly authorized representatives of the plaintiff shall, upon written request of the Assistant Attorney General in charge of the Antitrust Division, on reasonable notice given to defendants at their principal office, subject to any lawful privilege, be permitted:

1. Access during normal office hours to inspect and copy all books, ledgers, accounts, correspondence, memoranda and other documents and records in the possession, custody, or control of defendants, which may have counsel present, relating to any matters contained in this Final Judgment. PILKINGTON may elect, with respect to any such materials as may be located outside the United States of America at the time it receives such notice, to provide such access at a location within the United States that is reasonably acceptable to the duly authorized representative in lieu of providing access at the situs of the materials.

2. Subject to the reasonable convenience of defendants and without restraint or interference from it, to interview officers, employees, or agents of defendants, who may have counsel present, regarding any matters contained in the Final Judgment. PILKINGTON may elect to make available for such interviews those of its officers, employees, or agents whose regular work station is outside the United States of America at a location within the United States that is reasonably acceptable to the duly authorized representative.

B. Upon written request of the Assistant Attorney General in charge of the Antitrust Division, on reasonable notice given to defendants at their principal office, subject to any lawful privilege, defendant shall submit such written reports, under oath if requested, with respect to any matters contained in this Final Judgment.

C. No information or documents obtained by the means provided by this Section VI shall be divulged by the plaintiff to any person other than a duly authorized representative of the Executive Branch of the United States government, except in the course of legal proceedings to which the United States is a party, or for the purpose of securing compliance with this Final Judgment, or as otherwise required by law.

D. If at the time information or documents are furnished by defendant to plaintiff, defendant represents and identifies in writing the material in any such information or document to which a claim of protection may be asserted under Rule 26(c)(7) of the Federal Rules of Civil Procedure, and defendant marks each pertinent page of such material "Subject to claim of protection under Rule 26(c)(7) of the Federal Rules of Civil Procedure," then 10 days' notice shall be given by plaintiff to defendant prior to divulging such material in any legal proceeding (other than a grand jury proceeding) which defendant is not a party.

VII

Further Elements of Judgment

A. This Final Judgment shall expire on the tenth anniversary of its entry.

B. Jurisdiction is retained by this Court over this action and the parties thereto for the purpose of enabling any of the parties thereto to apply to this Court at any time for further orders and directions as may be necessary or appropriate to carry out or construe this Final Judgment, to modify or terminate any of its provisions, to enforce compliance, and to punish violations of its provisions.

VIII

Public Interest

Entry of this Final Judgment is in the public interest.

UNITED STATES DISTRICT JUDGE

United States District Court for the District of Arizona

United States of America, Plaintiff, v. *Pilkington plc and Pilkington Holdings Inc.*, Defendants. Civil Action No. 94–345. Filed: May 25, 1994, Judge Browning.

Competitive Impact Statement

Pursuant to Section 2(b) of the Antitrust Procedures and Penalties Act (15 U.S.C. 16(b)), the United States of America hereby files this Competitive Impact Statement relating to the proposed Final Judgment submitted for entry against Pilkington plc ("Pilkington") and Pilkington Holdings Inc., Pilkington's indirectly, wholly-owned American subsidiary, in this civil antitrust action.

I

Nature and Purpose of the Proceeding

A. The Complaint

The government filed this civil antitrust suit on May 25, 1994, alleging that defendants violated Sections 1 and 2 of the Sherman Act by enforcing and maintaining agreements and understandings that unreasonably restrain interstate and foreign trade in the construction and operation of float glass plants and in float glass process technology, and by monopolizing the world market for the design and construction of float glass plants. Specifically, the Complaint alleges that, without sufficiently valuable intellectual property rights and through a network of bilateral patent and know-how license agreements and various understandings with most other float glass manufacturers in the world, defendants:

(a) Allocated and divided territories for, and limited the use of, float glass technology worldwide;

(b) Interpreted and enforced the territorial and use restrictions in the license agreements so that their combined effect prevented competitors from using or developing competing float glass technology;

(c) Required competitors to prove that all of the licensed technology had become publicly known before being relieved of the territorial and use restrictions;

(d) Imposed and enforced restrictions on competitors' ability to sublicense float glass technology;

(e) Imposed and enforced reporting and grant-back provisions in the license agreements;

(f) Imposed and enforced restrictions on exports of glass by licensees from and to the United States; and

(g) Continued enforcement of the territorial, use, and sublicense restrictions indefinitely, even after no further licensing royalties were payable and the licensed patents had expired.

The Complaint also alleges that Pilkington has monopolized the world market for the design and construction of float glass plants through license agreements that impose unreasonable restrictions on licensees and by other predatory and exclusionary conduct. Finally, the Complaint alleges that the conduct described above has had and continues to have direct, substantial, and reasonably foreseeable adverse effects on U.S. export trade and commerce in providing services and related equipment and materials for the design and construction of float glass plants outside the United States.

The prayer for relief seeks: (1) A declaration that the provisions in Pilkington's license agreements with float glass manufacturers that have the purpose or effect of limiting or restricting: (a) The territory in which a manufacturer may make or sell float glass, or (b) the use of float glass technology Pilkington originally disclosed to that manufacturer, or derived therefrom, are illegal and unenforceable; (2) an injunction against defendants' enforcing any such provisions; (3) an injunction against defendants' (a) interfering with the efforts of any person (i) in this country to provide or perform services for the design or construction of float glass plants anywhere in the world, or (ii) anywhere in the world to provide or perform services for the design or construction of float glass plants in the United States (including representing that such services would violate or infringe defendants' intellectual property rights, (b) interfering with the design, construction, or operation of any such plant or the sale or shipment of glass from those plants, or (c) monopolizing or attempting to monopolize the market for the design and construction of float glass plants; and (4) costs.

B. The Technology Market Involved

Flat glass includes glass formed in a flat shape or bent or curved for further fabrication and is used principally for windows in dwellings and commercial buildings, automobile windshields and other glass parts, architectural products, and mirrors. Almost all flat glass currently sold worldwide is made by the "float" process, which involves floating molten glass on the surface of a bath of molten metal, usually tin, which is sealed with a protective atmosphere. In a continuous process, molten glass is delivered to one end of the tin bath and is removed at the opposite end as a continuous ribbon of flat glass after cooling until it is rigid enough to retain its shape during removal.

Commercial float glass manufacture requires relatively large-scale, single-purpose plants that are not efficiently convertible to other uses; and other manufacturing facilities are not efficiently convertible to float glass production. The cost of designing and constructing a typically-sized float glass plant, including equipment, materials, and construction labor, is in the range of $100 to $150 million. During the years 1984–91, 55 new float plants were designed, built, and placed in service worldwide; of those, nine are in North America, including seven in the United States.

Between now and the end of the century, 30 to 50 new float glass plants are planned or projected worldwide, amounting to expenditures of as much as $5 billion. Many are expected to be built in developing countries, where contracts are likely to be awarded to outside bidders for plant design, engineering, construction, and construction supervision services. Such services often include the specifying, ordering, or procuring of process equipment and materials used in such plants.

Persons in the United States would compete, if not restrained, for the award of contracts to provide float glass design and construction services. To the extent such persons successfully compete for contracts to design and construct float glass plants to be built outside the United States, the resulting U.S. export trade or commerce would generate substantial domestic economic activity, including substantial opportunities for domestic providers of engineering and design services, equipment fabricators, and materials suppliers. It is estimated that, when a U.S. firm designs and supervises construction of a foreign plant costing roughly $100 million, approximately $35 to $50 million of that total eventually flows into the United States' economy in orders for domestic materials, equipment, and services. It is further estimated that, if not restrained, U.S. exporters of float glass technology may be expected to obtain between 10 percent and 50 percent of the 30 to 50 new plants planned or projected over the next several years. Thus, potential U.S. export sales for contractors, fabricators, and suppliers could amount to $500 million to $2.5 billion.

II

The Practices and Events Giving Rise to the Alleged Sherman Act Violations

A. Licensing Scheme

1. Background

Virtually all commercial flat glass was produced either by the old sheet glass process or the old plate glass process until 1962. In the late 1950s, Pilkington developed the first commercially successful float process for making flat glass, which eventually replaced both plate and sheet processes.[1] Pilkington obtained hundreds of patents worldwide covering its version of the float process and developed a considerable body of related know-how.

Beginning in 1962, Pilkington entered into patent and know-how license agreements with all its principal competitors. Now, over 90% of flat glass worldwide is manufactured under a Pilkington license agreement. Eight licenses were granted in the United States to: AFG Industries, Inc. ("AFG"); Combustion Engineering, Inc. (now AFG); Ford Motor Co. ("Ford"); Fourco Glass Co. (also now AFG); Guardian Industries Corp. ("Guardian"); Pennsylvania Float Glass, Inc. (now Guardian); PPG Industries, Inc. ("PPG"); and Libbey-Owens-Ford Co. ("LOF") (now owned 80% by Pilkington and 20% by Nippon Sheet Glass Co. Ltd.).

2. The Agreements

The Pilkington float license agreements typically: (a) Provided for Pilkington to disclose all "float process"[2] know-how it owned or controlled at the time, and (b) granted non-exclusive licenses under (i) patents and patent applications of a specified country or countries, (ii) the "float process" know-how to be disclosed to the licensee under the agreement, and (iii) all patented and unpatented "float process" improvements Pilkington owned, controlled, or developed within a certain time period. Most licenses did not grant the right to sublicense. Also, improvement exchange provisions of the agreements required the licensee to grant-back to Pilkington (*i.e.*, disclose and license) all patented and unpatented "float process" improvements the licensee owned, controlled, or discovered during the exchange period. The license agreements required both lump-sum payments and continuous royalties, and virtually all of them required that any disputes be settled by arbitration in London under the law of England.

The agreements imposed territorial and other use limitations by, in effect, "authorizing" each licensee to practice the licensed patents and use the licensed know-how only in a specified country or countries (usually the licensee's own domestic market), and only to make and sell flat glass.[3] The license agreements also imposed restraints on exports of glass from the specified territories. Those restraints applied to some U.S. licensees as well as to certain foreign licensees exporting to the United States. Export waivers have been granted by Pilkington in some cases, but were often limited as to time, location, and output.

Finally, the agreements imposed confidentiality and nondisclosure obligations on the licensees for all the know-how disclosed, unless and until the information or know-how becomes public knowledge. In practice, Pilkington placed the burden on the licensee to make any showing of public knowledge.

Today, virtually all of the original float license agreements themselves, as well as their improvement exchange and disclosure requirements, have terminated; the royalty obligations thereunder have become fully paid up; Pilkington's principal float glass patents have expired; and a substantial portion of its related know-how has become publicly known. Yet, the territorial and use restrictions, the confidentiality and nondisclosure obligations, the prohibition on sublicensing, and the arbitration clause and choice of law provision remain in full force and effect insofar as they apply to both licensed original know-how and unpatented improvements, most of which the world's flat glass producers have been using for decades.

As a result of the continuing restrictions in the agreements, existing licensees, including those in the United States, cannot design and build new float plants, or sublicense independent third parties to do so, outside their licensed "territories" without Pilkington's permission. Moreover, innovations in designs and technology that improve float process efficiency and float glass quality are important advantages in competing for contracts to design and construct (or supervise construction of) float glass plants; thus, geographically limiting the opportunities for economic exploitation of such innovations not only reduces the effectiveness of such competition but also reduces the incentives for innovation.

The adverse impact of the continuing license restrictions is substantial. Since Pilkington has no intellectual property rights of substantial value, the restraints are neither ancillary nor reasonably necessary to any legitimate purpose or transaction, and are, therefore, unreasonable restraints on trade within the meaning of Section 1 of the Sherman Act, 15 U.S.C. 1.

3. Current Status of Licenses

There are over 60 Pilkington float licenses agreements. Most of therm contain no authorization for the licensee to manufacture or sublicense outside its original territory now or at any time in the future.

A small number of agreements provide that "the territorial and other limitations on use cease to apply" after a period of time (usually 30 years after commencement of royalty payments but, in any case, not before the agreement terminates and the licenses granted thereunder become paid up) Such licenses are held by just three companies (other than Pilkington and its subsidiaries or affiliates). In the absence of the stipulated Final Judgment, after 1996, only these three companies will have worldwide rights to manufacture on their own and to sublicense more than 50 percent-owned subsidiaries without any additional royalty or lump-sum payment to Pilkington.[4]

In sum, in the absence of the stipulated Final Judgment, the vast majority of current and former Pilkington licensees (who together make up the bulk of those competitors capable of providing float glass plant design and construction services) continue to be restrained from either manufacturing glass or sublicensing (selling) glass

[1] Pilkington's float process substantially reduced capital and operating costs, when compared with the plate process, by eliminating the need for grinding and polishing, but was not at first cost competitive with the sheet process. By 1970, float glass had almost completely replaced plate glass and, because of quality improvements and cost reductions, was competitive with sheet glass.

[2] The license agreements very broadly defined "float processes" as "all processes * * * used for * * * production of flat glass * * * with the aid of a bath of molten material * * * with which the glass is in contact at any stage during its production," but exclusing everything (i) prior to delivery of the glass to the bath, and (ii) after its emergence from the lehr (where it undergoes controlled cooling).

[3] While most agreements contained no express, contractual prohibitions against manufacturing in any particular country outside the specified, licensed countries, the grants are all limited licenses, "authorizing" manufacture of float glass only in the specified countries.

[4] But absent the stipulated judgment, even these rights will not allow these three companies to compete effectively in most developing countries where the future market is for new float plants because of ownership limitations there that require, as a legal or practical matter, a domestic company to have majority ownership of new manufacturing ventures.

technology outside their original territories.

B. Litigation

Pilkington has routinely used litigation, and threats of litigation, to enforce its anticompetitive license restrictions. On several occasions, Pilkington has actually sued or brought arbitration proceedings against its American float glass licensees. In 1983, Pilkington sued its U.S. licensee, Guardian Industries, alleging that Guardian had improperly used and disclosed Pilkington's proprietary know-how in building a float glass plant in Luxembourg. After an adverse preliminary ruling by the court, Pilkington agreed to settle its claims on terms favorable to Guardian, permitting Guardian to construct float glass plants outside its previously-prescribed territory in return for Guardian's agreement to preserve the confidentiality of Pilkington's float technology.

Pilkington more successfully asserted claims against PPG in 1979 and again in 1985. In a 1985 arbitration concluded in 1992, Pilkington was able to enforce its 1962 license agreement with PPG and to recover damages from PPG stemming from PPG's construction of a float glass plant in China in the early 1980s. The arbitrators determined that, while much of Pilkington's alleged secret know-how was publicly known by 1985, PPG had failed to prove that 45 specific items were publicly known. The arbitrators did not consider the question of whether any of those items were valid trade secrets.

Also in the early 1980's Pilkington sued U.S. licensee AFG over unpaid royalties relating to AFG's operation of float glass plants constructed using AFG's own technology. The case was settled in 1985, resulting in substantial limitations on AFG's ability to use and sell the disputed technology.

C. Other Exclusionary Conduct

The evidence demonstrates that Pilkington acted to restrict competition and control output. Pilkington licensed its principal competitors, which had the effect of minimizing the likelihood of their developing competing float glass technologies. At the same time, Pilkington turned down requests for float glass licenses from persons who were not already flat glass producers. The territories to which each licensee was limited by its float license agreement generally corresponded to the territories in which it operated prior to entering into that agreement. Thus, Pilkington's network of bilateral patent and know-how licenses, containing territorial and other use limitations, as well as confidentiality obligations, provided a framework for Pilkington to control the worldwide market for float glass plant design and construction services. The evidence also indicates Pilkington's effort to coordinate activities of certain of its licensees, and reflects a shared or common interest among certain licensees to limit entry by competing technologies.

Pilkington exercised its right to grant or deny licenses not only in its own self-interest to avoid direct competition, but also in ways designed to benefit licensees in their territories. When Pilkington did grant float licenses, it frequently did so only to firms controlled by an existing licensee or to a joint venture of existing licensees.

One of Pilkington's goals in deciding whether to license, and in imposing territorial/export restraints when it did, was to control price, capacity, and output of flat glass. Pilkington sometimes reached separate understandings with licensees who exceeded, or threatened to exceed, the territorial or other limitations imposed by their licenses. By discouraging or challenging the construction of new float plants outside any licensee's original, assigned territory, Pilkington sought to maintain control over glass output and the sale or disclosure of float technology, for its own benefit, as well as that of the other licensees. Pilkington also tried to dissuade flat glass distributors and suppliers of materials and equipment used in building float plants from dealing with non-licensees and threatened reprisals if they did.

Pilkington reserved for itself certain markets, and turned down requests for licenses in those markets, including requests from existing float licensees, for the two-fold purpose of exploiting those markets itself, and controlling exports from those markets to other parts of the world. Pilkington attempted to achieve this goal by coordinating the shipment of glass to specific customers through certain licensees and indirectly, its U.S. subsidiary LOF.

III

Explanation of the Proposed Final Judgment and Its Anticipated Effect on Competition

The United States and the defendants have stipulated that the Court may enter the proposed Final Judgment at any time after compliance with the Antitrust Procedures and Penalties Act, 15 U.S.C. 16(b)–(h). Under the provisions of section 2(e) of the Antitrust Procedures and Penalties Act, 15 U.S.C. 16(e), the proposed Final Judgment may not be entered unless the Court finds entry is in the public interest. Section VIII of the proposed Final Judgment sets forth such a finding.

The proposed Final Judgment provides for affirmative and injunctive relief, which is expected to eliminate any residual anticompetitive effects of the restrictive license agreements and other conduct challenged by the Complaint. Specifically, consistent with the United States' antitrust jurisdiction under the Foreign Trade Antitrust Improvements Act of 1982, 15 U.S.C. 6a, the Final Judgment would eliminate all territorial and use limitations Pilkington imposed on its U.S. licensees and allow them to manufacture on their own or sublicense any third party to do so anywhere in the world, free of charge, using the float technology disclosed and licensed to those licensees. Such manufacturing and sublicensing rights would be subject only to limited confidentiality obligations imposed under certain narrow and specific conditions.

The Judgment also would provide, in effect, a similar "safe harbor" for any other American individual or firm who is not a Pilkington float glass licensee to use any float technology in its possession without liability to Pilkington. Further, the Judgment would enjoin certain conduct having the purpose or effect of restricting exports of float glass to the United States or limiting the use of float technology or manufacture of float glass in North America. Finally, the Judgment would enjoin the defendants from making certain adverse representations about U.S. licensees or non-licensees and would require the defendants to disclose to those American entities the results of any adjudication of Pilkington's alleged trade secrets.

A. Section IV.A.: U.S. Licensees

The injunctive provisions of this subsection apply to Pilkington's U.S. float glass licensees, defined as any person or entity incorporated or having its principal place of business in the United States and having entered into any agreement with Pilkington prior to the stipulation date for the licensing of or the right to use float glass technology. It does not apply to any subsidiary (at least 50 percent owned), affiliate (less than 50 percent owned), or parent of any U.S. licensee,[5] or to any person

[5] This exclusion is designed to prevent a foreign entity from claiming the benefits of specific provisions of the proposed Final Judgment designed for U.S. entities simply by acquiring, being acquired by, or becoming affiliated with any American entity. United States and foreign entities are treated differently under the proposed Judgment (see

while it is a subsidiary, affiliate, or parent of any defendant.

Specifically, subject to a narrow exception and certain conditions noted below, subsection IV.A.1. would prohibit defendants from entering into, maintaining, enforcing, or claiming any right under any agreement or understanding that restrains in any way a U.S. licensee from using or sublicensing anywhere in the world the float glass technology Pilkington disclosed and licensed to it, or that requires such licensee to pay royalties or lump sum or line fees for such use or sublicensing. Also, subject to the same exception and conditions, subsection IV.A.2. would prohibit defendants from asserting against a U.S. licensee any alleged proprietary know-how rights in the same float technology disclosed and licensed to that licensee.

The exception and conditions mentioned above are contained in subsections IV.A.3. and IV.A.4. Subsection IV.A.3. provides that defendants may assert a breach of confidentiality claim against a U.S. licensee concerning licensed technology, only if the claim (i) pertains to a trade secret under applicable law, and (ii) is based on the U.S. licensee's failure either to make lawful and commercially reasonable efforts itself to maintain confidentiality or to require by contract anyone to whom it transfers such technology to do so. Subsection IV.A.4. specifically preserves whatever claim a defendant may have for an account of profits, damages, or any other monetary relief asserted in any proceedings begun before the stipulation date and based on conduct occurring before that date. However, this exception does not allow defendants to bring future actions for monetary relief, whether or not based on prior conduct.

Finally, subsection IV.A.2., again subject to the same exception and conditions described above, also prohibits defendants from asserting against a U.S. licensee any alleged proprietary know-how rights in float technology acquired from any source other than Pilkington, unless defendant have a good faith argument that each item, or combination of items, of such technology: (i) Is a trade secret under applicable law, and (ii) has been acquired in breach of confidentiality or otherwise unlawfully.

B. Section IV.B.: U.S. Non-Licensees

The injunctive provisions of this subsection apply to any person or entity domiciled or incorporated in the United States and having its principal place of business here, but who has not entered into a float glass license agreement with Pilkington. Such persons or entities fall into two general categories: (i) Non-licensees who are nevertheless under some contractual confidentiality or noncompete obligation for Pilkington's benefit (e.g., employees, contractors, suppliers, consultants, etc.), and (ii) persons who are not under any such obligation.

As to the first category, subsection IV.B.1. of the proposed Judgment prohibits defendants from entering into or enforcing any agreement containing such a confidentiality obligation or covenant not to compete that is longer in duration or greater in scope than permitted under applicable law. That subsection, however, provides that entering into or enforcing such an agreement will not constitute contempt of the Judgment if defendants have a good faith argument that it is permitted by applicable law.

Subsection IV.B.2. of the proposed Final Judgment applies to all U.S. non-licensee competitors and potential entrants into the float glass technology market. It prohibits defendants from asserting against such a person alleged proprietary know-how rights in float glass technology disclosed and licensed by Pilkington to any U.S. licensee, unless each of several specific conditions are met. First, defendants must have a good faith argument that each item, or combination of items, of such technology asserted (i) is a trade secret under applicable law, and (ii) has been acquired in breach of confidentiality or otherwise unlawfully. Second, within 14 days after any such assertion, defendants must (i) make a written showing to the Department of Justice supporting both arguments referred to above, and (ii) enumerate and describe each such item or combination of items asserted, to distinguish them from information not a trade secret, on a list submitted to both the Department and the U.S. non-licensee against whom they are asserted. Finally, in order for Pilkington to assert a claim, such U.S. non-licensee must be unwilling to make lawful and commercially reasonable efforts to maintain the confidentiality of those items or combination of items for which it has received actual notice of defendants' claim, and for which they have made the requisite showing.

C. Section IV.C.: Foreign Licensees

Subject to two conditions noted below, subsection IV.C. of the proposed Judgment prohibits defendants from entering into, maintaining, enforcing, or claiming a right under any agreement or understanding that in any way restrains a foreign float glass licensee from using or sublicensing float glass technology in North America. Further, defendants may not charge any fees for the use or sublicensing in North America of float glass technology disclosed by Pilkington to any U.S. licensee, and may not enforce any confidentiality claims for the use or sublicensing of such technology, unless defendants have a good faith argument that each item or combination of items of such technology involved is a trade secret. However, defendants may enforce confidentiality claims against foreign licensees' use or sublicensing in North America of float glass technology not disclosed to any U.S. licensee, and may charge them commercially reasonable and non-discriminatory fees for the use of such technology.

D. Other Provisions

Subsection IV.D. of the proposed Judgment prohibits defendants from asserting any proprietary know-how rights or enforcing any agreements with the intent of restraining or limiting the amount of exports of float glass to the U.S. Subsection IV.E. prohibits defendants from entering into, maintaining, or enforcing any agreement that fixes, maintains, or stabilizes prices for the use of float glass technology in the U.S. Subsection IV.F. prohibits defendants for representing to any person anywhere in the world that the person's own use, or its financing, promoting, or facilitating another person's use, of float glass technology acquired directly from any U.S. licensee or U.S. non-licensee would result in any liability to defendants.

Subsection IV.G. requires defendants to identify to the Department, and to all U.S. licensees and all U.S. non-licensees who request it, the float glass technology found to be public knowledge in the arbitration proceedings concluded in August 1992 between Pilkington and PPG. This subsection requires a similar identification for any such technology disclosed and licensed to any U.S. licensee that Pilkington acknowledges in writing to be in the public domain or that is so held to be in any arbitration or court proceeding to which Pilkington is a party.

E. Effect on Competition

The relief in the proposed Final Judgment is designed to ensure that: (1) Pilkington's U.S. licensees, principally PPG, Ford, Guardian, and AFG, will be free of the territorial and use restrictions

---

Section IV.C.) because the jurisdictional reach of the U.S. antitrust laws is limited

in their 20 to 30-year-old license agreements to compete for the design and construction of float glass plants abroad as well as in the U.S.; and (2) U.S. firms with the requisite expertise that never were Pilkington licensees but currently are attempting to enter the market will be free to do so without unreasonable restraint or interference. The effective removal of the license restrictions and the "safe harbor" provided by the proposed Final Judgment should encourage and facilitate others with the requisite expertise, including former employees of Pilkington and its licensees, to enter the market. It is expected that the combination of unrestrained existing manufacturers and new entrants will result in improved glass processes at lower prices.

IV

Remedies Available to Private Litigants

Section 4 of the Clayton Act, 15 U.S.C. 15, provides that any person who has been injured as a result of conduct prohibited by the antitrust laws may bring suit in federal court to recover three times the damages suffered, as well as costs and reasonable attorney's fees. Entry of the proposed Final Judgment will neither impair nor assist the bringing of such actions. Under the provisions of section 5(a) of the Clayton Act, 15 U.S.C. 16(a), the Judgment has no *prima facie* effect in any subsequent lawsuits that may be brought against the defendants in this matter.

V

Procedures Available for Modification of the Proposed Judgment

As provided by the Antitrust Procedures and Penalties Act, any person believing that the proposed Final Judgment should be modified may submit written comments to Gail Kursh, Chief, Professions and Intellectual Property Section, U.S. Department of Justice, Antitrust Division, 555 4th Street, NW., room 9903, Washington, DC 20001, within the 60-day period provided by the Act. These comments, and the Department's responses, will be filed with the Court and published in the **Federal Register**. All comments will be given due consideration by the Department of Justice, which remains free, pursuant to a stipulation signed by the United States and defendants, to withdraw its consent to the proposed Judgment at any time prior to entry. Section I of the proposed Final Judgment provides that the Court retains jurisdiction over this action, and the parties may apply to the Court for any order necessary or appropriate for modification, interpretation, or enforcement of the Final Judgment.

VI

Determinative Materials/Documents

No materials or documents of the type described in Section 2(b) of the Antitrust Procedures and Penalties Act, 15 U.S.C. § 16(b), were considered in formulating the proposed Final Judgment.

VII

Alternative to the Proposed Final Judgment

The alternative to the proposed Final Judgment is a full trial on the merits. That alternative was rejected because the relief provided in the proposed Judgment will fully and effectively open the market to competition, as well as eliminate any residual effects of the alleged violations, and would produce immediate positive competitive impact; litigation would involve obvious risks as well as substantial costs to the United States; and preparing the case for trial, trying it, and disposing of appeals after trial might delay obtaining any relief for several years.

Dated: May 25, 1994.

Respectfully submitted,

K. Craig Wildfang,

Special Counsel to the Assistant Attorney General, Antitrust Division.

Kurt Shaffert,

Thomas H. Liddle,

Molly L. DeBusschere,

John B. Arnett, Sr.,

M. Lee Doane,

Attorneys, U.S. Department of Justice, Antitrust Division, 555 4th Street, NW., Room 9903 JCB, Washington, D.C. 20001, 202/307-0467

Certificate of Service

The undersigned hereby certifies that on this day of May, 1994 he caused true and correct copies of the foregoing Complaint, Stipulation, Competitive Impact Statement, and Government's Motion Under Local Rule 1.2(e)(1) To Assign This Case With Above-Named Related Cases to be served by mail upon the following:

John H. Shenefield, Esq., Morgan, Lewis & Bockius, 1800 M Street, NW., Washington, DC 20036—Attorney for Defendants Pilkington plc, Pilkington Holdings Inc., and Libbey-Owens-Ford Co. in CIV 92–752–TUC–WDB, CIV 93–552–TUC–WDB, and CIV 94–TUC–WDB.

Thomas D. Barr, Esq., Cravath, Swayne & Moore, Worldwide Plaza, 825 Eighth Avenue, New York, NY 10019—Attorney for Plaintiff PPG Industries, Inc. in CIV 92–775–TUC–WDB.

Kenneth C. Anderson, Esq., 685 Third Avenue, New York, NY 10017—Attorney for Plaintiff International Technologies Consultants, Inc. in CIV–93–552–TUC–WDB.

Jeffrey Willis, Esq., Streich Lang, 33 N. Stone Avenue, Tucson, AZ 85701—Attorney for Defendant Guardian Industries Corporation in CIV–93–552–TUC–WDB.

Donald A. Wall, Esq., Squire, Sanders & Dempsey, Two Renaissance Square, 40 North Central Avenue, Suite 2700, Phoenix, AZ 85004–4441—Attorney for Defendant AFG Industries, Inc. in CIV–93–552–TUC–WDB.

K. Craig Wildfang,

Attorney for the United States.

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

Importer of Controlled Substances; Notice of Registration

By Notice dated March 21, 1994, and published in the **Federal Register** on April 1, 1994 (59 FR 15458), Knight Seed Company, Inc., 151 W. 126th Street, Burnsville, Minnesota 55337, made application to the Drug Enforcement Administration to be registered as an importer of Marihuana (7360), a basic class of controlled substance listed in Schedule I.

No comments or objections have been received. Therefore, pursuant to section 1008(a) of the Controlled Substances Import and Export Act and in accordance with Title 21 Code of Federal Regulations 1311.42, the above firm is granted registration as an importer of the basic class of controlled substance listed above.

Dated: May 25, 1994.

Gene R. Haislip,

Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration.

[FR Doc. 94–14334 Filed 6–13–94; 8:45 am]

BILLING CODE 4410–09–M

[Docket No. 93–21]

Wilbert McClay, Jr., M.D.; Revocation of Registration

On November 24, 1992, the Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration (DEA), issued an Order to Show Cause to Wilbert McClay, Jr., M.D. (Respondent), of Baton Rouge, Louisiana, proposing to revoke his DEA Certificate of Registration, AM3221708, and deny any pending applications for registration as a practitioner. The statutory basis for seeking the revocation of the Certificate of Registration was that Respondent's continued registration would be inconsistent with the public interest, as that term is used in 21 U.S.C. 823(f) and 21 U.S.C. 824(a)(4).

Respondent, through counsel, requested a hearing on the issues raised by the Order to Show Cause, and the matter was docketed before Administrative Law Judge Paul A. Tenney. Following prehearing procedures, a hearing was held in New Orleans, Louisiana on August 10, 1993. On October 6, 1993, in his findings of fact, conclusions of law, and recommended ruling, the administrative law judge recommended a suspension of Respondent's DEA registration, to run concurrently with the suspension of his medical license by the Louisiana State Board of Medical Examiners, as well as the concurrent indefinite suspension of his Schedule II privileges.

On October 18, 1993, the Government filed exceptions to Judge Tenney's opinion, and on November 8, 1993, the administrative law judge transmitted the record to the then-Acting Administrator. The Deputy Administrator has carefully considered the entire record in this matter and, pursuant to 21 CFR 1316.67, hereby issues his final order in this matter based upon findings of fact and conclusions of law as hereinafter set forth.

The administrative law judge found that in August 1984, a hearing was held before the Louisiana State Board of Medical Examiners (Board) to determine whether Respondent prescribed legally controlled substances in other than a legal or legitimate manner, and to allow him to respond to charges of "medical incompetency" under the Louisiana State Medical Practice Act. The charges were based on an investigation conducted by the Louisiana Division of Narcotics and Dangerous Drugs. The investigation revealed that from January 1979 through October 1982, Respondent prescribed a number of Schedule II controlled substances.

Following the hearing, the Board issued a decision on January 31, 1985, in which it found that Respondent had issued prescriptions without a legitimate medical purpose and ordered that Respondent's license to practice medicine be suspended for three months, followed by a three-year period of probation. The Board further ordered that Respondent surrender his state and Federal permits to handle Schedule II and Schedule III controlled substances. After the three year probation period, the Board reinstated Respondent's Schedule III privileges, however, his Schedule II privileges remained suspended indefinitely.

In April 1988, the Respondent contacted the Board's Executive Secretary concerning his probationary status. The Executive Secretary erroneously advised the Respondent that because he had successfully completed his probation, his medical license and controlled substances privileges were unrestricted.

In addition, the Executive Secretary mistakenly mailed a notification letter to the Louisiana Department of Health and Human Resources, Division of Licensing and Certification, informing them that Respondent's Schedule II controlled substances privileges were no longer restricted. Upon discovering the error, the Executive Secretary attempted unsuccessfully to telephone the Respondent. Following Respondent's probation period, DEA issued Respondent a Certificate of Registration limited to Schedules IV and V, and in reliance on the Board's incorrect information, Respondent's DEA registration was modified to include Schedule II and III in June 1988. The registration was renewed on March 3, 1990, in Schedules II–V.

On July 29, 1988, the Board's Executive Secretary sent a letter to the Respondent advising him that she had misread the Board's 1985 order and that the Respondent remained without Schedule II privileges. On August 1, 1988, the Program Manager for the Division of Licensing and Certification at the Louisiana Department of Health and Human Resources sent Respondent a copy of his state controlled substances license and informed the Respondent that since his medical license had been restricted by the Board, his controlled substances license must also be restricted.

After receiving erroneous information from the Board that Respondent had an unrestricted medical license, the Division of Licensing and Certification sent a second letter to the Respondent on August 19, 1988, with an enclosed unrestricted state controlled substances license.

When the Board was informed that Respondent had been issued an unrestricted state controlled substances license, the Board again wrote to the Respondent on September 12, 1988, advising him that he had been mistakenly issued an unrestricted controlled substances registration and that his Schedule II privileges remained suspended.

On September 29, 1988, the Respondent appeared before the Board to request that the Board lift the restrictions that had been placed on his medical license and prescribing privileges. The Board informed the Respondent that his schedule II privileges would remain suspended.

In July 1991, the Board received information that the Respondent had written three prescriptions in 1991 for Schedule II controlled substances. On July 2, 1991, DEA contacted the Respondent by telephone, requesting that he surrender his registration so that it could be modified to reflect an authorization to handle Schedules III–V. Respondent informed DEA that it received incorrect information from the Board, and that Respondent was, in fact, permitted to prescribe Schedule II controlled substances. The DEA also sent Respondent a letter dated July 23, 1991, requesting the voluntary surrender of his Schedule II and IIN privileges. Shortly thereafter, the Respondent notified DEA in writing of his refusal to voluntarily surrender his Schedule II privileges.

The Respondent testified at the administrative hearing that because of his relocation to another office, he did not receive the August 1, 1988 notice from the Program Manager for the Division of Licensing and Certification regarding the restrictions that were placed on his medical license and controlled substances license until the summer of 1992. The Respondent also testified that although he received the September 12, 1988 letter from the Board advising him that he had been mistakenly issued an unrestricted controlled substances registration and that his Schedule II privileges remained suspended, he did not read it because, in his opinion, "the letter was * * * moot." The administrative law judge found Respondent's testimony in this regard not credible, since the Respondent implicitly demonstrated knowledge of the contents of the letters by appearing before the Board in September 1988 to request that the restrictions be removed from his medical license.

The Respondent also admitted at the administrative hearing that he wrote three prescriptions for Schedule II controlled substances in 1991 and that he was unaware of any restriction that would have prohibited him from prescribing these controlled substances. Respondent further testified that DEA did not ask him to surrender his DEA registration.

VOL 59 ISS 113 JE 14 994 UMI

In December 1991, Respondent appeared before the Board to respond to charges that he prescribed Schedule II controlled substances in violation of the restrictions placed on his license by the Board in January 1985. On January 9, 1992, the Board issued its decision and order and found that Respondent was at all times aware of the restrictions placed on his license by the order of January 31, 1985. As a result, effective April 1, 1992, the Board suspended Respondent's medical license for six months, and continued the indefinite suspension of his Schedule II prescribing privileges.

In June 1992, the Civil District Court for the Parish of New Orleans, State of Louisiana, granted Respondent's motion for stay of the Board's order of suspension of his medical license. On November 12, 1992, the court denied Respondent's appeal from the decision of the Board. Respondent has been granted a second stay of the suspension of his medical license, pending the outcome of his appeal filed with the Fourth Circuit of the State of Louisiana.

Pursuant to 21 U.S.C. 823(f) and 824(a)(4) the Deputy Administrator may revoke a registration and deny any application for such registration, if he determines that the continued registration would be inconsistent with the public interest. Section 823(f) requires that the following factors be considered:

(1) The recommendation of the appropriate State licensing board or professional disciplinary authority.

(2) The applicant's experience in dispensing controlled substances.

(3) The applicant's conviction record under Federal or State laws relating to the distribution, or dispensing of controlled substances.

(4) Compliance with applicable State, Federal, or local laws relating to controlled substances.

(5) Such other conduct which may threaten the public health and safety.

It is well established that these factors are to be considered in the disjunctive, i.e., the Deputy Administrator may properly rely on any one or a combination of the factors and give each factor the weight he deems appropriate. See *Henry J. Schwarz, Jr., M.D.*, Docket No. 88–42, 54 FR 16422 (1989).

In considering whether grounds exist to revoke Respondent's registration pursuant to 21 U.S.C. 824(a)(4), the administrative law judge found factors one, two, four and five listed in section 823(f) relevant. Factor one is applicable by virtue of the fact that the Louisiana State Board of Medical Examiners suspended Respondent's Schedule II prescribing privileges indefinitely. Factors two, four and five are applicable based upon Respondent's abuse of his Schedule II prescribing privileges during the period of January 1979 and October 1982, and his unauthorized prescribing of Schedule II controlled substances on three occasions in 1991.

Respondent argued that he believed that he was in full compliance with State and Federal law since he had a Certificate of Registration from both the State of Louisiana and the DEA. The administrative law judge concluded that Respondent's reliance upon these mistakenly issued documents was unreasonable. Respondent was notified on several occasions by both letter and telephone conversations that his Schedule II controlled substances privileges had been erroneously reinstated.

The administrative law judge recommended a suspension of Respondent's DEA Certificate of Registration to run concurrently with the suspension of Respondent's medical license by the Board. The administrative law judge further recommended that the suspension of the Respondent's Schedule II privileges be continued for the period of the State's suspension, which is currently indefinite.

The Government filed exceptions to the administrative law judge's recommendation of a suspension of Respondent's DEA registration to run concurrently with the state's suspension, since the record was not clear as to whether the Respondent has already served the six month suspension of his state license in view of the various appeals and stays of the Board's decision. The Government also took exception to the administrative law judge's recommendation that the suspension of the Respondent's DEA Schedule II privileges coincide with the state's indefinite suspension of those privileges. The Government argued that Respondent's flagrant disregard for the rules and regulations pertaining to controlled substances warranted, at the very least, revocation of his Schedule II privileges.

The Deputy Administrator having considered the entire record adopts the administrative law judge's findings of fact and conclusions of law, however, disagrees with both aspects of the recommended ruling of a suspension of Respondent's DEA registration. The record is clear that Respondent issued controlled substance prescriptions without legitimate medical purpose and not in the good faith administration of bona fide treatment. The Respondent lost all of his controlled substance privileges on two, albeit short, occasions in 1985 (three months) and 1992 (six months). It is uncontroverted that Respondent lost his Schedule II privileges in January 1985, and they were never restored. Despite these prohibitions, he prescribed Schedule II controlled substances on at least three occasions in 1991, and although he was notified on several occasions that the reinstatement of his Schedule II privileges was erroneous, he refused to surrender any of his registrations. Respondent has shown repeated disregard for the rules and regulations relating to controlled substances.

The Deputy Administrator concludes that a suspension of Respondent's DEA Certificate of Registration to run concurrent with the Louisiana Board's six month suspension is minimal and ineffective. Accordingly, the Deputy Administrator of the Drug Enforcement Administration, pursuant to the authority vested in him by 21 U.S.C. 823 and 824 and 28 CFR 0.100(b) and 0.104, hereby orders that DEA Certificate of Registration, AM3221708, issued to Wilbert McClay, Jr., M.D., be and it hereby is, revoked, however, after one year, favorable consideration will be given to an application for a limited registration. This order is effective July 14, 1994.

Dated: June 6, 1994.

Stephen H. Greene,

Deputy Administrator.

BILLING CODE 4410–09–M

Manufacturer of Controlled Substances; Registration

By Notice dated March 21, 1994, and published in the **Federal Register** on April 1, 1994, (59 FR 15459), Stepan Chemical Company Natural Products Department, 100 W. Hunter Avenue, Maywood, New Jersey 07607, made application to the Drug Enforcement Administration (DEA) to be registered as a bulk manufacturer of the basic classes of controlled substances listed below:

Drug	Schedule
Cocaine (9041)	II
Benzoylecgonine (9180)	II

Comments were received, however, no written request for a hearing was received. Therefore, pursuant to section 303 of the Comprehensive Drug Abuse Prevention and Control Act of 1970 and title 21, Code of Federal Regulations, § 1301.54(e), the Deputy Assistant Administrator, Office of Diversion Control, hereby orders that the application submitted by the above firm for registration as a bulk manufacturer of the basic classes of controlled substances listed above is granted.

Dated: May 16, 1994.

Gene R. Haislip,

Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration.

BILLING CODE 4410–09–M

DEPARTMENT OF LABOR

Office of the Secretary

Agency Recordkeeping/Reporting Requirements Under Review by the Office of Management and Budget (OMB)

BACKGROUND: The Department of Labor, in carrying out its responsibilities under the Paperwork Reduction Act (44 U.S.C. chapter 35), considers comments on the reporting/recordkeeping requirements that will affect the public.

LIST OF RECORDKEEPING/REPORTING REQUIREMENTS UNDER REVIEW: As necessary, the Department of Labor will publish a list of the Agency recordkeeping/reporting requirements under review by the Office of Management and Budget (OMB) since the last list was published. The list will have all entries grouped into new collections, revisions, extensions, or reinstatements. The Departmental Clearance Officer will, upon request, be able to advise members of the public of the nature of the particular submission they are interested in.

Each entry may contain the following information:

- The Agency of the Department issuing this recordkeeping/reporting requirement.
- The title of the recordkeeping/reporting requirement.
- The OMB and/or Agency identification numbers, if applicable.
- How often the recordkeeping/reporting requirement is needed.
- Whether small businesses or organizations are affected.
- An estimate of the total number of hours needed to comply with the recordkeeping/reporting requirements and the average hours per respondent.
- The number of forms in the request for approval, if applicable.
- An abstract describing the need for and uses of the information collection.

COMMENTS AND QUESTIONS: Copies of the recordkeeping/reporting requirements may be obtained by calling the Departmental Clearance Officer, Kenneth A. Mills ((202) 219–5095). Comments and questions about the items on this list should be directed to Mr. Mills, Office of Information Resources Management Policy, U.S. Department of Labor, 200 Constitution Avenue, NW., room N–1301, Washington, DC 20210. Comments should also be sent to the Office of Information and Regulatory Affairs, Attn: OMB Desk Officer for (BLS/DM/ESA/ETA/OAW/MSHA/OSHA/PWBA/VETS), Office of Management and Budget, room 3001, Washington, DC 20503 ((202) 395–7316).

Any member of the public who wants to comment on recordkeeping/reporting requirements which have been submitted to OMB should advise Mr. Mills of this intent at the earliest possible date.

Revision

Employment and Training Administration
Contributions Operations
1205–0178; ETA 581
Quarterly
State or local governments
53 respondents; 8 hours per response; 1,696 total hours; 1 form

Provides quarterly data on State agencies' volume and performance in wage processing, number and promptness of liable employer registrations, number delinquent in filing contribution reports, number and extent of tax delinquencies and results of field audit program.

Reinstatement

Occupational Safety and Health Administration
Ionizing Radiation
1218–0103
On occasion
Businesses or other for-profit; small businesses or organizations
48 respondents; 2 hours per response; 96 total hours

The purpose of this standard and its information collection requirements is to provide protection for employees from the adverse health effects associated with occupational exposure to Ionizing Radiation. The standard requires that employers notify the Occupational Safety and Health Administration of Ionizing Radiation overexposure.

Signed at Washington, DC this 9th day of June, 1994.

Kenneth A. Mills,

Departmental Clearance Officer.

BILLING CODE 4510–30–M

Employment and Training Administration

Investigations Regarding Certifications of Eligibility to Apply for Worker Adjustment Assistance

Petitions have been filed with the Secretary of Labor under Section 221(a) of the Trade Act of 1974 ("the Act") and are identified in the Appendix to this notice. Upon receipt of these petitions, the Director of the Office of Trade Adjustment Assistance, Employment and Training Administration, has instituted investigations pursuant to Section 221(a) of the Act.

The purpose of each of the investigations is to determine whether the workers are eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act. The investigations will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved.

The petitioners or any other persons showing a substantial interest in the subject matter of the investigations may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than June 24, 1994.

Interested persons are invited to submit written comments regarding the subject matter of the investigations to the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than June 24, 1994.

The petitions filed in this case are available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Employment and Training Administration, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, DC 20210.

Signed at Washington, DC this 31st day of May, 1994.

Violet Thompson,

Deputy Director, Office of Trade Adjustment Assistance.

Investigations Regarding Certifications of Eligibility to Apply for NAFTA Transitional Adjustment Assistance

Petitions for transitional adjustment assistance under the North American Free Trade Agreement-Transitional Adjustment Assistance Implementation Act (Pub. L. 103–182), hereinafter called (NAFTA–TAA), have been filed with State Governors under Section 250(a) of Subchapter D, Chapter 2, Title II, of the Trade Act of 1974, as amended, are identified in the Appendix to this Notice. Upon notice from a Governor that a NAFTA–TAA petition has been received, the Director of the Office of Trade Adjustment Assistance (OTAA), Employment and Training Administration (ETA), Department of Labor (DOL), announces the filing of the petition and takes actions pursuant to paragraphs (c) and (e) of Section 250 of the Trade Act.

The purpose of the Governor's actions and the Labor Department's investigations are to determine whether the workers separated from employment after December 8, 1993 (date of enactment of Public Law 103–182) are eligible to apply for NAFTA–TAA under Subchapter D of the Trade Act because of increased imports from or the shift in production to Mexico or Canada.

The petitioners or any other persons showing a substantial interest in the subject matter of the investigations may request a public hearing with the Director of OTAA at the U.S. Department of Labor (DOL) in Washington, DC, provided such request is filed in writing with the Director of OTAA not later than June 24, 1994.

Also, interested persons are invited to submit written comments regarding the subject matter of the petitions to the Director of OTAA at the address shown below not later than June 24, 1994.

Petitions filed with the Governors are available for inspection at the Office of the Director, OTAA, ETA, DOL, room C–4318, 200 Constitution Avenue, NW., Washington, DC 20210.

Signed at Washington, DC, this 6th day of June, 1994.

Violet Thompson,

Deputy Director, Office of Trade Adjustment Assistance.

BILLING CODE 4510–30–M

Notice of Determinations Regarding Eligibility To Apply for Worker Adjustment Assistance and NAFTA Transitional Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974, as amended, the Department of Labor herein presents summaries of determinations regarding eligibility to apply for trade adjustment assistance for workers (TA–W) issued during the period of May, 1994.

In order for an affirmative determination to be made and a certification of eligibility to apply for worker adjustment assistance to be issued, each of the group eligibility requirements of Section 222 of the Act must be met.

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated,

(2) That sales or production, or both, of the firm or subdivision have decreased absolutely, and

(3) That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

Negative Determinations for Worker Adjustment Assistance

In each of the following cases the investigation revealed that criterion (3) has not been met. A survey of customers indicated that increased imports did not contribute importantly to worker separations at the firm.

TA–W–29,508; J & R Wood Products, Inc., Roseburg, OR

TA–W–29,574; Martin Marietta Magnesia Specialties, Inc., Manistee, MI

TA–W–29,496; Electronix Servicenter, Irving, TX

TA–W–29,708; Ottenheimer & Co., Rocky Mount, VA

TA–W–29,805; Radform Tool Co., East McKeesport, PA

TA–W–29,413 & TA–W–29,414; Adobe Mining Co., Kittanning, PA and Midland, TX

In the following cases, the investigation revealed that the criteria for eligibility have not been met for the reasons specified.

TA–W–29,448; Ingersoll-Dresser Pump Co., Phillipsburg, NJ

Increased imports did not contribute importantly to worker separations at the firm.

TA–W–29,562; Hembree Well Service, Inc., Ellis, KS

The workers' firm does not produce an article as required for certifiction under Section 222 of the Trade Act of 1974.

TA–W–29,537; Hembree Well Service, Inc., Ness City, KS

The workers' firm does not produce an article as required for certification under Section 222 of the Trade Act of 1974.

TA–W–29,626; Jockey Int'l, Inc., Distribution Center, Kenosha, WI

The workers' firm does not produce an article as required for certification under Section 222 of the Trade Act of 1974.

TA–W–29,664; Bristol Consolidators, Inc., Greenville, PA

The workers' firm does not produce an article as required for certification under Section 222 of the Trade Act of 1974.

TA–W–29,699; Weyerhaeuser Co., Klamath Falls, OR

The workers' firm does not produce an article as required for certification under Section 222 of the Trade Act of 1974.

TA–W–29,733; Potomac Mine Island Creek Coal Co., Bayard, WV

U.S. imports of coal were negligible in 1992 and 1993.

TA–W–29,727; Navaro Mining, Inc., Bluefield, VA

U.S. imports of coal were negligible in 1992 and 1993.

TA–W–29,788; Gerber Products Co., Inc., Gerber Baby Care, Reedsburg, WI

The investigation revealed that criterion (2) has not been met. Sales or production did not decline during the relevant period for certification.

TA-W-29,747; Heater Wire, El Paso, TX

The investigation revealed that criterion (2) has not been met. Sales or production did not decline during the relevant period for certification.

Affirmative Determinations for Worker Adjustment Assistance

TA-W-29,629; W & F Products, Inc., Buffalo, NY

A certification was issued covering all workers separated on or after March 3, 1993.

TA-W-29,609; Lucas Aerospace Applied Technology Div., City of Industries, CA

A certification was issued covering all workers separated on or after March 24, 1993

TA-W-29,486; Magnesium Corp. of America, Salt Lake City, UT

A certification was issued covering all workers separated on or after February 14, 1993.

TA-W-29,634; International Women's Apparel, Easton, PA

A certification was issued covering all workers separated on or after February 1, 1993.

TA-W-29,639; Gould Shawmut, Marble Falls, TX

A certification was issued covering all workers separated on or after October 1, 1993.

TA-W-29,630; Dezurik—La Grange, La Grange, GA

A certification was issued covering all workers separated on or after March 9, 1993.

TA-W-29,655; Elkem Metals Co., Ashtabula, OH

A certification was issued covering all workers separated on or after March 22, 1993.

TA-W-29,766; USA Enterprises of Georgia, Conyers, GA

A certification was issued covering all workers separated on or after March 24, 1993.

TA-W-29,802; Western Geophysical Co., Houston, TX

A certification was issued covering all workers separated on or after April 25, 1993.

TA-W-29,686 & TA-W-29,687; Hesteco Manufacturing Co, #1, Elizabeth, PA & Hesteco Manufacturing Co., #4, Hummelstown, PA

A certification was issued covering all workers separated on or after March 24, 1993.

TA-W-29,651; Southern Illinois Oil Producers, Olney, IL

A certification was issued covering all workers separated on or after March 16, 1993.

TA-W-29,588; Cooper Power Industries, Inc., Cooper Power Systems, Cannonsburg, PA

A certification was issued covering all workers separated on or after March 1, 1993.

TA-W-29,748, TA-W-29,749 & TA-W-29,750; Fisher Price, Murray, KY, Medina, NY and East Aurora, NY

A certification was issued covering all workers separated on or after April 5, 1993.

Also, pursuant to Title V of the North American Free Trade Agreement Implementation Act (Pub. L. 103-182) concerning transitional adjustment assistance hereinafter called (NAFTA-TAA) and in accordance with Section 250(a) Subchapter D, Chapter 2, Title II, of the Trade Act as amended, the Department of Labor presents summaries of determinations regarding eligibility to apply for NAFTA-TAA issued during the month of May, 1994.

In order for an affirmative determination to be made and a certification of eligibility to apply for NAFTA-TAA the following group eligibility requirements of Section 250 of the Trade Act must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, (including workers in any agricultural firm or appropriate subdivision thereof) have become totally or partially separated from employment and either—

(A) That sales or production, or both, of such firm or subdivision have decreased absolutely,

(B) That imports from Mexico or Canada of articles like or directly competitive with articles produced by such firm or subdivision have increased,

(c) That the increase in imports contributed importantly to such workers' separations or threat of separation and to the decline in sales or production of such firm or subdivision; or

(2) That there has been a shift in production by such workers' firm or subdivision to Mexico or Canada of articles like or directly competitive with articles which are produced by the firm or subdivision.

Negative Determinations NAFTA-TAA

NAFTA-TAA-00069; Rudolph Miles Personnel, Inc., El Paso, TX

The investigation revealed that workers of the subject firm do not produce an article within the meaning of the Act. The Department of Labor has consistently determined that the performance of services does not constitute production of an article as required by the Trade Act of 1974.

NAFTA-TAA-00089; Lyons Falls Pulp & Paper, Inc., Lyons Falls, NY

The investigation revealed that criterion (3) & criterion (4) were not met. A survey conducted with a sample of customers of Lyons Pulp & Paper, Inc. revealed that respondents either did not import chlorine-free paper from Canada/Mexico or their imports were not an important proportion of the survey sample's business with the subject firm.

NAFTA-TAA-00105; Fruit of The Loom, Osceola, AR

The investigation revealed that criterion (3) and criterion (4) were not met. Employment declines among workers producing long sleeve tee shirts at the Osceola, AR plant resulted from a company decision to consolidate its two-plant production of long sleeve tee shirts at one domestic plant of Fruit of The Loom. Sales for this product line did not decline.

NAFTA-TAA-00090; Kraft General Foods, Avon, NY

The investigation revealed that criterion (3) and criterion (4) were not met. Production of frozen novelty products was discontinued at the subject plant at the end of 1993. A survey conducted with customers purchasing frozen novelty products from the subject firm revealed that customers did not import these products from Canada or Mexico.

NAFTA-TAA-00085; Beaver Dam Products Corp., A Div. of Chrysler Corp., Beaver Dam, WI

The investigation revealed that criterion (3) and criterion (4) were not met. Sales and production increased in 1993 compared to 1992. The subject plant will be closing in 1994. A survey of major customers revealed that customers did not import marine or industrial engines and parts from Canada or Mexico in the relevant time period.

NAFTA-TAA-00087; Howes Leather Co., Ashland Hide Co., Ashland, KY

The investigation revealed that criteria (3) and criteria (4) were not met. The subject firm produced leather for its parent company, Howes Leather Co. Howes Leather Company does not import leather, and a survey of its customers revealed that either customers did not import leather from Canada or Mexico or they relied on imports from Canada/Mexico for a very small proportion of their total purchases during the relevant time period.

NAFTA-TAA-00088; Andrea Manufacturing, Decatur, IL

The investigation revealed that criteria (3) and criteria (4) were not met.

A survey conducted with the manufacturer for whom Andrea Manufacturing produced women's sportswear revealed that the manufacturer did not import women's sportswear from Mexico or Canada or contract work with firms in Mexico or Canada. A survey was also conducted with customers of Andrea's manufacturer revealing that respondents purchasing women's sportswear did not import women's sportswear from Mexico or Canada.

Affirmative Determinations NAFTA-TAA

NAFTA-TAA-00093; Millinckrodt Medical, Inc., Mallinckrodt Anethesiology, New Athens, IL

A certification was issued covering all workers of Millinckrodt Medical, Inc., Mallinckrodt Anethesiology, New Athens, IL separated on or after December 8, 1993.

NAFTA-TAA-00091; L. Grief Companies, Shippensburg, PA

NAFTA-TAA-00099; The Grief Companies, Lehigh Valley, PA

A certification was issued covering all workers of L. Grief Companies, Shippensburg, PA and The Grief Companies, Lehigh Valley, PA separated on or after December 8, 1993.

NAFTA-TAA-00098; Waynesboro Apparel, Inc., Waynesboro, GA

A certification was issued covering all workers of Waynesboro Apparel, Inc., Waynesboro, GA separated on or after December 8, 1993.

NAFTA-TAA-00106; Viskase Corp., Osceola, AR

A certification was issued covering all workers engaged in employment related to the shirring operations at Viskase Corp., Osceola, AR separated on or after December 8, 1993.

NAFTA-TAA-00081; Allied Signal Safety Restraints, El Paso, TX

A certification was issued covering all workers engaged in employment related to the engineering and quality control stages of production at Allied Signal Safety Restraints, El Paso, TX separated on or after December 8, 1993.

NAFTA-TAA-00082; Otis Elevator Co., Tucson, AZ

A certification was issued covering all workers engaged in employment related to the purchasing stage of production at Otis Elevator Co., Tucson, AZ separated on or after December 8, 1993.

I hereby certify that the aforementioned determinations were issued during the month of May, 1994. Copies of these determinations are available for inspection in room C-4318, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, DC 20210 during normal business hours or will be mailed to persons to write to the above address.

Dated: June 7, 1994.

Violet L. Thompson,

Deputy Director, Office of Trade Adjustment Assistance.

NATIONAL FOUNDATION ON THE ARTS AND HUMANITIES

Cooperative Agreement for Documentation Preparation Assistance

AGENCY: National Endowment for the Arts.

ACTION: Notification of availability.

SUMMARY: The National Endowment for the Arts is requesting proposals leading to the award of a Cooperative Agreement for technical assistance to "Arts Plus" grantees on how to document their activities so that others interested in adapting a project or approach could easily examine and understand the development, results, and impact of the project. It is anticipated that the Cooperative Agreement will result in a documentation preparation handbook. Those interested in receiving the Solicitation package should reference Program Solicitation PS 94-12 in their written request and include two (2) self-addressed labels. verbal requests for the Solicitation will not be honored.

DATES: Program Solicitation PS 94-12 is scheduled for release approximately June 28, 1994 with proposals due July 28, 1994.

FOR FURTHER INFORMATION CONTACT: William I. Hummel, Contracts Division, National Endowment for the Arts, 1100 Pennsylvania Ave., NW. Washington, DC 20506 (202/682-5482).

William I. Hummel,

Director, Contracts and Procurement Division.

BILLING CODE 7537-01-M

NUCLEAR REGULATORY COMMISSION

License Termination for the Amax Site, Parkersburg, WV

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of license termination.

This notice is to inform the public that the United States Nuclear Regulatory Commission (the Commission) is terminating the Material License No. SMB-1418 issued to Amax, Inc., for rare earth recovery operations near Parkersburg, WV. On March 24, 1993, the Commission published in the **Federal Register** (58 FR 1588) its intention to terminate the license upon receipt of appropriate closing or conveyance documents from the Department of Energy (DOE). Receipt of the documents will result in the site being transferred to DOE under authority of the Nuclear Waste Policy Act (NWPA) section 151(c). The Amax, Inc. site is listed in the Commission's Site Decommissioning Management Plan.

The Amax, Inc. site is subject to a provision of NWPA that requires DOE to assume title and custody of low-level radioactive waste that originated in the processing of zirconium, hafnium, or rare earth ores. The legislation stipulates that DOE assume title and custody of the site, since the owner of the site requests transfer, the site is "decontaminated and stabilized" in accordance with the Commission requirements, and the owner has made financial arrangements, approved by the NRC, for the "long-term maintenance and monitoring" of the site.

The conditions have been satisfied. The Commission has received notification from DOE that it has assumed custody of the site and that the title to the site has been transferred to the United States of America.

This termination will be reopened only if additional contamination, or noncompliance with the decommissioning plan is found indicating a significant threat to public health and safety. Noncompliance would occur if the licensee had not complied with an approved decommissioning plan or had provided false information.

Dated at Rockville, MD this 8th day of June 1994.

For the Nuclear Regulatory Commission

John H. Austin,

Chief, Low-Level Waste and Decommissioning Project Branch, Division of Waste Management, Office of Nuclear Material Safety and Safeguards.

BILLING CODE 7590-01-M

[Docket No. 50–213]

Connecticut Yankee Atomic Power Co.; Consideration of Issuance of Amendment to Facility Operating License and Opportunity for a Hearing

The U.S. Nuclear Regulatory Commission (Commission) is considering issuance of an amendment to Facility Operating License No. DPR–61, issued to Connecticut Yankee Atomic Power Company (the licensee), for operation of the Haddam Neck Plant located in Middlesex County, Connecticut.

The proposed amendment would revise the Technical Specification (TS) Surveillance Requirement 4.2.2.1.2, "Power Distribution Limits;" TS Section 5.3.1, "Fuel Assemblies," Administrative TS Section 6.9.1.9.b, "Analytical Methods Used;" and the associated Bases sections. These changes to the TS will allow the Haddam Neck Plant to load up to 5.0 weight percent nominal fuel into the reactor.

Before issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

By July 13, 1994, the licensee may file a request for a hearing with respect to issuance of the amendemnt to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written request for a hearing and a petition for leave to intervene. Requests for a hearing and a petition for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. Interested persons should consult a current copy of 10 CFR 2.714 which is available at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555 and at the local public document room located at the Russell Library, 123 Broad Street, Middletown, Connecticut 06457. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition; and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to 15 days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than 15 days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter. Each contention must consist of a specific statement of the issue of law or fact to be raised or controverted. In addition, the petitioner shall provide a brief explanation of the bases of the contention and a concise statement of the alleged facts or expert opinion which support the contention and on which the petitioner intends to rely in proving the contention at the hearing. The petitioner must also provide references to those specific sources and documents of which the petitioner is aware and on which the petitioner intends to rely to establish those facts or expert opinion. Petitioner must provide sufficient information to show that a genuine dispute exists with the applicant on a material issue of law or fact. Contentions shall be limited to matters within the scope of the amendment under consideration. The contention must be one which, if proven, would entitle the petitioner to relief. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Services Branch, or may be delivered to the Commission's Public Docket Room, the Gelman Building, 2120 L Street, NW., Washington, DC 2055, by the above date. Where petitions are filed during the last 10 days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at 1–(800) 248–5100 (in Missouri 1–(800) 342–6700). The Western Union operator should be given Datagram Identification Number N1023 and the following message addressed to John F. Stolz: petitioner's name and telephone number; date petition was mailed; plant name; and publication date and page number of this **Federal Register** notice. A copy of the petition should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to Gerald Garfield, Esquire, Day, Berry & Howard, Counselors at Law, City Place, Hartford, Connecticut 06103–3499, attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the presiding Atomic Safety and Licensing Board that the petition and/or request should be granted based upon a balancing of the factors specified in 10 CFR 2.714(a)(1)(i)–(v) and 2.714(d).

If a request for a hearing is received, the Commission's staff may issue the amendment after it completes its technical review and prior to the completion of any required hearing if it publishes a further notice for public comment of its proposed finding of no significant hazards consideration in accordance with 10 CFR 50.91 and 50.92.

For further details with respect to this action, see the application for amendment dated May 17, 1994, which is available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555, and at the local public document room located at the Russell Library, 123 Broad Street, Middletown, Connecticut 06457.

Dated at Rockville, Maryland, this 3rd day of June 1994.

For the Nuclear Regulatory Commission.

John F. Stolz,

Director, Project Directorate I–4, Division of Reactor Projects—I/II, Office of Nuclear Reactor Regulation.

[FR Doc. 94–14384 Filed 6–13–94; 8:45 am]

BILLING CODE 7590–01–M

[Docket No. 50–289]

GPU Nuclear Corporation; Consideration of Issuance of Amendment to Facility Operating License and Opportunity for a Hearing

The Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. DPR–50, issued to GPU Nuclear Corporation (the licensee), for operation of the Three Mile Island Nuclear Station, Unit 1 located in Dauphin County, Pennsylvania.

The proposed amendment would revise the plant Technical Specifications (TS) to change the limit on control rod drop time for 12 control rods from 1.66 seconds to 2.11 seconds. The change would only be in effect for the remainder of the present operating cycle and could be necessary to allow continued plant operation. The reason for the increased drop time for the 12 rods referenced in the licensee's request is buildup of corrosion products in certain portions of the control rod drive mechanisms (CRDMs). The licensee conducted control road testing on June 1, 1994, and removed four CRDMs for inspection to confirm the root cause of the slow drop times.

Before issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

By July 13, 1994, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written request for a hearing and a petition for leave to intervene. Requests for a hearing and a petition for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR part 2. Interested persons should consult a current copy of 10 CFR 2.714 which is available at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555 and at the local public document room located at the Government Publications Section, State Library of Pennsylvania, Walnut Street and Commonwealth Avenue, Box 1601, Harrisburg, Pennsylvania 17105. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition; and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularly the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to 15 days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than 15 days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter. Each contention must consist of a specific statement of the issue of law or fact to be raised or controverted. In addition, the petitioner shall provide a brief explanation of the bases of the contention and a concise statement of the alleged facts or expert opinion which support the contention and on which the petitioner intends to rely in proving the contention at the hearing. The petitioner must also provide references to those specific sources and documents of which the petitioner is aware and on which the petitioner intends to rely to establish those facts or expert opinion. Petitioner must provide sufficient information to show that a genuine dispute exists with the applicant on a material issue of law or fact. Contentions shall be limited to matters within the scope of the amendment under consideration. The contention must be one which, if proven, would entitle the petitioner to relief. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Services Branch, or may be delivered to the Commission's Public Document Room, the Gelman Building, 2120 L Street NW., Washington, DC 20555, by the above date. Where petitions are filed during the last 10 days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at 1 (800) 248–5100 (in Missouri 1 (800) 342–6700). The Western Union operator should be given Datagram Identification Number N1023 and the following message addressed to John F. Stolz: petitioner's name and telephone number; date petition was mailed; plant name; and publication date and page number of this **Federal Register** notice. A copy of the petition should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to Ernest L. Blake, Jr., Esquire, Shaw, Pittman, Potts & Trowbridge, 2300 N Street NW., Washington, DC 20037, attorney for the license.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the presiding Atomic Safety and Licensing Board that the petition and/or request should be granted based upon a balancing of the factors specified in 10 CFR 2.714(a)(1)(i)–(v) and 2.714(d).

If a request for a hearing is received, the Commission's staff may issue the amendment after it completes its technical review and prior to the completion of any required hearing if it

publishes a further notice for public comment of its proposed finding of no significant hazards consideration in accordance with 10 CFR 50.91 and 50.92.

For further details with respect to this action, see the application for amendment dated May 20, 1994, which is available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street NW., Washington, DC 20555, and at the local public document room located at the Government Publications Section, State Library of Pennsylvania, Walnut Street and Commonwealth Avenue, Box 1601, Harrisburg, Pennsylvania 17105.

Dated at Rockville, Maryland, this 7th day of June 1994.

For the Nuclear Regulatory Commission.

John F. Stolz,

Director, Project Directorate I–4, Division of Reactor Projects—I/II, Office of Nuclear Reactor Regulation.

BILLING CODE 7590–01–M

OFFICE OF PERSONNEL MANAGEMENT

Proposed Information Collection Submitted to OMB for Clearance

AGENCY: Office of Personnel Management.

ACTION: Notice of proposed information collection.

SUMMARY: In accordance with the Paperwork Reduction Act of 1980 (chapter 35 of title 44, United States Code), this notice announces a request submitted by the Office of Personnel Management (OPM) to the Office of Management and Budget (OMB) for clearance of two information collections: Nonforeign Area Cost-of-Living Allowance Background Survey and Nonforeign Area Cost-of-Living Allowance Price Survey. These information collections will be used for annual living cost surveys and for background surveys that will be conducted approximately once every 5 years to evaluate the program. Selected retail, service, realty, and other businesses and local governments will be surveyed in nonforeign allowance areas and in the Washington, DC, area to obtain living cost data. OPM will use these data to develop cost-of-living allowances as authorized by section 5941 of title 5, United States Code. Approximately 300 establishments will be contacted in the background survey, and approximately 4,000 establishments will be contacted in the price survey. OPM estimates that the survey interviews will take approximately 480 hours annually. For a copy of this proposal call C. Ronald Trueworthy on 703–908–8550.

DATES: Comments on this proposal should be received within 30 days after the date of this notice.

ADDRESSES: Send or deliver comments to:

Allan G. Hearne, Chief, Methodology Development Branch, Salary Systems Division, U.S. Office of Personnel Management, 1900 E Street, NW., room 6H31, Washington, DC 20415; and

Joseph Lackey, OPM Desk Officer, Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, room 3002, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT:

Allan G. Hearne (202) 606–2838, Office of Personnel Management.

James B. King,

Director.

BILLING CODE 6325–01–M

Federal Salary Council; Meetings

AGENCY: Office of Personnel Management.

ACTION: Notice of meetings.

SUMMARY: According to the provisions of section 10 of the Federal Advisory Committee Act (Pub. L. (92–463), notice is hereby given that the thirty-sixth and thirty-seventh meetings of the Federal Salary Council will be held at the times and place shown below. At the meetings the Council will continue discussing issues relating to locality-based comparability payments authorized by the Federal Employees Pay Comparability Act of 1990 (FEPCA). The meetings are open to the public.

DATES: July 19, 1994, at 10 a.m.: August 23, 1994, at 10 a.m.

ADDRESSES: Office of Personnel Management, 1900 E Street NW., room 7B09, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Ruth O'Donnell, Chief, Salary Systems Division, Office of Personnel Management, 1900 E Street NW., room 6H31, Washington, DC 20415–0001. Telephone number: (202) 606–2838.

For the President's Pay Agent.

Lorraine A. Green,

Deputy Director.

BILLING CODE 6820–BW–M

RESOLUTION TRUST CORPORATION

Warranted Contracting Officer Program

AGENCY: Resolution Trust Corporation.

ACTION: Notice of availability.

SUMMARY: The Resolution Trust Corporation (RTC) hereby notifies the public that it has revised its program under which only RTC employees designated by the RTC as "warranted contracting officers," or managing agents of savings associations under the conservatorship of the RTC, may execute contracts on behalf of the RTC. The Statement of Qualifications to be, and Authority of, an RTC Warranted Contracting Officer (Statement), is being amended accordingly, and is available for distribution to the public.

ADDRESSES: The Statement may be obtained from the RTC Public Reading Room, 801 17th Street, NW., Washington, DC 20434, phone number (202) 416–6940, fax (202) 416–2076 (These are not toll-free numbers), and from the RTC Public Service Centers: Atlanta PSC, Marquis One Tower, suite 1100, 245 Peachtree Center Avenue, NE., Atlanta, GA. 30303, phone number (404) 225–5069 or (800) 628–4362, fax (404) 225–5081; Dallas PSC, Reverchon Plaza, suite 130, 500 Maple Avenue, Dallas, TX 75219, phone number (214) 443–4860 or (800) 782–4674, fax (214) 443–4875; Denver PSC, 1111 15th Street, Suite 101, Denver, CO 80202, phone number (303) 556–6400 or (800) 542–6135, fax (303) 556–6430; Kansas City PSC, 4900 Main Street, Suite 200, Kansas City, KS 64112, phone number (816) 968–7184 or (800) 365–3342, fax (816) 531–7251; Newport Beach PSC, 4000 MacArthur Blvd., suite 4100, West Tower, Newport Beach, CA 92660, phone number (714) 263–4953 or (800)

283–9288, fax (714) 852–7674; and Valley Forge PSC, 1000 Adams Avenue, Norristown, PA 19403, phone number (215) 650–8500 or (800) 782–6326, fax (215) 650–6168.

EFFECTIVE DATE: The requirements described in this notice became effective on May 16, 1994.

FOR FURTHER INFORMATION CONTACT: Carl Gold, Counsel, RTC Division of Legal Services, (202) 763–0728. This is not a toll-free number.

SUPPLEMENTARY INFORMATION: The Resolution Trust Corporation Completion Act (RTCCA), Public Law 103–204, was enacted on December 17, 1993. Section 30 of the RTCCA added a new subsection (y) to section 21A of the Federal Home Loan Bank Act, 12 U.S.C. 1441a. Section 30 of the RTCCA provides that a person may execute or modify a contract for goods or services on behalf of the RTC only if the person is a warranted contracting officer appointed by the RTC or a managing agent of a savings association under the conservatorship of the RTC. Section 30 further provides that each such person must provide appropriate certification to parties contracting with the RTC, and that each contract must contain certain notices to the other contracting party regarding the requirements for appointment as a warranted contracting officer and the nature and extent of the warranted contracting officer's or managing agent's authority. Finally, Section 30 provides that any contract that fails to meet these requirements shall be null and void and shall not be enforced against the RTC or its agents by any court.

The requirements to be a warranted contracting officer, and the nature and extent of the contracting authority exercised by any warranted contracting officer or managing agent, are set forth in the publicly available Statement. These may be adjusted from time to time, as published in the RTC's Contract Policies and Procedures Manual (CPPM), the relevant portions of which will be contained in the Statement, which shall also be amended as the parameters are amended.

On January 21, 1994, the RTC published a Notice of Availability in the **Federal Register** [59 FR 3382], in which it summarized the parameters of the warranted contracting officer program as it existed on that date. Subsequently, the RTC has issued Revision 7 of its CPPM, which contains, among other things, revisions to the parameters of the warranted contracting officer program. As revised in Revision 7 of the CPPM, the key points of the program are as follows:

There are three levels of warranted contracting officer, with Level III being the highest. In brief summary, the requirements to be appointed as, and to remain, a warranted contracting officer are a combination of experience, training, and general and specific education. These have been somewhat modified by Revision 7 to the CPPM. The Revised Statement will reflect these modifications. The higher the level, the more stringent the requirements, and concomitantly, the greater authority exercised.

The amounts of authority granted to each level of warranted contracting officer are as follows:

Level I: On a per contracting action basis, to:

a. Execute contracts with total estimated fees up to the limit of Simplified Contracting as defined by Chapter 5 of Revision 7 of the CPPM;

b. Execute task orders with total fees up to $100,000 under pre-established task order agreements;

c. Execute delivery orders under GSA Federal Supply Schedules or RTC, or other government agency's contracts;

d. Execute purchase orders with total estimated fees up to $100,000;

e. Execute contract administrative changes or modifications on contracts with total cumulative value up to $100,000; and

f. Approve invoices for contracts, task orders, purchase orders, or delivery orders for which they have contracting officer responsibility.

Level II: Level II contracting officers now are appointed to Step A, Step B, or Step C.

Level II, Step A contracting officers, when assigned responsibility for a specific contract, have authority to:

a. Execute contracts with total estimated fees (including options) up to $1,000,000;

b. Execute individual task orders with total estimated fees up to $1,000,000;

c. Execute delivery orders under GSA Federal Supply Schedules or RTC, or other government agency's contracts;

d. Execute purchase orders with total estimated fees up to $200,000;

e. Execute changes to contracts, task order agreements, task orders, and contract modifications where the fees for the change or modification result in the modified contract not exceeding $1,000,000;

f. Execute contract terminations with total fees up to $1,000,000;

g. Execute contract claim settlements with payments up to $100,000; and

h. Approve invoices for contracts or task orders for which they have contracting officer responsibility.

Level II, Step B contracting officers, when assigned responsibility for a specific contract, have authority to:

a. Execute contracts with total estimated fees (including options) up to $2,500,000;

b. Execute individual task orders with total estimated fees up to $2,500,000;

c. Execute delivery orders under GSA Federal Supply Schedules or RTC, or other government agency's contracts.

d. Execute purchase orders with total estimated fees up to $100,000;

e. Execute changes to contracts, task order agreements, task orders, and contract modifications where the fees for the change or modification result in the modified contract not exceeding $2,500,000;

f. Execute contract terminations with total fees up to $2,500,000;

g. Execute contract claim settlements with payments up to $250,000; and

h. Approve invoices for contracts or task orders for which they have contracting officer responsibility.

Level II, Step C contracting officers, when assigned responsibility for a specific contract, have authority to:

a. Execute contracts with total estimated fees (including options) up to $5,000,000;

b. Execute individual task orders with total estimated fees up to $5,000,000;

c. Execute delivery orders under GSA Federal Supply Schedules or RTC, or other government agency's contracts;

d. Execute purchase orders with total estimated fees up to $100,000;

e. Execute changes to contracts, task order agreements, task orders, and contract modifications where the fees for the change or modification result in the modified contract not exceeding $5,000,000;

f. Execute contract terminations with total fees up to $5,000,000;

g. Execute contract claim settlements with payments up to $500,000; and

h. Approve invoices for contracts or task orders for which they have contracting officer responsibility.

Level III: There are also 3 Steps of Level III warranted contracting officers. The authority of each level is as follows:

Level III, Step A contracting officers have authority to:

a. Execute contracts and task order agreements with total estimated fees (including options) up to $10 million per year for SAMDA asset management, loan servicing, and indemnification of loan servicing; execute all other contracts and task order agreements with total estimated fees (including options) up to $5 million;

b. Execute delivery orders under GSA Federal Supply Schedules or RTC, or other government agency's contracts;

c. Execute purchase orders with total estimated fees up to $500,000;

d. Execute changes to contracts, task order agreements, task orders, and modifications to those documents including changes in the delivery, cost or schedule, where the fees for the change or modification result in the modified contract not exceeding $5 million ($10 million per year for SAMDA, asset management, loan servicing, and indemnification of loan servicing);

e. Execute contract terminations with fees defined in paragraph (a) of this level;

f. Execute contract claim settlements with payments up to $750,000; and

g. Approve invoices up to the limit of their execution authority or the contract value, whichever is less.

Level III, Step B contracting officers have authority to:

a. Execute contracts, task order agreements, and task orders with total estimated fees up to $10,000,000 ($10 million per year for asset management, loan servicing, and indemnification of loan servicing);

b. Execute delivery orders under GSA Federal Supply Schedules or RTC, or other government agency's contracts;

c. Execute purchase orders with total estimated fees up to $10 million;

d. Execute changes and modifications to contracts, task order agreements, and task orders where the fees for the change or modification result in the modified contract not exceeding $10,000,000 ($10 million per year for asset management loan servicing and indemnification of loan servicing);

e. Execute contract terminations with total fees up to $10,000,000;

f. Execute contract claim settlements with payments up to $1,000,000; and

g. Approve invoices up to the limit of their execution authority or the contract value, whichever is less.

Level III, Step C contracting officers have unlimited authority to:

a. Execute contracts including task order agreements;

b. Execute task orders;

c. Execute delivery orders;

d. Execute purchase orders;

e. Execute administrative changes to contracts, task order agreements, task orders, and contract modifications thereof;

f. Execute contract terminations;

g. Execute contract claim settlements; and

h. approve invoices.

These changes affect only contracts for services other than legal services. In addition, no change has been made to the authority of managing agents to contract on behalf of associations under the conservatorship of the RTC.

Warranted contracting officers and managing agents are given a certificate of appointment, showing the level of the warrant. The certificate shall be signed by the RTC's Director, Office of Contract Policy and Major Dispute Resolutions. This certificate or a copy must be presented prior to executing a contract or taking one of the other actions listed above.

Dated at Washington, DC, this 8th day of June 1994.

Resolution Trust Corporation.

John M. Buckley, Jr.,

Secretary.

BILLING CODE 8010–01–M

[Release No. 34–34167; File No. SR–NYSE–93–45]

Self-Regulatory Organizations; New York Stock Exchange, Inc.; Order Granting Approval to Proposed Rule Change Relating to the Specialist Combination Review Policy

June 6, 1994.

I. Introduction and Summary

On December 3, 1993, the New York Stock Exchange, Inc. ("NYSE" or "Exchange") submitted to the Securities and Exchange Commission ("SEC" or "Commission"), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")[1] and Rule 19b–4 thereunder,[2] a proposed rule change to adopt a new set of guidelines for reviewing combinations among specialist units known as the Exchange's Specialist Combination Review Policy (the "Policy").

The proposed rule change was published for comment in Securities Exchange Act Release No. 33475 (January 13, 1994), 59 FR 3145 (January 20, 1994). No comments were received on the proposal.

The Exchange's current Policy was first approved by the Commission on a six-month pilot basis in 1987.[3] It was subsequently extended and then granted interim effectiveness until such time as the Commission makes a final determination on permanent approval.[4]

The proposed rule change will continue to authorize the Quality of Markets Committee ("QOMC") to review certain proposed combinations that, in the Exchange's view, may lead to undue concentration within the specialist community. The current combination review policy calls for an Exchange review of a potential combination under a two tier system where the combined unit exceeds any one of the four specified concentration measures.[5] A tier I QOMC review occurs whenever a proposed combination would result in a specialist organization specializing in securities which exceed

[1] 15 U.S.C. 78s(b)(1) (1988).

[2] 17 CFR 240.19b–4 (1991).

[3] See Securities Exchange Act Release No. 24411 (April 29, 1987), 52 FR 17870 (May 12, 1987).

[4] See Securities Exchange Act Release No. 25481 (March 17, 1988), 53 FR 9554 (March 23, 1988).

[5] The concentration measures include specialist share of:

- allocation (*i.e.* designation as registered specialist) for all listed common stocks
- allocation (*i.e.* designation as registered specialist) for the 250 most active listed common stocks
- total share volume of stock trading on the Exchange
- total dollar value of stock trading on the Exchange.

5% of any one of four concentration measures. A tier II review occurs whenever a proposed combination would result in a specialist organization exceeding 10% of any concentration measure. The tier II review differs from the tier I review in that the presumption is against approval of the proposed combination.[6] The proposed new Policy establishes a three tier system of review for combinations. The four concentration measures that trigger a combination review under the various tiers, however, will remain unchanged.

The proposed rule change does not affect the role of the Exchange's Market Performance Committee ("MPC"), acting under delegated authority from the QOMC, of conducting a preliminary review of all proposed combinations to determine the effects of the proposed combination on market quality. If the MPC concludes that the proposed combination will erode significantly market quality, it informs the constituent units of its concern. If the constituent units persist in their plans, the MPC can inform them that some or all of the affected stocks may be put up for reallocation.[7]

II. Description of the Proposal

The proposed rule change modifies the NYSE's mechanism of monitoring the level of concentration within the Exchange specialist community. The proposal establishes a three tier system of review whereby the QOMC will be authorized to review proposed specialist combinations that raise concentration-related issues.

A tier I QOMC review is triggered, both currently and under the proposal, whenever a proposed combination involves or would result in a specialist organization exceeding 5% of any concentration measure.[8] In a tier I review, the QOMC reviews the proposed combination with the following considerations in mind: (a) Specialist performance and market quality in the stocks subject to the proposed combination;

(b) The effects of the proposed combination in terms of the following criteria: (i) Strengthening the capital base of the resulting specialist organization;

(ii) Minimizing both the potential for financial failure of the new unit and the negative consequences of any such failure on the specialist system as a whole; and

(iii) Maintaining or increasing operational efficiencies within the resulting specialist organization;

(c) The commitment to the Exchange market, focusing on whether the constituent specialist organizations have worked to support, strengthen and advance the Exchange, its agency/auction market and its competitiveness in relation to other markets; and

(d) The effect of the proposed combination on overall concentration of specialist organizations.

When a combination involves an entity that is not an existing specialist unit (*e.g.*, if a third party's contemporaneous purchase of two or more units creates a combination exceeding the five percent threshold), the application of the "commitment to the Exchange market" criterion to the non-specialist organization will be based upon an assessment of whether the organization will work to support, strengthen and advance the Exchange, its agency/auction market and its competitiveness in relation to other markets.

Moreover, the criterion relating to the "commitment to the Exchange market" under a tier I review is designed to require the QOMC to look to a variety of factors that extend beyond compliance with the Exchange's requirements for providing sufficient capital, talent and order handling services. Specifically, the Committee will review and assess each constituent unit's past conduct on the Exchange relating to such items as:

(a) Participation upon request in the Exchange's FACTS program,[9] in its marketing seminars, in sales calls and in other of its marketing initiatives seeking to attract order flow and new listings.

(b) Acceptance of innovations in order-routing and other trade-support systems and willingness to make optimal use of the systems once they become fully operational.

(c) Willingness to apply for allocations of stocks that are less lucrative from the standpoint of profitability to the specialist.

(d) Assistance to other units by providing capital and personnel in unusual market situations, such as "breakouts" and difficult openings.

(e) Efforts at customers' relations with both listed companies and order providers, as evidenced by personal contact, return of telephone calls, prompt resolution of complaints, assessment of customer needs and anticipation of customer problems.

(f) Efforts to streamline the efficiency of its own operations and its competitive posture.

The QOMC will continue to approve or disapprove a particular proposed specialist unit combination based on its assessment of the concentration and other considerations described above. In addition, the QOMC will retain the ability to condition its approval, under any level of review, upon compliance by the resulting specialist organization with any steps specified by the QOMC to address particular concerns in regard to the considerations above.

Once the proposed combination potentially exceeds 10% of any concentration measure, the QOMC will give primary weight to the effect of the proposed combination on the overall concentration of specialist organizations. Moreover, the Policy places an affirmative obligation upon the proponents of the combination to make certain representations regarding the proposed combination in order to obtain QOMC approval. The breadth of the evidentiary showing required depends upon whether the proponents are subject to a tier II or tier III QOMC review.

A tier II QOMC review will be triggered whenever a proposed combination involves or would result in a specialist organization exceeding 10%, up to and including 15%, of any of the four concentration measures. In a tier II review, the burden of proof will then be on the constituent specialist organizations to prove, by a preponderance of the evidence, that the proposed combination:

(1) Would not create or foster concentration in the specialist business detrimental to the Exchange and its markets; and

(2) Would foster competition among specialist organizations; and

(3) Would enhance the performance of the constituent specialist organization and the quality of the markets in the stocks; and

(4) Would otherwise be in the public interest.

Absent such a showing, the QOMC will disapprove the proposed combination.

A tier III QOMC review will be triggered whenever a proposed combination involves or would result in

[6] The burden of proof is on the proponents of the combination to show, by clear and convincing evidence, that the proposed combination would not result in undue concentration and would promote competition among the specialist units.

[7] If the proposed combination is under 5%, then the MPC is in effect the governing body and its decision is appealable through the Exchange's rules relating to hearings and appeals. If, however, the proposed combination would exceed one of the thresholds, then the MPC's determination would be taken under advisement by the QOMC in conducting its review pursuant to the Policy; in this case it would be the QOMC's decision that would be appealable. See NYSE Constitution, Article IV, Section 14.

[8] See note 6, *supra*.

[9] The FACTS program is used to introduce member firms and other interested persons to the operations of the Exchange.

a specialist organization exceeding 15% of any of the four concentration measures. In a tier III review, the proponents must present clear and convincing evidence demonstrating that, if approved, the proposed combination would satisfy requirements 1–4 enumerated above.

The proposed rule change defines a "proposed combination" subjected to the Policy to include:

(a) A merger of specialist organizations or an acquisition of one organization by another;

(b) The formation of a joint account involving two or more existing organizations;

(c) The "split-up" of an existing organization (including an organization operating under a joint account) and recombination with another organization;

(d) An individual specialist leaving an existing organization and proposing to take stocks with him to join another existing organization; and

(e) Any other arrangement that would result in previously separate organizations operating under common control.

The NYSE also has informed the Commission of how it intends to address three specific situations involving the purchase of specialist units by an entity other than a specialist firm. First, when a non-specialist entity purchases a single specialist unit, the acquisition will not be reviewable under the Policy regardless of whether or not the specialist unit has a concentration level of 5% or more at the time of purchase. The Policy only applies to combinations of specialist units that involve or would result in a unit exceeding 5%, 10%, or 15% of a concentration measure. Second, if a non-specialist entity proposes to purchase two or more specialist units that, combined into one unit, account for more than 5%, 10%, or 15% of a concentration measure, the acquisition will be reviewable under the Policy. Finally, a non-specialist entity's purchase of two or more specialist units which are kept operationally separate, but when viewed together would cross a 5%, 10%, or 15% concentration measure, will be reviewable under the Policy.[10] In this latter example, the QMOC will seek information as to what the acquiror's intentions are with respect to the specialist units and whether or not a combination is anticipated. In sum, any time a threshold may be exceeded as a direct result of a potential combination made possible by an acquisition, it will be subject to review.[11]

The Exchange has previously stated, with respect to the Policy,[12] that the Policy is designed to provide the Exchange with a mechanism for reviewing proposed mergers, acquisitions and other combinations between or among specialist units that may lead to a level of concentration within the specialist community that is detrimental to the Exchange and the quality of its markets. The Exchange expressed its belief that undue concentration may undermine its agency/auction process, accentuate specialist complacency, and damage the public's perception of the Exchange as a free market environment. Specifically, the Exchange's principal concern from a concentration standpoint was that the transformation of the specialist community into fewer and larger units might vitiate the competition among existing specialist units and present a significant barrier to new entrants to the specialist business, all to the detriment of the competition for the allocation of new listings. In implementing a policy to address these concerns, the Exchange sought to strike an appropriate balance between the perceived harm from undue concentration and the need for some specialist organizations to grow and attract capital through combinations. The instant modification strengthens this balance by adding a middle level of review at which the proponents of the combination are held to a less burdensome standard.

III. Discussion

The Commission recognizes the NYSE's concerns that undue concentration can result in various negative effects on market quality. The Commission also believes that in many situations consolidations among specialist units can be beneficial for the units themselves, particularly for those units with limited capital and resources, as well as for the quality of the market.

The Commission has previously indicated its belief that it is appropriate for the NYSE to adopt a policy that authorizes it to monitor specialist combinations to determine their impact upon the competitive environment necessary to maintain an orderly market.[13] Further, the Commission continues to believe the concentration factors identified by the NYSE are adequately designed to result in approval of proposed combinations which will not have an adverse impact on market quality or result in undue concentration, and at the same time will enable the NYSE to identify those combinations that can be potentially harmful to market quality and actually decrease competition.

The Commission has carefully reviewed the NYSE's Policy, placing particular emphasis on its differences with respect to the existing pilot procedure. The Commission previously expressed concern, due to the ability of the NYSE to disapprove proposed combinations based upon their potential concentration effects, as to whether the thresholds identified by the NYSE are appropriate measures of potentially harmful concentration. In particular, the Commission was concerned with the 10% threshold, where the constituent firms would have to overcome the presumption that the proposed combination would result in a level of business harmful to the specialist community.[14] Although the instant Policy retains this presumption, the burden of proof placed upon the proponents under a tier II review is being decreased from a clear and convincing to a preponderance standard. The clear and convincing standard will now only apply to a tier III review. The Commission believes that this intermediary level of review, along with the lower evidentiary standard, will make it less likely that potentially beneficial mergers will be erroneously blocked, consistent with the Act and the goals of the Exchange.

Accordingly, in light of the legitimate concentration concerns the NYSE has identified, the Commission believes that it is consistent with the Act for the NYSE to have a permanent review mechanism for proposed specialist combinations. Further, the Commission believes that the threshold levels identified by the NYSE in the Policy are reasonable in relation to the current distribution of the four concentration measures among specialist units on the NYSE.

---

[10] The NYSE states that such a review is initiated because of the introduction of the element of common ownership even if the units are to be kept separate.

[11] For example, if a full service broker-dealer bought two specialist units, one with 4% of all allocations and the other with 3%, this would constitute a combination subject to review. Likewise, if a full service broker-dealer that already owned one specialist unit with 7% of all allocations bought another unit having 2% of all allocations, this would be reviewable under the Policy because it is a combination of specialist units crossing the 5% threshold. In contrast, if a full service broker-dealer that had no affiliated specialist unit bought a unit having 11% of all allocations, this purchase would not be reviewable under the Policy.

[12] See Securities Exchange Act Release No. 24411 (April 29, 1987) 52 FR 17870 (May 12, 1987).

[13] See Securities Exchange Act Release No. 24411 (April 29, 1987). 52 FR 17870 (May 12, 1987).

[14] The Commission notes that to date the NYSE QOMC has only conducted two tier II reviews, both of which have been approved, despite the current high level of burden of proof.

Finally, the Commission notes that the QOMC acts on behalf of the Board of Directors and consists of at least three Directors that are representatives of the public. Currently only one member of the eight-member committee represents a specialist unit. The Commission would be concerned if specialist representation of the QOMC were substantially increased to more than a minor representation by specialists when determining the outcome of a proposed specialist combination, as this could appear to cause a conflict of interest. In such circumstance, the Commission will review this Policy for continued consistency with the Act.

IV. Conclusion

For the reasons discussed above, the Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, and, in particular, with the requirements of Sections 6(b).[15] In this regard, the Commission believes that the proposal is consistent with the Section 6(b)(5) requirements that the rules of an exchange be designed to promote just and equitable principles of trade, to prevent fraudulent and manipulative acts, and, in general, to protect investors and the public, in that it identifies specific levels of review for combinations that could potentially impair market quality and hinder competition to the detriment of investors and the public interest while ensuring that combinations that are beneficial to the market place will not be prohibited. The Commission also believes that the proposal does not impose any unnecessary or inappropriate burden on competition under Section 6(b)(8) of the Act in that it establishes review procedures to prevent undue concentration of specialist units that could potentially hinder market quality. Although the Commission recognizes that the Policy can result in prohibiting certain combinations from occurring, the Commission believes the considerations outlined in the Policy in conducting a combination review under the various tiers will help to ensure that combinations that are beneficial to the market will be permitted, while prohibiting those combinations that may have a negative impact on market quality. Accordingly, any potential burden on competition resulting from the Policy is, in the Commission's view, justified as necessary and appropriate under the Act.

It is therefore ordered, pursuant to Section 19(b)(2) of the Act,[16] that the proposed rule change (SR–NYSE–93–45) is approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[17]

Margaret H. McFarland,

Deputy Secretary.

Self-Regulatory Organizations; Applications for Unlisted Trading Privileges; Notice and Opportunity for Hearing; Pacific Stock Exchange, Inc.

June 8, 1994.

The above named national securities exchange has filed applications with the Securities and Exchange Commission ("Commission") pursuant to section 12(f)(1)(B) of the Securities Exchange Act of 1934 and Rule 12f–1 thereunder for unlisted trading privileges in the following security:

Hanson PLC

Class B Warrants Expiring 9/30/97 (File No. 7–12569)

This security is listed and registered on one or more other national securities exchanges and are reported in the consolidated transaction reporting system.

Interested persons are invited to submit on or before June 29, 1994, written data, views and arguments concerning the above-referenced application. Persons desiring to make written comments should file three copies thereof with the Secretary of the Securities and Exchange Commission, 450 5th Street NW., Washington, DC 20549. Following this opportunity for hearing, the Commission will approve the application if it finds, based upon all the information available to it, that the extensions of unlisted trading privileges pursuant to such applications are consistent with the maintenance of fair and orderly markets and the protection of investors.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

[Release No. 35–26063]

Filings Under the Public Utility Holding Company Act of 1935 ("Act")

June 7, 1994.

Notice is hereby given that the following filing(s) has/have been made with the Commission pursuant to provisions of the Act and rules promulgated thereunder. All interested persons are referred to the application(s) and/or declaration(s) for complete statements of the proposed transaction(s) summarized below. The application(s) and/or declaration(s) and any amendments thereto is/are available for public inspection through the Commission's Office of Public Reference.

Interested persons wishing to comment or request a hearing on the application(s) and/or declaration(s) should submit their views in writing by July 1, 1994, to the Secretary, Securities and Exchange Commission, Washington, DC 20549, and serve a copy on the relevant applicant(s) and/or declarant(s) at the address(es) specified below. Proof of service (by affidavit or, in case of any attorney at law, by certificate) should be filed with the request. Any request for hearing shall identify specifically the issues of fact or law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in the matter. After said date, the application(s) and/or declaration(s), as filed or as amended, may be granted and/or permitted to become effective.

CINergy Corp. (70–8427)

CINergy Corp. ("CINegy"), 139 East Fourth Street, Cincinnati, Ohio 45202, a Delaware corporation not currently subject to the Act, has filed an application-declaration under sections 5, 6(a), 7, 9(a)(1), 9(a)(2), 10, 13(b) and rules 80–91 and 93–94 thereunder.

The application-declaration seeks approvals relating to the proposed combination of Cincinnati Gas & Electric Company ("CG&E"), an Ohio combination electric and gas public-utility holding company exempt from registration under section 3(a)(2) of the Act pursuant to rule 2, and PSI Resources, Inc. ("PSI"), an Indiana public-utility holding company exempt from registration under section 3(a)(1) of the Act pursuant to rule 2, by which CG&E and PSI's electric public-utility subsidiary, PSI Energy, Inc. ("Energy"), would become wholly owned subsidiaries of CINergy. Following the transaction, CINergy would register with the Commission under Section 5 of the

Act. CINergy also seeks approvals in connection with services to be rendered by CINergy Services, Inc. ("Services"). CINergy's newly formed service company subsidiary, the formation of a new CINergy subsidiary that will hold certain of the CINergy system's non-utility assets, and the issuance of shares of CINergy common stock for CINergy's dividend reinvestment and employee benefit plans.

CG&E and its public-utility subsidiary companies are primarily engaged in providing electric and gas service in the southwestern portion of Ohio and adjacent areas in Kentucky and Indiana.[1] The service area covers approximately 3,000 square miles has an estimated population of 1.8 million, and includes the cities of Cincinnati and Middletown in Ohio, Covington and Newport in Kentucky, and Lawrenceburg in Indiana. As of February 28, 1994, there were 88,458,656 shares of CG&E common stock, par value $8.50 per share, and 3,300,000 shares of CG&E cumulative preferred stock (400,000 of which were redeemed on April 1, 1994) outstanding. CG&E's principal executive office is located in Cincinnati, Ohio. On a consolidated basis, for the year ended December 31, 1993, CG&E's operating revenues were approximately $1.75 billion with consolidated assets of approximately $5.1 billion, consisting of $3.28 billion in electric utility property, plant, and equipment and $504 million in gas utility property, plant, and equipment, and $1.36 billion in other corporate assets.

PSI owns all the issued and outstanding common stock of Energy, an Indiana corporation engaged in the production, transmission, distribution, and sale of electric energy in north central, central, and southern Indiana.[2] Energy services a population of approximately 1.9 million in 69 counties in Indiana. As of February 28, 1994 there were 57,114,573 shares of PSI common stock outstanding. PSI has no shares of preferred stock outstanding. As of February 28, 1994, there were 5,118,335 preferred shares of Energy outstanding. PSI's principal corporate office is located in Plainfield, Indiana. On a consolidated basis, for the year ended December 31, 1993, PSI's operating revenues were approximately $1.1 billion, and its total assets were approximately $2.7 billion, of which $2.2 billion was electric utility plant.

CINergy was incorporated in Delaware on June 30, 1993 to become a holding company over CG&E and Energy following the proposed merger. At present, the common stock of CINergy, which consists of 100 issued and outstanding shares, is owned by PSI and by Tri-State Improvement Company, a wholly owned non-utility subsidiary of CG&E. Each company owns 50 shares.

CINergy Sub, Inc. ("CINergy Sub"), a subsidiary of CINergy, was incorporated under the laws of Ohio on July 1, 1993. The authorized capital stock of CINergy Sub consists of 100 shares of common stock, no par value. CINergy has entered into a subscription agreement for all such shares. No shares of CINergy Sub common stock have been issued. CINergy Sub has and prior to the closing of the proposed merger will have, no operations other than the activities necessary to accomplish the proposed combination of CINergy Sub and CG&E as described below.

Pursuant to an Agreement and Plan of Reorganization, dated as of December 11, 1992, as amended and restated on July 2, 1993 and as of September 10, 1993 ("Merger Agreement"), PSI will be merged with and into CINergy, with CINergy as the surviving corporation ("PSI Merger"), and CINergy Sub will be merged with and into CG&E, with CG&E as the surviving corporation ("CG&E Merger"). As a result of the PSI Merger and the CG&E Merger, CG&E and Energy will become operating subsidiaries of CINergy, and CINergy will be a holding company under section 2(a)(7) of the Act.

Specifically, upon consummation of the proposed transaction: (1) Each issued and outstanding share of CG&E common stock (other than treasury and certain other shares which will be

[1] CG&E wholly owns four public-utility subsidiary companies—The Union Light, Heat and Power Company, an electric and gas subsidiary company, Miami Power Corporation, a subsidiary which owns a 138 kV transmission line, The West Harrison Gas and Electric Company, an electric subsidiary company, and Lawrenceburg Gas Company, a gas subsidiary company. In addition, CG&E owns 9% of Ohio Valley Electric Corp., an electric subsidiary company.

CG&E directly or indirectly owns all the issued and outstanding common stock in five non-utility companies and minority interests in five limited partnerships. Three are direct subsidiaries—Tri-State Improvement Company, a real estate development company formed to acquire and hold property for use in CG&E's utility operations, CGE Corp., formed to hold CG&E's non-utility interests, and KO Transmission Company, used to acquire an interest in an interstate natural gas pipeline.

CGE Corp. has three wholly owned non-utility subsidiaries—Enertech Associates International, Inc. ("Enertech"), CG&E Resource Marketing, Inc. ("Resource Marketing"), and CGE ECK, Inc. ("CGE ECK"). Enertech provides, among other things, consulting, fuel brokering, operation and maintenance services, and demand-side management services worldwide and also pursues investment opportunities worldwide. Resource Marketing holds CG&E's 25% interest in U.S. Energy Partners, a gas marketing partnership that will compete with traditional regulated merchant service and will broker gas to industrial and large commercial customers. CGE ECK holds CG&E's 30–45% interest in a Czech limited liability company which will own and operate a Czech generating [illegible].

The limited partnerships are North Rhine I Limited Partnership (CG&E has a $300,000 commitment representing a 10.91% limited partnership interest), North Rhine II Limited Partnership (CG&E has a $300,000 commitment representing a 5.61% limited partnership interest), Franciscan Homes II Limited Partnership (CG&E has a $300,000 commitment representing a 2.07% limited partnership interest), Blue Chip Capital Fund (CG&E has a $1 million commitment representing 2.3% of the fund), and Blue Chip Opportunity Fund (CG&E has a $500,000 commitment representing 4.1% of the fund). North Rhine I and II and Franciscan Homes II Limited Partnerships provide low income housing in CG&E's service territory. Blue Chip Capital and Opportunity Funds promote community development through investment in female and [illegible]% owned businesses in CG&E territory.

[2] Energy has two subsidiaries, PSI Energy Argentina, Inc. and South Construction Company, a company used to own real estate and interests in real estate which are either not used and useful in the conduct of Energy's business or which have some defect in title which is unacceptable to Energy.

PSI either directly or indirectly owns PSI Argentina, Inc. ("PSI Argentina") and Costanera Power Corp. Through these subsidiaries, PSI is a 10% shareholder of Argelec S.A., a 6% shareholder of Central Costanera S.A., an Argentine electric generating company, and an 8% shareholder in Distrilec Inversora S.A. ("Distrilec"). Distrilec owns 51% of Edesur S.A., an electric distribution system. PSI Argentina also wholly owns an inactive subsidiary, Energy Services Inc. of Buenos Aires, formed to provide operating and consulting services to foreign utilities.

PSI wholly owns three active non-utility subsidiaries, PSI Recycling, Inc. (which recycles material from Energy and other sources), PSI Investments, Inc. ("Investments") (which oversees investments in nonregulated businesses), and PSI Argentina. Investments has two active subsidiaries, Power Equipment Supply Co. (which sells equipment among other things) and Wholesale Power Services, Inc. ("WPS") (which activities include, among others, power brokering, electricity futures, consulting services in wholesale power related markets). WPS, also through a division, formed International Power Exchange, an electronic bulletin board for the bulk power market.

Investments has five inactive subsidiaries—PSI Power Resource Operations Inc. and PSI Power Resource Development, Inc. (which develop, construct, operate, maintain, and own independent power producer/cogeneration projects), PSI Environmental Corp. (which provides environmental services), PSI International, Inc., and PSI Sunnyside, Inc. (both formed to develop, construct, operate, and own cogenerating or power production facilities).

PSI also holds minority interests in five limited partnerships—CID Partnership, L.P. ($350,000 investment at year-end 1993), CID Ventures, L.P. (a 7% interest with a $1 million investment at year-end 1993), CID Equity Capital III, L.P. (a 8.2% interest with a $800,000 investment at year-end 1993), Cambridge Ventures, L.P. (a 7.6% interest with a $250,000 investment at year-end 1993), and Circle Centre Mall (a $1.2 million commitment to be invested in mid-1994 representing a 4.2 [illegible] interest). CID Equity Partners is a private venture capital partnership dedicated to building successful companies through long-term investments in growing Indiana and other midwestern businesses. Circle Centre Mall is a 700,000 square foot shopping mall under construction in downtown Indianapolis

cancelled, and shares held by holders who dissent in compliance with Ohio law) will be converted into the right to receive one share of CINergy common stock, par value $.01 per share ("CG&E Conversion Ratio"); (2) each issued and outstanding share of PSI common stock (other than treasury and certain other shares which will be cancelled, and shares held by holders who dissent in compliance with Indiana law) will be converted into the right to receive that number of shares of CINergy common stock obtained by dividing $30.69 by the average closing sale price of the CG&E common stock for the 15 consecutive trading days preceding the fifth trading day prior to the PSI Merger; provided that, if the actual quotient obtained thereby is less than .909, the quotient shall be .909, and if the actual quotient obtained thereby is more than 1.023, the quotient shall be 1.023 ("PSI Conversion Ratio"); (3) the aggregate of all shares of CINergy Sub common stock issued and outstanding prior to the transaction will be converted into the right to receive that number of shares of CG&E common stock equivalent to the aggregate number of shares of CG&E common stock issued and outstanding immediately prior to the transaction; and (4) all shares of capital stock of CINergy issued and outstanding immediately prior to the transaction will be cancelled. Holders of PSI common stock entitled to receive fractional shares of CINergy common stock will receive a cash payment in lieu of such fractional shares. These cash payments will be determined by multiplying the fractional share interest by the average of the last reported sales price per share of CG&E common stock on the consolidated tape for the ten business days prior to and including the last business day on which CG&E common stock was traded on the New York Stock Exchange, without any interest thereon.[3] The outstanding shares of preferred stock of CG&E and Energy will not be affected. CINergy states that the transaction is expected to be tax-free to CG&E, PSI, and Energy shareholders (except as to dissenters' rights and fractional shares). Based on the capitalization of PSI and CG&E on February 28, 1994 and PSI Conversion Ratio of 1.023, the shareholders of PSI and CG&E would own securities representing approximately 40% and 60%, respectively, of the outstanding voting power of CINergy. CINergy states that the proposed merger is a pure stock-for-stock exchange and qualifies for treatment as a pooling of interests.

Following the merger, CG&E's utility subsidiaries will remain subsidiaries of CG&E, the non-utility subsidiaries of PSI will become subsidiaries of CINergy, and the non-utility subsidiaries of CG&E will remain subsidiaries of CG&E. The Merger Agreement provides that CINergy's principal corporate office will be in Cincinnati, Ohio. CINergy's board of directors, which will be classified into three classes, will consist of a total of 19 directors, 10 of whom will be designated by CG&E and 9 of whom will be designated by PSI.

CINergy requests authority to form a new subsidiary ("Holding Company Sub") to hold certain of the CINergy system's non-utility interests. It is anticipated that Holding Company Sub will be incorporated in Delaware, and that its capitalization will consist of 100 shares of common stock, par value $.01 per share, all of which will be issued to, and acquired by, CINergy at a price not more than $1 per share. CINergy expects that Holding Company Sub will acquire all the outstanding capital stock of some or all of the following non-utility subsidiaries: Enertech, Resource Marketing, CGE ECK, PSI Recycling, Inc., PSI Argentia, Power Equipment Supply Company, WPS, PSI Power Resource Development, Inc., PSI Power Resource Operations Inc., PSI Environmental Corp., PSI International, Inc., and PSI Sunnyside, Inc.

CINergy also requests authorizations with respect to the activities of Services, which was incorporated in Delaware on February 23, 1994 to serve as the service company for the CINergy system after the proposed merger. CINergy proposes that Services provide companies in the CINergy system with a variety of administrative, management, and support services. It is anticipated that Services will be staffed by transfer of personnel from the current employee rosters of CG&E, PSI, and their subsidiaries. CINergy states that Services' accounting and cost allocation methods and procedures will comply with the Commission's standards for service companies in registered holding-company systems, and that Services' billing system will use the Commission's "Uniform System of Accounts of Mutual Service Companies and Subsidiary Service Companies." Services' service agreement calls for pre-filing review by state commissions of any amendment to its service agreement. For CINergy's utility subsidiaries, Services proposes to provide services at cost. For CINergy's non-utility subsidiaries, Services proposes that charges be at fair market value and requests an exemption from the "at cost" requirements of section 13(b).

In addition, CINergy requests authority through December 31, 1995 to issue and/or acquire in open market transactions an aggregate amount up to 10 million shares of CINergy common stock for CINergy's shareholder dividend reinvestment, stock purchase plan, stock-based employee benefit plans, and the CG&E and Energy 401(k) plans. CINergy has not finalized its dividend reinvestment plan ("CINergy DRIP") but anticipates that the terms will be the following. All holders of record of shares of CINergy common stock, Energy cumulative preferred or preference stock or CG&E cumulative preferred stock will be eligible to participate in the CINergy DRIP. Full investment of funds will be possible under the CINergy DRIP, subject to a minimum of $25 and a maximum of $100,000 purchase limits. There will be no brokerage or other fees on purchases. All costs of administration of the CINergy DRIP will be paid by CINergy; however, charges will be incurred by participants who direct the plan administrator to sell their shares on withdrawal.

The shares of additional common stock purchased under the CINergy DRIP with optional cash payments and reinvested dividends, if any, may be, in the discretion of CINergy, authorized but unissued CINergy common stock or shares of CINergy common stock purchased on the open market by the plan administrator. CINergy will not change the source of shares of common stock to open-market purchases unless capital needs or market conditions warrant. When purchases of shares of CINergy common stock under the CINergy DRIP come from authorized but unissued shares, the purchase price of such shares will be the average of the high and low prices (computed to four decimal places) of CINergy common stock, as reported in the New York Stock Exchange Composite Transactions section of The Wall Street Journal, for the appropriate investment date, or if no trading in CINergy common stock occurs on such date, the next preceding date on which such trading occurred. When CINergy common stock purchased for each investment date comes from purchases on the open market, the purchase price will be the weighted average price (computed to four decimal places), excluding brokerage commissions, of such shares

[3] Fractional shares of CG&E and PSI common stock held in accounts under the dividend reinvestment plans, the 401(k) savings plans, and the employee benefit plans of CG&E and PSI will be converted into the applicable number of shares (or fractional shares) of CINergy common stock under the corresponding plans of CINergy, CG&E, or PSI, in accordance with the appropriate CG&E or PSI Conversion Ratio.

acquired for the plan. CINergy will pay all administrative costs of acquisition, including brokerage fees and commissions. It is anticipated that there will be no discount program under the CINergy DRIP.

A participant may sell or withdraw all or a portion of his/her shares at any time. Sales of shares through the CINergy DRIP will not be "matched" with other participants' purchases, but will be executed without regard to such purchases. Proceeds from any sale, less applicable brokerage commission, will be remitted to a participant following settlement through the independent agent.

Whether the participant requests to sell the shares in his/her account or elects to receive certificates for the full shares in his/her account, the participant's interest in fractional shares will be paid in cash on the basis of the price paid to the participant for his/her whole shares. A participant will be entitled to request in writing and receive a certificate representing the full shares of CINergy common stock credited to his/her account.

CINergy proposes to use the proceeds from the sale of the newly-issued shares of additional common stock for the repayment of indebtedness, for working capital, or for other general corporate purposes. CINergy will not, however, use such proceeds to acquire the securities of or any interest in any exempt wholesale generators or in any foreign utility company until such time as such investment shall be approved by order or by regulation of the Commission, to the extent such approval is required under the Act.

CG&E and PSI will discontinue their respective dividend reinvestment plans following the consummation of the proposed merger.

CINergy proposes to adopt four stock-based plans—CINergy Stock Option Plan ("Stock Option Plan"), CINergy Emplyee Stock Purchase and Savings Plan ("ESOP"), CINergy Performance Shares Plan ("Performance Plan"), and CINergy Directors' Deferred Compensation Plan ("Directors' Plan"). Although the final terms of these plans have not been established, the anticipated terms are set forth below.

The Stock Option Plan is a plan by which non-employee directors, officers of CINergy or any of its subsidiaries, and employees who are executive employees, employed in a significant executive supervisory, administrative, operational or professional capacity, or who have the potential to contribute to the future success of any participating employer, may be granted incentive stock options, nonqualified stock options, stock appreciation rights and/or cash awards granted in connection with nonqualified stock options to reimburse an optionee for the income taxes imposed upon the exercise of such an option. Each outside director will receive an automatic grant of nonqualified stock option to purchase 12,500 shares of CINergy common stock. This grant vests at the rate of 20% per year beginning with the first anniversary of the date of the grant.

The option price must be no less than 100% of the fair market value of CINergy common stock on the date of the grant. The terms of incentive stock options may not exceed ten years from the date of grant. Each grantee will receive an agreement setting out the terms and conditions of the grant. The Stock Option Plan will be administered by the compensation committee of the CINergy board, which committee will consist of outside directors.

Upon the consummation of the proposed merger, the PSI Stock Option Plan will be merged into the Stock Option Plan.

The ESOP is an employee stock purchase plan in which eligible employees of CINergy and its subsidiaries may be granted options to purchase shares of CINergy common stock. All employees of CINergy or its subsidiaries will be eligible to participate in the ESOP, except part-time employees, employees who have not been employed by CINergy or, in the case of the first offering, by Energy or CG&E, for at least nine months as of the first date of the offering and any full officer of Energy, CG&E, or any other participating employer.

Each offering under the plan consists of an offering period of 26 months. During the offering period, plan participants may make after-tax contributions to a savings account under the plan in an aggregate amount to up to ten percent of the participant's annual base salary multiplied by 26/12ths. Amounts contributed to the savings account will earn interest. The employee may terminate participation at any time, but cannot renew participation prior to a new offering period. At the end of the offering period, a participant may exercise his/her option to purchase shares of CINergy common stock at a five percent discount from the fair market value of the shares on the first day of the offering period, receive the cash held in his/her savings account, or receive a combination of both.

Upon consummation of the proposed merger, the PSI Stock Purchase and Savings Plan will be merged into the ESOP.

The Performance Plan is a long-term incentive compensation plan. Officers of CINergy or any of its subsidiaries, and employees who are executive employees, employed in a significant executive supervisory, administrative, operational or professional capacity, or who have the potential to contribute to the future success of any participating employer, may participate in the plan.

Employees who participate in the Performance Plan will be granted awards payable in a combination of shares of CINergy common stock and cash. The awards will be payable in two equal annual installments following the end of a performance period. Awards will be based on a percentage of a participant's annual base salary and the attainment of the individual, group, and corporate goals established by each participating employer's board of directors.

Upon consummation of the proposed transaction, the PSI and Energy Performance Shares Plans will be merged into the Performance Plan.

The Director's Plan will allow each director of CINergy or any of its subsidiaries to defer fees for serving as a director and to have them accrued either in terms of cash or in terms of theoretical units of shares of CINergy common stock. If deferred in theoretical units of stock, the stock will be distributed to the director at the time he/she retires from the appropriate board. Amounts deferred in cash will be paid at the same time.

Upon the consummation of the proposed merger, the PSI Directors' Deferred Compensation Plan will be merged into this plan. Directors currently participating in that plan will make new elections prior to such time to participate in, and transfer therein deferrals to, the Directors' Plan.

In addition, CINergy proposes to maintain on substantially the same terms, the CG&E and PSI 401(k) plans, except that shares of CINergy common stock will be used instead of CG&E common stock and Energy common stock. The CG&E plans are known as the savings Incentive Plan ("CG&E SIP") and the Deferred Compensation and Investment Plan ("CG&E DCIP") and are mirror 401(k) plans with savings features. All non-exempt full-time employees of CG&E with one year of service are eligible to participate in the CG&E SIP. All full-time exempt employees of CG&E DCIP.

Both the CG&E SIP and the CG&E DCIP accept before-tax and after-tax contributions from employees. Employee contributions are invested according to employee instructions. CG&E matches $.55 per dollar of

employee contributions, through the first five percent of the employee's salary. This match is made solely in CG&E common stock. Shares acquired under the CG&E SIP and the CG&E DCIP are placed at the average high and low price on the New York Stock Exchange on the trading day immediately preceding their acquisition.

Energy has 401(k) plans for all of its eligible employees which allow employees to make both before-tax and after-tax contributions. Eligible employees can save up to 10% of their before-tax eligible compensation and up to 10% of their after-tax compensation. The company matches, in PSI common stock, employees' before-tax contribution in two components: (1) A base match equal to $.70 for every dollar an eligible employee contributes, up to the first four percent of compensation; and (2) a potential incentive match equal to $.10 to $.30 for each dollar contributed, up to the first four percent of compensation. The amount of the incentive match depends on the level of corporate goals achieved.

Shares may be purchased in the open market or may be issued by PSI and are priced based on the closing price of PSI common stock as set forth in the New York Stock Exchange Composite Transactions section of the *Wall Street Journal* for the date on which the contributions are invested.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010–01–M

DEPARTMENT OF TRANSPORTATION

Office of the Secretary

Plans for Establishment of Land Transportation Standards Subcommittee

AGENCY: Office of International Transportation and Trade, Office of the Secretary, Department of Transportation.

ACTION: This notice announces the Department of Transportation's (DOT) plans for establishing the Land Transportation Standards Subcommittee (LTSS) required in the North American Free Trade Agreement (NAFTA). It also describes the LTSS' scope of work, notifies the public of upcoming meetings, and invites interested parties to write to DOT, by July 20, 1994, to be included in the Department's distribution list for LTSS reports and related information.

SUMMARY: The United States, Canada, and Mexico intend to work to develop more compatible land transportation standards through the LTSS in accordance with a timetable set in the NAFTA. Five working groups of federal and state government technical experts from the three countries will accomplish this work under the direction of the LTSS. While the working groups will be comprised of government officials only, the U.S. delegation to the LTSS will include federal and state government officials, as well as representatives from industry, labor, and safety advocacy groups. The LTSS is scheduled to hold its first plenary session on July 12, 1994, in Cancun, Mexico. Several working groups may meet on July 11, 1994 at the same location. Agendas for the meetings are yet to be determined. In the future, the Department intends to publish in advance the schedules and agendas for LTSS and working group meetings, and to distribute regularly relevant information to individuals and organizations on its mailing list. Public briefings will also be scheduled as appropriate to provide updated information. Respondents are requested to send a post card with their full names and addresses to DOT, specifying the group(s) about which they would like to receive information.

BACKGROUND: The NAFTA establishes a Committee on Standards-Related Measures, and requires that it create a subcommittee to seek, to the extent practicable, compatibility of land transportation standards among the United States, Canada, and Mexico. Annex 913.5.a–1 of the NAFTA sets forth the work program that the LTSS will follow for seeking compatibility of the countries' standards-related measures for bus and truck operations, rail personnel standards that are relevant to cross-border operations, and the transportation of hazardous materials.

Land Transportation Standards Subcommittee: The LTSS will meet once a year chaired, on the U.S. side, by the Director of the Office of International Transportation and Trade, Office of the Secretary of Transportation. The chair will give general guidance and direction to U.S. working group heads, establish the parameters for participation of U.S. delegates in delegation and trilateral meetings, and prepare policy recommendations for the Secretary of Transportation's consideration. U.S. participants to the LTSS will include: (1) Federal officials from the Federal Highway Administration (FHWA), Federal Railroad Administration (FRA), Research and Special Programs Administration (RSPA), the U.S. Department of State, the Office of the U.S. Trade Representative, and other federal agencies as appropriate; (2) state policy-makers identified by the National Governors' Association; (3) trade association representatives for the truck, bus, and rail industries, shippers transportation labor unions, brokers, and shippers; and (4) public safety advocates.

Working Groups: Five working groups, comprised of federal, state, and provincial officials from the three countries, will be established. In the United States, each working group will operate under the leadership of a DOT official. By invitation, representatives of state government organizations such as the Association of American Motor Vehicle Administrators, the Commercial Vehicle Safety Alliance, the International Association of Chiefs of Police, the National Association of State Regulatory Utility Commissioners, the Cooperative Hazardous Materials Enforcement Development Program, and others may also be part of the U.S. delegation. Individual working groups will determine the frequency of meetings depending on the scope of work and the time-frame established in the NAFTA for seeking compatibility for the specific standards under each group's jurisdiction. The groups and chairs are listed below.

1. Working Group 1—This group will consider medical and non-medical standards-related measures for drivers, including age and language requirements. It will also review measures with respect to vehicles such as tires, brakes, parts and accessories, cargo securement, maintenance and repair, inspections, and emissions and environmental pollution levels not covered by the Automotive Standards Council's work program established under Annex 913.5.a–3 of the NAFTA. In addition, the group will examine standards related to the supervision of motor carrier safety compliance. For information call Tom Kozlowski, Chief, Standards Development Division/ FHWA, at (202) 366–2981.

2. Working Group 2—This group will analyze the development of more compatible vehicle weights and dimensions standards. For information call Susan Binder, Chief, Office of Industry and Economic Analysis/ FHWA, at (202) 366–9230.

3. Working Group 3—This group will be responsible for seeking compatibility of standards-related measures relating t

road signs. For information call Rudolph Umbs, Acting Chief, Safety Management Division/FHWA, at (202) 366–0411.

4. Working Group 4—This group will consider compatibility of standards related to rail operating personnel that are relevant to cross-border operations, and standards related to locomotives and other rail equipment. For information call Jane Bachner, Director, Office of Economic Analysis/FRA, at (202) 366–0344.

5. Working Group 5—This group will be responsible for seeking compatibility of standards related to the transportation of hazardous materials. For information call Frits Wybenga, International Standards Coordinator for Hazardous Materials/RSPA, at (202) 366–0656.

MEETINGS: The LTSS is scheduled to meet for the first time in plenary session on July 12, 1994, in Cancun, Mexico. Several working groups may also meet at the same location on July 11, 1994. Agendas for the July sessions are not immediately available, but may be obtained by calling the individuals listed on this notice the week of June 27. Schedules and agendas for future meetings will be published in advance.

FOR FURTHER INFORMATION: Contact David DeCarme, Chief, Maritime and Surface Division, Office of International Transportation and Trade, Office of the Secretary of Transportation, at (202) 366–2892.

ADDRESS AND DEADLINE: Individuals and organizations interested in being placed on the mailing list for receiving LTSS-related information are requested to send, by July 20, 1994, a post card indicating the complete name and address where the information should be sent, and specifying the group or groups about which information is desired. Mail post cards to David DeCarme, U.S. Department of Transportation, OST/X–20, room 10300, 400 Seventh Street SW., Washington, DC 20590.

Dated: June 9, 1994.

Arnold Levine,

Director, Office of International Transportation and Trade.

DEPARTMENT OF THE TREASURY

Public Information Collection Requirements Submitted to OMB for Review

June 8, 1994.

The Department of Treasury has submitted the following public information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1980, Public Law 96–511. Copies of the submission(s) may be obtained by calling the Treasury Bureau Clearance Officer listed. Comments regarding this information collection should be addressed to the OMB reviewer listed and to the Treasury Department Clearance Officer, Department of the Treasury, room 2110, 1425 New York Avenue NW., Washington, DC 20220.

Office of Thrift Supervision (OTS)

OMB Number: 1550–0023

Form Number: OTS Form 1313; Monthly Cost of Funds Survey Systems Worksheet; Officer's Certification

Type of Review: Extension

Title: Thrift Financial Report (TFR)

Description: The Office of Thrift Supervision (OTS) collects financial data from insured institutions and their subsidiaries in order to assure their safety and soundness as depositories of the personal savings of the general public. The OTS monitors financial positions and interest-rate risk so that adverse conditions can be remedied promptly. The respondents are savings associations.

Respondents: Businesses or other for-profit, savings institutions

Estimated Number of Respondents/ Recordkeepers: 1,788

Estimated Burden Hours Per Respondent/Recordkeeper: 20 hrs. 41 mins.

Frequency of Response: Monthly, quarterly

Estimated Total Reporting/ Recordkeeping Burden: 365,215 hours

Clearance Officer: Colleen Devine (202) 906–6025, Office of Thrift Supervision, 2nd Floor, 1700 G. Street, NW., Washington, DC 20552.

OMB Reviewer: Gary Waxman (202) 395–7340, Office of Management and Budget, room 3208, New Executive Office Building, Washington, DC 20503.

Dale A. Morgan,

Departmental Reports Management Officer.

UNITED STATES INFORMATION AGENCY

Convention on Cultural Property Implementation Act (Pub. L. 97–446); Import Restriction on Archaeological Material of the Moche Period From the Sipan Archaeological Region, Peru

AGENCY: United States Information Agency.

ACTION: Determination to Extend Emergency Restriction on Moche Material from the Sipan Archaeological Region, Peru.

Pursuant to the authority vested in me under Executive Order 12555 and Delegation Order No. 86–3 of March 18, 1986 (51 FR 10137),

I find:

Pursuant to the requirements of section 304(c) (3) of the Act, 19 U.S.C. 2603(c)(3), with respect to the extension of an emergency import restriction on Moche artifacts from the Sipan Archaeological Region, Peru, and pursuant to the emergency provisions under section 304, subsections (a)(2) and (a)(3); and pursuant to a unanimous favorable recommendation from the Cultural Property Advisory Committee,

(1) That the material is archaeological and is identifiable as coming from sites in the Sipan Archaeological Region, an area recognized to be of high cultural significance, for it contains evidence of the Moche culture at the apogee of its development; that an ambience conducive to further pillage continues to exist in this region causing continued jeopardy from pillage, dismantling, dispersal, or fragmentation which is, of threatens to be, of crisis proportions;

(2) That the material is part of the remains of the Moche culture (approximately A.D. 100–800) which did not develop a writing system and about which little is known except from scientific excavation of intact remains; that an ambience conducive to further pillage continues to exist relative to these remains of the Moche culture, the record of which continues to be in jeopardy from pillage, dismantling, dispersal, or fragmentation which is, or threatens to be, of crisis proportions;

(3) That the application of the import restriction set forth on a temporary basis would continue, in whole or in part, to reduce the incentive for pillage, for it has been established that the emergency import restriction in place since 1990 has resulted in a diminution to systematic clandestine pillage of the sites in the Sipan Archaeological Region.

Determination

Therefore, in accordance with the aforementioned authority vested in me, and pursuant to section 304(c)(3) of the Act, 19 U.S.C. 2603(c)(3), and consistent with a favorable recommendation from the Cultural Property Advisory Committee, I determine:

(1) That the emergency condition continues to apply with respect to Moche artifacts from the Sipan Archaeological Region in the Lambayeque Valley of northern Peru.

(2) That the emergency import restriction that went into effect on May 7, 1990, is extended for a period of three more years effective June 15, 1994.

Dated: June 9, 1994.

Penn Kemble,

Deputy Director, United States Information Agency.

Sunshine Act Meetings

Federal Register

Vol. 59, No. 113

Tuesday, June 14, 1994

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

BOARD OF GOVERNORS OF THE FEDERAL RESERVE SYSTEM

TIME AND DATE: 11:00 a.m., Monday, June 20, 1994.

PLACE: Marriner S. Eccles Federal Reserve Board Building, C Street entrance between 20th and 21st Streets, N.W., Washington, DC 20551.

STATUS: Closed.

MATTERS TO BE CONSIDERED:

1. Personnel actions (appointments, promotions, assignments, reassignments, and salary actions) involving individual Federal Reserve System employees.
2. Any items carried forward from a previously announced meeting.

CONTACT PERSON FOR MORE INFORMATION: Mr. Joseph R. Coyne, Assistant to the Board; (202) 452–3204. You may call (202) 452–3207, beginning at approximately 5 p.m. two business days before this meeting, for a recorded announcement of bank and bank holding company applications scheduled for the meeting.

Dated: June 10, 1994.

Jennifer J. Johnson,

Associate Secretary of the Board.

Department of Housing and Urban Development

Office of the Assistant Secretary for Housing—Federal Housing Commissioner

Notice of Funding Availability for Preservation Support Grants and Notice of Paperwork Submission

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Housing—Federal Housing Commissioner

[Docket No. N–94–3762; FR–3613–N–01]

NOFA for Preservation Support Grants and Notice of Paperwork Submission

AGENCY: Office of the Assistant Secretary for Housing—Federal Housing Commissioner, HUD.

ACTION: Notice of funding availability and paperwork submission.

SUMMARY: This NOFA announces the availability of up to $6 million in funding for Preservation Support Grants, to promote the ability of residents of eligible low-income housing to: (1) Participate meaningfully in the preservation process established by the Emergency Low Income Housing Preservation Act of 1987 (ELIHPA) and the Low-Income Housing Preservation and Resident Homeownership Act of 1990 (LIHPRHA); and (2) affect decisions about the future of their housing. This NOFA also serves to assist the Secretary in discharging the obligation to notify qualified purchasers of the availability of properties for sale and otherwise facilitate the coordination and oversight of the preservation program. A portion of the unobligated funds from the Preservation Technical Assistance NOFA published September 3, 1992 (57 FR 40570), is made available under this NOFA.

Eligible applicants may apply for a Preservation Support Grant in one of two categories. First, Outreach and Training Grants are available to resident-controlled or community-based nonprofit organizations with experience in resident education and organizing to conduct community-, city-, or county-wide outreach to identify, organize, and deliver training to residents of eligible low-income housing. Second, Preservation Activity Grants are available to State and local government agencies and nonprofit intermediaries to perform activities that further the preservation program in their jurisdictions. These activities may include outreach, training, and organizational development of unorganized tenants. In a separate NOFA, the Department has solicited applications from intermediaries to administer direct technical assistance grant funds to resident and community groups (FR–3473, published April 6, 1994, at 59 FR 16366).

This document includes information about eligible applicants, the level of funding available, and HUD's processing of applications, as well as the selection criteria for grant applicants.

DATES: The expedited deadline for submission of comments on the paperwork burden associated with this NOFA is: June 24, 1994.

The deadline for submission of applications is August 15, 1994. Applications must be physically received in the Preservation Division, Department of Housing and Urban Development, room 6284, 451 Seventh Street, SW., Washington, DC 20410, by 4:30 p.m., EST, on or before the due date.

ADDRESSES: Comments on the information collection requirments should refer to the proposal by name and should be sent to: Joseph F. Lackey, Jr., OMB Desk Officer, Office of Management and Budget, New Executive Office Building, Washington, DC 20503.

Upon request, Preservation Support Grant application packages may be obtained from the Multifamily Housing Clearinghouse, P.O. Box 6424, Rockville, MD 20850, telephone number: 1–800–955–2232. Please refer to FR–3613 when requesting an application package.

FOR FURTHER INFORMATION CONTACT: Frank Malone, Director, Office of Preservation and Property Disposition, Department of Housing and Urban Development, room 6284, 451 Seventh Street, SW., Washington, DC 20410; telephone (202) 708–3555. To provide service for persons who are hearing- or speech-impaired, this number may be reached via TDD by dialing the Federal Information Relay Service on 1–800–877–TDDY (1–800–877–8339) or 202–708–9300. (Except for the TDD number, telephone numbers are not toll-free.)

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Act Statement

The information collection requirements contained in this NOFA have been submitted, for expedited processing, to the Office of Management and Budget (OMB) for review under the Paperwork Reduction Act of 1980 (44 U.S.C. 3501–3520). No person may be subjected to a penalty for failure to comply with these information collection requirements until they have been approved and assigned an OMB control number. The OMB control number, when assigned, will be announced by separate notice in the **Federal Register**. Any applicant that completes an application before the OMB control number is assigned may have to modify that application in accordance with changes in the application package that are requested by OMB and agreed to by HUD.

Public reporting burden for the collection of information requirements contained in this rule are estimated to include the time for reviewing the instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Information on the estimated public reporting burden is provided under the Preamble heading, *Other Matters*. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, by June 24, 1994, to the Department of Housing and Urban Development, Rules Docket Clerk, 451 Seventh Street, SW., room 10276, Washington, DC 20410–0500; and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Attention: Desk Officer for HUD, Washington, DC 20503.

Introduction

On July 13, 1993, the Department published a draft Notice of Funding Availability (58 FR 37819), specifically inviting public comments on the Department's proposed methodology for implementing the provisions of section 312 of the Housing and Community Development Act of 1992 (1992 HCDA), which added sections 251–257, the Low-Income Housing Preservation and Resident Homeownership Act of 1990 (LIHPRHA). The comment period expired on August 28, 1993. The Department received a total of 26 comments. Two comments were from legal/advocacy organizations, eight from low income housing organizations which are involved in development of and advocacy for affordable housing, nine were from tenant organizations, three were from community development corporations, two from community service organizations, one from a local agency and one from an individual housing consultant.

This NOFA addresses section 254 of LIHPRHA. Comments received relating to the other added sections were addressed in an earlier NOFA directed at those sections and published on April 6, 1994 (59 FR 3473). The first section of this NOFA is a discussion of the public comments on the section 254 aspects of the draft NOFA and of modifications made in response to the comments and as a result of additional HUD consideration. The actual NOFA follows the discussion of public comments and begins with the section

designated "II. Purpose and Substantive Description."

I. Public Comments

A. Priorities

Five commenters recommended that local resident-controlled groups with experience in organizing receive highest funding priority. The rationale behind these comments was that assistance to organize by a tenant-led coalition at the local level enables tenants to share experiences and provide peer support. Also, one commenter stressed that organizing and training sponsored by local tenant coalitions protect against "sham" nonprofit purchasers. The Department agrees with these comments and is giving preference to local resident-controlled groups. Organizations that receive Outreach and Training grants are required to demonstrate that they have at least two years experience in resident organizing and education. Under the Preservation Activity Grant category, the Department also will give priority consideration to State and local government agencies and intermediaries that propose to provide outreach and training and organizational development to unorganized tenants.

One commenter suggested that in awarding Outreach and Training grants, HUD should give priority to the local nonprofit entity most trusted or most likely to be trusted by the tenants. Factors cited by the commenter that could be used as a measure of trust included languages spoken by staff, ethnicity, positive history in the immediate neighborhood, and whether the nonprofit entity has a rural/urban/suburban focus. The Department believes that establishing a trusting relationship between recipients and providers of the activity is an important aspect of a program. However, assessing the level of trust is judgmental and requires an insight about the relationship between a nonprofit organization and tenants that would be difficult for HUD staff to readily discern. The Department believes that a trusting relationship will evolve when the parties become acquainted, begin to work together, and plan successful programs.

Two commenters suggested that under the Outreach and Training grants, organizing should be given priority over education and training. However, if the purpose of the application is to provide training, one commenter suggested that preference should be given to applicants planning training for resident groups and community-based nonprofit purchasers (as opposed to owner entities, appraisers, and financial institutions), because resident groups and community-based nonprofit purchasers generally have fewer resources. Also, it was suggested that this preference be implemented through a point system published in the NOFA. Under the Outreach and Training grant category, HUD will require that successful applicants restrict provision of training to resident groups and community-based nonprofit purchasers. However, under the Preservation Activity Grants category, grantees may use funds to train and educate other groups, such as appraisers, financial institutions, and owners.

B. Allocation of Funds

The Department received eleven comments recommending that a majority of the Preservation Support Grant funds be set aside for resident outreach and training that would involve leadership development, training, and ongoing support instead of for the provision of information on LIHPRHA and ELIPHA (without organizational development, training, and support). Eight commenters suggested that, at a minimum, 60 percent of the funds should be reserved for outreach and training. Another commenter advised that the Department allocate 50 percent for each type of Preservation Support Grant, with a mid-year review for reallocation.

The Department will allocate 50 percent of the Preservation Support Grant funds to Outreach and Training grants and 50 percent to Preservation Activity grants. This equal division of the allocation will maximize opportunities for the Department to produce newly organized tenant groups, because HUD will give preference, under the Preservation Activity grant program, to State or local government agencies or intermediaries that submit applications for outreach and training and the organizational development of tenants. By including outreach and training and organizational development for tenants as preferred activities under Preservation Activity grants, the Department will be able to ensure that unorganized tenants will be reached if they live in areas where eligible local tenant controlled groups or community-based nonprofit organizations do not exist.

One commenter suggested that Outreach and Training grants be allocated in the $50,000 to $150,000 range annually for up to three years. The Department agrees that grant amounts should be limited. The Department will award Outreach and Training grants commensurate with the scope and size of the market served and the level of outreach and training described in the application. The maximum amount an applicant may receive for an Outreach and Training grant will be $150,000 annually, up to a maximum, if warranted, of $450,000 over a three-year period.

The Preservation Activity grant will be available for, among other activities, outreach and training and organizational development for tenants who live in areas where community-based nonprofit organizations or local resident-controlled groups do not exist. Because applicants applying for Preservation Activity Grants may propose an activity that is regional or national in scope and that would require a high level of funding to be effective, the Department believes that the maximum amount an applicant may receive for a Preservation Activity Grant should be $500,000 for proposals that are national in scope, and $250,000 for proposals aimed at the regional, State or local level. This NOFA addresses funding levels in detail for each category in Section II.D.

Two commenters stated that HUD should have two funding rounds annually for Preservation Support Grants, with one-year grant awards renewable for up to three years. The Department has determined that the size of Preservation Support Grants does not merit the task of scoring, ranking, and awarding grants biannually; it is more cost-effective to announce the availability of funds on an annual basis. Further, Preservation Support Grants are awarded on a competitive basis and cannot be renewed without a new round of competition. However, HUD will accept Outreach and Training grant applications that propose activities designed to be completed over a three-year period. Such proposals, if funded, would receive incremental funding as described in Section II.C of the NOFA.

Six commenters claimed that basing fund allocation solely on active Notices of Intent (NOIs) and Plans of Action (POAs) is skewed because this basis does not directly correlate with preservation sales activity. Another commenter claimed that HUD's records are not fully accurate because the basis for the allocation is program volume—specifically, the sum of "active Notices of Intent plus the number of Plans of Action submitted for the State"—so allocations may be distorted. HUD will allocate grant funds in accordance with the selection process described in Section IV of this NOFA. The number of active Notices of Intent and Plans of Action will not be the determining factor.

Another commenter stated that the allocation under this NOFA should be made according to eligible projects, not by activity level. However, HUD will award grants based on proposed activities, not according to eligible projects. The commenter further stated that the allocation should include transition rule project owners who have not filed an NOI. This comment relates to Title II projects, where owners were not required to file NOIs prior to the 1992 HCDA. Such projects will be eligible under the provisions of this NOFA.

C. Eligible Activities

One commenter suggested that organizations applying for Preservation Activity Grants should not be limited by the definition of eligible intermediaries in the NOFA. The commenter claimed that preservation activities, such as LIHPRHA training, technical assistance, data gathering, and clearinghouse functions, can be performed by an organization that does not have experience in grant allocation and administration and has not previously served a wide geographic area. Community-based nonprofits with experience in education on LIHPRHA and ELIPHA, for example, would be competent to perform these activities. The Department will limit eligibility for Preservation Activity Grants to eligible intermediaries and will adhere to the definition of intermediary used in the July 13, 1993, NOFA, because it is consistent with section 255(d) of the 1992 HCDA.

This commenter also stated that while preference should be given to locally based groups, it should be possible for community-based groups to apply for resident outreach and training grants for a multicounty area, if a local group is not available. The Department agrees and has indicated in Section III.C of the NOFA that priority will be given to established local resident-controlled groups. Next in order of preference will be established community-based nonprofit organizations, and, thirdly, city-wide, county-wide or multi-county coalitions of resident groups applying for Outreach and Training Grants. Further, community action, legal service, and fair housing counseling agencies; State and local government agencies; and intermediaries that apply for Preservation Activity Grants to initiate outreach and training and the organizational development of tenants will receive priority funding under that category.

This commenter also stated that organizations should be able to do both resident organizing and preservation activities, and that the eligible activities should include legal and financial research on properties. The Preservation Activity Grants, which will provide funding for legal and financial research studies on eligible properties, also will include outreach and training and organizational development training for tenants as an eligible and priority activity. If all funds are not awarded to eligible applicants in one grant category, the Department will utilize unused funds from one grant category to fund acceptable applications for the other, as indicated in Section III.A of the NOFA.

Four commenters suggested that the Department clarify that Outreach and Training Grants are available to support residents in projects where the owner is not selling. Two commenters want Outreach and Training Grants available where an owner has made no decision yet, but is eligible under ELIPHA or LIHPRHA. The Department agrees, and has stated in Section III.D of this NOFA, that eligible projects include any Preservation property, regardless of whether an owner has filed a Notice of Intent.

A commenter proposed that HUD fund the production of information materials, such as pamphlets, posters, displays, and videos that can be used for resident outreach and training. The commenter said that some of these materials already exist, having been produced in States with a high level of activity. However, HUD could make them widely available to assistance providers. This would avoid potentially duplicative efforts nationwide and will assure distribution of accurate information. The Department accepted this proposal and has included a provision under the Preservation Activity Grant program for creating informational materials about the Preservation process for nationwide distribution as an eligible activity. (See Section III.F of the NOFA for further details.)

D. Other

Nineteen commenters stated that because of the size of the Outreach and Training Grant program, and because the activities should be nonproject specific, HUD should administer that program. The Department agrees and will administer the awarding and monitoring of both categories of the Preservation Support Grants program.

One commenter recommended that the Department eliminate the set-aside for Preservation Support Grants and allow intermediaries to apply for an amount up to the entire State allocation to be used for Direct Assistance or Preservation Support Grants, with a maximum of $60,000 for training, outreach, and preservation activities. Beyond that, the commenter suggested that intermediaries be allowed to propose activities most appropriate for their jurisdictions. The law provides for two separate grant categories under Preservation Support Grants and identifies specific purposes for each one. The intent of the statute is to allow interested resident groups an opportunity to participate in the preservation process. While the point raised here is valid, the Department must adhere to the specifics of the law. Also, the opportunity for a resourceful resident-controlled group, which may have access to other supplemental funds to combine with a HUD award to organize and educate tenants, should not be thwarted by the elimination of the set-aside for Preservation Support Grants.

One commenter said that HUD should change the Outreach and Training applicant definition to include a network of advocacy people or other qualified organizations, not just resident-controlled or resident-based nonprofits. They stressed that the requirement that the applicant be a resident-controlled or community-based group was too restrictive and would prohibit certain tenant groups from participating in the preservation process. They further questioned the need for the applicant's board to be resident-controlled and recommended that the requirement be deleted. The Department appreciates the concerns expressed; however, the requirement is statutory and cannot be deleted.

One commenter proposed that the NOFA add criteria to ensure that each community-based organization applicant has an established mechanism to guarantee responsiveness to tenants. The Department rejects this suggestion because it believes it would be a burdensome requirement and difficult to implement and measure. The same commenter suggested that tenants and other organizations working on these issues in the community also should have a chance for input on the application and award. The Department disagrees with this comment. It is unclear how and when the commenter intended that tenants and other organizations would comply with this requirement. Also, it is illegal for HUD to disclose advance information about the applicants in a competitive grant process.

Finally, this commenter suggested that HUD, as grant administrator, should provide notice of the application to all nonprofit and tenant organizations working on preservation in the relevant jurisdiction and to national and regional groups, and that there should be a limited time period for other qualified groups to submit a competing application. The Department believes that this recommendation will delay decisionmaking and create excessive administrative burdens. However, under section 102 of the HUD Reform Act, HUD will publish the names of the recipients of assistance under this NOFA in the Federal Register.

One commenter stated that this NOFA should have similar accountability language in Outreach and Training Grant applications as in the Direct Assistance Grant applications. The Department has modified the language defining eligible applicants for Outreach and Training Grants and Preservation Activity grants. The eligibility requirements now reflect accountability similar to that expected of Direct Assistance Grant applicants.

Three commenters stated that because the best Outreach and Training providers will not always be local entities and the statute requires local entities, the NOFA should be clear that Preservation Activity Grants should be available for Outreach and Training by regional/statewide providers. The commenter added that Statewide organizations should be eligible to receive Outreach and Training grants where there is a lack of local activity.

The Department is limiting applicants applying for Outreach and Training grants to local resident-controlled, community-based, city-wide, county-wide, or multi-county providers, which is consistent with the statute. However, community action, legal service, and fair housing counseling agencies; State or local government agencies; and local, regional, State, and national intermediaries can apply for a Preservation Activity Grant to conduct outreach and training and organizational development training for tenants where no local resident-controlled group or community-based organization exists. With respect to awards made under this category, the Department will give preference to eligible regional, State, and local intermediaries over national nonprofit organizations.

Three commenters stated that HUD should more clearly define what are eligible activities for State and local governments and nonprofit intermediaries using Preservation Support Grants. In addition, commenters suggested that the term "deemed appropriate" should be clarified. Another commenter stated that the NOFA should contain a broader list of specific activities or examples of "other activities" that further the intent of the preservation programs. The Department agrees with this comment and, in Section III.F of the NOFA, has clarified and broadened the list of eligible activities for Preservation Activity grants.

One commenter offered that HUD should clarify that resident-controlled and community-based nonprofits are treated equally. Three commenters stated that an overwhelming majority of funding for Preservation Support Grants should be made available to resident-controlled organizations. The Department is giving priority to local resident-controlled groups that apply for Outreach and Training grants, because the statute clearly indicates tenants/residents as the intended beneficiaries of this assistance. In cases where no experienced local resident-controlled group or community-based nonprofit organization exists, or where one exists, but does not apply or has applied, but its application was disapproved, then community action, legal service, and fair housing counseling agencies; State and local government agencies; or national nonprofit intermediaries may apply for a Preservation Activity Grant and receive priority consideration to conduct outreach and training and organizational development of the tenants.

Five commenters stated that HUD should give preferences to Outreach and Training applicants in the following order: applicants in which the decisionmaking body is made up entirely of HUD-assisted residents, those with a majority of HUD-assisted residents, those with a majority of low-income community members, community-based applicants, and regionally based applicants. Organizations with no direct experience should be acceptable where there is no other applicant. One commenter stated that HUD should spell out a clear priority to maximize funds to resident-controlled coalitions. Another commenter said that priority should be for groups with at least three years of organizing experience demonstrating board and staff accountability to resident groups. The Department will give preference for Outreach and Training grants to local resident-controlled groups with at least two years of organizing experience. The priorities will be reflected in the rating process described in Section IV.C of the NOFA.

One commenter said that Outreach and Training grants should be reviewed and selected separately from Preservation Activity grants, with separate allocations. The Department agrees and has developed a separate selection process for each of the Preservation Support Grant categories. This commenter also recommended that intermediaries administering Direct Assistance Grants should also be able to apply to do Other Purpose activities; this is especially important in geographic areas where there are not many experienced entities.

Intermediaries that are eligible to apply to administer Direct Assistance Grants are also eligible to apply for Preservation Activity grants. However, intermediaries selected to administer Direct Assistance Grants, by statute, "may not provide other services to grant recipients that are the subject of the grant application and may not receive payment, directly or indirectly, from the proceeds of grants they have approved." Therefore, administering intermediaries may not also apply to perform outreach and organizational development activities for resident groups that may receive technical assistance funds through the Resident Capacity or Predevelopment Grants that the intermediary is administering.

Another commenter contended that potential purchasers should be able to receive these grants when no other qualified applicant has expressed an interest in the activity. In other words, potential purchasers would be considered grantees of last resort. The Department believes that the statute clearly identifies eligible applicants for Preservation Support grants; the program is not opened to potential purchasers.

Two commenters stated that Outreach and Training recipients should not be able to seek an ownership interest in the project. They claim that such a policy would avoid conflicts of interest with potential landlords, while enabling residents to organize independently. The Department agrees with this comment and believes that such a policy would restrict grantees from also benefitting as potential purchasers who could receive a direct assistance grant, and certain incentives under ELIPHA or LIHPRHA, thereby becoming a double recipient of HUD's Preservation program.

One commenter stated that HUD should allocate unused funds from the 1992 NOFA according to the 90/10 percent formula: i.e., 90 percent to Direct Assistance Grants and 10 percent to Preservation Support grants. Another commenter suggested that HUD clarify the exact amount of funds available from the 1992 NOFA and how they will be divided. The Department has divided the allocation of unused funds from the 1992 NOFA according to the 90/10 percent formula: 90 percent to

Technical Assistance Grants and 10 percent to Preservation Support Grants.

Three commenters said that more of the unused funds from the 1992 NOFA should be available for Outreach and Training Grants. Another suggested that all unobligated 1992 NOFA funds be allocated to Outreach and Training grants. The Department will allocate the portion of the unused 1992 NOFA funds designated for Preservation Support Grants using a 50/50 percent formula: 50 percent for Outreach and Training grants and 50 percent for Preservation Activity grants. Again, the reason for the equal allocation is to allow the Department to maximize the level of assistance to, and expand the number of, newly organized tenant groups, through the provision of outreach and training and organizational development under Preservation Activity grants. One commenter also suggested that HUD issue a separate NOFA for Outreach and Training Grants. The Department is publishing one NOFA for both categories of Preservation Support Grants because it is more cost-effective and efficient.

One commenter contended that more money should be made available for Preservation Support Grants because a great majority of at-risk projects in the commenter's State are not organized. Some residents are even unaware that they live in HUD-assisted buildings; few have heard of LIHPRHA or ELIHPA and even fewer are aware of HUD's Technical Assistance Grants.

The statute provides that of any amount made available for these purposes in any appropriations act, 90 percent shall be set aside for use in accordance with Direct Assistance Grants and 10 percent shall be set aside for use in accordance with Preservation Support Grants. However, the Department will give preference to a Preservation Activity Grant applicant that shows it will take specific steps to inform and organize potential eligible low-income tenants who are unlikely to be unaware of the Preservation program (see Section IV.C(2) of this NOFA).

One commenter objected to large national contracts for Outreach and Training grants. The commenter suggested that $5 million currently set aside for additional national training should be put into Outreach and Training grants and administered in a separate NOFA, stating that a previous contract of $1.5 million to provide training around the country was ineffective and that small, local contracts are much better than a large national contract. The commenter further contended that most resident learning is hands-on, not in hotel workshops. The Department will administer the Preservation Support Grant program and will award Outreach and Training grants only to local resident-controlled or community-based nonprofit organizations that demonstrate their experience and ability to organize and educate the residents, or to city, county, or multi-county providers. Where no local resident-controlled or community-based nonprofit organizations exists, or where one exists, but does not apply or has applied, but its application was disapproved, HUD will accept applications to conduct outreach and training from community action, legal service, and fair housing counseling agencies; State and local government agencies; nonprofit intermediaries; or other groups that can demonstrate that they have three or more years of experience dealing with tenant issues and a capacity to undertake organizing unorganized tenants.

II. Purpose and Substantive Description

A. Authority and Background

The funding made available under this NOFA is authorized by section 312 of the Housing and Community Development Act of 1992 (Pub. L. 102–550, approved October 28, 1992) (1992 HCDA), in order to provide outreach and training to eligible resident groups and to assist the Department in carrying out its responsibilities under the Emergency Low-Income Housing Preservation Act of 1987 (Pub. L. 100–242, section 201 of the Housing and Community Development Act of 1987, approved Feb. 5, 1988) (ELIHPA) or the Low-Income Housing Preservation and Resident Homeownership Act of 1990 (Pub. L. 101–625, section 601 of the National Affordable Housing Act (NAHA), approved November 28, 1990) (LIHPRHA). This NOFA combines funding authorized for FY 1993 and FY 1994 in section 312 of the 1992 HCDA. Funds announced by this NOFA will include amounts authorized in 1992 that remain unobligated from the Preservation Technical Assistance Grant Program, resulting in up to a total of $6 million available under this NOFA.

The origins of LIHPRHA are in ELIHPA. The purpose of ELIHPA was to preserve low-income affordability restrictions on certain HUD-insured or assisted multifamily projects. ELIHPA authorized the use of incentives to encourage owners to retain low-income affordability restrictions or to transfer the property to purchasers who would agree to retain those restrictions. The fundamental principles underlying ELIHPA were that the low-income housing should be preserved for the intended beneficiaries and that owners should be guaranteed a fair and reasonable return on their investments.

ELIHPA was intended to be a temporary measure that would allow Congress time to fashion a permanent program for the preservation of existing low-income housing projects. This permanent program is LIHPRHA, which replaced ELIHPA except to the extent that section 604 of NAHA provides a transition option for certain owners. The Department's regulations implementing these statutory provisions were published as an interim rule at 57 FR 11992 (April 8, 1992), and were revised in interim rules at 57 FR 57312 (December 3, 1992), 58 FR 4870 (January 15, 1993), and 58 FR 3384 (July 13, 1993, including requirements in this NOFA that were imposed by Title III of the 1992 HCDA). All references in this NOFA to sections 248.1 through 248.183 are to those sections as set out in these interim rules.

B. Allocation Amounts

The purpose of this NOFA is to make $6 million in grant funds available to eligible applicants to perform resident outreach and training, organizational development, education activities, and preservation assistance activities. These funds will be allocated equally between Outreach and Training Grants and Preservation Activity Grants. One million dollars ($1 million) of these grant funds are from unobligated funds from fiscal year 1992 Preservation Technical Assistance Grant funds. Both grant categories are described below.

C. Grant Categories

There are two types of Preservation Support Grants: (1) Outreach and Training Grants; and (2) Preservation Activity Grants.

Outreach and Training Grants are available for established community, city-wide, county-wide, or multi-county coalitions of resident-controlled groups or community-based nonprofit organizations with experience in resident education and organizing, to identify and organize residents of eligible low-income housing.

Preservation Activity Grants are available to community action, legal service, and fair housing counseling agencies; State and local government agencies; and State, regional, or national nonprofit intermediaries, for the purpose of conducting outreach and training and organizational development for unorganized tenants or carrying out other proposed activities, described in Section III.F of this NOFA.

that further the preservation program in their jurisdictions.

D. Grant Amounts

(1) *Outreach and Training Grants.* HUD will accept Outreach and Training applications that propose a term of from one to three years. The Department will limit the grant amount to $450,000 for successful applications that propose three-year activities. The maximum annual distribution for such grants will be $150,000, which must be obligated or expended by the grantee prior to the distribution of additional funds. Day-to-day draw-down limits and procedures will be described in the application package.

Outreach and Training grants will be awarded in amounts reflective of the overall program design, capacity, and need, as measured by the criteria in Section IV.C of this NOFA.

(2) *Preservation Activity Grants.* At the regional, State, and local levels, the Department will make a one-time award, not to exceed $250,000, for proposals designed to address outreach and training and organizational development for tenants or other types of Preservation activities. Applicants applying for Preservation Activity grants that propose outreach and training and organizational development for tenants, or other eligible preservation activities that are national in scope and require a high level of funding to be effective, may receive a one-time award in an amount not to exceed $500,000. However, the Department will give preference to eligible regional, State, and local intermediaries over national nonprofit organizations. A national nonprofit organization must document its ability to accomplish proposed tasks on a national level and describe what resources it has to carry out the activity effectively and with success. Grantees in receipt of Section 254 funds may not use these funds to replace local or regional, public or private funding initiatives that are already in place.

The level of funding will be commensurate with the described level of complexity of activities, geographic scope, and number of potential participants. Activities must be completed in a timely manner and may not, in any case, exceed a three-year period.

The Department may terminate the grant if a grantee fails to complete the task within a reasonable time period. In determining the reasonableness of the time period, HUD will consider the complexity of the activity and the resources available to accomplish the task.

III. Eligibility Information

A. General

Preservation Support Grants are meant to fund activities that will further the Preservation process and are carried out by: local resident-controlled or community-based nonprofit organizations, in the case of Outreach and Training grants; and community action, legal service, and fair housing counseling agencies; State and local government agencies; and State, regional or national intermediaries, in the case of Preservation Activity grants. Resident-controlled groups are comprised primarily of residents living in HUD-assisted projects.

Outreach and Training grant applications will be reviewed separately from Preservation Activity grant applications. However, if all funds are not awarded to eligible applicants in one grant category, the Department will have the option to utilize unused funds from that grant category to fund acceptable applications for the other. The Department will give priority to resident-controlled and community-based organizations that apply for Outreach and Training Grants. In competitive situations where resident outreach and training activities are proposed under both categories of the Preservation Support Grant (e.g., a local government or non-community-based nonprofit organization proposing a resident outreach and training program within the same jurisdiction as the resident-controlled group), applications from a Preservation Activity Grant applicant will only be considered in the balance of a jurisdiction not served by an Outreach and Training Grant recipient.

Grantees will be selected based on eligibility thresholds; applicant type, capacity, and experience; and jurisdictional needs, as described below in this NOFA.

B. Eligible Recipients

Eligible recipients of Outreach and Training and Preservation Activity grants will be tenants living in eligible Title II or Title VI projects. In addition, funds provided in this NOFA may be available to provide assistance to tenants living in property disposition projects that are subject to section 203(c)(2)(D) of the Housing and Community Development Amendments of 1978 (12 U.S.C. 1701z–11), as amended by section 101(b) of the Multifamily Housing Property Disposition Reform Act of 1994 (108 Stat. 342; Pub. L. 103–233, approved April 11, 1994).

C. Eligible Applicants—Outreach and Training Grants

An organization applying to do resident outreach and training must demonstrate that it is a nonprofit organization, has at least two years of experience in resident organizing and education, and is either resident-controlled with a majority of the board consisting of residents of HUD-assisted housing or is a community-based organization (CBO) that meets the definition of a CBO in 24 CFR 248.101, with a majority of its activities taking place at the community level. Applications from newly formed resident-controlled groups and CBOs that have applied for tax-exempt status under section 501(c) of the Internal Revenue Code of 1986 on or before the date of application may be considered as long as the organization is approved before the effective date of the grant agreement. Also, newly formed and otherwise eligible organizations may submit joint applications with eligible organizations that are tax-exempt.

Priority will be given to local resident-controlled groups. Next in order of preference will be established community-based organizations and, thirdly, city-wide, county-wide, or multi-county coalitions of resident groups with a majority (51 percent or more) of Board participation by HUD tenants and that can provide documentation that they have experience working with ELIPHA and/or LIHPRHA programs. Where there is no application from such groups, community action, legal service, and fair housing counseling agencies; State and local government agencies; and intermediaries may apply for Preservation Activity grants to initiate outreach and training and the organizational development of tenants.

D. Eligible Activities—Outreach and Training Grants

Outreach and Training Grants are available for the following activities:

- Identifying residents and resident groups living in eligible preservation projects. Eligible projects include any property that is or could become available for sale and meeting the definition of "eligible low-income housing" at 24 CFR 248.101 or 248.201, regardless of whether an owner has filed a Notice of Intent.
- Providing outreach and training to tenants identified by local Field Offices where HUD staff may not be available to perform such tasks due to budgetary constraints. These activities could include attending Preservation Capital Needs Assessment (PCNA) exit

conferences, obtaining translation of the owner's Notice of Intent, providing other service where needed for PCNA exit conferences, or attending other resident meetings.

• Organizing residents of eligible low-income housing to participate effectively in the preservation process.

• Performing outreach, training, and counseling, which may include sound housing management, maintenance, and financial management, to residents and resident groups living in eligible preservation projects.

• Delivering project-based, community-, city-, or county-wide training programs on ELIHPA, LIHPRHA, resident participation, and forms of resident homeownership options.

E. Eligible Applicants—Preservation Activity Grants

(1) *Description of applicants.* HUD will accept applications from community action, legal service, and fair housing counseling agencies; regional, State, and local government agencies; nonprofit intermediaries; or other groups that can demonstrate that they have both three or more years of experience dealing with tenant issues and a capacity to undertake organizing unorganized tenants. A national nonprofit organization must have at least five years of similar experience. Eligible applicants fall into one of the following categories:

(1) *State and local housing agencies.* This category includes public housing agencies, community redevelopment agencies, other agencies that administer a community's Comprehensive Housing Affordability Strategy (CHAS), and State housing finance authorities.

(2) *Regional, State, and local nonprofit organizations* that must have been in existence for at least three years prior to the date of application and either are classified as exempt organizations under section 501(c)(3) of the Internal Revenue Code of 1986 or are otherwise a tax-exempt entity.

(3) *National nonprofit intermediaries* that have been in existence for at least five years prior to the date of application and are classified as exempt organizations under section 501(c)(3) of the Internal Revenue Code of 1986. An intermediary applying for Preservation Activity Grant funds must:

• Have as a central purpose of its organization the preservation of low-income housing and the prevention of displacement of low- and moderate-income residents;

• Not receive direct Federal appropriations for operating support;

• Meet the standards of fiscal responsibility established in OMB Circulars A–110 and A–122 or, if a State or local agency, 24 CFR part 85 and OMB Circular 87; and

• Have a record of service to low-income individuals or community-based nonprofit housing developers in multiple communities.

(2) *Limitations on Intermediaries.* Intermediaries that are eligible to apply to administer Technical Assistance Grants may be eligible to apply for a Preservation Activity Grant pursuant to the following prohibition. Intermediaries selected to administer Technical Assistance Grants, pursuant to Section 255(a) of the 1992 HCDA, "may not provide other services to grant recipients that are the subject of the grant application and may not receive payment, directly or indirectly, from the proceeds of grants they have approved." Therefore, administering intermediaries may not also apply to perform outreach and organizational development for tenants, or other types of Preservation support activities for resident groups that receive technical assistance funds through the Resident Capacity or Predevelopment Grants that the intermediary is administering.

Also, unlike intermediaries that are eligible to administer Direct Assistance grants, those intermediaries applying for Preservation Activity Grants may not serve as pass-through intermediaries. That is, they are limited to using grant funds to carry out eligible grant activities and may not administer the allocation of HUD grant or loan funds.

F. Eligible Activities—Preservation Activity Grants

Preservation Activity grants will be available to:

• Provide outreach and training and organizational development for "unorganized" tenants, as provided by resident-controlled groups and CBOs under the Outreach and Training category in Section III.C of this NOFA, if no experienced local resident-controlled group or community-based nonprofit organization exists or one exists, but does not apply or has applied, but HUD disapproved its application;

• Provide outreach and training to tenants identified by local Field Offices where HUD staff may not be available to perform such tasks due to budgetary constraints. These activities could include attending Preservation Capital Needs Assessment (PCNA) exit conferences, obtaining translation of the owner's Notice of Intent, providing other service where needed for PCNA exit conferences, or attending other resident meetings.

• Undertake pilot programs that assist HUD field staff to expedite the preservation process or otherwise conserve staff resources;

• Streamline the preservation process via the activities described in this Section;

• Educate parties outside the Department (including, but not limited to appraisers, financial institution officials, State and local government officials, community groups, and owner entities) about the preservation process;

• Establish preservation clearinghouses as a resource to resident organizations, community groups, and potential purchasers;

• Create informational materials about the preservation process for nationwide distribution;

• Perform legal and financial research studies on eligible properties; and

• Provide support activities that would otherwise further the Preservation program established under ELIHPA and LIHPRHA.

G. Ineligible Activities—Both Categories

Activities ineligible for funding under either category (Outreach and Training or Preservation Activity) of Preservation Support grants include:

• Purchase of land or buildings or any improvements to land or buildings;

• Entertainment, including associated costs such as food and beverages, but not including refreshments and supplies for organizational meetings;

• Payments of fees for lobbying services;

• Activities funded from other sources;

• Activities already being performed outside the scope of this NOFA; and

• Activities completed prior to the date funding is approved under this NOFA.

IV. Selection Process

A. Screening

The Multifamily Preservation Division staff in Headquarters will screen each application to determine whether it meets the technical requirements for application submission contained in this NOFA and the application package. If the application meets the technical requirements, it will be reviewed and ranked according to the selection criteria in Section IV.C of the NOFA. After screening the application, the Preservation Division will fax information about the applicant and application, such as name, project number, and experience the applicant identifies it has with HUD and the Preservation Program, to the Chief, Loan Management Division, in the HUD Field Office with jurisdiction over the applicant's geographical area. The Loan Management staff will review the information and provide comments about the information and the extent of its experience, if any, with the organization. Within sixty days from the application deadline, the Preservation Division will notify an applicant of its selection or rejection. Grantees will be required to sign a grant agreement.

B. Threshold Review—Correction of Deficient Applications

(1) *Threshold Review.* The Department will perform a threshold review of the applications to ensure completeness and will request applicants to correct any nonsubstantive deficiencies. Nonsubstantive deficiencies are those that are not integral to the application's review, such as a certification.

(2) *Revisions.* If an application is found to be deficient in a nonsubstantive manner, the Department will inform the applicant of such deficiency within 15 days after the application deadline and the applicant will have seven days to submit revisions. If an application is substantively deficient at the time of application deadline, the application will be rejected.

C. Selection Criteria

HUD will review each Preservation Support Grant application and assign up to 100 points in each category (Outreach and Training Grants and Preservation Activity Grants), in accordance with the criteria described in this Section.

In competitive situations where resident outreach and training activities are proposed under both categories of Preservation Support Grants (e.g., a local government or non-community-based nonprofit organization proposing a resident outreach and training program within the same jurisdiction as the resident-controlled group), applications from a Preservation Activity Grant applicant will only be considered in any part of a jurisdiction not served by an Outreach and Training Grant recipient.

After rating, the Department will rank the applications according to score and will fund them in rank order, reserving the option, if needed, to establish a minimum score of 60 points for funding. Grants will be awarded based upon the highest scores, which represent the best overall assessment of the potential of the proposed work activities for achieving the principal objective of this competition: to promote the ability of residents to participate meaningfully in the preservation process and to enable State or local housing agencies or intermediaries to conduct outreach and training and organizational development for unorganized tenants and undertake other activities that further preservation programs.

Applications that pass the technical threshold review will be rated as follows:

(1) *Outreach and Training Grants.* Under this category, the Department will require successful applicants to restrict provision of outreach and training to resident groups and community-based nonprofit purchasers. In addition, local resident-controlled groups will receive priority rating over community-based organizations and city-wide, county-wide, or multi-county coalitions of resident groups.

(a) *Capacity* is reflected in the qualifications or capabilities of the applicant (maximum points: 50). The capability of the applicant to conduct community-, city-, or county-wide outreach and training programs to identify and organize residents of eligible low-income housing within a reasonable time period, within budget, and in an effective manner, as demonstrated through past performance. In assigning points for this criterion, HUD will consider:

• *Direct Experience.* An applicant under this category must provide documentation that they have experience working with ELIPHA and/or LIHPRHA programs. The applicant or key staff must show that it has at least two years of experience in this area of work to receive points under this criterion. An applicant also may demonstrate this experience by the participation of or affiliation with board members or consultants. The Department will rate the application according to the degree to which the applicant describes its ability to organize residents and conduct educational workshops or describe how it will obtain such experience. This criterion will be measured by previous experience and success in outreach, recruitment, counseling, organizational development, and training (* * * up to 20 points).

• *Preservation Experience.* The degree of knowledge, experience, and expertise the applicant can show that it has, or will obtain, with ELIHPA and/or LIHPRHA programs, to ensure compliance with relevant program requirements and to enable newly organized tenant groups to participate in these Preservation programs. This criterion will be measured by previous experience (* * * up to 20 points).

• *Management Capacity.* The extent to which the applicant can ensure through its organization and management plans that the activity for which it applied will be well-managed; carried out in a timely manner; and protected from waste, fraud, or other abuse of funds, based on past performance with similar programs (* * * up to 5 points).

• *Fiscal Responsibility.* The ability of the applicant or key staff to handle, manage, and account adequately for financial resources and to use acceptable financial control procedures, demonstrated through past performance of the applicant entity or key staff with Federal, State, or local funds, or an explanation of how such capability will be obtained (* * * up to 5 points).

(b) *Level of Resident Participation in the Organization.* Priority will be given to established resident-controlled groups and nonprofit community-based organizations that have a majority (51 percent or more) of Board participation by tenants in HUD-assisted project(s) (maximum points: 20). HUD will rate the applications on a scale that gives the highest number of points to organizations with the highest number of HUD-assisted tenants on the Board.

(c) *Need.* The degree of need for the proposed outreach and training programs to identify and organize tenants of eligible low-income housing, demonstrated by the number of eligible projects in the community (maximum points: 15). In measuring this criterion, HUD will consider the number of eligible projects in the area and the number of tenants that the applicant identifies that would benefit from the activity.

(d) *Program Quality and Feasibility.* The comprehensiveness of the proposed plan and the potential of the applicant for developing a successful and effective program (maximum points: 15). HUD will consider the extent to which the proposed program represents a sound, comprehensive, and responsive plan for developing outreach and training efforts; organizing tenants, and providing housing counseling. Program quality will be evaluated in terms of whether the proposed program activities meet the Outreach and Training program objective.

(2) *Preservation Activity Grants.* Under this category, the Department will give preference to eligible regional, State, and local intermediaries over national nonprofit organizations. Also, the Department will give priority to any applicant that shows its intention to initiate outreach and training and the organizational development of low-income tenants where no resident-

VOL
59
ISS
1
1
3
JE
14
994
UMI

controlled or community-based organization exists. Organizations such as community action, legal service, and fair housing counseling agencies must demonstrate that they have three or more years experience dealing with tenants and the capacity to undertake tenant organization. Regional, State, and local government agencies will be required to document their ability to implement the proposed activity on a regional level, and intermediaries that propose to undertake outreach and training and organizational development for tenants or carry out other proposed support activities on a national level must demonstrate their ability to accomplish such tasks.

(a) *Capacity* is the qualification or capabilities of the applicant to develop and implement: Successful and effective outreach and training and organizational development for tenants; and other Preservation support activities, as described in Section III of this NOFA (maximum points: 50).

• *Preservation Experience.* The degree of knowledge, experience, and expertise the applicant can show that it has, or will obtain, with ELIHPA and/or LIHPRHA programs, to ensure compliance with relevant program requirements and enable newly organized tenant groups to participate in these preservation programs. This criterion will be measured by previous experience (* * * up to 20 points).

• *Direct Experience.* The applicant or key staff must show that it has at least three years of experience in the area of work for which it is applying, or describe how it will obtain such experience. This criterion will be measured by previous experience and success in the applicable activity (* * * up to 20 points).

• *Management Capacity.* The extent to which the applicant can ensure through its organization and management plans that the activity for which it applied will be well-managed; carried out in a timely manner; and protected from waste, fraud, or other abuse of funds, based on past performance with similar programs (* * * up to 5 points).

• *Fiscal Responsibility.* The ability of the applicant or key staff to handle, manage, and account adequately for financial resources and to use acceptable financial control procedures, demonstrated through past performance of the applicant entity or key staff with Federal, State, or local funds, or an explanation of how such capability will be obtained (* * * up to 5 points).

(b) *Jurisdictional Needs.* This criteria will be based on the Department's determination of how well the applicant addresses specific unmet needs in the jurisdiction. This assessment will be based on the number of current preservation cases in the Multifamily Preservation Processing System (MPPS). The Department will also take into consideration the number of applications received from that jurisdiction. This assessment may include availability of Department-sponsored or other training for residents and other groups (maximum points: 20 points).

(c) *Program Quality and Feasibility.* The comprehensiveness of the proposed plan and the potential of the applicant for developing a successful and effective program (maximum points: 30). HUD will evaluate the extent to which the proposed program: represents a sound, comprehensive, and responsive plan for developing any of the activities described in Section III.F of this NOFA and meets the Preservation Activity Grant Program objective.

• *Commitment.* The extent of the applicant commitment and responsiveness to the needs and problems of the tenants (* * * up to 10 points).

• *Outreach, Recruitment, and Selection Activities.* The level, nature, and comprehensiveness of proposed outreach, recruitment (including specific steps to be taken to attract potential eligible participants who are unlikely to be aware of the program), and selection strategies, as measured by: (i) the extent to which the applicant has developed special outreach efforts to recruit eligible low-income tenants; and (ii) the extent to which the proposed participant selection system supports these efforts (* * * 20 points).

V. Grant Application Process

A. Application Packages

Upon request, Preservation Support Grant application packages are available from the Multifamily Housing Clearinghouse, P.O. Box 6424, Rockville, MD 20850, telephone number: 1–800–955–2232. Please refer to FR–3613 when requesting an application package.

For other questions about the Preservation program, please contact the Preservation Division, Room 6284, Department of Housing and Urban Development, 451 7th Street, SW., Washington, DC 20410; telephone (202) 708–2300, or the contact numbers at the beginning of this NOFA.

B. Deadline for Submission

Applications for Preservation Support Grants must be physically received by the Multifamily Preservation Division no later than 4:30 p.m. (EST), on August 15, 1994. No facsimiles will be accepted. Any application received after that time will not be accepted for processing and will be returned to the applicant. Any revisions made in accordance with Section IV.B(2) of this NOFA may be transmitted by facsimile; however, the original revision must be subsequently submitted by mail or in person.

C. Submission Requirements

An applicant must provide a completed application, including the following, as applicable:

(1) OMB Standard Forms 424 and 424B;

(2) Summary of proposed activities and jurisdiction;

(3) Information about the applicant, including its history, its staff and qualifications, and its experience;

(4) Summary of plan to carry out proposed activities;

(5) Evidence of tax-exempt status, if applicable;

(6) Certification that assistance provided under this NOFA will not be used to supplant or duplicate other resources for the proposed activities. For purposes of this paragraph, "other resources" means resources provided from any source other than under this NOFA;

(7) Other disclosures, certifications, and assurances (including Drug-Free Workplace certification), as required under the law and this NOFA;

(8) Certification that the applicant and any of its affiliates do not have, and will not seek, an ownership interest in any developments that are to be assisted with these funds; and

(9) Other information and materials as may be described in the application kit.

VI. Other Matters

Public Reporting Burden

The information collection requirements contained in this notice have been submitted to the Office of Management and Budget under the Paperwork Reduction Act of 1980 (44 U.S.C. 3501–3520). The Department has determined that the following provisions contain information collection requirements.

Number of respondents	×	Frequency of response	×	Hours per response	=	Burden hours
120		1		6		720

Environmental Impact

In accordance with 40 CFR 1508.4 of the regulations of the Council on Environmental Quality and 24 CFR 50.20(b) of the HUD regulations, the policies and procedures contained in this notice relate only to technical assistance and, therefore, are categorically excluded from the requirements of the National Environmental Policy Act.

Federalism Impact

The General Counsel, as the Designated Official under section 6(a) of Executive Order 12612, Federalism, has determined that the policies contained in this notice will not have substantial direct effects on States or their political subdivisions, or the relationship between the Federal government and the States, or on the distribution of power and responsibilities among the various levels of government. As a result, this notice is not subject to review under the Executive Order 12612.

Family Executive Order

The General Counsel, as the Designated Official under Executive Order 12606, The Family, has determined that this notice does not have potential for significant impact on family formation, maintenance, and general well-being, and, thus, is not subject to review under the Order. No significant change in existing HUD policies or programs will result from promulgation of this notice, as those policies and programs related to family concerns.

Section 102 of the HUD Reform Act: Documentation and Public Access Requirements; Applicant/Recipient Disclosures

Documentation and public access requirements. HUD will ensure that documentation and other information regarding each application submitted pursuant to this NOFA are sufficient to indicate the basis upon which assistance was provided or denied. This material, including any letters of support, will be made available for public inspection for a five-year period beginning not less than 30 days after the award of the assistance. Material will be made available in accordance with the Freedom of Information Act (5 U.S.C. 552) and HUD's implementing regulations at 24 CFR part 15. In addition, HUD will include the recipients of assistance pursuant to this NOFA in its quarterly **Federal Register** notice of all recipients of HUD assistance awarded on a competitive basis. (See 24 CFR 12.14(a) and 12.16(b), and the notice published in the **Federal Register** on January 16, 1992 (57 FR 1942), for further information on these documentation and public access requirements.)

Disclosures. HUD will make available to the public for five years all applicant disclosure reports (HUD Form 2880) submitted in connection with this NOFA. Update reports (also Form 2880) will be made available along with the applicant disclosure reports, but in no case for a period less than three years. All reports—both applicant disclosures and updates—will be made available in accordance with the Freedom of Information Act (5 U.S.C. 552) and HUD's implementing regulations at 24 CFR part 15. (See 24 CFR part 12, subpart C, for further information on these disclosure requirements.)

Section 103 HUD Reform Act

HUD's regulation implementing Section 103 of the Department of Housing and Urban Development Reform Act of 1989 (42 U.S.C. 3537a), codified as 24 CFR part 4, applies to the funding competition announced today. The requirements of the rule continue to apply until the announcement of selection of successful applicants.

HUD employees involved in the review of applications and in the making of funding decisions are limited by 24 CFR part 4 from providing advance information to any person (other than an authorized employee of HUD) concerning funding decisions, or from otherwise giving any applicant an unfair competitive advantage. Persons who apply for assistance in this competition should confine their inquiries to the subject areas permitted under 24 CFR part 4.

Applicants who have questions should contact the HUD Office of Ethics (202) 708–3815 (voice/TDD). (This is not a toll-free number.) The Office of Ethics can provide information of a general nature to HUD employees, as well. However, a HUD employee who has specific program questions, such as whether particular subject matter can be discussed with persons outside the Department, should contact his or her Regional or Field Office Counsel, or Headquarters counsel for the program to which the question pertains.

Section 112 of the Reform Act

Section 112 of the HUD Reform Act added a new section 13 to the Department of Housing and Urban Development Act (42 U.S.C. 3537b). Section 13 contains two provisions dealing with efforts to influence HUD's decisions with respect to financial assistance. The first imposes disclosure requirements on those who are typically involved in these efforts—those who pay others to influence the award of assistance or the taking of a management action by the Department and those who are paid to provide the influence. The second restricts the payment of fees to those who are paid to influence the award of HUD assistance, if the fees are tied to the number of housing units received or are based on the amount of assistance received, or if they are contingent upon the receipt of assistance.

Section 13 was implemented by 24 CFR part 86. If readers are involved in any efforts to influence the Department in these ways, they are urged to read part 86, particularly the examples contained in Appendix A of the rule.

Any questions about the rule should be directed to the: Office of Ethics, room 2158, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, DC 20410–3000. Telephone: (202) 708–3815 (voice/TDD). (This is not a toll-free number.) Forms necessary for compliance with the rule may be obtained from the local HUD office.

Prohibition Against Lobbying Activities

The use of funds awarded under this NOFA is subject to the disclosure requirements and prohibitions of section 319 of the Department of Interior and Related Agencies Appropriations Act for Fiscal Year 1990 (31 U.S.C. 1352) (the "Byrd Amendment") and the implementing regulations at 24 CFR part 87. These authorities prohibit recipients of federal contracts, grants, or loans from using appropriated funds for lobbying the Executive or Legislative branches of the federal government in connection with a specific contract, grant, or loan. The prohibition also covers the awarding of contracts, grants, cooperative agreements, or loans unless the recipient has made an acceptable certification regarding lobbying. Under 24 CFR part 87, applicants, recipients

VOL

994
UMI

and subrecipients of assistance exceeding $100,000 must certify that no federal funds have been or will be spent on lobbying activities in connection with the assistance.

Authority: 42 U.S.C. 4101 *et seq.*; 42 U.S.C. 3535(d).

Dated: May 24, 1994.

Nicolas P. Retsinas,

Assistant Secretary for Housing—Federal Housing Commissioner.

Environmental Protection Agency

40 CFR Part 710

Partial Updating of TSCA Inventory Data Base; Production and Site Reports; Technical Amendment; Final Rule

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 710

[OPPTS-62140; FRL-4869-7]

Partial Updating of TSCA Inventory Data Base; Production and Site Reports; Technical Amendment

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule; technical amendment.

SUMMARY: This document announces the 1994 reporting period for the Inventory Update Rule, and amends the rule to update the reporting address.

DATES: This document is effective June 14, 1994. The 1994 reporting period is from August 25, 1994 to December 23, 1994.

FOR FURTHER INFORMATION CONTACT: Susan B. Hazen, Director, Environmental Assistance Division (7408), Office of Pollution Prevention and Toxics, Environmental Protection Agency, Rm. E-545, 401 M St., SW., Washington, DC 20460, (202) 554-1404, TDD: (202) 554-0551.

SUPPLEMENTARY INFORMATION:

I. Background

In the **Federal Register** of June 12, 1986 (51 FR 21438), EPA promulgated a rule (40 CFR part 710, subpart B), referred to as the Inventory Update Rule (IUR), under the authority of section 8(a) of the Toxic Substances Control Act (TSCA), 15 U.S.C. 2607(a), requiring manufacturers and importers of certain chemical substances included on the TSCA Chemical Substance Inventory to report current data on the production volume, plant site, and site-limited status of the substances. After the initial reporting during 1986, recurring reporting is required every 4 years. A second reporting cycle took place in 1990. The third reporting period will be in 1994.

II. 1994 Reporting Period

The initial reporting period was August 25, 1986 to December 23, 1986. Reporting periods recur every 4 years from August 25 to December 23, so that the next reporting period is August 25, 1994 to December 23, 1994. Persons subject to the rule must submit the required information during this period.

III. Update of the Information

A. The TSCA Chemical Substance Inventory

As an aid to submitters reporting during 1986, EPA published a 1985 edition of the TSCA Chemical Substance Inventory. This publication, available from the Government Printing Office (GPO), superseded the 1979 edition and supplements prior to 1985. To aid reporters during 1990, EPA published a 1990 supplement to the 1985 edition. Copies of both the "TSCA Chemical Substance Inventory: 1985 Edition" and the "TSCA Chemical Substance Inventory: 1990 Supplement" may still be obtained by writing or calling: Superintendent of Documents, Government Printing Office, Washington, DC 20402, (202) 783-3238. The 1990 Supplement costs $15.00 in the U.S., $18.75 outside the U.S., and should be ordered by its Document Control Code, S/N 055-000-00361-1. The 1985 Edition costs $161.00 ($201.00 outside the U.S.), and its Document Control Code is S/N 055-000-00254-1.

In support of the 1994 reporting, EPA is publishing a revised TSCA Chemical Substances Inventory in a set of floppy diskettes for use in a personal computer instead of the hard copy form. These diskettes will contain information for all nonconfidential chemical substances added to the TSCA Inventory data base before May 1, 1994. The types of information contained in the diskettes will be similar to that found in the computer tape form of the TSCA Inventory that EPA has been disseminating to the public biannually through the National Technical Information Service (NTIS). Specifically, each of the chemical substances included in the diskettes is identified by a Chemical Abstracts (CA) Index or Preferred Name, the corresponding Chemical Abstracts Service (CAS) Registry Number, molecular formula, and if applicable, the chemical definition and appropriate EPA special flags as found in the printed Inventory. The substances are sequenced in ascending order of the corresponding CAS Registry Numbers. The diskettes will not include chemical synonyms that are copyrighted by the Chemical Abstracts Service. Furthermore, generic names or EPA Accession Numbers for substances with confidential chemical identities will not be included.

The diskette version includes over 62,000 records and requires 12 megabytes of disk space for installation. Installation software that will automatically uncompress the file is included with the diskettes. However, users will have to furnish their own data base management software to perform searches. Both tapes and diskettes will be available for sale from: National Technical Information Service (NTIS), 5285 Port Royal Road, Springfield, VA 22161, (703) 487-4650 or (800) 553-NTIS. The diskettes cost $195.00 in the U.S., Canada, and Mexico, and $390.00 for all other addresses. The NTIS Order Number for the diskettes is PB94-501731GEI. The tapes cost $360.00 in the U.S., Canada, and Mexico, and $720.00 for all other addresses. The NTIS Order Number for the tapes is PB94-501749GEI.

B. Reporting Address and Instructions

40 CFR 710.39 is being amended to reflect new addresses and telephone numbers, as follows:

Reporting Packages Address: TSCA Hotline (7408), Office of Pollution Prevention and Toxics, U.S. Environmental Protection Agency, 401 M St., SW., Washington, DC 20460, Telephone: (202) 554-1404, ATTN: Inventory Update Rule.

Mailing Address for Completed Forms: Document Control Officer (7407), Office of Pollution Prevention and Toxics, U.S. Environmental Protection Agency, 401 M St., SW., Washington, DC 20460, ATTN: Inventory Update Rule.

EPA will automatically mail out a reporting package to those facilities that reported in 1990. This package will include the manual entitled "Instructions for Reporting for the Partial Updating of the TSCA Chemical Inventory Data Base," a new Form U, and a copy of the **Federal Register** Notice. If you did not report in 1990, but need to report in 1994, the reporting package will be available from the TSCA Hotline at the address referenced above. Additional reporting forms will also be available from the TSCA Hotline.

IV. Reporting Form

Section 710.39 requires submitters to report using EPA's Form U. In 1990, EPA made changes in the form to assist submitters in completing it and facilitate processing of the form; none of the changes resulted in substantive revisions to the reporting requirements of the rule. New printed forms will be made available for reporting during 1994. Neither the 1986 nor the 1990 form is acceptable for 1994 reporting.

A. Reporting Errors

Several types of reporting errors occurred frequently enough in the past to merit discussion. One of the most frequent type of errors concerns the submitter reported Dun & Bradstreet number. Numerous submitters reported numbers with extra or missing digits, numbers which belonged to their parent companies (rather than the Dun & Bradstreet number assigned to the plant site for which the submitter was

reporting), or no number at all. This problem required EPA to send a large number of requests to the submitters for correction of submitter error. To avoid this error, all submitters should verify the accuracy of the Dun & Bradstreet number they are reporting. Those plant sites without Dun & Bradstreet numbers may obtain them, free of charge, by calling their local Dun & Bradstreet office.

Reporting of substances that are not required to be reported is another common error. Polymers, inorganics, microorganisms, and naturally occurring chemical substances are generally excluded from the reporting requirements. This exclusion does not however apply if the chemical substance is the subject of a rule proposed or promulgated under section 4, 5(a)(2), 5(b)(4), or 6 of TSCA or is the subject of an order issued under section 5(e) or 5(f) of TSCA or is the subject of relief that has been granted under a civil action under section 5 or 7 of TSCA. See § 710.26. Hydrates of chemicals which are on the TSCA Inventory in the anhydrous form are not reportable; however, the corresponding anhydrous form is subject to the reporting requirements. Furthermore, substances that have been delisted from the TSCA Inventory should not be reported.

Another significant source of errors is the manner in which chemical identifying numbers and names are entered in the reporting forms. Several types of identifying numbers (e.g., Chemical Abstracts Service Registry Numbers, Premanufacture Notification Numbers, and Accession Numbers) are allowed for reporting. Confusion on the appropriate way to identify a chemical substance and report an identifier has created many problems in the past. Note that the correct format for any CAS Registry Number being reported is six digits, hyphen, two digits, hyphen, one digit, e.g., XXXXXX–XX–X. Leading zeros on the left may be omitted. If the chemical identifier is a CAS Registry Number (ID Code = C), then this format must be used.

If the chemical substance name extends beyond the space provided on the report line, do not continue the name on the following report line. Instead, truncate the name at the end of the line with a series of three dots (ellipsis) or continue the name on a separate sheet of paper. This avoids the insertion of a new reporting line without a production volume.

When reporting the production volume, report the amount to the nearest whole number. Do not include decimal points. Scientific notation is also unacceptable.

A large number of errors are made in plant site and technical contact information. Please make sure that the correct information goes in the correct box. One common mistake is the lack of a signature in the signature box. The Form U will be returned if the signature is missing. In addition, the signature must match the name of the person in the Name/Title Field.

Lastly, persons who export chemicals found on the TSCA Chemical Substance Inventory are reminded that they may have reporting obligations under this rule. Section 12(a) of TSCA provides that chemicals manufactured for export are subject to the requirements of TSCA section 8. Persons who manufacture a chemical substance on the TSCA Inventory solely for export, are considered a manufacturer and are subject to all IUR requirements of the rule.

B. Confidentiality Claims

Since 1990, EPA has allowed submitters to report both confidential and nonconfidential substances on the same form, and to indicate which substances on a form have confidential identities. However, note that a submitter may only claim the identity of a chemical substance as confidential if that substance is already included on the TSCA Inventory with a confidential chemical identity. Furthermore, no confidentiality claim for chemical identity will be accepted unless accompanied by a separate written substantiation for the individual chemical substance claimed as confidential, with detailed answers to the 11 questions prescribed in § 710.38 of the Inventory Update Rule. As provided in § 710.38(d), failure to provide the necessary substantiation at the time of filing may result in the chemical identity reported being made available to the public without further notice to the submitter.

V. Electronic Reporting

Section 710.32(b) provides that magnetic media submitted in response to the IUR must meet the EPA specifications, as described in the "Instructions for Reporting for the Partial Updating of the TSCA Chemical Inventory Data Base" available from the TSCA Hotline. In the 1986 rule, submitters were to report by paper or computer tape. Because of the ready availability of microcomputers, in 1990 EPA modified this section of the Instructions to allow reporting using floppy diskettes. The major change in 1994 is that magnetic tape submissions will not be accepted. For the 1994 reporting period, ASCII diskette submissions from IBM and compatible personal computers are permissible. EPA's specifications for the format and detailed instructions for electronic reporting can be found in "Instructions for Reporting for the 1994 Partial Updating of the TSCA Chemical Inventory Data Base." Because of TSCA security considerations, reporting via telecommunication lines is not accepted.

The 1986 rule required that chemical substances whose identities are confidential be reported by hard copy means only. This was amended in 1990 to allow reporting of such substances via magnetic media. In the 1994 reporting period, chemical substances whose identities are confidential may again be reported via magnetic media

VI. Paperwork Reduction Act

The information collection requirements in this rule have been approved by the Office of Management and Budget (OMB) under the *Paperwork Reduction Act*, 44 U.S.C. 3501 *et seq.* and have been assigned control number OMB No. 2070–0070.

This collection of information has an estimated reporting/recordkeeping burden averaging 1.2 hours per chemical report per respondent. These estimates include time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information

Send comments regarding the burden estimate or any other aspect of this collection, including suggestions for reducing this burden to Chief, Information Policy Branch (Mail Code 2136); U.S. Environmental Protection Agency; 401 M St., SW., Washington, DC 20460; and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503, marked "Attention: Desk Officer for EPA."

List of Subjects in 40 CFR Part 710

Environmental protection, Chemicals, Hazardous substances, Reporting and recordkeeping requirements.

Dated: June 6, 1994.

Mark A. Greenwood,

Director, Office of Pollution Prevention and Toxics.

Therefore, 40 CFR part 710 is amended as follows:

PART 710—[AMENDED]

1. The authority citation for part 710 continues to read as follows:

Authority: 15 U.S.C. 2607(a).

2. Section 710.39 is revised to read as follows:

§ 710.39 Instructions for submitting information.

(a) All persons submitting written information in response to the requirements of this subpart must use original copies of Form U available from EPA at the address set forth in paragraph (b) of this section.

(b) Complete instructions for completing the reporting form and preparing a magnetic media report are given in the EPA publication entitled "Instructions for Reporting for 1994 Partial Updating of the TSCA Chemical Inventory Data Base." Reporting forms and instruction booklets may be obtained from the following address: TSCA Hotline (7408), Office of Pollution Prevention and Toxics, U.S. Environmental Protection Agency, 401 M St., SW., Washington, DC 20460, ATTN: Inventory Update Rule, (202) 554–1404.

(c) Completed reporting forms and magnetic media must be submitted to: Document Control Officer (7407), Office of Pollution Prevention and Toxics, U.S. Environmental Protection Agency, 401 M St., SW., Washington, DC 20460, ATTN: Inventory Update Rule.

Part V

Department of Health and Human Services

Food and Drug Administration

21 CFR Part 810
Medical Device Recall Authority; Proposed Rule

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 810

[Docket No. 93N–0260]

Medical Device Recall Authority

AGENCY: Food and Drug Administration, HHS.

ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is publishing a proposed regulation to establish procedures to implement the new medical device recall authority provided in the Safe Medical Devices Act of 1990 (the SMDA). This new statutory authority protects the public health by permitting FDA to remove dangerous devices from the market promptly. This authority adds to other remedies already available to the agency, including notification, repair, replacement, and refund.

DATES: Written comments by September 12, 1994. FDA intends that any final rule that may issue based on this proposal become effective July 14, 1994.

ADDRESSES: Submit written comments to the Dockets Management Branch (HFA–305), Food and Drug Administration, rm. 1–23, 12420 Parklawn Dr., Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: John H. Samalik, Center for Devices and Radiological Health (HFZ–121), Food and Drug Administration, 2098 Gaither Rd., Rockville, MD 20850. 301–594–4595.

SUPPLEMENTARY INFORMATION:

I. Background and Legislative History

On November 28, 1990, the SMDA, which amended the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 301 *et seq.*), became law. The purpose of the new law was to improve the Medical Device Amendments of 1976 (Pub. L. 94–295) (the 1976 amendments), which had amended the act by establishing a comprehensive framework to regulate medical devices intended for human use in order to ensure their safety and effectiveness. The SMDA includes provisions designed to expand and strengthen FDA's authority to ensure that devices entering the market are safe and effective, to learn quickly about serious problems associated with medical devices, and to remove dangerous and defective devices from the market promptly.

The 1976 amendments provided FDA with various premarket controls over medical devices (e.g., classification, premarket notification, and premarket approval). The 1976 amendments also broadened the postmarket controls available to FDA with respect to medical devices, giving FDA the authority to require patient notification, repair, replacement or refund; medical device reporting and recordkeeping; compliance with current good manufacturing practices; and restrictions on the distribution of certain devices.

In 1990, Congress concluded, based on hearings and investigations, that the regulatory scheme established in the 1976 amendments was inadequate to protect the public health (H. Rept. 808, 101st Cong., 2d sess. 13–14 (1990)). The SMDA was enacted to enhance that regulatory scheme. Thus, the legislative intent of the SMDA in general was to streamline and strengthen the premarket and postmarket controls available to FDA with respect to medical devices.

In drafting the SMDA, both the House of Representatives and the Senate focused considerable attention on the implementation and enforcement of section 518 of the act (21 U.S.C. 360h) since its enactment in the 1976 amendments. This section, added by the 1976 amendments and amended by the Medical Device Amendments of 1992 (Pub. L. 102–300), authorizes FDA to require notification of a risk to health presented by a medical device, or to require repair, replacement, or refund of the purchase price of a device. The remedies provided in sections 518(a), (b), and (c) of the act are available where the agency has determined that the device presents an unreasonable risk of substantial harm to the public health.

The House Report accompanying H.R. 3095 states that:

> [E]ven when the FDA has discovered a serious health hazard associated with a medical device, the Agency faces a unique barrier to enforcing important administrative remedies. Unlike other health and safety agencies, FDA may not take administrative action to order a defective device recalled unless it can show that the device did not meet the state-of-the-art at the time it was designed and manufactured.

(H. Rept. 808, 101st Cong., 2d sess. 14 (1990).

Section 8 of the SMDA amended section 518 of the act by adding a new subsection (e) entitled "Recall Authority." The mandatory recall authority in section 518(e) of the act complements existing provisions in sections 518(a), (b), and (c) of the act. Section 518(e) provides that, if FDA finds that there is a reasonable probability that a device intended for human use would cause serious, adverse health consequences or death, FDA may order the appropriate person(s) to immediately cease distribution of the device, to immediately notify health professionals and device user facilities of the order, and to instruct such professionals and facilities to cease use of the device. Section 518(e) of the act also states that, after providing an opportunity for an informal hearing, FDA may amend the cease distribution and notification order to require a recall of the device. This new authority protects the public health by permitting FDA to ensure the prompt removal of dangerous and defective devices from the market.

Congress explained that "a 'reasonable probability' of an event is where it is more likely than not that the event will occur," and that FDA "will have considerable discretion in determining whether it is more likely than not that the continued distribution of a device would cause serious, adverse health consequences or death." (S. Rept. 513, 101st Cong., 2d sess. 19 (1990)).

The legislative history also makes clear that the term "serious, adverse health consequences" is intended to mean:

> Any significant adverse experience attributable to a device, including those which may be either life threatening, or involving permanent or long-term injuries, but excluding those non-life-threatening injuries which are temporary and reasonably reversible. In other words, injuries attributable to a device that are not significant in nature and are treatable and reversible by standard medical techniques, proximate in time to the injury, are not included within the term's definition.

Section 518(e) of the act is self-executing and does not require rulemaking before the authority granted may be exercised. FDA is issuing this proposed rule, however, pursuant to its authority to promulgate regulations under section 701(a) of the act (21 U.S.C. 371(a)), to establish publicly the procedures that will be followed when FDA exercises its recall authority. FDA has already found the new authority in section 518(e) of the act useful in securing the prompt removal from the market of several devices that presented a risk to the public health under the statutory standard. The experience gained to date has been useful to the agency in developing the proposed rule

II. Statutory Requirements

Section 518(e) of the act sets out a three-step procedure for the issuance of a mandatory medical device recall order. First, after finding that there is a reasonable probability that a device intended for human use would cause serious, adverse health consequences or death, FDA may issue a cease

distribution and notification order requiring the appropriate person to immediately: (1) Cease distribution of the device, (2) notify health professionals and device user facilities of the order, and (3) instruct these professionals and facilities to cease use of the device.

Second, FDA will provide the person named in the cease distribution and notification order with the opportunity for an informal hearing on whether the order should be modified, vacated, or amended to require a mandatory recall of the device.

Third, after providing the opportunity for an informal hearing, FDA may issue a mandatory recall order if the agency determines that such an order is necessary.

As stated above, FDA will provide the person named in a cease distribution and notification order with an opportunity for an informal hearing. The hearing is to be held not later than 10 days after the date of issuance of the order. If a hearing is requested, the device still may not be distributed and health professionals and device user facilities must still be notified.

The language of the statute makes clear that there is to be only one opportunity for a hearing, and that the purposes of any hearing that is held are both to address the actions required by the cease distribution and notification order *and* to determine whether the order should be amended to require a recall. The legislative history of section 518(e) of the act, as reflected in the conference report, also clearly demonstrates congressional intent that there be one, and only one, opportunity for a hearing following the cease distribution order, and that it is at this hearing that the person named in the order may present data and information showing why the order should not be amended to require a recall:

> The conference agreement requires [FDA], after making an appropriate finding, to issue an initial order providing for the immediate cessation of distribution and use of the device, with an informal hearing to follow within 10 days to determine whether to vacate the order *or* whether to amend the order to require a recall. [Emphasis added.] (Conf. Rept. 959, 101st Cong., 2d sess. 25 (1990).

Congress intended that the informal hearing "would be analogous to the judicial hearing that is held prior to granting a temporary restraining order. Where circumstances require expedited action, a motion for a temporary restraining order can result in notice, a hearing and a judicial decision in a single day." (H. Rept. 808, 101st Cong., 2d sess. 29 (1990)).

III. Scope of the Proposed Regulation

The proposed regulation implementing section 518(e) of the act, if made final, would be set out in new 21 CFR Part 810—Medical Device Recall Authority. The regulation would establish the procedures that FDA would follow in conducting medical device recalls under section 518(e) of the act. FDA believes that the proposed regulation realizes congressional intent to allow for prompt action by the agency to protect the public health, while ensuring the rights of persons subject to a cease distribution and notification order or mandatory recall order. (S. Rept. 513, 101st Cong., 2d sess. 20 (1990)).

IV. Definition of Terms, Computing of Time, and Service of Orders

Proposed § 810.2 defines certain terms used in the proposed regulation. To ensure consistency in application, to the extent practicable, the proposed definitions of these terms are similar to definitions used in FDA's recall guidelines (part 7; subpart C (21 CFR part 7, subpart C)) or in proposed regulations to implement other provisions of the SMDA. Thus, the definitions of "cease distribution and notification strategy," "mandatory recall strategy," "consignee," and "correction," are based on definitions in § 7.3. The definition of "device user facility" is the same as that used in the medical device reporting tentative final rule (56 FR 60024, November 26, 1991).

The definitions of "reasonable probability" and "serious, adverse health consequences" are consistent with congressional use of these terms in the legislative history. (S. Rept. 513, 101st Cong., 2d sess. 19 (1990)).

Proposed § 810.3 provides that, in computing any period of time prescribed or allowed by the proposed regulation, the following rules would apply. First, the day of the act or event from which the designated period of time begins to run would not be included: "Day 1" would be the day *after* the act or event. Second, all calendar days would be included in the computation, including the last day of the period, unless the last day is a Saturday, Sunday, or Federal legal holiday, or, when the act to be done is the filing of a document with the agency, a day on which weather or other conditions have made the agency office to which such a filing is to be made inaccessible. In those cases, the period would run until the end of the next day which is not one of the days described above. For example, if a person named in a cease distribution and notification order receives the order on Friday, November 1, and a request for an informal hearing is required to be submitted to FDA within 3 days, the request would need to be submitted to FDA by the close of business on Monday, November 4. If the FDA office to which the request is to be submitted were closed on Monday, November 4, because of weather conditions, the request would be required to be submitted by close of business on Tuesday, November 5, or the next day on which the FDA office was open for business.

V. Procedures

Proposed § 810.10(d) describes certain information that FDA may require the person named in a cease distribution and notification order to submit to the agency. This information is similar to the information that firms which initiate voluntary recalls are now asked to submit to FDA under § 7.46. The reason for requiring submission of this information is to enable FDA to monitor compliance with the cease distribution and notification order and to determine whether additional action is necessary.

Under section 518(e)(1), FDA will provide the person named in a cease distribution and notification order with an opportunity for an informal hearing, to be held not later than 10 days after the date of issuance of the order, on the actions required by the order and on whether the order should be amended to require a recall. The term "informal hearing" is defined in section 201(y) of the act (21 U.S.C. 321(y)). In the **Federal Register** of August 20, 1976 (41 FR 35282 at 35289), FDA interpreted the "informal hearing" provisions of section 201(y) of the act as the "functional equivalent of FDA's regulatory hearing" described in 21 CFR part 16.

Proposed § 810.11(a)(1) provides that the person named in a cease distribution and notification order may, within the timeframe specified in the order, submit a written request to FDA for a regulatory hearing. The request must be addressed to the agency employee identified in the order. Ordinarily, FDA will require that the person named in the cease distribution and notification order submit the hearing request within 3 days of receipt of the order. Where warranted, however, FDA may require that the hearing request be submitted in less than 3 days, possibly even on the same day on which the person receives the order. These procedures reflect congressional intent that the hearing be analogous to a hearing on a temporary restraining order, where notice, a hearing, and a judicial decision may all

occur in a single day. (H. Rept. 808, 101st Cong., 2d sess. 29 (1990)).

Under 21 CFR 16.26(b), after the hearing commences, the presiding officer may issue a summary decision on any issue in the hearing if he or she determines that there is no genuine and substantial issue of fact respecting that issue.

Although not required by section 518(e) of the act, FDA is proposing an alternative review process for persons who do not want to make an appearance before the agency, but who do wish to challenge a cease distribution and notification order. Accordingly, under proposed § 810.12(a), the person named in a cease distribution and notification order may, in lieu of requesting a regulatory hearing under proposed § 810.11, submit a written request to FDA asking that the order be modified or vacated. The written request must be addressed to the agency employee identified in the order and must be submitted within the timeframe specified in the order.

FDA recognizes that, in the time immediately following the issuance of a cease distribution and notification order, sufficient information may not be available to the agency to enable it to determine whether the actions being taken by the person named in the order are adequate to protect the public health. For example, where the person named in the order elects to recall the device voluntarily, it is possible that FDA may determine later that the voluntary recall is inadequate to protect individuals from the risks associated with use of the device. Thus, FDA may find it necessary to amend the cease distribution and notification order to include a mandatory recall even where, at an earlier time, voluntary efforts appeared to be adequate.

If FDA initially determines that a cease distribution and notification order need not be amended to require a mandatory recall, but subsequently finds that the person named in the order has failed to comply with the requirements of the order, FDA may amend the order by issuing a mandatory recall order under proposed § 810.13.

VI. Enforcement Provisions

The failure to comply with a cease distribution and notification order issued under proposed § 810.10 or a mandatory recall order issued under proposed § 810.13 renders a device misbranded under section 502(t)(1) of the act (21 U.S.C. 352(t)(1)). A misbranded device is subject to seizure under section 304 of the act (21 U.S.C. 334) and its introduction into interstate commerce is a prohibited act under sections 301(a), (b), (c), (g), and (k) of the act (21 U.S.C. 331(a), (b), (c), (g), (k)). Any person who fails or refuses to comply with any requirement of a cease distribution and notification order or a mandatory recall order has committed a prohibited act under section 301(q) of the act.

A firm in violation of section 301 of the act may be enjoined under section 302 of the act (21 U.S.C. 332) and any person responsible for the violation is subject to criminal penalties under section 303(a) of the act (21 U.S.C. 333(a)). In addition, any person who violates a requirement of the act with respect to a device is also subject to civil penalties under section 303(f) of the act.

VII. Environmental Impact

The agency has determined under 21 CFR 25.24(a)(8) and (e)(4) that this action is of a type that does not individually or cumulatively have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

VIII. Analysis of Impacts

FDA has examined the impacts of the proposed rule under Executive Order 12866 and the Regulatory Flexibility Act (Pub. L. 96–354). Executive Order 12866 directs agencies to assess all costs and benefits of available regulatory alternatives and, when regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety, and other advantages; distributive impacts; and equity). The agency believes that this proposed rule is consistent with the regulatory philosophy and principles identified in the Executive Order. In addition, the proposed rule is not a significant regulatory action as defined by the Executive Order and so is not subject to review under the Executive Order.

The Regulatory Flexibility Act requires agencies to analyze regulatory options that would minimize any significant impact of a rule on small entities. The agency believes that only a small number of firms will be affected by this proposal. The recall authority would be invoked by the Center for Devices and Radiological Health (CDRH) in those instances that match very closely the definition of a class I recall; where there is a strong likelihood that the use of or exposure to a device would cause serious adverse health consequences or death. Thus, the agency believes that this new authority will not be used frequently. While both the number of class I recalls per year, and the costs associated with those recalls vary quite widely, the greatest number of such recalls in 1 year to date has been 36, and the average over the last 5 fiscal years has been 19 per year. Thus, the agency expects that no more than one or two recalls per year would be ordered that would not have occurred without this regulation. Although the agency does not have a cost figure for a recall, it is likely that the cost would be under $2 million. Because of these reasons, the agency certifies that the proposed rule will not have a significant economic impact on a substantial number of small entities. Therefore, under the Regulatory Flexibility Act, no further analysis is required.

An assessment of the economic impact of any final rule based on this proposal has been placed on file in the Dockets Management Branch (address above) and may be seen by interested persons between 9 a.m. and 4 p.m., Monday through Friday.

IX. Paperwork Reduction Act of 1980

This proposed rule contains information collections which are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1980 (44 U.S.C. Ch. 35). The title, description, and respondent description of the information collection are shown below with an estimate of the annual reporting and recordkeeping burden. Included in the estimate is the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

Title: "Recall Authority" is intended to protect the public health by permitting FDA to ensure the prompt removal of dangerous and defective devices from the market under Pub. L. 101–629.

Description: FDA is publishing a proposed regulation to establish procedures to implement the new medical device recall authority provided in the SMDA of 1990. In accordance with that authority, FDA may issue an order requiring appropriate persons to cease distribution of a medical device and to notify health professionals and device user facilities of the order and instruct them to cease use of the device, if the agency finds that there is a reasonable probability that the device would cause serious adverse health consequences or death. After providing the person subject to the order with an opportunity for an informal hearing, FDA may amend the order to require a mandatory

recall of the device. This authority is in addition to other remedies already available to the agency, including notification, repair, replacement, refund, and reimbursement.

ESTIMATED ANNUAL REPORTING BURDEN

Section	Annual Number of Responses	Average Burden Per Response (hours)	Total Annual Burden (hours)
§ 810.13(b)(3)	2	480	960

As required by section 3504(h) of the Paperwork Reduction Act of 1980, FDA has submitted a copy of this proposed rule to OMB for its review of these information collection requirements. Other organizations and individuals wishing to submit comments regarding this burden estimate or any aspects of these information collection requirements, including suggestions for reducing the burden, should direct comments to FDA's Dockets Management Branch (address above) and to the Office of Information and Regulatory Affairs, OMB, rm. 3208, New Executive Office Bldg., Washington, D.C. 20503, Attn: Desk Officer for FDA.

X. Request for Comments

Interested persons may, on or before September 12, 1994, submit to the Dockets Management Branch (address above) written comments regarding this proposal. Two copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the docket number found in brackets in the heading of this document. Received comments may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

List of Subjects in 21 CFR Part 810

Administrative practice and procedure, Cease distribution and notification orders, Mandatory recall orders, Medical devices, Recordkeeping and reporting requirements.

Therefore, under the Federal Food, Drug, and Cosmetic Act, it is proposed that new part 810 be added to read as follows:

PART 810—MEDICAL DEVICE RECALL AUTHORITY

Subpart A—General Provisions

Sec.

810.1 Scope.
810.2 Definitions.
810.3 Computation of time.
810.4 Service of orders.

Subpart B—Mandatory Medical Device Recall Procedures

810.10 Cease distribution and notification order.
810.11 Regulatory hearing.
810.12 Written request for review of cease distribution and notification order.
810.13 Mandatory recall order.
810.14 Cease distribution and notification or mandatory recall strategy.
810.15 Communications concerning a cease distribution and notification or mandatory recall order.
810.16 Cease distribution and notification or mandatory recall order status reports.
810.17 Termination of a cease distribution and notification or mandatory recall order.
810.18 Public notice.

Authority: Secs. 201, 301, 302, 303, 304, 501, 502, 518, 701, 705 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321, 331, 332, 333, 334, 351, 352, 360h, 371, 375).

Subpart A—General Provisions

§ 810.1 Scope.

Part 810 describes the procedures that the Food and Drug Administration will follow in exercising its medical device recall authority under section 518(e) of the Federal Food, Drug, and Cosmetic Act.

§ 810.2 Definitions.

As used in this part:

(a) *Act* means the Federal Food, Drug, and Cosmetic Act.

(b) *Agency* or *FDA* means the Food and Drug Administration.

(c) *Cease distribution and notification strategy* or *mandatory recall strategy* means a planned, specific course of action to be taken by the person named in a cease distribution and notification order or in a mandatory recall order, which addresses the extent of the notification or recall, the need for public warnings, and the extent of effectiveness checks to be conducted.

(d) *Consignee* means any person or firm that has received, purchased, or used a device that is subject to a cease distribution and notification order or a mandatory recall order.

(e) *Correction* means repair, modification, adjustment, relabeling, or inspection (including patient monitoring) of a device, without its physical removal from its point of use to some other location.

(f) *Device user facility* means a hospital, ambulatory surgical facility, nursing home, or outpatient treatment or diagnostic facility that is not a physician's office.

(g) *Health professionals* means practitioners, including physicians, nurses, pharmacists, dentists, respiratory therapists, physical therapists, technologists, or any other practitioners or allied health professionals that have a role in using a device for human use.

(h) *Reasonable probability* means that it is more likely than not that an event will occur.

(i) *Serious, adverse health consequence* means any significant adverse experience, including those which may be either life threatening or involve permanent or long-range injuries, but excluding non-life-threatening injuries that are temporary and reasonably reversible. Injuries attributable to a device that are treatable and reversible by standard medical techniques, proximate in time to the injury, are not included within the term's definition.

(j) *Recall* means the correction or removal of a device for human use where FDA finds that there is a reasonable probability that the device would cause serious, adverse health consequences or death.

(k) *Removal* means the physical removal of a device from its point of use to some other location for repair, modification, adjustment, relabeling, destruction, or inspection.

§ 810.3 Computation of time.

In computing any period of time prescribed or allowed by this part, the day of the act or event from which the designated period of time begins to run shall not be included. The last day of the period shall be included unless it is a Saturday, Sunday, or Federal legal holiday, or, when the act to be done is the filing of a document with the agency, a day on which weather or other conditions have made the agency office to which such a filing is to be made inaccessible, in which event the period

runs until the end of the next day which is not one of the aforementioned days.

§ 810.4 Service of orders.

Orders issued under this part will be served in person by a designated employee of FDA, or by registered mail, to the named person or designated agent at the named person's or designated agent's last known address in FDA's records.

Subpart B—Mandatory Medical Device Recall Procedures

§ 810.10 Cease distribution and notification order.

(a) If FDA finds that there is a reasonable probability that a device intended for human use would cause serious, adverse health consequences or death, the agency may issue a cease distribution and notification order requiring the person named in the order to immediately:

(1) Cease distribution of the device;

(2) Notify health professionals and device user facilities of the order; and

(3) Instruct these professionals and facilities to cease use of the device.

(b) FDA will include the following information in the order:

(1) The requirements of the order relating to cessation of distribution and notification of health professionals and device user facilities.

(2) Pertinent descriptive information to enable accurate and immediate identification of the device subject to the order, including, where known:

(i) The brand name of the device;

(ii) The common name, classification name, or usual name of the device;

(iii) The model, catalog, or product code numbers of the device; and (iv) The manufacturing lot numbers or serial numbers of the device or other identification numbers.

(3) A statement of the grounds for FDA's finding that there is a reasonable probability that the device would cause serious, adverse health consequences or death.

(c) FDA may also include in the order a model letter for notifying health professionals and device user facilities of the order and a requirement that notification of health professionals and device user facilities begin and be completed within a specified timeframe.

(d) FDA may also require that the person named in the cease distribution and notification order submit any or all of the following information to the agency by a time specified in the order:

(1) The total number of units of the device produced and distributed and the timespans of the production and distribution.

(2) The total number of units of the device estimated to be in distribution channels.

(3) The total number of units of the device distributed to health professionals and user facilities.

(4) The total number of units of the device in the hands of home users.

(5) Distribution information, including the names and addresses of all direct consignees.

(6) A copy of any written communication used by the person named in the order to notify health professionals and user facilities.

(7) The proposed strategy for complying with the cease distribution and notification order.

(8) Progress reports to be made at specified intervals, showing the names and addresses of health professionals and user facilities that have been notified, names of specific individuals contacted within user facilities, and the dates and times of such contacts.

(9) The name and address of any health professional or user facility that refuses to comply with the notification instructions.

(10) The name, address, and telephone number of the person who should be contacted concerning implementation of the order.

(e) FDA will provide the person named in a cease distribution and notification order with an opportunity for a regulatory hearing on the actions required by the cease distribution and notification order and on whether the order should be modified, vacated, or amended to require a mandatory recall of the device.

(f) FDA will also provide the person named in the cease distribution and notification order with an opportunity, in lieu of a regulatory hearing, to submit a written request to FDA asking that the order be modified or vacated.

(g) FDA will include in the cease distribution and notification order the name, address, and telephone number of an agency employee to whom any request for a regulatory hearing or agency review is to be addressed.

§ 810.11 Regulatory hearing.

(a) Any request for a regulatory hearing shall be submitted in writing to the agency employee identified in the order within the timeframe specified by FDA.

(b) The regulatory hearing shall be limited to:

(1) Reviewing the actions required by the cease distribution and notification order and determining whether FDA should affirm, modify, or vacate the order; and

(2) Determining whether FDA should amend the cease distribution and notification order to require a recall of the device that was the subject of the order.

(c) Any hearing requested by the person named in a cease distribution and notification order will be conducted in accordance with the procedures set out in section 201(y) of the act (21 U.S.C. 321(y)) and part 16 of this chapter, except that the order issued under § 810.10, rather than a notice under § 16.22(a) of this chapter, provides the notice of opportunity for a hearing and is part of the administrative record of the regulatory hearing under § 16.80(a) of this chapter. As provided in § 16.60(h) of this chapter, if FDA believes that immediate action is necessary to protect the public health, the agency may waive, suspend, or modify any procedure in part 16 pursuant to § 10.19 of this chapter.

(d) If the person named in the cease distribution and notification order does not request a regulatory hearing within the timeframe specified by FDA in the cease distribution and notification order, that person will be deemed to have waived his or her right to a hearing.

(e) The presiding officer will hold any regulatory hearing requested under paragraph (a) of this section not later than 10 days after the date of issuance of the cease distribution and notification order, unless FDA and the person named in the order agree to a later date.

§ 810.12 Written request for review of cease distribution and notification order.

(a) In lieu of requesting a regulatory hearing under § 810.11, the person named in a cease distribution and notification order may submit a written request to FDA asking that the order be modified or vacated. Such person shall address the written request to the agency employee identified in the order and shall submit the request within the timeframe specified in the order.

(b) A written request for review of a cease distribution and notification order shall identify each ground upon which the requestor relies in asking that the order be modified or vacated.

(c) The agency official who issued the cease distribution and notification order shall provide the requestor written notification of his or her decision to affirm, modify, or vacate the order within a reasonable time after completing the review of the request. The agency official will include in this written notification:

(1) A statement of the grounds for the decision to affirm, modify, or vacate the order; and

(2) The requirements of any modified order.

§ 810.13 Mandatory recall order.

(a) If the person named in a cease distribution and notification order does not request a regulatory hearing or submit a request for agency review of the order, or, if after conducting a regulatory hearing or completing agency review of a cease distribution and notification order pursuant to § 810.11 or § 810.12, FDA determines that the order should be amended to require a recall of the device with respect to which the order was issued, FDA shall amend the order to require such a recall.

(b) In a mandatory recall order, FDA may:

(1) Specify that the recall is to extend to the wholesale, retail, or user level.

(2) Specify a timetable in accordance with which the recall is to occur and be completed.

(3) Require the person named in the order to submit to the agency a proposed recall strategy, as described in § 810.14, and periodic reports describing the progress of the mandatory recall, as described in § 810.16.

(4) Provide the person named in the order with a model recall notification letter.

(c) FDA will not include in a mandatory recall order a requirement for:

(1) Recall of a device from individuals; or

(2) Recall of a device from device user facilities, if FDA determines that the risk of recalling the device from the facilities presents a greater health risk than the health risk of not recalling the device from use, unless the device can be replaced immediately by the recalling firm with an equivalent device (which may be a competitor's product).

(d) FDA will include in a mandatory recall order provisions for notice to individuals subject to the risks associated with use of the device. If a significant number of such individuals cannot be identified, FDA may notify such individuals pursuant to section 705(b) of the act.

(e) If FDA initially determines that a cease distribution and notification order need not be amended to require a mandatory recall, but subsequently finds that the person named in the order has failed to comply with the requirements of the order, or that the actions taken are not adequate to protect individuals from the risks associated with use of the device, FDA may amend the order to require a recall of the device.

§ 810.14 Cease distribution and notification or mandatory recall strategy.

(a) *General.* The person named in a cease distribution and notification order issued under § 810.10, or a mandatory recall order issued under § 810.13, shall develop a strategy for complying with the order that is appropriate for the individual circumstances and that takes into account the following factors:

(1) The nature of the serious, adverse health consequences related to the device;

(2) The ease of identifying the device;

(3) The extent to which the risk presented by the device is obvious to a health professional or user facility;

(4) The extent to which the device is used by health professionals and user facilities; and

(5) The extent to which efforts to notify health professionals and user facilities and to instruct such professionals and facilities to cease use of the device have been successful.

(6) The person named in the order shall submit a copy of the proposed strategy to the agency within the timeframe specified in the order.

(7) The agency will review the proposed strategy and make any changes to the strategy it deems necessary. The person named in the order shall act in accordance with a strategy determined by FDA to be appropriate, but shall initiate the strategy as soon as submitted to the agency unless notified not to do so.

(b) *Elements of the strategy.* A proposed strategy shall meet all of the following requirements:

(1)(i) The person named in the order shall specify the level in the chain of distribution to which the cease distribution and notification order or mandatory recall order is to extend as follows:

(A) Consumer or user level, e.g., health professional, consignee, or user facility level, including any intermediate wholesale or retail level; or

(B) Retail level, to the level immediately preceding the consumer or user level, and including any intermediate level; or

(C) Wholesale level.

(ii) The person named in the order shall not recall a device from individuals; and

(iii) The person named in the order shall not recall a device from user facilities if FDA notifies the person not to do so because of a risk determination under § 810.13(c)(2).

(2) The person named in a recall order shall ensure that the strategy provides for notice to individuals subject to the risks associated with use of the recalled device. The notice may be provided through the individual's health professional if FDA determines that such consultation is appropriate and would be the most effective method of notifying patients.

(3) Effectiveness checks by the firm are required to verify that all health professionals, user facilities, consignees, and individuals, as appropriate, have been notified of the cease distribution and notification order or mandatory recall order and have taken appropriate action. The person named in the cease distribution and notification order or the mandatory recall order shall specify in the strategy the method(s) to be used, i.e., personal visits, telephone calls, letters, or a combination thereof, and the level of the effectiveness checks that will be conducted, i.e., the percent of the total number of health professionals, user facilities, consignees, and individuals, as appropriate, to be contacted. The agency may conduct additional (FDA) audit checks where appropriate.

§ 810.15 Communications concerning a cease distribution and notification or mandatory recall order.

(a) *General.* The person named in a cease distribution and notification order issued under § 810.10 or a mandatory recall order issued under § 810.13 is responsible for promptly notifying each health professional, user facility, consignee, or individual, as appropriate, of the order. The purpose of the communication is to convey:

(1) That FDA has found that there is a reasonable probability that use of the device would cause a serious, adverse health consequence or death;

(2) That the person named in the order has ceased distribution of the device;

(3) That health professionals and user facilities must cease use of the device immediately;

(4) Where appropriate, that the device is subject to a mandatory recall order; and

(5) Specific instructions on what should be done with the device.

(b) *Implementation.* The person named in a cease distribution and notification order or a mandatory recall order shall notify the appropriate persons(s) of the order by written communication, e.g., telegram, mailgram, fax, or first class letter. The written communication and any envelope in which it is sent or enclosed shall be conspicuously marked, preferably in bold red ink: "URGENT—[DEVICE CEASE DISTRIBUTION AND NOTIFICATION ORDER] or [MANDATORY DEVICE RECALL ORDER]." Telephone calls or other

personal contacts may be made in addition to, but not as a substitute for, the written communication, and shall be documented in an appropriate manner.

(c) *Contents.* The person named in the order shall ensure that the notice of a cease distribution and notification order or mandatory recall order:

(1) Is brief and to the point;

(2) Identifies clearly the device, size, lot number(s), code(s), or serial number(s) and any other pertinent descriptive information to facilitate accurate and immediate identification of the device;

(3) Explains concisely the serious, adverse health consequences that may occur if use of the device were continued;

(4) Provides specific instructions on what should be done with the device; and

(5) Provides a ready means for the recipient of the communication to confirm receipt of the communication and to notify the person named in the order of the actions taken in response to the communication. Such means may include, but are not limited to, the return of a postage-paid, self-addressed post card or a toll-free call to the person named in the order.

(6) Does not contain irrelevant qualifications, promotional materials, or any other statement that may detract from the message.

(d) *Follow-up communications.* The person named in the cease distribution and notification order or mandatory recall order shall ensure that follow-up communications are sent to all who fail to respond to the initial communication.

(e) *Responsibility of recipient.* Health professionals, user facilities and consignees that receive a communication concerning a cease distribution and notification order or a mandatory recall order should immediately follow the instructions set forth in the communication. Where appropriate, these recipients should immediately notify their consignees of the order in accordance with paragraphs (b) and (c) of this section.

§ 810.16 Cease distribution and notification or mandatory recall order status reports.

(a) The person named in a cease distribution and notification order issued under § 810.10, or a mandatory recall order issued under § 810.13, shall submit periodic status reports to FDA to enable the agency to assess the person's progress in complying with the order. The frequency of such reports and the agency official to whom such reports shall be submitted will be specified in the order.

(b) Unless otherwise specified in the order, each status report shall contain the following information:

(1) The number and type of health professionals, user facilities, consignees, or individuals notified of the order and the date and method of notification;

(2) The number and type of health professionals, user facilities, consignees, or individuals that have responded to the communication and the quantity of the device on hand at these locations at the time the communication was received;

(3) The number and type of health professionals, user facilities, consignees, or individuals that have not responded to the communication;

(4) The number of devices returned or corrected by each health professional, user facility, consignee, or individual contacted, and the quantity of products accounted for;

(5) The number and results of effectiveness checks that have been made; and

(6) Estimated time-frames for completion of the requirements of the cease distribution and notification order or mandatory recall order.

(c) Submission of status reports will be discontinued when the agency terminates a cease distribution and notification order or recall order in accordance with § 810.17.

§ 810.17 Termination of a cease distribution and notification or mandatory recall order.

(a) The person named in a cease distribution and notification order issued under § 810.10 or a mandatory recall order issued under § 810.13 may request termination of the order by submitting a written request to FDA. The person submitting a request shall certify that he or she has complied in full with all of the requirements of the order and shall include a copy of the most current status report submitted to the agency under § 810.16. A request for termination of a recall order shall include a description of the disposition of the recalled device.

(b) FDA may terminate a cease distribution and notification order issued under § 810.10 or a mandatory recall order issued under § 810.13 when the agency determines that the person named in the order:

(1) Has taken all reasonable efforts to ensure that all health professionals, user facilities, consignees, and, where appropriate, individuals have been notified of the cease distribution and notification order and have complied with the instructions to cease use of the device; or

(2) Has removed the device from the market or has corrected the device so that use of the device would not cause serious, adverse health consequences or death.

(c) FDA will provide written notification to the person named in the order when a cease distribution and notification order or a mandatory recall order has been terminated or when a request for termination has been denied.

§ 810.18 Public notice.

The agency will make available to the public in the weekly FDA Enforcement Report a descriptive listing of each new mandatory recall issued under § 810.13. The agency will delay public notification of orders where the agency determines that such notification may cause unnecessary and harmful anxiety in individuals and that initial consultation between individuals and their health professionals is essential.

Dated: June 7, 1994.

Michael R. Taylor,

Deputy Commissioner for Policy.

The Federal Register: What It Is and How to Use It

A Guide for the User of the Federal Register — Code of Federal Regulations System

This handbook is used for the educational workshops conducted by the Office of the Federal Register. For those persons unable to attend a workshop, this handbook will provide guidelines for using the *Federal Register* and related publications, as well as an explanation of how to solve a sample research problem.

Briefing on How To Use the Federal Register
For information on a briefing in Washington, DC, see announcement on the inside cover of this issue.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The seal of the National Archives and Records Administration authenticates this issue of the **Federal Register** as the official serial publication established under the Federal Register Act. 44 U.S.C. 1507 provides that the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper, 24x microfiche and as an online database through *GPO Access*, a service of the U.S. Government Printing Office. The online database is updated by 6 a.m. each day the **Federal Register** is published. The database includes both text and graphics from Volume 59, Number 1 (January 2, 1994) forward. It is available on a Wide Area Information Server (WAIS) through the Internet and via asynchronous dial-in. The annual subscription fee for a single workstation is $375. Six-month subscriptions are available for $200 and one month of access can be purchased for $35. Discounts are available for multiple-workstation subscriptions. To subscribe, Internet users should telnet to wais.access.gpo.gov and login as newuser (all lower case); no password is required. Dial in users should use communications software and modem to call (202) 512–1661 and login as wais (all lower case); no password is required; at the second login prompt, login as newuser (all lower case); no password is required. Follow the instructions on the screen to register for a subscription for the **Federal Register** Online via *GPO Access*. For assistance, contact the *GPO Access* User Support Team by sending Internet e-mail to help@eids05.eids.gpo.gov, or a fax to (202) 512–1262, or by calling (202) 512–1530 between 7 a.m. and 5 p.m. Eastern time, Monday through Friday, except Federal holidays.

The annual subscription price for the **Federal Register** paper edition is $444, or $490 for a combined **Federal Register**, Federal Register Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the Federal Register Index and LSA is $403. Six month subscriptions are available for one-half the annual rate. The charge for individual copies in paper form is $6.00 for each issue, or $6.00 for each group of pages as actually bound; or $1.50 for each issue in microfiche form. All prices include regular domestic postage and handling. International customers please add 25% for foreign handling. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA or MasterCard. Mail to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250–7954.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 59 FR 12345.

THE FEDERAL REGISTER
WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present:
1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

WASHINGTON, DC

WHEN: June 23 at 9:00 am
WHERE: Office of the Federal Register
Conference Room, 800 North Capitol Street NW., Washington, DC (3 blocks north of Union Station Metro)
RESERVATIONS: 202–523–4538

Title 3—

The President

Proclamation 6699 of June 10, 1994

Flag Day and National Flag Week, 1994

By the President of the United States of America

A Proclamation

In this week we salute the flag of the United States of America: our history's proud pennant; noble banner of freedom, liberty, opportunity, and independence; and the glorious emblem of our national pride and patriotism.

Woven into the Stars and Stripes and into the fabric of our Nation is the legacy of our Founders, who crafted a government built on a revolutionary respect for the rights of individuals. Coming ashore on this new continent, they had fled the tyranny of sovereigns: "We the People" were to be sovereigns of this new land.

On June 14, 1777, the Continental Congress established the design of a flag for the new Republic so that we might bestow our loyalty, not to kings, but to countrymen, all of us created equal. Eleven years later, the Constitutional Convention placed a written rule of law at the symbolic head of government, and we have since pledged our allegiance not only to the Stars and Stripes, but also "to the Republic for which it stands." We salute the achievement and wisdom of our Founders, embodied in our flag, and we honor all of the men and women who have upheld and defended the ideals stitched into its billowing folds.

Our flag's bright stars, ancient symbols of dominion and sovereignty, represent the constellation of States in our federal system of government—its stripes, the first States born of the original thirteen colonies. Its bright colors embody the essence of our American heritage: red, for valor; white, for hope and purity; and blue, the color of loyalty, reverence, justice, and truth. Witness to our past, it holds aloft the promise of our future.

"Old Glory," as it was nicknamed in 1831 by Navy Captain William Driver, was first carried into conflict at the Battle of Brandywine on September 11, 1777. As the Nation now observes the 50th anniversary of the Battle of Normandy, we honor the courageous Americans who carried our standard into the infernos of war at all of our history's most critical crossroads. It has saluted the final resting places of lives lost in the defense of liberty, from the beaches of Normandy to the jungles of Vietnam and the deserts of Iraq and Somalia.

Our flag has been borne aloft into the heavens by our gallant astronauts and has been worn bravely on the shoulders of those who each day risk their lives to protect the public safety. It flies freely from its place of honor in classrooms, churches, businesses, government buildings, and is proudly displayed by Americans serving their Nation in distant points across the globe. Its silent, solemn presence makes each of those places "home" and keeps the spirit of liberty alive in the hearts of Americans wherever they may be.

To commemorate the adoption of our flag, the Congress, by a joint resolution approved August 3, 1949 (63 Stat. 492), designated June 14 of each year Flag Day and requested the President to issue an annual Proclamation calling for its observance and for the display of the Flag of the United States on all Government buildings. The Congress also requested the President, by joint resolution approved June 9, 1966 (80 Stat. 194), to issue annually

a Proclamation designating the week in which June 14 occurs as National Flag Week, and calling upon all citizens of the United States to display the flag during that week.

NOW, THEREFORE, I, WILLIAM J. CLINTON, President of the United States of America, do hereby proclaim June 14, 1994, as Flag Day and the week beginning June 12, 1994, as National Flag Week. I direct the appropriate officials of the Government to display the Flag of the United States on all Government buildings during that week. I urge all Americans to observe Flag Day, June 14, and Flag Week by flying the Stars and Stripes from their homes and other suitable places.

I also call upon the American people to observe with pride and all due ceremony those days from Flag Day through Independence Day, also set aside by the Congress (89 Stat. 211), as a time to celebrate our heritage in public gatherings and activities and to publicly recite the Pledge of Allegiance to the Flag of the United States of America.

IN WITNESS WHEREOF, I have hereunto set my hand this tenth day of June, in the year of our Lord nineteen hundred and ninety-four, and of the Independence of the United States of America the two hundred and eighteenth.

William J. Clinton

Proclamation 6700 of June 10, 1994

National Men's Health Week, 1994

By the President of the United States of America

A Proclamation

As this great country moves forward in its commitment to address the many concerns related to the delivery of health care, we set aside this week to give special attention to those issues that affect the health of American men. We have made enormous progress in medical technology and research, yet the goal of extending human life expectancy will not be fully realized until information on prevention, detection, and treatment of disease reaches all men and is used by all men.

Tobacco use is the single most important preventable cause of death in the United States, and currently 24 million American men smoke. It is a major risk factor for diseases of the heart and lungs and doubles the risk of stroke among men. The risk of dying from lung cancer is 22 times higher for men who smoke. Those who continue to smoke place themselves and those around them at great peril. It is imperative for this country to focus its efforts on eliminating the use of tobacco products through education and treatment programs.

In the past decade, public awareness has also been increased regarding the dangers of alcohol consumption and its impact on the health of American men. Alcohol abuse is, more frequently than not, a related factor in motor vehicle fatalities, homicides, and suicides. It is becoming a special problem for the young men in this country. Let us not falter in our progress—the time has come for us to demand better access to treatment programs, stronger and better enforced laws related to drunk driving, policies to reduce minors' access to alcohol, and greater involvement of primary care providers in dealing with this problem.

Among older men, prostate cancer is a serious enemy. It is estimated that in 1994, in America alone, prostate cancer will affect 200,000 men, and 38,000 will die. Prostate cancer strikes men almost as often as breast cancer strikes women, yet reluctance to discuss this disease has left its research largely under funded. However, what we do know gives us hope. In addition to physical detection, doctors can now use a blood test to determine the presence of this cancer. Furthermore, there are several available forms of effective treatment. We must ensure that all men over the age of 50 have access to screening for and treatment of this disease, while we simultaneously push for affordable medical care for all Americans.

Even in the face of better, more accessible detection and prevention programs, we need men to recognize and adopt healthier lifestyles. No health care policy can replace the benefits that American men would reap from this change.

The Congress, by Senate Joint Resolution 179, has designated the week of June 12 through June 19, 1994, as "National Men's Health Week" and has authorized and requested the President to issue a proclamation in observance of this week.

NOW, THEREFORE, I, WILLIAM J. CLINTON, President of the United States of America, do hereby proclaim the week of June 12, 1994, as National Men's Health Week. I invite the Governors of the 50 States and the Commonwealth of Puerto Rico, the Mayor of the District of Columbia, and the appropriate officials of all other areas under the American flag to issue similar proclamations. I also ask health care professionals, private industry, community groups, insurance companies, and all other interested organizations and individual citizens to unite to publicly reaffirm our Nation's continuing commitment to men's health.

IN WITNESS WHEREOF, I have hereunto set my hand this tenth day of June, in the year of our Lord nineteen hundred and ninety-four, and of the Independence of the United States of America the two hundred and eighteenth.

William J. Clinton

Executive Order 12921 of June 13, 1994

Amendment to Executive Order No. 12864

By the authority vested in me as President by the Constitution and the laws of the United States of America, and in order to provide for the appointment of up to 37 members to the United States Advisory Council on the National Information Infrastructure, it is hereby ordered that section 1(a) of Executive Order No. 12864, as amended, is further amended by deleting the number "30" and inserting the number "37" in lieu thereof.

Rules and Regulations

Federal Register
Vol. 59, No. 114
Wednesday, June 15, 1994

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week

ARMED FORCES RETIREMENT HOME

5 CFR Part 2100

Armed Forces Retirement Home Privacy Program

AGENCY: Armed Forces Retirement Home (AFRH).

ACTION: Final rule; request for comments.

SUMMARY: The Armed Forces Retirement Home, which includes the U.S. Soldiers' and Airmen's Home (USSAH) and the U.S. Naval Home (USNH) is publishing its Privacy Program procedural rules in accordance with the Privacy Act of 1974, 5 U.S.C. 552a, as amended.

DATES: *Effective:* This rule is effective July 15, 1994. Written comments regarding this rule must be received on or before July 15, 1994, to be considered by the agency.

ADDRESSES: Written comments may be sent to Mrs. Doris Montgomery, Administrative Officer, Resource Management Directorate, U.S. Soldiers' and Airmen's Home, 3700 N. Capitol Street, NW., Washington, DC 20317–0002, (202) 722–3230.

SUPPLEMENTARY INFORMATION: The enactment of the Armed Forces Retirement Home Act of 1991, 24 U.S.C. 401–441 (Pub. L. 101–510), effective November 5, 1991, incorporated the U.S. Soldiers' and Airmen's Home and the U.S. Naval Home into an independent establishment in the Executive Branch of the Federal Government to be known as the Armed Forces Retirement Home. Systems of records formerly under the cognizance of the individual facilities (USSAH and USNH) are now to be incorporated into the procedural rules of the AFRH.

List of Subjects in 5 CFR Part 2100

Privacy.

For the reasons set forth above, 5 CFR Ch. XI is amended by adding part 2100 to read as follows:

Ch. IX—Armed Forces Retirement Home

PART 2100—ARMED FORCES RETIREMENT HOME PRIVACY ACT PROCEDURES

Sec.

2100.1 Purpose.
2100.2 Definitions.
2100.3 Procedure for requesting information.
2100.4 Requirements for identification.
2100.5 Access by subject individuals
2100.6 Schedule of fees.
2100.7 Request for correction or amendment.
2100.8 Review of request for amendment.
2100.9 Appeal of denial to grant access or to amend records.
2100.10 Conditions of disclosure and accounting of certain disclosures.
2100.11 Penalties.
2100.12 Accounting of disclosure.
2100.13 Specific exemptions.

Authority: Public Law 93–579, 88 Stat. 1896, 5 U.S.C. 552a(f).

§ 2100.1 Purpose.

Pursuant to the requirements of the Privacy Act of 1974, 5 U.S.C. 552a, as amended, the following rules of procedures are established with respect to access and amendment of records maintained on the individual subjects of these records by the Armed Forces Retirement Home, which includes the continuing care retirement communities of the U.S. Soldiers' and Airmen's Home and the U.S. Naval Home. These rules do not apply to civilian employees' records maintained by the individual facilities which are covered by the Office of Personnel Management systems of records.

§ 2100.2 Definitions.

(a) All terms used in this part which are defined in 5 U.S.C. 552a, as amended, shall have the same meaning herein.

(b) *Agency*, as used in this part, means the Armed Forces Retirement Home (AFRH).

(c) *Facility* or *facilities* refers to the continuing care retirement communities of the U.S. Soldiers' and Airmen's Home (USSAH) and the U.S. Naval Home (USNH), which are incorporated within the Armed Forces Retirement Home (AFRH).

(d) *Access* means providing a copy of a record to, or allowing review of the original record by, the individual or the individual's authorized representative, legal guardian or conservator.

§ 2100.3 Procedure for requesting information.

Individuals shall submit written inquiries regarding all AFRH records to the appropriate facility at the following addresses: Associate Director, Resource Management, U.S. Soldiers' and Airmen's Home, 3700 N. Capitol Street, NW., Washington, DC 20317–0002; or, Administrative Services, U.S. Naval Home, 1800 Beach Drive, Gulfport, Mississippi 39507–1597. All personal (walk-in) requests will require some form of common identification.

§ 2100.4 Requirements for identification.

Only upon proper identification will any individual be granted access to records which pertain to him/her. Identification is required both for accurate record identification and to avoid disclosing records to unauthorized individuals. Individuals must provide their full name and as much information as possible in order that a proper search for records can be accomplished. Requests made by mail shall be signed by the individual requesting his/her records. Inclusion of a telephone number for the requester is recommended to expedite certain matters. Requesters applying in person must provide an identification with photograph, such as a driver's license, military or annuitant identification card, or any official document as acceptable identification validation. Personal requests can only be accepted on regularly scheduled workdays (Monday through Friday, excluding Federal holidays) between the hours of 7:30 a.m. and 3:30 p.m.

§ 2100.5 Access by individuals.

(a) No individual will be allowed access to any information compiled or maintained in reasonable anticipation of civil actions or proceedings, or otherwise exempt under § 2100.12. Requests for pending investigations will be denied and the requester instructed to forward another request giving adequate time for the investigation to be completed. Requesters shall be provided the telephone number so they can call and check on the status in order to know when to resubmit the request.

(b) Any individual may authorize the facility to provide a copy of his/her records to a third party. This authorization must be in writing and shall be provided to the facility with the initial request.

(c) Access to records may be authorized to the legal guardian or conservator acting on behalf of an individual who has been declared to be incompetent due to physical or mental incapacity or age by a court of competent jurisdiction.

(d) When an individual requesting access to his/her record wishes to be accompanied by another individual during the course of the examination of the record, the individual making the request shall submit to the official having operational control of the record, a signed statement authorizing that person access to the record.

(e) If medical records are requested and a USSAH or USNH practitioner believes that access to the records by the subject could harm that person's mental or physical health, the requester will be asked to name a practitioner to receive the records. If this requirement poses a hardship on the individual, he/she will be offered the service of an USSAH or USNH practitioner other than the one who provided treatment. If the individual refuses to name a recipient, the record will not be released.

§ 2100.6 Schedule of fees.

(a) Individuals will not be charged for:

(1) The search and review of the record.

(2) Copies of the record produced as a necessary part of the process of making the record available for access; or,

(3) Copies of the requested record when it has been determined that access can only be accomplished by providing a copy of the record through the mail.

(b) Waiver. The official having operational control at the appropriate facility may at no charge, provide copies of a record if it is determined the production of the copies is in the interest of the Government.

(c) Fee Schedule and method of payment. With the exception of paragraphs (a) and (b) of this section, fees will be charged as indicated below:

(1) Records will be duplicated at a rate of $.10 per page for all copying of 5 pages or more. There is no charge for duplication of 4 or fewer pages.

(2) Where it is anticipated that the fees chargeable under this section will amount to more than $30.00, the requester shall be promptly notified of the amount of the anticipated fee or such portion thereof as can readily be estimated. In instances where the estimated fees will exceed $30.00, an advance deposit may be required. The notice or request for advance deposit shall extend an offer to the requester in order to reformulate the request in a manner which will reduce the fees, yet still meet the needs of the requester.

(3) Fees should be paid in full prior to issuance of requested copies. In the event the requester is in arrears for previous requested copies, no subsequent request will be processed until the arrears have been paid in full.

(4) Remittances shall be in the form either of a personal check, bank draft drawn on a bank in the United States, or a postal money order. Remittances shall be made payable to the facility to which the request is being made, and mailed or delivered to the appropriate facility (see § 2100.3 of this part).

(5) A receipt for fees paid will be given upon request.

§ 2100.7 Request for correction or amendment.

(a) Requests to correct or amend a file shall be addressed to the system manager in which the file is located. The request must reasonably describe the record to be amended, the items to be changed as specifically as possible, the type of amendment (e.g., deletion, correction, amendment), and the reason for the amendment. The request should also include the reasons why the requester believes the record is not accurate, relevant, timely, or complete. The burden of proof will be upon the individual to furnish sufficient facts to persuade the change of the record of the inaccuracy, irrelevancy, timeliness, or incompleteness of the record. Normally all documents submitted, to include court orders, shall be certified. Amendments under this part are limited to correcting factual matters and not matters of official judgement or opinions.

(b) Requirements of identification as outlined in § 2100.4 apply to requests to correct or amend a file.

(c) Incomplete requests shall not be honored, but the requester shall be contacted for the additional information needed to process the request.

(d) The amendment process is not intended to permit the alteration of evidence presented in the course of judicial or quasi-judicial proceedings. Any amendments or changes to these records normally are made through the specific procedures established for the amendment of such records.

(e) When records sought to be amended are actually covered by another issuance, the administrative procedures under that issuance must be exhausted before using the procedures under the Privacy Act.

§ 2100.8 Review of request for amendment.

(a) A written acknowledgement of the receipt of a request for amendment of a record will be provided to the requester within 10 working days, unless final action regarding approval or denial will constitute acknowledgment.

(b) Where there is a determination to grant all or a portion of a request to amend a record, the record shall be promptly amended and the requesting individual notified. Individuals, agencies or components shown by disclosure accounting records to have received copies of the record, or to whom disclosure has been made, will be notified of the amendment by the system manager in which the file is located.

(c) Where there is a determination to deny all or a portion of a request to amend a record, a designated official will promptly advise the requesting individual of the specifics of the refusal and the reasons; and inform the individual that he/she may request a review of the denial(s).

§ 2100.9 Appeal of denial to grant access or to amend records.

(a) All appeals of denial to grant access or to amend records should be addressed to the appropriate facility at the following addresses: Associate Director, Resource Management, U.S. Soldiers' and Airmen's Home, 3700 N. Capitol Street, NW., Washington, DC 20317–0002; or, Administrative Services, U.S. Naval Home, 1800 Beach Drive, Gulfport, Mississippi 39507–1597. The appeal should be concise and should specify the reasons the requester believes that the initial action was not satisfactory. If an appeal is denied, the designated official will notify the requester of the reason for denial and of the right to judicial review pursuant to 5 U.S.C. 552a(g). If an initial denial of a request to amend records is upheld, the requestor will also be advised of his or her right to file a statement of dispute disagreeing with the denial and such statement will be provided to all future users of the file.

(b) If the designated official decides to amend the record, the requester and all previous recipients of the disputed information will be notified of the amendment. If the appeal is denied, the designated official will notify the requester of the reason of the denial, of the requester's right to file a statement of dispute disagreeing with the denial, that such statement of dispute will be retained in the file, that the statement

will be provided to all future users of the file, and that the requester may file suit in a Federal district court to contest the decision not to amend the record.

(c) The designated official will respond to all appeals within 30 working days or will notify the requester of an estimated date of completion if the 30 day limit cannot be met.

§ 2100.10 Conditions of disclosure and accounting of certain disclosures.

No record containing personally identifiable information within an AFRH system of records shall be disclosed by any means to any person or agency outside the AFRH, except by written request or prior written consent of the individual subject of the record, or as provided for in the Privacy Act of 1974, as amended, unless when such disclosure is:

(a) To those officers and employees of the agency which maintains the record and who have a need for the record in the performance of their duties;

(b) Required under 5 U.S.C. 552;

(c) For a routine use of the record compatible with the purpose for which it was collected;

(d) To the Bureau of the Census for purposes of planning or carrying out a census or survey or related activity pursuant to 13 U.S.C.;

(e) To a recipient who has provided the AFRH with advance adequate written assurance that the record will be used solely as a statistical research or reporting record, and the record is to be transferred in a form that is not individually identifiable;

(f) To the National Archives of the United States as a record which has sufficient historical or other value to warrant its continued preservation by the U.S. Government or for evaluation by the Archivist of the United States, or his/her designee, to determine whether the record has such value;

(g) To another agency or to an instrumentality of any governmental jurisdiction within or under the control of the United States for a civil or criminal law enforcement activity if the activity is authorized by law, and if the head of the agency or instrumentality, has made a written request to the agency which maintains the record specifying the particular portion desired and the law enforcement activity for which the record is sought;

(h) To a person pursuant to a showing of compelling circumstances affecting the health or safety of an individual if upon such disclosure notification is transmitted to the last known address of such individual;

(i) To either House of Congress, or, to the extent of matter within its jurisdiction, any committee or subcommittee thereof, any joint committee of Congress or subcommittee of any such joint committee;

(j) To the Comptroller General, or any authorized representatives, in the course of the performance of the duties of the General Accounting Office;

(k) Pursuant to the order of a court of competent jurisdiction; or

(l) To a consumer reporting agency in accordance with 31 U.S.C. 3711(f).

§ 2100.11 Penalties.

(a) An individual may bring a civil action against the AFRH to correct or amend the record, or where there is a refusal to comply with an individual request or failure to maintain any record with accuracy, relevance, timeliness and completeness, so as to guarantee fairness, or failure to comply with any other provision of the Privacy Act. The court may order correction or amendment of records. The court may enjoin the AFRH from withholding the records and order the production of the record.

(b) Where it is determined that the action was willful or intentional with respect to 5 U.S.C. 552a(g)(1)(C) or (D), the United States may be liable for the actual damages sustained.

(c) Criminal penalties may be imposed against an officer or employee of the USSAH or USNH who discloses material, which he/she knows is prohibited from disclosure, or who willfully maintains a system of records without compliance with the notice requirements.

(d) Criminal penalties may be imposed against any person who knowingly and willfully requests or obtains any record concerning another individual from an agency under false pretenses.

(e) All of these offenses are misdemeanors with a fine not to exceed $5,000.

§ 2100.12 Accounting of disclosure.

(a) The AFRH or agency will maintain a record of disclosures in cases where records about the individual are disclosed from a system of records except—

(1) When the disclosure is made pursuant to the Freedom of Information Act, 5 U.S.C. 552, as amended; or

(2) When the disclosure is made to those officers and employees of the AFRH who have a need for the record in the performance of their duties.

(b) This accounting of the disclosures will be retained for a least 5 years or for the life of the record, whichever is longer, and will contain the following information:

(1) A brief description of the record disclosed;

(2) The date, nature, and purpose for the disclosure; and,

(3) The name and address of the person, agency, or other entity to whom the disclosure is made.

(c) Except for the accounting of disclosure made to agencies, individuals, or entities in law enforcement activities or disclosures made from the AFRH exempt systems of records, the accounting of disclosures will be made available to the data subject upon request in accordance with the access procedures of this part.

§ 2100.13 Specific exemptions.

Subsection (k) of 5 U.S.C. 552a authorizes the AFRH to adopt rules designating eligible system of records as exempt from certain requirements of 5 U.S.C. 552a. To be eligible for a specific exemption under the authority of 5 U.S.C. 552a(k), the pertinent records within a designated system must contain one or more of the following:

(a) Investigative records compiled for law enforcement purposes. If this information has been used to deny someone a right however, the AFRH must release it unless doing so would reveal the identify of a confidential source ((k)(2) exemption).

(b) Records used only for statistical, research, or other evaluation purposes, and which are not used to make decisions on the rights, benefits, or privileges of individuals, except as permitted by 13 U.S.C. 8 (Use of census data) ((k)(4) exemption).

(c) Data compiled to determine suitability, eligibility, or qualifications for Federal service, Federal contracts, or access to classified information. This information may be withheld only if disclosure would reveal the identity of a confidential source ((k)(5) exemption).

(d) Test or examination material used solely to determine individual qualifications for appointment or promotion in the Federal service, the disclosure of which would compromise the objectivity or fairness of the testing or examination process ((k)(6) exemption).

Dennis W. Jahnigen,

Chair, Armed Forces Retirement Home Board, Chief Executive Officer, Armed Forces Retirement Home.

BILLING CODE 8250–01–P

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 922

[Docket No. FV94-922-11FR]

Apricots Grown in Designated Counties in Washington; Revision in Container Regulations

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Interim final rule with request for comments.

SUMMARY: This rule revises container regulations for apricots shipped to fresh market outlets under Marketing Order No. 922. This rule gives handlers greater flexibility in selecting containers to meet their packaging needs by eliminating the inside dimension requirements on each type of container that has a minimum apricot net weight requirement. The rule eliminates reference to the obsolete lidded four-basket crate, and replaces the term "closed L.A. lugs and equivalent cartons" with the term "closed containers" to simplify wording and improve clarity. This rule also includes a correction to the container regulations which had previously appeared in the **Federal Register** as a final rule, but did not appear in the annual Code of Federal Regulations.

DATES: This interim final rule becomes effective: June 15, 1994. Comments which are received by July 15, 1994, will be considered prior to any finalization of the interim final rule.

ADDRESSES: Interested persons are invited to submit written comments concerning this rule. Comments must be sent in triplicate to the Docket Clerk, Fruit and Vegetable Division, AMS, USDA, room 2525–S, P.O. Box 96456, Washington, DC 20090–6456 or by FAX at (202) 720–5698. All comments should reference the docket number and the date and page number of this issue of the **Federal Register** and will be made available for public inspection in the Office of the Docket Clerk during regular business hours.

FOR FURTHER INFORMATION CONTACT: Mark J. Kreaggor, Marketing Order Administration Branch, Fruit and Vegetable Division, Agricultural Marketing Service, U.S. Department of Agriculture, room 2523–S, P.O. Box 96456, Washington, DC 20090–6456; telephone: (202) 720–5127; or Teresa Hutchinson, Northwest Marketing Field Office, Fruit and Vegetable Division, AMS, USDA, 1220 SW. Third Avenue, room 369, Portland, OR 97204; telephone: (503) 326–2724.

SUPPLEMENTARY INFORMATION: This interim final rule is issued under Marketing Order No. 922 [7 CFR part 922], regulating the handling of apricots grown in designated counties in Washington, hereinafter referred to as the order. The order is effective under the Agricultural Marketing Agreement Act of 1937, as amended [7 U.S.C. 601–674], hereinafter referred to as the Act.

The Department of Agriculture (Department) is issuing this rule in conformance with Executive Order 12866.

This rule has been reviewed under Executive Order 12778, Civil Justice Reform. This rule is not intended to have retroactive effect. This rule will not preempt any state or local laws, regulations, or policies, unless they present an irreconcilable conflict with this rule.

The Act provides that administrative proceedings must be exhausted before parties may file suit in court. Under section 608c(15)(A) of the Act, any handler subject to an order may file with the Secretary a petition stating that the order, any provision of the order, or any obligation imposed in connection with the order is not in accordance with law and request a modification of the order or to be exempted therefrom. A handler is afforded the opportunity for a hearing on the petition. After the hearing the Secretary will rule on the petition. The Act provides that the district court of the United States in any district in which the handler is an inhabitant, or has a principal place of business, has jurisdiction in equity to review the Secretary's ruling on the petition, provided a bill in equity is filed not later than 20 days after the date of the entry of the ruling.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of this action on small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately 55 handlers of Washington apricots that are subject to regulation under the marketing order. In addition, there are approximately 400 producers in the regulated area. Small agricultural service firms, which include producers of Washington apricots, have been defined by the Small Business Administration [13 CFR 121.601] as those whose annual receipts are less than $3,500,000, and small agricultural producers are defined as those whose annual receipts are less than $500,000. A majority of these handlers and producers may be classified as small entities.

Section 922.52 [7 CFR 922.52] authorizes the issuance of regulations for grade, size, quality, maturity, pack, markings, and container for any variety or varieties of apricots grown in any district or districts of the production area. Section 922.53 [7 CFR 922.53] authorizes the modification, suspension, or termination of regulations issued under section 922.52.

Container regulations are currently in effect under section 922.306. This rule eliminates references to inside dimensions for each type of container that has a minimum apricot net weight requirement. This rule also removes references to the obsolete lidded four-basket crate and replaces the term "closed L.A. lugs and equivalent cartons" with the term "closed containers."

This rule was recommended by the Washington Apricot Marketing Committee (committee), which works with the Department in administering the marketing order.

The committee met on December 15, 1993, and unanimously recommended elimination of inside dimension requirements for each type of container that has a minimum apricot net weight requirement. The committee also unanimously recommended deleting reference in the container regulation to the lidded four-basket crate, and that the term "closed L.A. lugs and equivalent cartons" be replaced with the term "closed containers."

Handlers have experienced difficulty in packing many of the new, larger varieties of apricots, particularly in row-faced and tray-packed containers because of the inside dimension requirements in effect. Container height limits, for example, can cause a higher incidence of compression damage in large apricots that are row-faced or tray-packed. In addition, the inside dimension requirements have prevented handlers from using many generic containers used in other fruit and vegetable industries.

This rule deletes references to designated container dimensions for each type of container that has a minimum apricot net weight requirement. The committee believes that continued standardization of the minimum net weight requirements of

the authorized containers is needed to prevent market confusion resulting from the use of deceptive containers.

This rule will allow handlers greater flexibility in packaging. By allowing different container dimensions, as long as the minimum weight requirements are met, handlers will have the flexibility to use containers commonly used in other fruit and vegetable industries, to use different containers for different varieties of apricots, and to develop new containers.

This rule will remove authority for the use of the obsolete lidded four-basket crate. The rule will also remove reference in the regulation to the term "closed L.A. lugs and equivalent cartons" replacing it with the term, "closed containers." This change is intended only to simplify wording and improve clarity.

This rule also corrects the container regulations in the Code of Federal Regulations for Apricots Grown in Designated Counties in Washington [7 CFR Part 922]. Changes to the container requirements appeared in the **Federal Register** [44 FR 37598, June 28, 1979] [Apricot Regulation 6, Amendment 4], but did not correspondingly appear in the annual Code of Federal Regulations.

Based on the above information, the Administrator of the AMS has determined that this interim final rule will not have a significant impact on a substantial number of small entities and that the action set forth herein will benefit producers and handlers of apricots grown in designated counties in Washington State.

After consideration of all available information, it is found that the revision of the container regulations, as hereinafter set forth, will tend to effectuate the declared policy of the Act.

Pursuant to 5 U.S.C. 553, it is also found and determined, upon good cause, that it is impracticable, unnecessary, and contrary to the public interest to give preliminary notice prior to putting this rule into effect, and that good cause exists for not postponing the effective date of this rule until 30 days after publication in the **Federal Register** because: (1) The 1993–94 marketing year begins June 1, 1994, and the container regulations established herein should apply to all apricots produced in the production area and need to be in place before the beginning of the marketing year; (2) handlers are aware of this rule, which was recommended at an open committee meeting, and need no additional time to comply with these regulations which are a relaxation; and (3) the rule provides a 30-day comment period, and any comments timely received will be considered prior to finalization of this interim final rule.

List of Subjects in 7 CFR Part 922

Apricots, Marketing agreements, Reporting and recordkeeping requirements.

For the reasons set forth in the preamble, 7 CFR part 922 is amended as follows:

PART 922—APRICOTS GROWN IN DESIGNATED COUNTIES IN WASHINGTON

1. The authority citation for 7 CFR part 922 continues to read as follows:

Authority: 7 U.S.C. 601–674.

2. Section 922.306 is revised to read as follows:

§ 922.306 Apricot Regulation 6.

(a) No handler shall handle any apricots unless such apricots are:

(1) In open containers or telescope fiberboard cartons and the net weight of the apricots is not less than 28 pounds; or

(2) In closed containers containing not less than 14 pounds, net weight, of apricots: *Provided,* That when the apricots are packed in such containers they are row-faced or tray-packed; or

(3) In closed containers that are marked "12 pounds net weight" and contain not less than 12 pounds, net weight, of apricots which are of random size and are not row-faced; or

(4) In closed containers in which the apricots are row-faced or tray-packed: *Provided,* That apricots may be packed loose in such containers if a top pad is used and the net weight of the apricots therein is not less than 24 pounds; or

(5) If exported to Canada, in any of the containers specified in this paragraph (a) or in containers having inside dimensions of 16⅛ x 11½ inches with 4¾-inch end pieces and 3¾-inch side pieces.

(b) Notwithstanding any other provisions of this section, any individual shipment of apricots which, in the aggregate, does not exceed 500 pounds, net weight, may be handled without regard to the requirements specified in this section or in §§ 922.41 or 922.55.

(c) All apricots handled are also subject to all applicable grade, size, quality, maturity and pack regulations which are in effect pursuant to this part.

(d) The terms "handler", "handle" and "apricots" shall have the same meaning as when used in the amended marketing agreement and order.

Dated: June 9, 1994.

Eric M. Forman,

Deputy Director, Fruit and Vegetable Division.

[FR Doc. 94–14586 Filed 6–14–94; 8:45 am]

BILLING CODE 3410–02–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 94–NM–81–AD; Amendment 39–8939; AD 94–12–11]

Airworthiness Directives; Boeing Model 747–400 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule; request for comments.

SUMMARY: This amendment adopts a new airworthiness directive (AD) that is applicable to all Boeing Model 747–400 series airplanes. This action requires revising the Airplane Flight Manual to include procedures that will enable the flight crew to identify fuel system leaks and to take appropriate action to prevent further fuel loss. This amendment is prompted by reports that flight crew procedures related to fuel system leaks are not defined adequately in the FAA-approved AFM for these airplanes. The actions specified in this AD are intended to ensure that the flight crew is advised of the potential hazard related to fuel exhaustion due to undetected leakage, and the procedures necessary to address it.

DATES: Effective June 30, 1994.

Comments for inclusion in the Rules Docket must be received on or before August 15, 1994.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Transport Airplane Directorate, ANM–103, Attention: Rules Docket No. 94–NM–81–AD, 1601 Lind Avenue SW., Renton, Washington 98055–4056.

Information concerning this rulemaking action may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington.

FOR FURTHER INFORMATION CONTACT: Jon Regimbal, Aerospace Engineer, Propulsion Branch, ANM–140S, FAA, Transport Airplane Directorate, Seattle Aircraft Certification Office, 1601 Lind Avenue SW., Renton, Washington 98055–4056; telephone (206) 227–2687; fax (206) 227–1181.

SUPPLEMENTARY INFORMATION: On March 21, 1994, a Boeing Model 747–400

diverted from its intended destination airport because of indications that insufficient fuel remained to complete the scheduled leg of the flight. During landing and rollout, a large amount of fuel was spilled on the runway; additionally, during application of reverse thrust, fuel sprayed on the airplane. With such fuel leakage, the potential for a large fire existed during and after landing; however, the fuel did not ignite and no injuries occurred.

Investigation of this incident revealed that a major fuel leak had developed much earlier in the flight, and that approximately 35,000 lbs. of fuel had been lost. The operator of the incident airplane pointed out that, had a similar scenario occurred on the same flight leg in the opposite direction, the airplane's fuel supply would have been exhausted prior to reaching a suitable airport.

The fuel apparently had leaked from a cracked fuel tube within the engine nacelle. The cause of the cracking currently is under investigation by the engine manufacturer (and may be the subject of future rulemaking, if warranted). The fuel leak was located upstream of the fuel flow meter. Under these circumstances, sufficient fuel may still be supplied to the engine, and the engine may operate normally. In this particular incident, the flight crew received no immediate indication of abnormal fuel flow (i.e., excessive fuel flow on one engine) from the fuel flow meter. The "FUEL DISAGREE—PROG 2/2" Flight Management System—Control Display Unit (FMS–CDU) message and the "FUEL IMBALANCE" Engine Indication and Crew Alerting System (EICAS) message were displayed some time after the fuel began leaking. However, because there currently are no explicit instructions in the Airplane Flight Manual (AFM) or the Operations Manual relative to actions that should be taken during situations such as these, the flight crew did not initiate procedures to isolate the leak and retain the remaining fuel on the airplane.

If the flight crew fails to detect a fuel leak, appropriate action would not be taken to prevent further fuel loss. This condition, if not corrected, could result in fuel exhaustion due to undetected fuel leakage.

In light of this information, the FAA finds that certain procedures should be included in the FAA-approved AFM for Model 747–400 series airplanes to enable the flight crew to detect fuel system leaks and to take appropriate action. The FAA has determined that such procedures currently are not defined adequately in the AFM for these airplanes.

Since an unsafe condition has been identified that is likely to exist or develop on other Boeing Model 747–400 series airplanes of the same type design, this AD is being issued to ensure that flight crews are advised of the potential hazard related to a significantly reduced or exhausted airplane fuel supply, and of the procedures necessary to address it. This AD requires revising the Non-Normal Procedures Section of the AFM to include procedures that will enable the flight crew to identify fuel system leaks and to take appropriate action to prevent further fuel loss.

The applicability of this AD action is limited to only Model 747–400 series airplane. While Model 747–100, –200, –300, SP, and SR series airplanes have a similar fuel delivery system to that of the Model 747–400, the indication systems and flight crew procedures for monitoring fuel usage are significantly different for these models. These models were designed to be operated by three flight crew members and, in the event of a similar fuel leak on one of these airplanes, the flight engineer would detect the fuel leak and recommend shutdown of the appropriate engine prior to the loss of such a large quantity of fuel.

Since a situation exists that requires the immediate adoption of this regulation, it is found that notice and opportunity for prior public comment hereon are impracticable, and that good cause exists for making this amendment effective in less than 30 days.

Comments Invited

Although this action is in the form of a final rule that involves requirements affecting flight safety and, thus, was not preceded by notice and an opportunity for public comment, comments are invited on this rule. Interested persons are invited to comment on this rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified under the caption **ADDRESSES**. All communications received on or before the closing date for comments will be considered, and this rule may be amended in light of the comments received. Factual information that supports the commenter's ideas and suggestions is extremely helpful in evaluating the effectiveness of the AD action and determining whether additional rulemaking action would be needed.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the rule that might suggest a need to modify the rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report that summarizes each FAA-public contact concerned with the substance of this AD will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 94–NM–81–AD." The postcard will be date stamped and returned to the commenter.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

The FAA has determined that this regulation is an emergency regulation that must be issued immediately to correct an unsafe condition in aircraft, and that it is not a "significant regulatory action" under Executive Order 12866. It has been determined further that this action involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979). If it is determined that this emergency regulation otherwise would be significant under DOT Regulatory Policies and Procedures, a final regulatory evaluation will be prepared and placed in the Rules Docket. A copy of it, if filed, may be obtained from the Rules Docket at the location provided under the caption **ADDRESSES**.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. App. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

94–12–11 Boeing: Amendment 39–8939. Docket 94–NM–81–AD.

Applicability: All Model 747–400 series airplanes, certificated in any category.

Compliance: Required as indicated, unless accomplished previously.

To ensure that the flight crew is advised of the potential hazard associated with fuel exhaustion due to undetected fuel leakage, and of the procedures necessary to address it, accomplish the following:

(a) Within 60 days after the effective date of this AD, revise the Non-Normal Procedures Section of the FAA-approved Airplane Flight Manual (AFM) to include the following procedures, which will enable the flight crew to identify fuel system leaks and to take appropriate action to prevent further fuel loss. This may be accomplished by inserting a copy of this AD in the AFM.

In-Flight Fuel Leak

If the Flight Management Computer System (FMCS) message "FUEL DISAGREE—PROG 2/2" or "INSUFFICIENT FUEL" is displayed:

Compare the Fuel Quantity Indicating System (FQIS) total fuel quantity and the FMC calculated fuel remaining (based on fuel flow) with estimated fuel usage data.

If a fuel leak is suspected, turn off the stabilizer tank pump switches, if installed, the center wing tank pump switches, and the tank 2 and 3 override pump switches, and close all crossfeed valves (tank-to-engine fuel feed configuration). Watch for any unusual decrease in fuel tank quantity and/or a fuel imbalance to determine if fuel is being lost.

If an engine fuel leak is confirmed (either visually or by flight deck indications), shut down the affected engine to stop the leak and retain the remaining fuel. After shutdown of the affected engine, resume normal fuel management procedures. All remaining fuel can be used for the operating engines. Use FQIS to determine fuel remaining."

(b) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Seattle Aircraft Certification Office (ACO), FAA, Transport Airplane Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Seattle ACO.

Note: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Seattle ACO.

(c) Special flight permits may be issued in accordance with sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the airplane to a location where the requirements of this AD can be accomplished.

(d) This amendment becomes effective on June 30, 1994.

Issued in Renton, Washington, on June 8, 1994.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

[FR Doc. 94–14360 Filed 6–14–94; 8:45 am]

BILLING CODE 4910–13–U

---

14 CFR Part 97

[Docket No. 1604; Amdt. No. 27779]

Standard Instrument Approach Procedures; Miscellaneous Amendments

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment establishes, amends, suspends, or revokes Standard Instrument Approach Procedures (SIAPs) for operations at certain airports. These regulatory actions are needed because of the adoption of new or revised criteria, or because of changes occurring in the National Airspace System, such as the commissioning of new navigational facilities, addition of new obstacles, or changes in air traffic requirements. These changes are designed to provide safe and efficient use of the navigable airspace and to promote safe flight operations under instrument flight rules at the affected airports.

DATES: An effective date for each SIAP is specified in the amendatory provisions.

Incorporation by reference-approved by the Director of the Federal Register on December 31, 1980, and reapproved as of January 1, 1982.

ADDRESSES: Availability of matters incorporated by reference in the amendment is as follows:

For Examination

1. FAA Rules Docket, FAA Headquarters Building, 800 Independence Avenue SW., Washington, DC 20591;

2. The FAA Regional Office of the region in which the affected airport is located; or

3. The Flight Inspection Area Office which originated the SIAP.

For Purchase

Individual SIAP copies may be obtained from:

1. FAA Public Inquiry Center (APA–200), FAA Headquarters Building, 800 Independence Avenue SW., Washington, DC 20591; or

2. The FAA Regional Office of the region in which the affected airport is located.

By Subscription

Copies of all SIAPs, mailed once every 2 weeks, are for sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

FOR FURTHER INFORMATION CONTACT: Paul J. Best, Flight Procedures Standards Branch (AFS–420), Technical Programs Division, Flight Standards Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC 20591; telephone (202) 267–8277.

SUPPLEMENTARY INFORMATION: This amendment to part 97 of the Federal Aviation Regulations (14 CFR part 97) establishes, amends, suspends, or revokes Standard Instrument Approach Procedures (SIAPs). The complete regulatory description of each SIAP is contained in official FAA form documents which are incorporated by reference in this amendment under 5 U.S.C. 552(a), 1 CFR part 51, and § 97.20 of the Federal Aviation Regulations (FAR). The applicable FAA Forms are identified as FAA Forms 8260–3, 8260–4, and 8260–5. Materials incorporated by reference are available for examination or purchase as stated above.

The large number of SIAPs, their complex nature, and the need for a special format make their verbatim publication in the **Federal Register** expensive and impractical. Further, airmen do not use the regulatory text of the SIAPs, but refer to their graphic depiction on charts printed by publishers of aeronautical materials. Thus, the advantages of incorporation by reference are realized and publication of the complete description of each SIAP contained in FAA form documents is unnecessary. The provisions of this amendment state the affected CFR (and FAR) sections, with the types and effective dates of the SIAPs. This amendment also identifies the airport, its location, the procedure identification and the amendment number.

The Rule

This amendment to part 97 is effective upon publication of each separate SIAP as contained in the transmittal. Some SIAP amendments may have been previously issued by the FAA in a National Flight Data Center (FDC) Notice to Airmen (NOTAM) as an emergency action of immediate flight safety relating directly to published aeronautical charts. The circumstances which created the need for some SIAP amendments may require making them effective in less than 30 days. For the

remaining SIAPs, an effective date at least 30 days after publication is provided.

Further, the SIAPs contained in this amendment are based on the criteria contained in the U.S. Standard for Terminal Instrument Approach Procedures (TERPS). In developing these SIAPs, the TERPS criteria were applied to the conditions existing or anticipated at the affected airports. Because of the close and immediate relationship between these SIAPs and safety in air commerce, I find that notice and public procedure before adopting these SIAPs are unnecessary, impracticable, and contrary to the public interest and, where applicable, that good cause exists for making some SIAPs effective in less than 30 days.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) Is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. For the same reason, the FAA certifies that this amendment will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 97

Air traffic control, Airports, Navigation (air).

Issued in Washington, DC, on June 3, 1994.

Thomas C. Accardi,

Director, Flight Standards Service.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, part 97 of the Federal Aviation Regulations (14 CFR part 97) is amended by establishing, amending, suspending, or revoking Standard Instrument Approach Procedures, effective at 0901 UTC on the dates specified, as follows:

PART 97—STANDARD INSTRUMENT APPROACH PROCEDURES

1. The authority citation for part 97 continues to read as follows:

Authority: 49 U.S.C. app. 1348, 1354(a), 1421 and 1510; 49 U.S.C. 106(g); and 14 CFR 11.49(b)(2).

2. Part 97 is amended to read as follows:

§§ 97.23, 97.25, 97.27, 97.29, 97.31, 97.33, 97.35 [Amended]

By amending: § 97.23 VOR, VOR/DME, VOR or TACAN, and VOR/DME or TACAN; § 97.25 LOC, LOC/DME, LDA, LDA/DME, SDF, SDF/DME; § 97.27 NDB, NDB/DME; § 97.29 ILS, ILS/DME, ISMLS, MLS, MLS/DME, MLS/RNAV; § 97.31 RADAR SIAPs; § 97.33 RNAV SIAPs; and § 97.35 COPTER SIAPs, identified as follows:

. . . Effective August 18, 1994

Chandler, AZ, Chandler Muni, VOR RWY 4L, Amdt. 5
Rio Vista, CA, Rio Vista Muni, VOR–A, Amdt. 3, CANCELLED
Sanford, ME, Sanford Muni, NDB RWY 7, Amdt. 1
Sanford, ME, Sanford Muni, ILS RWY 7, Amdt. 2
Chandler, OK, Chandler Muni, NDB RWY 17, Amdt. 3, CANCELLED
Chandler, OK, Chandler Muni, NDB RWY 35, Orig

BILLING CODE 4910–13–M

---

14 CFR Part 97

[Docket No. 1606; Amdt. No. 27781]

Standard Instrument Approach Procedures; Miscellaneous Amendments

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment establishes, amends, suspends, or revokes Standard Instrument Approach Procedures (SIAPs) for operations at certain airports. These regulatory actions are needed because of the adoption of new or revised criteria, or because of changes occurring in the National Airspace System, such as the commissioning of new navigational facilities, addition of new obstacles, or changes in air traffic requirements. These changes are designed to provide safe and efficient use of the navigable airspace and to promote safe flight operations under instrument flight rules at the affected airports.

DATES: An effective date for each SIAP is specified in the amendatory provisions.

Incorporation by reference-approved by the Director of the Federal Register on December 31, 1980, and reapproved as of January 1, 1982.

ADDRESSES: Availability of matters incorporated by reference in the amendment is as follows:

For Examination

1. FAA Rules Docket, FAA Headquarters Building, 800 Independence Avenue, SW., Washington, DC 20591;
2. The FAA Regional Office of the region in which the affected airport is located; or
3. The Flight Inspection Area Office which originated the SIAP.

For Purchase

Individual SIAP copies may be obtained from:

1. FAA Public Inquiry Center (APA–200), FAA Headquarters Building, 800 Independence Avenue, SW., Washington, DC 20591; or
2. The FAA Regional Office of the region in which the affected airport is located.

By Subscription

Copies of all SIAPs, mailed once every 2 weeks, are for sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

FOR FURTHER INFORMATION CONTACT: Paul J. Best, Flight Procedures Standards Branch (AFS–420), Technical Programs Division, Flight Standards Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone (202) 267–8277.

SUPPLEMENTARY INFORMATION: This amendment to part 97 of the Federal Aviation Regulations (14 CFR part 97) establishes, amends, suspends, or revokes Standard Instrument Approach Procedures (SIAPs). The complete regulatory description of each SIAP is contained in official FAA form documents which are incorporated by reference in this amendment under 5 U.S.C. 552(a), 1 CFR part 51, and § 97.20 of the Federal Aviation Regulations (FAR). The applicable FAA Forms are identified as FAA Form 8260–5. Materials incorporated by reference are available for examination or purchase as stated above.

The large number of SIAPs, their complex nature, and the need for a special format make their verbatim publication in the **Federal Register** expensive and4mpractical. Further, airmen do not use the regulatory text of the SIAPs, but refer to their graphic depiction on charts printed by publishers of aeronautical materials. Thus, the advantages of incorporation by reference are realized and publication of the complete description of each SIAP contained in FAA form documents is unnecessary. The provisions of this amendment state the affected CFR (and FAR) sections, with the types and effective dates of the SIAPs. This amendment also identifies the airport, its location, the procedure identification and the amendment number.

This amendment to part 97 is effective upon publication of each separate SIAP as contained in the transmittal. The SIAPs contained in this amendment are based on the criteria contained in the United States Standard for Terminal Instrument Approach Procedures (TERPS). In developing these SIAPs, the TERPS criteria were applied to the conditions existing or anticipated at the affected airports.

The FAA has determined through testing that current non-localizer type, non-precision instrument approaches developed using the TERPS criteria can be flown by aircraft equipped with Global Positioning System (GPS) equipment. In consideration of the above, the applicable Standard Instrument Approach Procedures (SIAPs) will be altered to include "or GPS" in the title without otherwise reviewing or modifying the procedure. Because of the close and immediate relationship between these SIAPs and safety in air commerce, I find that notice and public procedure before adopting these SIAPs are unnecessary, impracticable, and contrary to the public interest and, where applicable, that good cause exists for making some SIAPs effective in less than 30 days.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) Is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. For the same reason, the FAA certifies that this amendment will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 97

Air traffic control, Airports, Navigation (air).

Issued in Washington, DC, on June 3, 1994.

Thomas C. Accardi,

Director, Flight Standards Service.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, part 97 of the Federal Aviation Regulations (14 CFR Part 97) is amended by establishing, amending, suspending, or revoking Standard Instrument Approach Procedures, effective at 0901 UTC on the dates specified, as follows:

PART 97—STANDARD INSTRUMENT APPROACH PROCEDURES

1. The authority citation for part 97 continues to read as follows:

Authority: 49 U.S.C. app. 1348, 1354(a), 1421 and 1510; 49 U.S.C. 106(g); and 14 CFR 11.49(b)(2).

2. Part 97 is amended to read as follows:

§§ 97.23, 97.27, 97.33, 97.35 [Amended]

By amending: § 97.23 VOR, VOR/DME, VOR or TACAN, and VOR/DME or TACAN; § 97.27 NDB, NDB/DME; § 97.33 RNAV SIAPs; and § 97.35 COPTER SIAPs, identified as follows:

14 CFR Part 97

[Docket No. 1605; Amdt. No. 27780]

Standard Instrument Approach Procedures; Miscellaneous Amendments

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment establishes, amends, suspends, or revokes Standard Instrument Approach Procedures (SIAPs) for operations at certain airports. These regulatory actions are needed because of changes occurring in the National Airspace System, such as the commissioning of new navigational facilities, addition of new obstacles, or changes in air traffic requirements. These changes are designed to provide safe and efficient use of navigable airspace and to promote safe flight operations under instrument flight rules at the affected airports.

DATES: An effective date for each SIAP is specified in the amendatory provisions.

Incorporation by reference-approved by the Director of the Federal Register on December 31, 1980, and reapproved as of January 1, 1982.

ADDRESSES: Availability of matter incorporated by reference in the amendment is as follows:

For Examination

1. FAA Rules Docket, FAA Headquarters Building, 800 Independence Avenue, SW., Washington, DC 20591;

2. The FAA Regional Office of the region in which affected airport is located; or
3. The Flight Inspection Area Office which originated the SIAP.

For Purchase

Individual SIAP copies may be obtained from:
1. FAA Public Inquiry Center (APA–200), FAA Headquarters Building, 800 Independence Avenue, SW., Washington, DC 20591; or
2. The FAA Regional Office of the region in which the affected airport is located.

By Subscription

Copies of all SIAPs, mailed once every 2 weeks, are for sale by the Superintendent of Documents, US Government Printing Office, Washington, DC 20402.

FOR FURTHER INFORMATION CONTACT: Paul J. Best, Flight Procedures Standards Branch (AFS–420), Technical Programs Division, Flight Standards Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone (202) 267–8277.

SUPPLEMENTARY INFORMATION: This amendment to part 97 of the Federal Aviation Regulations (14 CFR part 97) establishes, amends, suspends, or revokes Standard Instrument Approach Procedures (SIAPs). The complete regulatory description on each SIAP is contained in the appropriate FAA Form 8260 and the National Flight Data Center (FDC)/Permanent (P) Notices to Airmen (NOTAM) which are incorporated by reference in the amendment under 5 U.S.C. 552(a), 1 CFR part 51, and § 97.20 of the Federal Aviation Regulations (FAR). Materials incorporated by reference are available for examination or purchase as stated above.

The large number of SIAPs, their complex nature, and the need for a special format make their verbatim publication in the **Federal Register** expensive and impractical. Further, airmen do not use the regulatory text of the SIAPs, but refer to their graphic depiction of charts printed by publishers of aeronautical materials. Thus, the advantages of incorporation by reference are realized and publication of the complete description of each SIAP contained in FAA form documents is unnecessary. The Provisions of this amendment state the affected CFR (and FAR) sections, with the types and effective dates of the SIAPs. This amendment also identifies the airport, its location, the procedure identification and the amendment number.

The Rule

This amendment to part 97 of the Federal Aviation Regulations (14 CFR part 97) establishes, amends, suspends, or revokes SIAPs. For safety and timeliness of change considerations, this amendment incorporates only specific changes contained in the content of the following FDC/P NOTAM for each SIAP. The SIAP information in some previously designated FDC/Temporary (FDC/T) NOTAMs is of such duration as to be permanent. With conversion to FDC/P NOTAMs, the respective FDC/T NOTAMs have been cancelled.

The FDC/P NOTAMs for the SIAPs contained in this amendment are based on the criteria contained in the U.S. Standard for Terminal Instrument Approach Procedures (TERPS). In developing these chart changes to SIAPs by FDC/P NOTAMs, the TERPS criteria were applied to only these specific conditions existing at the affected airports.

All SIAP amendments in this rule have been previously issued by the FAA in a National Flight Data Center (FDC) Notice to Airmen (NOTAM) as an emergency action of immediate flight safety relating directly to published aeronautical charts. The circumstances which created the need for all these SIAP amendments requires making them effective in less than 30 days.

Further, the SIAPs contained in this amendment are based on the criteria contained in the TERPS. Because of the close and immediate relationship between these SIAPs and safety in air commerce, I find that notice and public procedure before adopting these SIAPs are unnecessary, impracticable, and contrary to the public interest and, where applicable, that good cause exists for making these SIAPs effective in less than 30 days.

Conclusion

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) Is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034 February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. For the same reason, the FAA certifies that this amendment will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 97

Air traffic control, Airports, Navigation (air).

Issued in Washington, DC, on June 3, 1994.

Thomas C. Accardi,

Director, Flight Standards Service.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, part 97 of the Federal Aviation Regulations (14 CFR part 97) is amended by establishing, amending, suspending, or revoking Standard Instrument Approach Procedures, effective at 0901 UTC on the dates specified, as follows:

PART 97—STANDARD INSTRUMENT APPROACH PROCEDURES

1. The authority citation for part 97 continues to read as follows:

Authority: 49 U.S.C. app. 1348, 1354(a), 1421 and 1510; 49 U.S.C. 106(g); and 14 CFR 11.49(b)(2).

2. Part 97 is amended to read as follows:

§§ 97.23, 97.25, 97.27, 97.29, 97.31, 97.33, 97.35 [Amended]

By amending: § 97.23 VOR, VOR/DME, VOR or TACAN, and VOR/DME or TACAN; § 97.25 LOC, LOC/DME, LDA, LDA/DME, SDF, SDF/DME; § 97.27 NDB, NDB/DME; § 97.29 ILS, ILS/DME, ISMLS, MLS, MLS/DME, MLS/RNAV; § 97.31 RADAR SIAPs; § 97.33 RNAV SIAPs; and § 97.35 COPTER SIAPs, identified as follows:

BILLING CODE 4910–13–M

DEPARTMENT OF COMMERCE

Bureau of Export Administration

15 CFR Parts 770, 771, and 775

[Docket No. 940533–4133]

RIN 0694–AA79

Exports to Argentina: Establishment of Import Certificate/Delivery Verification (IC/DV) Procedure, Shorter Processing Time Frames and General License GCG

AGENCY: Bureau of Export Administration, Commerce.

ACTION: Final rule.

SUMMARY: As part of the Department of Commerce initiative to streamline export licensing requirements for exports to countries that are demonstrating increased ability to safeguard reexports of U.S.-origin strategic goods and technology, the Bureau of Export Administration (BXA) is extending to Argentina export licensing benefits available under the provisions of section 5(k) of the Export Administration Act of 1979, as amended (EAA).

This action will lessen the administrative burden on U.S. exporters and their foreign customers.

Specifically, BXA is:

- Providing shorter processing times for license applications for Argentina; and
- Amending General License GCG to authorize certain shipments of U.S.-origin commodities to Argentina;

This rule also amends the Export Administration Regulations (EAR) to include new requirements based on the implementation of Import Certificate/Delivery Verification (IC/DV) procedures for Argentina.

DATES: *Effective Date:* This rule is effective June 15, 1994.

Grace Period: In lieu of the 45 day grace period provided in 15 CFR 775.10(c)(2), a 90 day grace period will apply to the requirement to obtain the Argentine Import Certificate to support an export license application. During the grace period, applications will be accepted whether or not supported by an Argentine Import Certificate.

FOR FURTHER INFORMATION CONTACT: David Schlechty, Office of Technology and Policy Analysis, Bureau of Export Administration, U.S. Department of Commerce, Telephone: (202) 482–4253.

SUPPLEMENTARY INFORMATION: The Bureau of Export Administration (BXA) requires a foreign importer to file an International Import Certificate (IC) in support of individual validated license applications to export certain commodities controlled for national security reasons to specified destinations. The commodities are identified by the code letter "A" following the Export Control Classification Number on the Commerce Control List, which identifies those items subject to Department of Commerce export controls. An IC is an undertaking by the government of the country of ultimate destination to exercise legal control over the disposition of those commodities covered by an IC.

BXA also requires a Delivery Verification Certificate (DV) on a selective basis, as described in 15 CFR 775.3(i). A DV is issued by the government of the country of ultimate destination after the exported commodities have either entered the export jurisdiction of that country or are otherwise accounted for by the importer.

New documentation practices adopted by Argentina warrant the inclusion of that country in the IC/DV procedure. This rule amends the EAR by adding Argentina to the list of countries that issue Import Certificates and by adding the name and address of the Argentina authorities to the list of foreign offices that administer the IC/DV systems.

Rulemaking Requirements

1. This final rule has been determined to be not significant for purposes of Executive Order 12866.

2. This rule involves collections of information subject to the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*). These collections have been approved by the Office of Management and Budget (OMB) under control numbers 0694–0001, 0694–0005, 0694–0007, 0694–0010, and 0694–0016. Licensing requirements under OMB control numbers 0694–0005, 0694–0007, and 0694–0010 will be reduced as a result of this rule, while there will be a small increase under 0694–0001 and 0694–0016, thereby reducing overall the paperwork burden on the public.

The Import Certificate requirements set forth in § 775.3 supersede the exclusion for Argentina, as a member of Country Group T, from the requirement for supporting documents for export license applications. The Import Certificate issued by the Government of Argentina does not constitute a collection of information under the Paperwork Reduction Act of 1980.

3. This rule does not contain policies with Federalism implications sufficient to warrant preparation of a Federalism assessment under Executive Order 12612.

4. Because a notice of proposed rulemaking and an opportunity for public comment are not required to be given for this rule by section 553 of the Administrative Procedure Act (5 U.S.C. 553) or by any other law, under sections 603(a) and 604(a) of the Regulatory Flexibility Act (5 U.S.C. 603(a) and 604(a)) no initial or final Regulatory Flexibility Analysis has to be or will be prepared.

5. The provisions of the Administrative Procedure Act, 5 U.S.C. 553, requiring notice of proposed rulemaking, the opportunity for public participation, and a delay in effective date, are inapplicable because this regulation involves a foreign and military affairs function of the United States. This rule does not impose a new control. No other law requires that a notice of proposed rulemaking and an opportunity for public comment be given for this rule.

Accordingly, it is issued in final form. However, comments from the public are always welcome. Comments should be submitted to Patricia Muldonian, Office of Technology and Policy Analysis, Bureau of Export Administration, Department of Commerce, P.O. Box 273, Washington, DC 20044.

List of Subjects

15 CFR Part 770

Administrative practice and procedure, Exports.

15 CFR Parts 771 and 775

Exports, Reporting and recordkeeping requirements.

Accordingly, Parts 770, 771, and 775 of the Export Administration Regulations are amended as follows:

1. The authority citation for 15 CFR parts 770, 771, and 775 continues to read as follows:

Authority: Pub. L. 90–351, 82 Stat. 197 (18 U.S.C. 2510 *et seq.*), as amended; sec. 101, Pub. L. 93–153, 87 Stat. 576 (30 U.S.C. 185), as amended; sec. 103, Pub. L. 94–163, 89 Stat. 877 (42 U.S.C. 6212), as amended; secs. 201 and 201(11)(e), Pub. L. 94–258, 90 Stat. 309 (10 U.S.C. 7420 and 7430(e)), as amended; Pub. PART 770—[AMENDED]

§ 770.14 [Amended]

2. Section 770.14 is amended by adding the word "Argentina," immediately before "Austria," in the introductory text of paragraph (a) and in paragraph (a)(3)(ii).

PART 771—[AMENDED]

§ 771.14 [Amended]

3. In § 771.14, paragraph (b) is amended by adding the word "Argentina," immediately before the word "Austria,".

PART 775—[AMENDED]

4. In § 775.1, paragraph (a) is amended by revising the fifth sentence to read as follows:

§ 775.1 Introduction.

(a) * * * Supporting documents are not required for Country Group T, unless specifically required by this part or if the Office of Export Licensing specifically requests a supporting document.

* * * * *

5. The table in § 775.1 is amended by adding "Argentina," immediately before "Australia," in the column titled "and the country of destination is:".

6. The list of countries in § 775.3(b) is amended by adding "Argentina" immediately before "Australia".

7. Supplement No. 1 to part 775 is amended by adding a new entry for "Argentina" in alphabetical order to read as follows:

SUPPLEMENT NO. 1.—AUTHORITIES ADMINISTERING IMPORT CERTIFICATE/DELIVERY VERIFICATION SYSTEM IN FOREIGN COUNTRIES [1]

[See footnotes at end of table]

Country	IC/DV authorities	System administered [2]
Argentina	Secretaria Ejecutiva de la Comision Nacional de Control de Exportaciones, Sensitivas y Material Belico, Balcarce 362—1er. piso—Capital Federal—CP 1064, Buenos Aires, Tel. 334–0738, Fax 331–1618.	IC/DV

SUPPLEMENT NO. 1.—AUTHORITIES ADMINISTERING IMPORT CERTIFICATE/DELIVERY VERIFICATION SYSTEM IN FOREIGN COUNTRIES [1]—Continued

[See footnotes at end of table]

Country	IC/DV authorities	System administered [2]
.	.	.

[1] Facsimiles of Import Certificates and Delivery Verifications issued by each of these countries may be inspected at the Bureau of Export Administration Western Regional Office, 3300 Irvine Avenue, Suite 345, Newport Beach, California 92660–3198 or at any U.S. Department of Commerce District Office (see listing in Commerce Office Addresses section of these regulations) or at the Office of Export Licensing, Room 1099D, U.S. Department of Commerce, 14th Street and Pennsylvania Avenue, NW., Washington, DC 20230.
[2] IC—Import Certificate and/or DV—Delivery Verification.

Dated: June 9, 1994.

Sue E. Eckert,

Assistant Secretary for Export Administration.

BILLING CODE 3510–DT–P

15 CFR Parts 771, 773, 779, 785, 786, and 799

[Docket No. 940672–4172]

RIN 0694–AA99

Exports to South Africa; Removal of Foreign Policy Controls

AGENCY: Bureau of Export Administration, Commerce.

ACTION: Final rule.

SUMMARY: On May 25, the United Nations Security Council (UNSC) passed Resolution 919 lifting the arms embargo against South Africa, and withdrawing their recommendation for other voluntary restrictions on sales to the South African military and police. The UNSC took this action at the request of the new South African Government, which was sworn in on May 10 following that nation's first all-race elections. With the end of the apartheid era in South Africa, the justification for maintaining the arms embargo and other restrictions no longer exists.

In recognition of the UNSC action and the installation of a democratically elected, nonracial government in South Africa, the Department of Commerce's export control regulations are hereby amended to eliminate controls established to implement an arms embargo, and to remove specific controls on exports to the South African military and police.

EFFECTIVE DATE: This rule is effective May 25, 1994.

FOR FURTHER INFORMATION CONTACT: David Schlechty, Office of Technology and Policy Analysis, Bureau of Export Administration, Telephone: (202) 482–4252.

SUPPLEMENTARY INFORMATION:

Rulemaking Requirements

1. This final rule has been determined to be significant for purposes of E.O. 12866.

2. This rule involves collections of information subject to the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*). These collections have been approved by the Office of Management and Budget under control numbers 0694–0002, 0694–0005, 0694–0006, 0694–0007, 0694–0010, 0694–0015, 0694–0038, 0694–0047 and 0694–0048.

3. This rule does not contain policies with Federalism implications sufficient to warrant preparation of a Federalism assessment under Executive Order 12612.

4. Because a notice of proposed rulemaking and an opportunity for public comment are not required to be given for this rule by section 553 of the Administrative Procedure Act (5 U.S.C. 553) or by any other law, under section 3(a) of the Regulatory Flexibility Act (5 U.S.C. 603(a) and 604(a)) no initial or final Regulatory Flexibility Analysis has to be or will be prepared.

5. The provisions of the Administrative Procedure Act (5 U.S.C. 553) requiring notice of proposed rulemaking, the opportunity for public participation, and a delay in effective date, are inapplicable because this regulation involves a military and foreign affairs function of the United States. Further, no other law requires that a notice of proposed rulemaking and an opportunity for public comment be given for this rule.

Therefore, this regulation is issued in final form. Although there is no formal comment period, public comments on this regulation are welcome on a continuing basis. Comments should be submitted to Hillary Hess, Office of Technology and Policy Analysis, Bureau of Export Administration, Department of Commerce, P.O. Box 273, Washington, DC 20044.

PART 771—[AMENDED]

§ 771.2 [Amended]

3. Section 771.2 is amended by removing and reserving paragraph (c)(11).

§ 771.4 [Amended]

4. Section 771.4 is amended by removing and reserving paragraph (b)(3).

PART 773—[AMENDED]

§ 773.1 [Amended]

5. Section 773.1 is amended by removing and reserving paragraph (a).

§ 773.2 [Amended]

6. Section 773.2 is amended by removing and reserving paragraph (b)(1).

7. Section 773.3 is amended by removing paragraph (d)(3)(ii)(E)(*3*) and revising paragraph (b)(1) to read as follows:

§ 773.3 Distribution license.

* * * * *

(b) *Ineligible or restricted commodities.*

(1) *Ineligible commodities.* All commodities listed in the Commerce Control List (Supplement No. 1 to § 799.1 of this subchapter) will be considered for eligibility under the Distribution License procedure, except commodities listed in Supplement No. 1 to part 773. Software and technology are not eligible for this procedure. Ineligible items require an individual validated license or written reexport authorization, except when the items are otherwise eligible for a general license or permissive reexport authorization.

* * * * *

8. Section 773.7 is amended:

a. By revising paragraph (b);

b. By revising paragraphs (d)(1)(ii)(C) and (d)(1)(ii)(D);

c. By removing paragraph (d)(1)(ii)(E); and

d. By revising the introductory text of paragraph (d)(3)(ii), to read as follows:

§ 773.7 Service Supply Procedure.

* * * * *

(b) *Ineligible or restricted commodities.* All commodities listed in the Commerce Control List (Supplement No. 1 to § 799.1 of this subchapter) will be considered for eligibility under the Service Supply Procedure, except:

(1) Parts to service arms, ammunition or implements of war referred to in Supplement No. 2 to Part 770; and

(2) Commodities listed in Supplement No. 1 to Part 773 and any parts to service such commodities.

* * * * *

(d) * * *

(1) * * *

(ii) * * *

(C) Form BXA–6026P, Service Supply (SL) License Statement By U.S. Exporter; and

(D) Comprehensive narrative statement by the exporter.

* * * * *

(3) * * *

(ii) *Application.* Each application for reexport by a foreign manufacturer shall include the documents specified in paragraphs (d)(3)(ii)(A) and (B) of this section:

* * * * *

PART 779—[AMENDED]

9. Section 779.4 is amended by removing and reserving paragraph (e), and by revising paragraph (a) to read as follows:

§ 779.4 General license GTDR: Technical data under restriction.

* * * * *

(a) *Country restrictions.* General license GTDR with written assurance may not be used for export to Country Groups Q, W, Y, S, and Z, the People's Republic of China, Iran, or Syria. General License GTDR without written assurance (GTDU) may not be used for exports to Country Groups S and Z, Iran or Syria of software available at retail outlets as described in the General Software Note (Supplement No. 2 to § 799.1 of this subchapter). General License GTDR without written assurance (GTDU) as described in any entry on the Commerce Control List (Supplement No. 1 to § 799.1 of this subchapter) may not be used for exports to Country Groups S and Z. This General License is subject to the prohibitions described in § 771.2(c) of this subchapter.

* * * * *

Supplement No. 2 to Part 779 [Removed and Reserved]

10. Supplement No. 2 to part 779 is removed and reserved.

PART 785—[AMENDED]

§ 785.4 [Amended]

11. Section 785.4 is amended by removing and reserving paragraph (a).

Supplement No. 1 to Part 785 [Removed]

12. Supplement No. 1 to Part 785 is removed.

Supplement No. 2 to Part 785 [Removed]

13. Supplement No. 2 to Part 785 is removed.

PART 786—[AMENDED]

14. Section 786.6 is amended by revising paragraph (a) and the introductory text of paragraph (c) to read as follows:

§ 786.6 Destination control statements.

(a) *Requirement for destination control statement.* When required by this § 786.6(a), an appropriate destination control statement is required to be entered on all copies of the bill of lading, the air waybill, and the commercial invoice covering an export from the United States. The same statement shall appear on all copies of all such shipping documents that apply to the same shipment. At the discretion of the exporter or his agent, a destination control statement may be entered on the shipping documents for exports for which no destination control statement is required. For exports to all destinations, one of the three destination control statements described in § 786.6 (c) and (d) is required for an export under—

(1) A validated license;

(2) General License GLV, GTF-US, G-TEMP, GLR, GFW, GNSG or GCT.

* * * * *

(c) *Statement to be used.* For exports to all destinations, one of the three destination control statements set forth in § 786.6(d) below may be used, as follows:

* * * * *

PART 799—[AMENDED]

15. Section 799.1 is amended by revising paragraph (b)(4) to read as follows:

§ 799.1 The Commerce Control List and how to use it.

* * * * *

(b) * * *

(4) The four digit number will be followed by a code letter. This code letter is a key to the documentation requirements of part 775 of this subchapter, and is used by many

exporters as a data processing code to indicate the country group level of control for CCL entries. The letters used and the respective letter country controls are as follows:

Code letters	Country groups for which a validated license is required
A[1]	QSTVWYZ (Cooperating countries).
B	QSTVWYZ (Other).
C	QSTVWYZ, except specified countries.
D	QSTVWYZ and Canada.
E	SZ and countries listed in certain supplements to the EAR.
F	SZ and certain other specified countries.
G	SZ.
H	Z.
I	None.

[1] Only "A" level items are subject to the IC/DV procedures (see § 775.3).

* * * * *

16. In Supplement No. 1 to § 799.1 (the Commerce Control List), Category 1, Materials, a new 1C92F is added and 1C93F is revised to read as follows:

1C92F Oil Well Perforators.

Requirements

Validated License Required: SZ, Iran, Syria
Unit: Number
Reason for Control: FP
GLV: $0
GCT: No
GFW: No

List of Items Controlled

a. Shaped charges specially designed for oil well operations, utilizing one charge functioning along a single axis, that upon detonation produce a hole, and:

a.1. Contain any formulation of RDX, PYX, PETN, HNS or HMX; and

a.2. Have only a uniformly shaped conical liner with an included angle of 90 degrees or less; and

a.3. Have a total explosive mass of no more than 90 grams; and

a.4. Have a diameter not exceeding three inches.

1C93F Fibrous and filamentary materials, not controlled by 1C10 or 1C50, for use in composite structures and with a specific modulus of 3.18 x 10^6 m or greater and a specific tensile strength of 7.62 x 10^4 m or greater.

Requirements

Validated License Required: SZ, Iran, Syria
Unit: Kilograms
Reason for Control: FP
GLV: $0
GCT: No
GFW: No

Supplement No. 1 to § 799.1 [Amended]

17. In Supplement No. 1 to § 799.1 (the Commerce Control List), the entries listed below are amended by revising the Requirements Section for each entry:

A. In Category 1, Materials: ECCNs 1A96G, 1B96G, 1C94F, 1C96G, 1D93F, 1D94F, 1D96G, 1E02A, 1E94F and 1E96G;

B. In Category 2, Material Processing: ECCNs 2A94F, 2A96G, 2B85F, 2B91F, 2B92F, 2B93F, 2B94F, 2B96G, 2D92F, 2D93F, 2D94F, 2D96G, 2E93F, 2E94F, and 2E96G;

C. In Category 3, Electronics: ECCNs 3A92F, 3A93F, 3A94F, 3A96G, 3B91F, 3B96G, 3C96G, 3D94F, 3D96G, 3E94F and 3E96G;

D. In Category 4, Computers: ECCNs 4A94F, 4A96G, 4B94F, 4B96G, 4C94F, 4C96G, 4D92F, 4D93F, 4D94F, 4D96G, 4E92F, 4E93F, 4E94F and 4E96G;

E. In Category 5, Telecommunications and "Information Security": ECCNs 5A90A, 5A91F, 5A92F, 5A93F, 5A94F, 5A95F, 5A96G, 5B94F, 5B96G, 5C96G, 5D90F, 5D91F, 5D92F, 5D93F, 5D94F, 5D95F, 5D96G, 5E90F, 5E91F, 5E92F, 5E93F, 5E94F, 5E95F and 5E96G;

F. In Category 6, Sensors: 6A90F, 6A92F, 6A93F, 6A94F, 6A96G, 6B96G, 6C96G, 6D90F, 6D92F, 6D93F, 6D94F, 6D96G, 6E90F, 6E92F, 6E93F, 6E94F and 6E96G;

G. In Category 7, Avionics and Navigation: ECCNs 7A94F, 7B94F, 7D94F and 7E94F;

H. In Category 8, Marine Technology: 8A92F, 8A93F, 8A94F, 8A96G, 8B96G, 8C96G, 8D92F, 8D93F, 8D96G, 8E92F, 8E93F and 8E96G;

I. In Category 9, Propulsion Systems and Transportation Equipment: 9A90F, 9A91F, 9A92F, 9A93F, 9A94F, 9A96G, 9B94F, 9B96G, 9D90F, 9D91F, 9D93F, 9D94F, 9D96G, 9E90F, 9E91F, 9E93F, 9E94F and 9E96G; and

J. In Category 0, Miscellaneous: 0A18A, 0A84C, 0A86F, 0A95H, 0A96G, 0E18A, 0E84C and 0E96G.

1A96G Other materials, n.e.s.

Requirements

Validated License Required: SZ
Unit: $ value
Reason for Control: FP
GLV: $0
GCT: No
GFW: No

1B6G Other test, inspection, and production equipment for materials.

Requirements

Validated License Required: SZ
Unit: $ value
Reason for Control: FP
GLV: $0
GCT: No
GFW: No

1C94F Fluorocarbon electronic cooling fluids.

Requirements

Validated License Required: SZ, Iran, Syria
Unit: Kilograms
Reason for Control: FP
GLV: $0
GCT: No
GFW: No

* * * * *

1C96G Other materials for production of Category 1 items, n.e.s.

Requirements

Validated License Required: SZ
Unit: $ value
Reason for Control: FP
GLV: $0
GCT: No
GFW: No

1D93F "Software" specially designed for the "development", "production", or "use" of fibrous and filamentary materials controlled by 1C50.b or 1C93F.

Requirements

Validated License Required: SZ, Iran, Syria
Unit: $ value
Reason for Control: FP
GTDR: No
GTDU: Yes, except destinations listed under *Validated License Required*

1D94F "Software" specially designed for the "development" or "production" of fluorocarbon electronic cooling fluids controlled by 1C94F.

Requirements

Validated License Required: SZ, Iran, Syria
Unit: $ value
Reason for Control: FP
GTDR: No
GTDU: Yes, except destinations listed under *Validated License Required*

1D96G Other software specially designed or modified for the "development", "production", or "use" of equipment controlled by Category 1, n.e.s.

Requirements

Validated License Required: SZ
Unit: $ value
Reason for Control: FP
GTDR: No
GTDU: Yes, except destinations listed under *Validated License Required*

1E02A Other technology.

Requirements

Validated License Required:
QSTVWYZ
Reason for Control: NS
GTDR: Yes, except Iran and Syria
GTDU: No

* * * * *

1E94F Technology for the "development", "production", or "use" of fibrous and filamentary materials controlled by 1C93F or fluorocarbon electronic cooling fluids controlled by 1C94F.

Requirements

Validated License Required: SZ, Iran, Syria
Reason for Control: FP
GTDR: No
GTDU: Yes, except destinations listed under *Validated License Required*

1E96G Other technology, n.e.s., for the "development", "production", or "use" of items controlled by Category 1.

Requirements

Validated License Required: SZ
Reason for Control: FP
GTDR: No
GTDU: Yes, except destinations listed under *Validated License Required*

2A94F Portable electric generators and specially designed parts.

Requirements

Validated License Required: SZ, Iran
Unit: $ value
Reason for Control: FP
GLV: $0
GCT: No
GFW: No

2A96G Other equipment, assemblies, and components in Category 2A, n.e.s.

Requirements

Validated License Required: SZ
Unit: $ value
Reason for Control: FP
GLV: $0
GCT: No
GFW: No

2B85F Equipment specially designed for manufacturing shotgun shells; and ammunition hand-loading equipment for both cartridges and shotgun shells.

Requirements

Validated License Required: SZ
Unit: $ value
Reason for Control: FP
GLV: $0
GCT: No
GFW: No

2B91F "Numerical control" units for machine tools and numerically controlled machine tools, n.e.s.

Requirements

Validated License Required: SZ, Iran, Syria
Unit: Number
Reason for Control: FP
GLV: $0
GCT: No
GFW: No

2B92F Manual dimensional inspection machines with two or more axes, and measurement uncertainty equal to or less (better) than (3 + L/300) micrometer in any axes (L measured length in mm).

Requirements

Validated License Required: SZ, Iran, Syria
Unit: Number
Reason for Control: FP
GLV: $0
GCT: No
GFW: No

2B93F Gear making and/or finishing machinery not controlled by 2B03A capable of producing gears to a quality level of better than AGMA 11.

Requirements

Validated License Required: SZ, Iran, Syria
Unit: $ value
Reason for Control: FP
GLV: $0
GCT: No
GFW: No

2B94F Robots not controlled by 2B07A that are capable of employing feedback information in real-time processing from one or more sensors to generate or modify "programs" or to generate or modify numerical program data.

Requirements

Validated License Required: SZ, Iran, Syria
Unit: $ value
Reason for Control: FP
GLV: $0
GCT: No
GFW: No

2B96G Other test, inspection, and production equipment in Category 2B, n.e.s.

Requirements

Validated License Required: SZ
Unit: $ value
Reason for Control: FP
GLV: $0
GCT: No
GFW: No

2D92F "Software" specially designed for the "development" or "production" of portable electric generators controlled by 2A94F.

Requirements

Validated License Required: SZ, Iran
Unit: $ value
Reason for Control: FP
GTDR: No
GTDU: Yes, except destinations listed under Validated License Required

2D93F "Software" specially designed for the "development" or "production" of manual dimensional inspection machines controlled by 2B92F.

Requirements

Validated License Required: SZ, Iran, Syria
Unit: $ value
Reason for Control: FP
GTDR: No
GTDU: Yes, except destinations listed under *Validated License Required*

2D94F "Software" specially designed for the "development", "production", or "use" of "numerical control" units and numerically controlled machine tools controlled by 2B91F, gear making and/or finishing machinery controlled by 2B93F, or robots controlled by 2B94F.

Requirements

Validated License Required: SZ, Iran, Syria
Unit: $ value
Reason for Control: FP
GTDR: No
GTDU: Yes, except destinations listed under *Validated License Required*

2D96G "Software", n.e.s., for the "development", "production", or "use" of commodities controlled under Category 2.

Requirements

Validated License Required: SZ
Unit: $ value
Reason for Control: FP
GTDR: No
GTDU: Yes, except destinations listed under *Validated License Required*

2E93F—Technology for the "development", "production", or "use" of portable electric generators controlled by 2A94F.

Requirements

Validated License Required: SZ, Iran
Reason for Control: FP
GTDR: No
GTDU: Yes, except destinations listed under *Validated License Required*

2E94F Technology for the "development", "production", or "use" of "numerical control" units and numerically controlled machine tools controlled by 2B91F, manual dimensional inspection machines controlled by 2B92F, gear making and/or finishing machinery controlled by 2B93F, or robots controlled by 2B94F.

Requirements

Validated License Required: SZ, Iran, Syria
Reason for Control: FP
GTDR: No
GTDU: Yes, except destinations listed under *Validated License Required*

2E96G Technology, n.e.s., for the "development", "production", or "use" of commodities controlled under Category 2.

Requirements

Validated License Required: SZ.
Reason for Control: FP
GTDR: No
GTDU: Yes, except destinations listed under *Validated License Required*

3A92F Electronic devices and components not controlled by 3A01

Requirements

Validated License Required: SZ, Iran, Syria
Unit: Number
Reason for Control: FP
GLV: $0
GCT: No
GFW: No

* * * * *

3A93F Electronic test equipment in Category 3A, n.e.s.

Requirements

Validated License Required: SZ, Iran, Syria
Unit: $ value
Reason for Control: FP
GLV: $1,000 for Syria only
GCT: No
GFW: No

3A94F General purpose electronic equipment not controlled by 3A02.

Requirements

Validated License Required: SZ, Iran, Syria
Unit: Number
Reason for Control: FP
GLV: $0
GCT: No
GFW: No

Unit: Number
Reason for Control: FP
GLV: $0
GCT: No
GFW: No

3B91F Equipment not controlled by 3B01 for the manufacture or testing of electronic components and materials, and specially designed components and accessories therefor.

Requirements

Validated License Required: SZ, Iran, Syria
Unit: Number
Reason for Control: FP
GLV: $0
GCT: No
GFW: No

* * * * *

3B96G Other test, inspection, and production equipment in Category 3B, n.e.s.

Requirements

Validated License Required: SZ.
Unit: Number
Reason for Control: FP
GLV: $0
GCT: No
GFW: No

3C96G Other materials in Category 3C, n.e.s.

Requirements

Validated License Required: SZ.
Unit: $ value
Reason for Control: FP
GLV: $0
GCT: No
GFW: No

3D94F "Software" specially designed for the "development", "production", or "use" of electronic devices or components controlled by 3A92, electronic test equipment controlled by 3A93, general purpose electronic equipment controlled by 3A94, or manufacturing and test equipment controlled by 3B91.

Requirements

Validated License Required: SZ, Iran, Syria
Unit: $ value
Reason for Control: FP
GTDR: No
GTDU: Yes, except destinations listed under *Validated License Required*

3D96G "Software", n.e.s., for the "development", "production", or "use" of commodities controlled under Category 3.

Requirements

Validated License Required: SZ.
Unit: $ value
Reason for Control: FP
GTDR: No
GTDU: Yes, except destinations listed under *Validated License Required*

3E94F Technology for the "development", "production", or "use" of electronic devices or components controlled by 3A92, electronic test equipment controlled by 3A93, general purpose electronic equipment controlled by 3A94, or manufacturing and test equipment controlled by 3B91.

Requirements

Validated License Required: SZ, Iran, Syria
Reason for Control: FP
Unit: $ value
GTDR: No
GTDU: Yes, except destinations listed under *Validated License Required*

3E96G Technology, n.e.s., for the "development", "production", or "use" of commodities controlled under Category 3.

Requirements

Validated License Required: SZ.
Unit: $ value
Reason for Control: FP
GTDR: No
GTDU: Yes, except destinations listed under *Validated License Required*

4A94F Computers, "assemblies" and related equipment not controlled by 4A01, 4A02, or 4A03, and specially designed components therefor

Requirements

Validated License Required: SZ, Iran, Syria
Unit: Computers and Peripherals in Number, parts and accessories in $ value
Reason For Control: FP
GLV: $0
GCT: No
GFW: No

* * * * *

4A96G Other computer equipment, "assemblies" and components, n.e.s

Requirements

Validated License Required: SZ.
Unit: Computers and Peripherals in Number, parts and accessories in $ value
Reason For Control: FP
GLV: $0
GCT: No
GFW: No

4B94F Equipment for the "development" and "production" of magnetic and optical storage equipment, as described in this entry.

Requirements

Validated License Required: SZ, Iran, Syria
Unit: $ value
Reason for Control: FP
GLV: $0
GCT: No
GFW: No

* * * * *

4B96G Computer test, production and inspection equipment, n.e.s.

Requirements

Validated License Required: SZ
Unit: $ value
Reason For Control: FP
GLV: $0
GCT: No
GFW: No

4C94F Materials specially formulated for and "required" for the fabrication of head/disk assemblies for controlled magnetic and magneto-optical hard disk drives.

Requirements

Validated License Required: SZ, Iran, Syria
Unit: $ value
Reason for Control: FP
GLV: $0
GCT: No
GFW: No

4C96G Materials, n.e.s., specially formulated for and "required" for the fabrication of computer equipment, "assemblies" and components.

Requirements

Validated License Required: SZ
Unit: $ value
Reason For Control: FP
GLV: $0
GCT: No
GFW: No

4D92F "Software" specially designed or modified for the "development", "production", or "use" of equipment controlled by 4B94 and materials controlled by 4C94.

Requirements

Validated License Required: SZ, Iran, Syria
Unit: $ value
Reason for Control: FP
GTDR: No
GTDU: Yes, except destinations listed under *Validated License Required*

4D93F "Program" proof and validation "software", "software" allowing the automatic generation of "source codes", and operating systems not controlled by 4D03 that are specially designed for "real time processing" equipment.

Requirements

Validated License Required: SZ, Iran, Syria
Unit: $ value
Reason for Control: FP
GTDR: No
GTDU: Yes, except destinations listed under *Validated License Required*

* * * * *

4D94F "Software" specially designed for the "development", "production", or "use" of "digital computers", "assemblies" and related equipment therefor controlled by 4A94.

Requirements

Validated License Required: SZ, Iran, Syria
Unit: $ value
Reason for Control: FP
GTDR: No
GTDU: Yes, except destinations listed under *Validated License Required*

4D96G "Software", n.e.s., specially designed or modified for the "development", "production", or "use" of computer equipment or materials controlled by 4A, 4B, or 4C, and other "software", n.e.s.

Note: Certain "software" must also be evaluated against the performance characteristics of the telecommunications or "information security" entries in Category 5. See Notes 1 and 2 following the heading of Category 4.

Requirements

Validated License Required: SZ
Unit: $ value
Reason for Control: FP
GTDR: No
GTDU: Yes, except destinations listed under *Validated License Required*

4E92F Technology for the "development", "production", or "use" of equipment controlled by 4B94, materials controlled by 4C94, or "software" controlled by 4D92, 4D93, or 4D94.

Requirements

Validated License Required: SZ, Iran, Syria
Unit: $ value
Reason for Control: FP
GTDR: No
GTDU: Yes, except destinations listed under *Validated License Required*

4E93F Technology for the "development" or "production" of graphics accelerators or equipment designed for "multi-data-stream processing" and technology "required" for the "development" or "production" of magnetic hard disk drives.

Requirements

Validated License Required: SZ, Iran, Syria
Unit: $ value
Reason for Control: FP
GTDR: No
GTDU: Yes, except destinations listed under *Validated License Required*

* * * * *

4E94F Technology for the "development", "production", or "use" of "digital computers", "assemblies" and related equipment therefor controlled by 4A94F.

Requirements

Validated License Required: SZ, Iran, Syria
Unit: $ value
Reason for Control: FP
GTDR: No
GTDU: Yes, except destinations listed under *Validated License Required*

4E96G Technology, n.e.s., for the "development", "production", or "use" of items controlled by Category 4.

Note: Technology for certain equipment or "software" must also be evaluated against the performance characteristics of the telecommunications or "information security" entries in Category 5. See Notes 1 and 2 following the heading of Category 4.

Requirements

Validated License Required: SZ
Unit: $ value
Reason for Control: FP
GTDR: No
GTDU: Yes, except destinations listed under *Validated License Required*

5A90A Any type of telecommunications equipment, not controlled by 5A01, specially designed to operate outside the temperature range from 219 K (−54° C) to 397 K (124° C).

Requirements

Validated License Required: SZ, Iran, Syria
Unit: $ value
Reason for Control: FP
GLV: $0
GCT: No
GFW: No

5A91F Transmission equipment, not controlled by 5A02, containing items set forth below.

Requirements

Validated License Required: SZ, Iran, Syria
Unit: $ value
Reason for Control: FP
GLV: $0
GCT: No
GFW: No

* * * * *

5A92F Mobile communications equipment, n.e.s., and "assemblies" and components therefor.

Requirements

Validated License Required: SZ, Iran, Syria
Unit: $ value
Reason for Control: FP
GLV: $0
GCT: No
GFW: No

5A93F Radio relay communications equipment designed for use at frequencies equal to or exceeding 19.7 GHz and "assemblies" and components therefor, n.e.s.

Requirements

Validated License Required: SZ, Iran, Syria
Unit: $ value
Reason For Control: FP
GLV: $0
GCT: No
GFW: No

5A94F "Data (message) switching" equipment or systems designed for "packet-mode operation" and assemblies and components therefor, n.e.s.

Requirements

Validated License Required: SZ, Iran, Syria
Unit: $ value
Reason For Control: FP
GLV: $0
GCT: No
GFW: No

Notes: "Data (message) switching" is defined as the technique for:

(a) Accepting data groups (including messages, packets, or other digital or telegraphic information groups) transmitted as a composite whole);

(b) Storing (buffering) data groups as necessary;

(c) Processing part of all the data groups, as necessary, for the purpose of:

(1) Control (routing, priority, formatting, code conversion, error control, retransmission or journaling);

(2) Transmission; or

(3) Multiplexing; and

(d) Retransmitting (processed) data groups when transmission or receiving facilities are available.

5A95F "Information security" equipment, n.e.s. (e.g., cryptographic, cryptoanalytic, and cryptologic equipment, n.e.s.), and components therefor.

Requirements

Validated License Required: SZ, Iran
Unit: $ value
Reason for Control: FP
GLV: $0
GCT: No
GFW: No

5A96G Telecommunications equipment, "assemblies", and components, n.e.s.

Requirements

Validated License Required: SZ
Unit: $ value
Reason for Control: FP
GLV: $0
GCT: No
GFW: No

5B94F Telecommunications test equipment, n.e.s.

Requirements

Validated License Required: SZ, Iran, Syria
Unit: $ value
Reason for Control: FP
GLV: $0
GCT: No
GFW: No

Note: General License G-DEST is available for shipment to Syria valued at $1,000 or less

5B96G Telecommunications and "information security" production equipment, n.e.s.

Requirements

Validated License Required: SZ
Unit: $ value
Reason for Control: FP
GLV: $0
GCT: No
GFW: No

5C96G Other materials required for the manufacture of telecommunications or "information security" equipment, "assemblies" and components, n.e.s

Requirements

Validated License Required: SZ
Unit: $ value
Reason for Control: FP
GLV: $0
GCT: No
GFW: No

5D90F "Software" specially designed or modified for the "development", "production", or "use" of equipment controlled by 5A90 or 5A91.

Requirements

Validated License Required: SZ, Iran, Syria
Unit: $ value
Reason for Control: FP
GTDR: No
GTDU: Yes, except destinations listed under *Validated License Required*

5D91F "Software" specially designed or modified for the "development", "production", or "use" of telecommunications test equipment controlled by 5B94.

Requirements

Validated License Required: SZ, Iran, Syria
Unit: $ value
Reason for Control: FP
GTDR: No
GTDU: Yes, except destinations listed under *Validated License Required*

5D92F "Software" specially designed or modified for the "development", "production" or "use" of mobile communications equipment controlled by 5A92.

Requirements

Validated License Required: SZ, Iran, Syria
Unit: $ value
Reason for Control: FP
GTDR: No
GTDU: Yes, except destinations listed under *Validated License Required*

5D93F "Software" specially designed or modified for the "development", "production" or "use" of radio relay communication equipment controlled by 5A93.

Requirements

Validated License Required: SZ, Iran, Syria
Unit: $ value
Reason for Control: FP
GTDR: No
GTDU: Yes, except destinations listed under *Validated License Required*

5D94F "Software" specially designed or modified for the "development", "production" or "use" of "data (message) switching" equipment controlled by 5A94.

Requirements

Validated License Required: SZ, Iran, Syria
Unit: $ value
Reason for Control: FP
GTDR: No

GTDU: Yes, except destinations listed under *Validated License Required*

5D95F "Software", n.e.s., specially designed or modified for the "development", "production", or "use" of "information security" or cryptologic equipment (e.g., equipment controlled by 5A95).

Requirements

Validated License Required: SZ, Iran
Unit: $ value
Reason for Control: FP
GTDR: No
GTDU: Yes, except destinations listed under *Validated License Required*

5D96G "Software", n.e.s., specially designed or modified for the "development", "production", or "use" of telecommunications equipment.

Requirements

Validated License Required: SZ
Unit: $ value
Reason for Control: FP
GTDR: No
GTDU: Yes, except destinations listed under *Validated License Required*

5E90F Technology for the "development", "production", or "use" of equipment controlled by 5A90 or 5A91 or "software" controlled by 5D90.

Requirements

Validated License Required: SZ, Iran, Syria
Unit: $ value
Reason for Control: FP
GTDR: No
GTDU: Yes, except destinations listed under *Validated License Required*

5E91F Technology for the "development", "production", or "use" of telecommunications test equipment controlled by 5B94, or "software" controlled by 5D91.

Requirements

Validated License Required: SZ, Iran, Syria
Reason for Control: FP
Unit: $ value
GTDR: No
GTDU: Yes, except destinations listed under *Validated License Required*

5E92F Technology for the "development", "production" or "use" of mobile communications equipment controlled by 5A92, or "software" controlled by 5D92.

Requirements

Validated License Required: SZ, Iran, Syria
Unit: $ value
Reason for Control: FP
GTDR: No
GTDU: Yes, except destinations listed under *Validated License Required*

5E93F Technology for the "development", "production" or "use" of radio relay communication equipment controlled by 5A93, or "software" controlled by 5D93.

Requirements

Validated License Required: SZ, Iran, Syria
Reason for Control: FP
GTDR: No
GTDU: Yes, except destinations listed under *Validated License Required*

5E94F Technology for the "development", "production" or "use" of "data (message) switching" equipment controlled by 5A94, or "software" controlled by 5D94.

Requirements

Validated License Required: SZ, Iran, Syria
Reason for Control: FP
Unit: $ value
GTDR: No
GTDU: Yes, except destinations listed under *Validated License Required*

5E95F Technology, n.e.s., for the "development", "production", or "use" of "information security" or cryptologic equipment (e.g., equipment controlled by 5A95), or "software" controlled by 5D95.

Requirements

Validated License Required: SZ, Iran
Reason for Control: FP
Unit: $ value
GTDR: No
GTDU: Yes, except destinations listed under *Validated License Required*

5E96G Technology, n.e.s., for the "development", "production", or "use" of telecommunications equipment.

Requirements

Validated License Required: SZ
Reason for Control: FP
GTDR: No
GTDU: Yes, except destinations listed under *Validated License Required*

6A90F Airborne radar equipment, n.e.s., and specially designed components therefor.

Requirements

Validated License Required: SZ, Iran, Syria
Unit: $ value
Reason for Control: FP
GLV: $0
GCT: No
GFW: No

6A92F Gravity meters (gravimeters) not controlled by 6A07A.

Unit: $ value

Reason for Control: FP
GLV: $0
GCT: No
GFW: No

6D90F "Software" specially designed for the "development", "production", or "use" of airborne radar equipment controlled by 6A90F.

Requirements

Validated License Required: SZ, Iran, Syria
Unit: $ value
Reason for Control: FP
GTDR: No
GTDU: Yes, except destinations listed under *Validated License Required*

6D92F "Software" specially designed for the "development", "production", or "use" of gravity meters (gravimeters) controlled by 6A92.

Requirements

Validated License Required: SZ, Iran, Syria
Unit: $ value
Reason for Control: FP
GTDR: No
GTDU: Yes, except destinations listed under *Validated License Required*

6D93F "Software" specially designed for the "development", "production", or "use" of "magnetometers" controlled by 6A94.

Requirements

Validated License Required: SZ, Iran, Syria
Unit: $ value
Reason for Control: FP
GTDR: No
GTDU: Yes, except destinations listed under *Validated License Required*

6D94F "Software" specially designed for the "development", "production", or "use" of marine or terrestrial acoustic equipment controlled by 6A94.

Requirements

Validated License Required: SZ, Iran
Unit: $ value
Reason for Control: FP
GTDR: No
GTDU: Yes, except destinations listed under *Validated License Required*

6D96G "Software", n.e.s., specially designed for the "development", "production", or "use" of equipment described in Category 6

Requirements

Validated License Required: SZ.
Unit: $ value
Reason for Control: FP
GTDR: No
GTDU: Yes, except destinations listed under *Validated License Required*

6E90F Technology for the "development", "production", or "use" of airborne radar equipment controlled by 6A90F.

Requirements

Validated License Required: SZ, Iran, Syria
Reason for Control: FP
GTDR: No
GTDU: Yes, except destinations listed under *Validated License Required*

6E92F Technology for the "development", "production", or "use" of gravity meters (gravimeters) controlled by 6A92F.

Requirements

Validated License Required: SZ, Iran, Syria
Reason for Control: FP
GTDR: No
GTDU: Yes, except destinations listed under *Validated License Required*

6E93F Technology for the "development", "production", or "use" of "magnetometers" controlled by 6A93F.

Requirements

Validated License Required: SZ, Iran, Syria
Reason for Control: FP
GTDR: No
GTDU: Yes, except destinations listed under *Validated License Required*

6E94F Technology for the "development", "production", or "use" of marine or terrestrial acoustic equipment controlled by 6A94F.

Requirements

Validated License Required: SZ, Iran
Reason for Control: FP
GTDR: No
GTDU: Yes, except destinations listed under *Validated License Required*

6E96G Technology, n.e.s., for the "development", "production", or "use" of equipment, materials or "software" controlled under Category 6.

Requirements

Validated License Required: SZ.
Reason for Control: FP
GTDR: No
GTDU: Yes, except destinations listed under *Validated License Required*

7A94F Other navigation direction finding equipment, airborne communication equipment, all aircraft inertial navigation systems, and other avionic equipment, including parts and components, n.e.s.

Requirements

Validated License Required: SZ, Iran, Syria
Unit: $ Value
Reason for Control: FP
GLV: $0
GCT: No
GFW: No

Note: Global Positioning Satellite receivers having the following characteristics are under the jurisdiction of the Department of State, Office of Defense Trade Controls:

a. Designed for encryption or decryption (e.g., Y-code) of GPS precise positioning service (PPS) signal;

b. Designed for producing navigation results above 60,000 feet altitude and at 1,000 knots velocity or greater;

c. Specifically designed or modified for use with a null-steering antenna or including a null-steering antenna designed to reduce or avoid jamming signals; or

d. Designed or modified for use with unmanned air vehicle systems capable of delivering at least a 500 kg payload to a range of at least 300 km. (GPS receivers designed or modified for use with military unmanned air vehicle systems with less capability are considered to be specially designed, modified or configured for military use and therefore covered under Category XV, paragraph (c), of the ITAR).

N.B.: Manufacturers or exporters of equipment under DOC jurisdiction are advised that the U.S. Government does not assure the availability of the GPS P-code for civil navigation.

7B94F Other equipment for the test, inspection, or production of navigation and avionics equipment.

Requirements

Validated License Required: SZ, Iran, Syria

BILLING CODE 3510–DT–P

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

National Highway Traffic Safety Administration

23 CFR Part 1260

[Docket No. 93–8; Notice 4]

RIN 2127–AE52

Certification of Speed Limit Enforcement; Revision of Procedures

AGENCY: Federal Highway Administration (FHWA) and National Highway Traffic Safety Administration (NHTSA), Department of Transportation.

ACTION: Final rule.

SUMMARY: This notice amends 23 CFR 1260 by establishing additional sanctions against a State having a compliance score exceeding the national maximum speed limit (NMSL) compliance score for any consecutive year after a year of non-compliance. The purpose of this revision is to encourage non-complying States to make efforts to reduce their scores in years succeeding any year in which they exceed the NMSL compliance score.

EFFECTIVE DATE: July 15, 1994.

FOR FURTHER INFORMATION CONTACT: In FHWA, Julie Anna Cirillo, Chief, Information Management and Analysis Branch, 202–366–2170. In NHTSA, J. Michael Sheehan, Chief, Police Traffic Services Division, 202–366–4295.

SUPPLEMENTARY INFORMATION:

Background

The 55 mph NMSL was first instituted in 1974. FHWA and NHTSA have shared responsibility for the enforcement of the NMSL. The Intermodal Surface Transportation Efficiency Act of 1991 (ISTEA) required the Secretary of Transportation to change the regulation governing the NMSL. Because of this statutory mandate, FHWA and NHTSA published a notice of proposed rulemaking (NPRM) to amend this regulation in the **Federal Register** on January 4, 1993 (58 FR 186).

ISTEA required that the new rule establish speed limit compliance requirements on 65 mph roads, in addition to 55 mph roads, and include a formula for determining compliance by the States with such requirements.

On October 22, 1993, NHTSA and FHWA published a final rule in the **Federal Register** (58 FR 54812), which revised the NMSL procedures in 23 CFR 1260 to provide that the penalty transfer of highway construction funds to 23 U.S.C. § 402 programs would not exceed the greater of (i) one and one-half percent of the construction funds, or (ii) the total section 402 apportionment for the applicable fiscal year. A subsequent year penalty was not proposed in the NPRM and, therefore, was not incorporated into the final rule.

Some commenters, in response to the NPRM, objected to the absence of incentives in the NPRM for States to seek improvement in their NMSL compliance scores. One commenter suggested that a subsequent year penalty for non-compliance could provide such incentives.

As adopted, the regulation provided that a non-complying State would transfer the same amount of funds year after year, which would have a minimal impact, especially in view of the graduated penalty categories that were

utilized. The agencies therefore published a Supplemental Notice of Proposed Rulemaking which was published in the **Federal Register** on October 22, 1993 (58 FR 54832) (the SNPRM) on the same day as the final rule (58 FR 54812), to propose to add subsection (d) to 23 CFR § 1260.19, which would impose an additional one percent penalty on States that failed to comply in successive years. This change to the regulation would have the effect of transferring a maximum of two and one-half percent of the funds apportioned to the State for Federal-aid highways and highway safety construction programs under section 104(b) of Title 23, United States Code (other than paragraph (5)) to the State's apportionment under 23 U.S.C. 402 for the fiscal year.

Under the SNPRM, the maximum amount would be transferred if such State (1) was in the highest penalty category pursuant to § 1260.19(c) (i)–(iv) in the immediately previous fiscal year and (2) did not improve its score in the current fiscal year so as to be within the range of scores for the applicable second highest penalty category established in § 1260.19(c) (i)–(iv). A non-complying State could avoid the additional one percent penalty transfer if it improved its score into a lower penalty category. Such a State would then be subject only to the amount of penalty for that category under § 1260.19(c). If a non-complying State remained in its former penalty category, or had a worse score which moved it into a higher category, the State's penalty transfer would be the transfer amount for that category plus the additional one percent penalty.

The agencies also proposed to make a minor revision to § 1260.21(c) to clarify that the 23 U.S.C. § 402 apportionment amount could be exceeded for successive year penalty transfers.

Discussion of Comments

The agencies received responses from eleven commenters. Some of the comments concerned matters that were not specifically related to the subsequent year penalty issue and had been resolved in the final rule published on October 22, 1993. For example, comments from the Michigan State Police, the Department of California Highway Patrol and the Illinois Department of Transportation opposed altogether the imposition of economic sanctions. These commenters expressed the belief that these sanctions are counterproductive and misdirect excessive attention to speed compliance issues. As the agencies explained in their October 22, 1993 final rule, the requirement that sanctions be imposed to encourage speed limit control on NMSL roadways is statutorily mandated.

Similarly, Advocates for Highway and Auto Safety (Advocates) and the Michigan State Police recommended that transferred funds should be designated for a limited number of purposes. The agencies had proposed, in the January 3, 1993 NPRM that transferred funds would be used principally for speed limit enforcement, but decided in the October 1993 final rule, for the reasons described therein, not to specify the use of funds for speed limit enforcement or any other specific highway safety program.

The Michigan State Police also made a number of suggestions regarding the speed compliance criteria to be used to determine whether States would be subject to penalties. For example, Michigan recommended that the nationwide compliance threshold be revised to reflect the 85th percentile speed, that no transfer should take place if a State's fatal accident rate is below the national average, and that the agencies consider whether a State's noncompliance rate contributed to the State's fatality rate. Persons interested in reviewing a full discussion regarding the speed compliance criteria that the agencies decided to adopt, and the reasons for this decision, should read the October 22, 1993 final rule.

Among the commenters responding to the issues raised by the SNPRM, the Alaska Department of Public Safety, the California Highway Patrol, the Indiana Department of Transportation, the Nevada Department of Transportation and others opposed additional penalties for successive year non-compliance. The Virginia State Police questioned the use of the words "improvement incentive" to describe what the agencies had proposed in the SNPRM. These commenters argued that the final rule had already gone too far, and that additional sanctions were unnecessary and inappropriate.

The National Association of Governors' Highway Safety Representatives (NAGHSR) commented that the SNPRM was necessary to prevent States from being terminally out of compliance, and Advocates said the SNPRM didn't go far enough to penalize non-complying States.

The Indiana Department of Transportation, the Alaska Department of Public Safety and the Virginia State Police commented that additional funding sanctions would only serve to pit State road construction departments against the various State safety agencies.

Amount of Transfer and Section 402 Apportionment

The Department of California Highway Patrol, NAGHSR, the New York State Police and Advocates for Highway and Auto Safety had various views of the Congressional intent concerning the amount of the transfer to the section 402 apportionment being used as an additional penalty for successive year NMSL non-compliance. The Nevada Department of Transportation and others stated that a transfer of too much money could overburden and render ineffective a State's highway safety program.

Advocates proposed that the imposition of additional penalties should not be limited to successive year non-compliance. They recommended additional funds transfer penalties for any subsequent year non-compliance, and suggested that the penalties should accumulate, up to a maximum of ten percent of a State's Federal highway construction funds apportioned under 23 U.S.C. § 104(b). The California Highway Patrol commented that the preamble to the SNPRM seemed to indicate that the successive year sanctions would not accumulate, but expressed concerned that the proposed regulatory language could be read to provide for a penalty that exceeds two and one-half percent and requested clarification on this issue.

As explained in the SNPRM, section 1029(c)(1)(A) of ISTEA provides "* * * for the transfer of apportionments under section 104(b) of Title 23, United States Code (other than paragraph (5)), if a State fails to enforce speed limits in accordance with this section, [and the implementing regulation]." However, the legislation did not specify the amount of the apportionments to be transferred.

The House bill had provided that the amount to be transferred would range from one to five percent of the designated apportionments for the first year of non-compliance and from two to ten percent for two or more consecutive years of non-compliance. The amounts were to be transferred to the highway safety grant programs authorized under 23 U.S.C. § 402. The Senate bill did not provide for a transfer of apportionments. In adopting the House's transfer penalty without the House language pertaining to amounts, the conferees included the following statement on page 328 of the report accompanying the conference bill:

The Conference Substitute applies that same reprogramming provision and Secretarial discretion with regard to the

percentage transferred as in the House bill.

In reviewing the range of transfers in the House bill for the purpose of proposing a reasonable amount to be utilized by a non-complying State, the agencies determined that one and one-half percent of the designated apportionment for each State approximated the total amount of its 402 program. The NPRM therefore proposed a one and one-half percent transfer to the section 402 program, with the funds to be used principally for speed limit enforcement. In the final rule the agencies adopted the one and one-half percent transfer, but decided not to specify the use of funds for speed limit enforcement or any other specific highway safety program.

Since the final rule provided additional flexibility to States to use the transferred funds for speed enforcement and other highway safety activities, the agencies reconsidered their proposal to limit the amount transferred, and requested comments in the SNPRM about revising the regulation to provide that the amount transferred may exceed the total § 402 program fiscal year apportionment in years successive to a year in which a State's compliance score is greater than the maximum allowable compliance score. The agencies stated that this kind of penalty transfer, which would permit an increase to as high as two and one-half percent of the funds apportioned for highway construction, would more closely follow the intent of the House bill for States that fail to comply in successive years.

As proposed, the agencies have decided to impose an additional one percent penalty on any State that is out of compliance and does not make sufficient improvement to reduce its penalty in two or more consecutive years. The agencies believe that limiting the additional penalty to consecutive year non-compliance also closely follows Congressional intent.

The maximum penalty that could be imposed would be two and one-half percent of the funds apportioned to the State for Federal-aid highways and highway safety construction programs under section 104(b) of Title 23, United States Code (other than paragraph (5)). The additional one percent penalty would not accumulate from year to year.

Based on the arguments of some of the commenters regarding the amount of money that may be meaningfully spent on highway safety in any given year, the agencies have decided that the transferred funds in any fiscal year shall not exceed one and one-half times the total section 402 apportionment for that fiscal year. Increasing the penalty beyond this amount for subsequent year non-compliance could overwhelm any State's section 402 budget.

For example, if the penalty were not subject to a limitation, States like Connecticut and Wyoming could be subject to withholdings that amount to as much as 2.2 and 2.3 times their section 402 budget, respectively (based on fiscal year 1992 funding levels). By limiting the amount of the penalty to one and one-half times the State's section 402 apportionment, the maximum subsequent year penalty for these States would be 1.7 percent of highway construction fund apportionments and 1.6 percent, respectively (based on fiscal year 1992 funding levels). In order to avoid penalty funding levels that cannot be effectively spent on safety programs, the agencies have amended § 1260.21(c) to cap any subsequent year penalty transfer at one and one-half times the total section 402 apportionment.

The SNPRM contained a typographical error in the last line of § 1260.19(d), which referred to "(a)(1)" instead of "(c)(1)." This notice corrects the error.

Proportionate Penalty Reduction

The SNPRM solicited comments on whether States should be provided some relief from additional penalties if they show a specific amount of improvement in their compliance score even though their compliance score might not place them in a lower category. NAGHSR and the Illinois Department of Transportation generally supported this concept. However, other commenters did not express opinions about this approach. The Department of California Highway Patrol proposed Federal-State negotiations rather than a mathematical formula.

However, the agencies prefer a formula which avoids discretionary decisions and clearly shows the States what the result of non-compliance will be.

After considering an even more graduated penalty strategy, as suggested by NAGHSR and the Illinois Department of Transportation, the agencies have decided to reject the creation of additional categories, particularly since the current range between penalty categories approximates only 10 percent of the total score. The agencies have neither received nor seen any evidence that additional graduations in the categories would make the current scheme more fair, and further mathematical complications are therefore unnecessary.

Regulatory Analyses and Notices

Executive Order 12866 and DOT Regulatory Policies and Procedures: NHTSA and FHWA have considered the impact of this rulemaking action under E.O. 12866 and the Department of Transportation's regulatory policies and procedures. This rulemaking document was not reviewed by the Office of Management and Budget under E.O. 12866, "Regulatory Planning and Review." This final action has been determined to be not "significant" under the Department of Transportation's regulatory policies and procedures. The agencies prepared an addendum to the Final Regulatory Evaluation (AFRE) in June, 1993, for the SNPRM, and made it available in the public docket. A copy of the Final Regulatory Evaluation (FRE) and the AFRE may be obtained by writing to Docket 93–8, HCC–10, Federal Highway Administration, room 4232, 400 Seventh Street SW., Washington, DC 20590.

The FRE indicates that at least three States (Connecticut, Massachusetts and Wyoming) could be subject to the subsequent year penalty if they are not able to improve their compliance scores during subsequent years. The SNPRM proposed to establish a maximum penalty transfer of 2.5 percent for a non-complying State in a subsequent year. Under this final rule, any subsequent year penalty cannot exceed one and one-half times the 23 U.S.C. 402 apportionment of a non-complying State for that fiscal year. Based on fiscal year 1992 funding levels and the final rule, the maximum subsequent year penalty for that year would be 1.7 percent of highway construction fund apportionments for Connecticut, 2.5 percent for Massachusetts, and 1.6 percent for Wyoming. There would, of course, be no impact on complying States

Regulatory Flexibility Act: NHTSA and FHWA have also considered the impacts of this final rule under the Regulatory Flexibility Act. We hereby certify that this rule will not have a significant economic impact on a substantial number of small entities. The FRE concludes that there is no significant impact on small businesses since the portion of the highway construction funds going to noncomplying States is not lost, but only transferred to highway safety programs. Accordingly, the preparation of a Regulatory Flexibility Analysis is unnecessary.

Paperwork Reduction Act: The requirement relating to this proposal, that each State must submit speed data

and related certification information necessary to calculate its compliance score, is considered to be an information collection requirement, as that term is defined by the Office of Management and Budget (OMB) in 5 CFR part 1320.

Accordingly, this information collection requirement has been previously submitted to and approved by OMB, pursuant to the provisions of the Paperwork Reduction Act (44 U.S.C. 3501, et seq.). The requirement has been approved through January 31, 1996, with the OMB control number 2125–0027. This revision to the regulation contains no additional information collection requirement.

National Environmental Policy Act: The agencies have analyzed this action for the purpose of compliance with the National Environmental Policy Act and have determined that it does not have a significant effect on the human environment.

Executive Order 12612 (Federalism): This action has been analyzed in accordance with Executive Order 12612, concerning Federalism. The rule's provisions are likely to affect the allocations of States' resources, the way they measure their success in traffic law enforcement, relationships among State agencies, and the distribution of Federal funds between States' highway construction and safety programs. All of these effects may fairly be regarded as Federalism impacts. However, the basic requirements of the rule (i.e., the potential redistribution of Federal funds) are mandated by statute, so the agencies do not have discretion to mitigate these impacts. The agencies have carefully considered the comments of State agencies in shaping the details of the rule.

Civil Justice Reform: This change to the regulation does not have any preemptive or retroactive effect. It imposes no requirements on the States, but rather encourages States to consider enacting and enforcing legislation requiring speed limits and speed limit enforcement through the potential redesignation of Federal highway construction funds to safety programs. Any redesignation of funds would not take place until FY 1997. If a non-complying State (1) submits data showing that its highway speeds are below certain national levels, and (2) a certification from the Governor reporting that the State is enforcing the speed limits on public highways in accordance with 23 U.S.C. 154, then it shall not be subject to the proposed subsequent year sanction which redesignates an additional amount of funds to the State's apportionment of safety grant programs. The transfer amount for first year non-compliance could be as high as two and one-half percent of a State's apportionment for Federal-aid highways and highway safety construction programs. However, any subsequent year penalty cannot exceed one and one-half times the 23 U.S.C. 402 apportionment of a non-complying State for that fiscal year. The authorizing legislation for the proposed rule does not establish a procedure for judicial review of final rules promulgated under its provisions. There is no requirement that individuals submit a petition for reconsideration or other administrative proceedings before they may file suit in court.

List of Subjects in 23 CFR Part 1260

Grant programs—Transportation, Highways and roads, Motor vehicles, Reporting and recordkeeping requirements, Speed limit, Traffic regulations.

(Catalog of Federal Domestic Assistance Program Number 20.205, Highway Planning and Construction. The regulations implementing Executive Order 12372 regarding intergovernmental consultation on Federal programs and activities apply to this program)

PART 1260—CERTIFICATION OF SPEED LIMIT ENFORCEMENT

In consideration of the foregoing, 23 CFR 1260 is amended to read as follows:

1. The authority citation for part 1260 continues to read as follows:

Authority: 23 U.S.C. 118, 141, 154, 315 and delegations of authority at 49 CFR 1.48 and 1.50.

2. Paragraph (d) is added to § 1260.19 as follows:

§ 1260.19 Effect of failure to certify or to meet compliance standards.

* * * * *

(d) An additional one percent of the funds apportioned to the State under 23 U.S.C. 104(b)(1), 104(b)(2), 104(b)(3), 104(b)(4) and 104(b)(6) shall be transferred pursuant to subsection (b) of this section to the State's highway safety grant program fund under 23 U.S.C. 402 for the fiscal year subsequent to the fiscal year in which the State submitted its compliance score if the Secretary determines that the State's compliance score calculated pursuant to § 1260.15(d) is in the same or a higher penalty category as the State's compliance score submitted in the prior fiscal year, as provided by paragraphs (c) (1) through (4) of this section.

* * * * *

3. Section 1260.21 is amended by revising paragraph (c) as follows:

§ 1260.21 Penalty reduction and notification of noncompliance.

* * * * *

(c) The State shall expend any transferred funds pursuant to §§ 1260.19(b) and 1260.19(d) for section 402 programs within that State. In no instance shall the transfer under § 1260.19(b) exceed the total section 402 apportionment for that fiscal year, prior to any penalty reduction, and in no instance shall the total transferred funds under §§ 1260.19(b) and 1260.19(d) exceed one and one-half times the total section 402 apportionment for any fiscal year.

* * * * *

Issued on: June 9, 1994.

BILLING CODE 4910–22–P

PENSION BENEFIT GUARANTY CORPORATION

29 CFR Parts 2619 and 2676

Valuation of Plan Benefits in Single-Employer Plans; Valuation of Plan Benefits and Plan Assets Following Mass Withdrawal; Amendments Adopting Additional PBGC Rates

AGENCY: Pension Benefit Guaranty Corporation.

ACTION: Final rule.

SUMMARY: This final rule amends the Pension Benefit Guaranty Corporation's ("PBGC's") regulations on Valuation of Plan Benefits in Single-Employer Plans and Valuation of Plan Benefits and Plan Assets Following Mass Withdrawal. The former regulation contains the interest assumptions that the PBGC uses to value benefits under terminating single-employer plans. The latter regulation contains the interest assumptions for valuations of multiemployer plans that have undergone mass withdrawal. The amendments set out in this final rule adopt the interest assumptions applicable to single-employer plans with termination dates in July 1994, and to multiemployer plans with valuation dates in July 1994. The effect of these amendments is to advise the public of the adoption of these assumptions.

EFFECTIVE DATE: July 1, 1994.

FOR FURTHER INFORMATION CONTACT: Harold J. Ashner, Assistant General Counsel, Office of the General Counsel, Pension Benefit Guaranty Corporation,

1200 K Street, NW., Washington, DC 20005, 202–326–4024 (202–326–4179 for TTY and TDD). (These are not toll-free numbers.)

SUPPLEMENTARY INFORMATION: This rule adopts the July 1994 interest assumptions to be used under the Pension Benefit Guaranty Corporation's ("PBGC's") regulations on Valuation of Plan Benefits in Single-Employer Plans (29 CFR part 2619, the "single-employer regulation") and Valuation of Plan Benefits and Plan Assets Following Mass Withdrawal (29 CFR part 2676, the "multiemployer regulation").

Part 2619 sets forth the methods for valuing plan benefits of terminating single-employer plans covered under title IV of the Employee Retirement Income Security Act of 1974, as amended ("ERISA"). Under ERISA section 4041(c), all single-employer plans wishing to terminate in a distress termination must value guaranteed benefits and "benefit liabilities," *i.e.*, all benefits provided under the plan as of the plan termination date, using the formulas set forth in part 2619, subpart C. (Plans terminating in a standard termination may, for purposes of the Standard Termination Notice filed with PBGC, use these formulas to value benefit liabilities, although this is not required.) In addition, when the PBGC terminates an underfunded plan involuntarily pursuant to ERISA section 4042(a), it uses the subpart C formulas to determine the amount of the plan's underfunding. Part 2676 prescribes rules for valuing benefits and certain assets of multiemployer plans under sections 4219(c)(1)(D) and 4281(b) of ERISA.

Appendix B to part 2619 sets forth the interest rates and factors under the single-employer regulations. Appendix B to part 2676 sets forth the interest rates and factors under the multiemployer regulation. Because these rates and factors are intended to reflect current conditions in the financial and annuity markets, it is necessary to update the rates and factors periodically.

The PBGC issues two sets of interest rates and factors, one set to be used for the valuation of benefits to be paid as annuities and one set for the valuation of benefits to be paid as lump sums. The same assumptions apply to terminating single-employer plans and to multiemployer plans that have undergone a mass withdrawal. This amendment adds to appendix B to parts 2619 and 2676 sets of interest rates and factors for valuing benefits in single-employer plans that have termination dates during July 1994 and multiemployer plans that have undergone mass withdrawal and have valuation dates during July 1994.

For annuity benefits, the interest rates will be 6.90% for the first 25 years following the valuation date and 5.25% thereafter. For benefits to be paid as lump sums, the interest assumptions to be used by the PBGC will be 5.50% for the period during which benefits are in pay status, 4.75% during the seven years directly preceding the benefit's placement in pay status, and 4.0% during any other years preceding the benefit's placement in pay status. (ERISA section 205(g) and Internal Revenue Code section 417(e) provide that private sector plans valuing lump sums not in excess of $25,000 must use interest assumptions at least as generous as those used by the PBGC for valuing lump sums (and for lump sums exceeding $25,000 must use interest assumptions at least as generous as 120% of the PBGC interest assumptions).) The above annuity interest assumptions represent an increase (from those in effect for June 1994) of .20 percent for the first 25 years following the valuation date and are otherwise unchanged. The lump sum interest assumptions represent an increase (from those in effect for June 1994) of .25 percent for the period during which benefits are in pay status and the seven years directly preceding that period; they are otherwise unchanged.

Generally, the interest rates and factors under these regulations are in effect for at least one month. However, the PBGC publishes its interest assumptions each month regardless of whether they represent a change from the previous month's assumptions. The assumptions normally will be published in the **Federal Register** by the 15th of the preceding month or as close to that date as circumstances permit.

The PBGC has determined that notice and public comment on these amendments are impracticable and contrary to the public interest. This finding is based on the need to determine and issue new interest rates and factors promptly so that the rates and factors can reflect, as accurately as possible, current market conditions.

Because of the need to provide immediate guidance for the valuation of benefits in single-employer plans whose termination dates fall during July 1994, and in multiemployer plans that have undergone mass withdrawal and have valuation dates during July 1994, the PBGC finds that good cause exists for making the rates and factors set forth in this amendment effective less than 30 days after publication.

The PBGC has determined that this action is not a "significant regulatory action" under the criteria set forth in Executive Order 12866, because it will not have an annual effect on the economy of $100 million or more or adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, and environment, public health or safety, or State, local, or tribal governments or communities; create a serious inconsistency or otherwise interfere with an action taken or planned by another agency; materially alter the budgetary impact of entitlements, grants, user fees, or loan programs or the rights and obligations of recipients thereof; or raise novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in Executive Order 12866.

Because no general notice of proposed rulemaking is required for this amendment, the Regulatory Flexibility Act of 1980 does not apply. See 5 U.S.C. 601(2).

List of Subjects

29 CFR Part 2619

Employee benefit plans, Pension insurance, Pensions.

29 CFR Part 2676

Employee benefit plans, Pensions.

In consideration of the foregoing, parts 2619 and 2676 of chapter XXVI, title 29, Code of Federal Regulations, are hereby amended as follows:

PART 2619—[AMENDED]

1. The authority citation for part 2619 continues to read as follows:

Authority: 29 U.S.C. 1301(a), 1302(b)(3), 1341, 1344, 1362.

2. In appendix B, Rate Set 9 is added to Table I, and a new entry is added to Table II, as set forth below. The introductory text of both tables is republished for the convenience of the reader and remains unchanged.

Appendix B to Part 2619—Interest Rates Used to Value Lump Sums and Annuities

Lump Sum Valuations

In determining the value of interest factors of the form $v^{0 \leq n}$ (as defined in § 2619.49(b)(1)) for purposes of applying the formulas set forth in § 2619.49 (b) through (i) and in determining the value of any interest factor used in valuing benefits under this subpart to be paid as lump sums (including the return of accumulated employee contributions upon death), the PBGC shall employ the

values of i_t set out in Table I hereof as follows:

(1) For benefits for which the participant or beneficiary is entitled to be in pay status on the valuation date, the immediate annuity rate shall apply.

(2) For benefits for which the deferral period is y years (y is an integer and $0<y\leq n_1$), interest rate i_1 shall apply from the valuation date for a period of y years; thereafter the immediate annuity rate shall apply.

(3) For benefits for which the deferral period is y years (y is an integer and $n_1<y\leq n_1+n_2$), interest rate i_2 shall apply from the valuation date for a period of $y-n_1$ years, interest rate i_1 shall apply for the following n_1 years; thereafter the immediate annuity rate shall apply.

(4) For benefits for which the deferral period is y years (y is an integer and $y>n_1+n_2$), interest rate i_3 shall apply from the valuation date for a period of $y-n_1-n_2$ years, interest rate i_2 shall apply for the following n_2 years, interest rate i_1 shall apply for the following n_1 years; thereafter the immediate annuity rate shall apply.

TABLE I

[Lump Sum Valuations]

Rate set	For plans with a valuation date		Immediate annuity rate (percent)	Deferred annuities (percent)				
	On or after	Before		i_1	i_2	i_3	n_1	n_2
• •	•	•	•	•	•	•	•	•
9	7–1–94	8–1–94	5.50	4.75	4.00	4.00	7	8

Annuity Valuations

In determining the value of interest factors of the form $v^{o\leq n}$ (as defined in § 2619.49(b)(1)) for purposes of applying the formulas set forth in § 2619.49 (b) through (i) and in determining the value of any interest factor used in valuing annuity benefits under this subpart, the plan administrator shall use the values of i_t prescribed in Table II hereof.

The following table tabulates, for each calendar month of valuation ending after the effective date of this part, the interest rates (denoted by i_1, i_2, * * *, and referred to generally as i_t) assumed to be in effect between specified anniversaries of a valuation date that occurs within that calendar month; those anniversaries are specified in the columns adjacent to the rates. The last listed rate is assumed to be in effect after the last listed anniversary date.

TABLE II

[Annuity Valuations]

For valuation dates occurring in the month—	The values of i_t are:					
	i_t	for t =	i_t	for t =	i_t	for t =
• • • •	•		•		•	
July 1994	.0690	1–25	.0525	>25	N/A	N/A

PART 2676—[AMENDED]

3. The authority citation for part 2676 continues to read as follows:

Authority: 29 U.S.C. 1302(b)(3), 1399(c)(1)(D), 1441(b)(1).

4. In appendix B, Rate Set 9 is added to Table I, and a new entry is added to Table II, as set forth below. The introductory text of both tables is republished for the convenience of the reader and remains unchanged.

Appendix B to Part 2676—Interest Rates Used to Value Lump Sums and Annuities

Lump Sum Valuations

In determining the value of interest factors of the form $v^{o\leq n}$ (as defined in § 2676.13(b)(1)) for purposes of applying the formulas set forth in § 2676.13 (b) through (i) and in determining the value of any interest factor used in valuing benefits under this subpart to be paid as lump sums, the PBGC shall use the values of i_t prescribed in Table I hereof. The interest rates set forth in Table I shall be used by the PBGC to calculate benefits payable as lump sum benefits as follows:

(1) For benefits for which the participant or beneficiary is entitled to be in pay status on the valuation date, the immediate annuity rate shall apply.

(2) For benefits for which the deferral period is y years (y is an integer and $0<y\leq n_1$), interest rate i_1 shall apply from the valuation date for a period of y years; thereafter the immediate annuity rate shall apply.

(3) For benefits for which the deferral period is y years (y is an integer and $n_1<y\leq n_1+n_2$), interest rate i_2 shall apply from the valuation date for a period of $y-n_1$ years, interest rate i_1 years; thereafter the immediate annuity rate shall apply.

(4) For benefits for which the deferral period is y years (y is an integer and $y>n_1+n_2$), interest rate i_3 shall apply from the valuation date for a period of $y-n_1-n_2$ years, interest rate i_2 shall apply for the following n_2 years, interest rate i_1 shall apply for the following n_1 years; thereafter the immediate annuity rate shall apply.

TABLE I
[Lump Sum Valuations]

Rate set	For plans with valuation date		Immediate annuity rate (percent)	Deferred annuities (percent)				
	On or after	Before		i_1	i_2	i_3	n_1	n_2
9	7–1–94	8–1–94	5.50	4.75	4.00	4.00	7	8

Annuity Valuations

In determining the value of interest factors of the form $v^{x \leq n}$ (as defined in § 2676.13(b)(1)) for purposes of applying the formulas set forth in § 2676.13 (b) through (i) and in determining the value of any interest factor used in valuing annuity benefits under this subpart, the plan administrator shall use the values of i_{11} prescribed in the table below.

The following table tabulates, for each calendar month of valuation ending after the effective date of this part, the interest rates (denoted by i_1, i_2, * * *, and referred to generally as i_j) assumed to be in effect between specified anniversaries of a valuation date that occurs within that calendar month; those anniversaries are specified in the columns adjacent to the rates. The last listed rate is assumed to be in effect after the last listed anniversary date.

TABLE II
[Annuity Valuations]

For valuation dates occurring in the month—	The values of i_j are:					
	i_1	for t=	i_2	for t=	i_3	for t=
July 1994	.0690	1 – 25	.0525	>25	N/A	N/A

Issued in Washington, DC, on this 9th day of June 1994.

Martin Slate,

Executive Director, Pension Benefit Guaranty Corporation.

BILLING CODE 7708–01–M

POSTAL SERVICE

39 CFR Part 111

Indemnity Claims

AGENCY: Postal Service.

ACTION: Final rule; correction.

SUMMARY: This notice corrects a typographical error in Domestic Mail Manual (DMM) Issue 47, issued on April 10, 1994. A typographical error was made in section S010.2.12a(3) of DMM Issue 47 which caused that section, as written, to incorrectly identify the maximum indemnity in the event of loss or damage to nonnegotiable documents that cannot be reconstructed (provided the sender establishes the value of the documents) as $50,000. Consistent with postal standards published in prior issues of the DMM, section S010.2.12a(3) should have shown the maximum indemnity is $5,000.

EFFECTIVE DATE: April 10, 1994.

FOR FURTHER INFORMATION CONTACT: Margaret Falwell, (202) 268–2472.

List of Subjects in 39 CFR Part 111

Postal Service.

PART 111—[AMENDED]

1. The authority citation for 39 CFR part 111 continues to read as follows:

Authority: 5 U.S.C. 552(a); 39 U.S.C. 101, 401, 403, 404, 3001–3011, 3201–3219, 3403–3406, 3621, 5001.

2. The Domestic Mail Manual is corrected as follows:

S010 Indemnity Claims

* * * * *

2.0 GENERAL FILING INSTRUCTIONS

* * * * *

2.12 Payable Express Mail Claims

In addition to the payable claims in 2.11, the following is payable for Express Mail:

a. For the purpose of insurance coverage for Express Mail, "document" is defined in S500. Indemnity for document reconstruction is paid as follows:

* * * * *

(3) Loss or damage to nonnegotiable documents that cannot be reconstructed, providing the sender establishes the value of the documents. Payment may not exceed $5,000.

* * * * *

A transmittal letter making the changes in the pages of the Domestic Mail Manual will be published and transmitted to subscribers automatically. Notice of issuance of the transmittal letter will be published in the **Federal Register** as provided by 39 CFR 111.3.

Stanley F. Mires,

Chief Counsel, Legislative.

BILLING CODE 7710–12–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[WI32-01-5763a; FRL-4891-5]

Approval and Promulgation of Implementation Plan; Wisconsin

AGENCY: Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: United States Environmental Protection Agency (USEPA) approves Wisconsin's 1990 base year ozone (O_3) emission inventory as a revision to the Wisconsin State Implementation Plan (SIP) for O_3. The inventory was submitted by the State of Wisconin to satisfy a Federal requirement that those States containing O_3 nonattainment areas (NAAs) classified as marginal to extreme submit inventories of actual O_3 season and emissions from all sources in accordance with USEPA guidance. Wisconsin's O_3 NAAs are the counties of Walworth, Door, Kewaunee, Manitowoc, Sheboygan, and the six county Milwaukee area (counties Washington, Ozaukee, Waukesha, Milwaukee, Racine, and Kenosha). The rationale for the approval is set forth in this final rule; additional information is available at the address indicated below in the supporting Technical Support Document (TSD).

DATES: This final rule will be effective August 15, 1994, unless notice is received by July 15, 1994, that someone wishes to submit adverse comments. If the effective date is delayed, timely notice will be published in Federal Register.

ADDRESSES: Copies of the SIP revision and USEPA's analyses are available for inspection at the following address: (It is recommended that you telephone Charles Hatten at (312) 886-6031 before visiting the Region 5 Office.) United States Environmental Protection Agency, Region 5, Air and Radiation Division, 77 West Jackson Boulevard, Chicago, Illinois 60604.

Written comments can be mailed to Carlton T. Nash, Chief, Regulation Development Section, Air Toxics and Radiation Branch (AT-18J). United States Environmental Protection Agency, Region 5, Air and Radiation Division, 77 West Jackson Boulevard, Chicago, Illionis 60604.

FOR FURTHER INFORMATION CONTACT:

Charles Hatten (312) 886-6031.

SUPPLEMENTARY INFORMATION:

I. Background

Under the Clean Air Act as amended (including the 1990 Amendments) (the Act), States have the responsibility to inventory emissions contributing to the National Ambient Air Quality Standards nonattainment, to track these emissions over time, and to ensure that control strategies are being implemented that reduce emissions and move areas towards attainment. Section 182(b) of the Act, 42 U.S.C. 7511a(b)(1), requires States with O_3 NAA's designated as moderate, serious, severe, and extreme to submit a plan within 3 years of 1990 to reduce VOC emissions by 15 percent with 6 years after 1990. The baseline level of emissions, from which the 15 percent reduction is calculated, is determined by adjusting the base year inventory to exclude biogenic emissions and to exclude certain emission reductions not creditible towards the 15 percent. The 1990 base year emissions inventory is the primary inventory from which the periodic inventory, the Reasonable Further Progress (RFP) projection inventory, and the modeling inventory are derived. See General Preamble to title I, 57 FR 13502 (April 16, 1992). Further information on these inventories and their purpose can be found in the "Emission Inventory Requirements for Ozone State Implementation Plans," U.S. Environmental Protection Agency, Office of Air Quality Planning and Standards, Research Triangle Park, North Carolina, (March 1991).

The air quality planning requirements for marginal to extreme O_3 NAAs are set out in section 182(a)-(e) of the Act. The General Preamble to title I of the 1990 Amendments to the Act describes the bases for reviewing SIP revisions submitted under title I of the 1990 Amendments, including requirements for the preparation of the 1990 base year inventories. *See* 57 FR 13502 (April 16, 1992) and 57 FR 18070 (April 28, 1992). A more detailed discussion of the interpretations of title I of the 1990 Amendments to the Act, as well as detailed policy guidance on the development of the emission inventory is contained in the General Preamble. See 57 FR 18070, appendix B (April 28, 1992).

Those States containing O_3 NAAs classified as marginal to extreme are required under section 182(a)(1) of the Act to submit a final, comprehensive, accurate, and current inventory of the actual O_3 season and weekday emissions from all sources within 2 years of enactment (November 15, 1992). The inventory must include both anthropogenic (man-made) and biogenic (natural) sources of volatile organic compound (VOC), nitrogen oxides (NO_X), and carbon monoxide (CO). The inventory is to address actual VOC, NO_X, and CO emissions for the area during peak O_3 season, which is generally comprised of the summer months. All stationary point and area sources, as well as highway mobile sources within the nonattainment area, are to be included in the compilation. Available guidance for preparing emission inventories is provided in the General Preamble. See 57 FR 13498 (April 16, 1992).

Summary of the SIP Revision and Criteria for This Action

A. Procedural Background

USEPA must determine whether a submittal is complete and therefore warrants further USEPA review and action. See section 110(k)(1) and 57 FR 13565 (April 16, 1992). USEPA's completeness criteria for SIP submittals are set out at 40 CFR part 51, appendix V (1991), as amended by 57 FR 42216 (August 26, 1991). USEPA attempts to make completeness determinations within 60 days of receiving a submission. However, a submittal is deemed complete by operation of law if a completeness determination is not made by USEPA 6 months after receipt of the submission.

USEPA reviewed Wisconsin's emission inventory to determine completeness shortly after its submittal, in accordance with the completeness criteria set out at 40 CFR part 51, appendix V (1991), as amended by 57 FR 42216 (August 26, 1991). USEPA found the January 15, 1993, submittal to be complete on March 16, 1993, and sent a letter dated March 24, 1993 to the Governor indicating the completeness of the submittal and the next steps to be taken in the review process.

The Act requires States to observe certain procedural requirements in developing emission inventory submissions to USEPA. Section 110(a)(2) of the Act provides that each emission inventory submitted by a State must be adopted after reasonable notice and public hearing.[1] Section 110(a)(2) of the Act similarly provides that each revision to an implementation plan submitted by a State under the Act must be adopted by such State after reasonable notice and public hearing.[2]

---

[1] Also, section 172(c)(7) of the Act requires that plan provisions for nonattainment areas meet the applicable provisions of section 110(a)(2).

[2] Memorandum from John Calcagni, Director, Air Quality Management Division, and William Laxton, Director, Technical Support Division, to Regional

The State of Wisconsin held public hearings on January 12 and 13, 1993, to hear public comment on the 1990 base year emission inventory for all six areas in Wisconsin designated nonattainment for O_3. Following the public hearing, the inventory was adopted by the State and signed by the Governor's Designee, Donald F. Theiler, Director, Bureau of Air Management, Wisconsin Department of Natural Resource (WDNR) on January 15, 1993, and submitted to USEPA as a formal request for revision to the SIP.

WDNR sent supplemental information to USEPA on July 21, 1993 and December 10, 1993, in response to USEPA's preliminary comments on the inventory.

When reviewing the final inventory, USEPA used the Level I, II, and III, O_3 nonattainment inventory quality review checklists provided by the OAQPS to determine the acceptance and approvability of the final emission inventory.

USEPA's initial Level I review determined whether the basic inventory requirements set forth in the "Emission Inventory Requirements for Ozone State Implementation Plans," EPA–450/4–91–010 (March 1991) were present. The Level II review evaluated the emission inventory in more detail expanding on many of the questions found in the Level I review for each of the four general source types: stationary point and area sources, highway and non-highway (or non-road) mobile sources. USEPA's Level II review evaluated the level of supporting documentation provided by the State for completeness, procedures and consistency for each of the emission source types according to current USEPA guidance, as well as data quality. A more detailed discussion of USEPA's Level I and II review findings are presented in the TSD.[3]

The Level III review process outlined below consists of ten points that the inventory must include.[4] For a base year emission inventory to be approvable it must pass all the following acceptance criteria:

1. An approved Inventory Preparation Plan (IPP) was provided and the Quality Assurance (QA) Program contained in the IPP implemented was performed and its implementation documented.

2. Adequate documentation was provided that enabled the reviewer to determine the estimation procedures and data sources used to develop the inventory.

3. The point source inventory must be complete.

4. Point source emissions must have been prepared or calculated according to USEPA guidance.

5. The area source inventory must be complete.

6. The area source emissions must have been prepared or calculated according to USEPA guidance.

7. Biogenic emissions must have been prepared according to current EPA guidance or another approved technique.

8. The method (e.g., Highway Performance Monitoring System (HPMS) or a network transportation planning model) used to develop VMT estimates must follow EPA guidance, which is detailed in the document, "Procedures for Emission Inventory Preparation, Volume IV: Mobile Sources", U.S. Environmental Protection Agency, Office of Mobile Sources and Office of Air Quality Planning and Standards, Ann Arbor, Michigan, and Research Triangle Park, North Carolina, December 1992. The VMT development methods were adequately described and documented in the inventory report.

9. The MOBILE model (or EMFAC model for California only) was correctly used to produce emission factors for each of the vehicle classes.

10. Non-road mobile emissions were prepared according to current EPA guidance for all of the source categories.

Based on USEPA's level III review findings, WDNR has satisfied all of USEPA's requirements for purposes of providing a comprehensive, accurate, and current inventory of actual emissions in the O_3 NAA. A summary of USEPA's Level III findings is given below:

1. The IPP and QA program have been approved and implemented. These were approved by a August 28, 1992, letter from Gary Gulezian, Region 5 to Larry Bruss, WDNR.

2. The documentation was adequate for all emission types (stationary point and area sources, and mobile sources) for the reviewer to determine the estimation procedures and data sources used to develop the inventory.

3. The point source inventory was found to be complete.

4. The point source emissions were estimated according to USEPA guidance.

5. The area source inventory was found to be complete.

6. The area source emissions were estimated according to USEPA guidance.

7. The biogenic emissions were estimated using the BIOgenic Model for Emissions (BIOME), an equivalent technique approved by USEPA.

8. The method used to development VMT estimates was adequately described and documented.

9. The MOBILE model was used correctly.

10. The non-road mobile emission estimates were correctly prepared according to current EPA guidance.

B. Emission Inventory

The State of Wisconsin has met the requirements of section 182(a)(1) of the Act by submitting a O_3 SIP revision that includes a comprehensive, accurate, and current inventory of actual emissions from all sources of relevant pollutants in the NAAs, classified marginal to extreme. This section of the notice describes the adequacy of Wisconsin's inventory of actual emissions as required by section 182(a)(1).

The State of Wisconsin Department of Natural Resources (WDNR) submitted a 1990 base year emission inventory for six areas designated nonattainment for O_3. Wisconsin's six areas designated nonattainment for O_3 include a total of eleven (11) counties: Walworth (marginal), and Door (rural transport) counties; Kewaunee, Manitowoc, and Sheboygan counties (moderate); and the Milwaukee area which include the counties of Washington, Ozaukee, Waukesha, Milwaukee, Racine, and Kenosha (severe). The nonattainment boundaries for these areas are described in **Federal Register** notices dated November 6, 1991 (56 FR 56852), and November 30, 1992 (57 FR 56778).

The emissions inventory contains stationary point and area sources, highway and non-highway (or non-road) mobile source, and biogenic sources within the NAA. Emissions from these groupings of emission source types for the six O_3 NAAs are presented below in the following tables, by pollutant (VOC, CO, and NO_X), in units of tons per summer weekday:

Air Directors, Region I–X, "Public Hearing Requirements for 1990 Base-Year Emission Inventories for Ozone and Carbon Monoxide Nonattainment Areas," (September 29, 1992).

[3] See USEPA guidance document, "Quality Review Guidelines for 1990 Base Year Emissions Inventories," Office of Air Quality Planning and Standards (OAQPS), Research Triangle Park, NC, August 1992.

[4] Memorandum from John S. Seitz, Director, Office of Air Quality Planning and Standards, to Regional Air Division Directors, Region I–X, "Emission Inventory Issues," June 24, 1993

VOC EMISSIONS FROM ALL SOURCES—TONS/SUMMER WEEKDAY

Ozone NAA	Point source emissions	Area source emissions	Highway mobile emissions	Non-road mobile emissions	Biogenic	Total emissions
Door	0.00	5.62	2.35	4.24	26.02	38.23
Kewaunee	0.85	1.76	1.33	0.83	20.97	25.75
Manitowoc	1.16	8.82	5.71	2.54	33.69	51.92

Total Emissions	190.63	22.69	148.82	57.25	419.39

In developing of these emission estimates, WDNR closely followed methodologies recommended by USEPA for the preparation of O_3 inventories. A more detailed discussion of how emission estimates were derived for the above groupings of emission source type is presented in the supporting TSD and inventory documentation.

II. Final Rulemaking Action

USEPA approved the 1990 base year O_3 emission inventory as meeting the requirements of section 182(a)(1) of the Act, as a revision to the O_3 State Implementation Plan (SIP) for all areas in Wisconsin designated as nonattainment, classified marginal to extreme. These areas include counties of the Walworth, Door, Kewaunee, Manitowoc, Sheboygan, and the six county Milwaukee area (which includes Washington, Ozaukee, Waukesha, Milwaukee, Racine, and Kenosha).

Because USEPA considers this action noncontroversial and routine, we are approving it without prior proposal. This action will become effective on August 15, 1994. However, if we receive adverse comments by July 15, 1994, then USEPA will publish:

(1) A document that withdraws the action; and

(2) Address the comments received in a subsequent final rule based on the proposal for approval of the requested SIP revision in the proposed rules section of this **Federal Register**. The public comment period will not be extended or reopened.

Under the Regulatory Flexibility Act, 5 U.S.C. 600 *et al.*, USEPA must prepare a regulatory flexibility analysis assessing the impact of any proposed or final rule on small entities. 5 U.S.C. 603 and 604. Alternatively, USEPA may certify that the rule will not have a significant economic impact on a substantial number of small entities. Small entities include small businesses, small not-for-profit enterprises, and government entities with jurisdiction over populations of less than 50,000.

The SIP approvals under section 110 and subchapter I, part D, of the Act do not create any new requirements, but simply approve requirements that the State is already imposing. Therefore, because the Federal SIP-approval does not impose any new requirements, I certify that it does not have a significant impact on small entities affected. Moreover, due to the nature of the Federal-State relationship under the Act, preparation of a regulatory flexibility analysis would constitute Federal inquiry into the economic reasonableness of State action. The Act forbids USEPA to base its actions concerning SIPs on such grounds. *Union Electric Co.* v. *U.S. E.P.A.*, 427 U.S. 246, 256–66 (1976).

This action has been classified as a Table 2 action by the Regional Administrator under the procedures published in the **Federal Register** on January 19, 1989 (54 FR 2214–2225). On

January 6, 1989 the OMB waived Table 2 and Table 3 SIP revisions (54 FR 2222) from the requirements of section 3 of Executive Order 12291 for a period of 2 years. The USEPA has submitted a request for a permanent waiver for Table 2 and 3 SIP revisions. The OMB has agreed to continue the waiver until such time of USEPA's request. This request continues in effect under Executive Order 12866 which superseded Executive Order 12291, on September 30, 1993.

Nothing in this action should be construed as permitting or allowing or establishing a precedent for any future request for revision to any SIP. Each request for revision to any SIP shall be considered separately in light of specific technical, economic, and environmental factors and in relation to relevant statutory and regulatory requirements.

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Carbon monoxide, Hydrocarbons, Nitrogen dioxide, Ozone, Volatile organic compounds.

Dated: May 11, 1994.

Michelle D. Jordan,

Acting Regional Administrator.

40 CFR Part 52 is amended as follows:

PART 52—[AMENDED]

The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401–7671q.

Subpart YY—Wisconsin

2. Section 52.2585 is amended by adding paragraph (e) to read as follows:

§ 52.2585 Control strategy: Ozone.

* * * * *

(e) Approval—On January 15, 1993, the Wisconsin Department of Natural Resources submitted a revision to the ozone State Implementation Plan for the 1990 base year inventory. The inventory was submitted by the State of Wisconsin to satisfy Federal requirements under section 182(a)(1) of the Clean Air Act as amended in 1990 (the Act), as a revision to the ozone State Implementation Plan (SIP) for all areas in Wisconsin designated nonattainment, classified marginal to extreme. These areas include counties of Walworth, Door, Kewaunee, Manitowoc, Sheboygan, and the six county Milwaukee area (counties of Washington, Ozaukee, Waukesha, Milwaukee, Racine, and Kenosha).

BILLING CODE 6560–50–M

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 64

[Docket No. FEMA–7597]

Suspension of Community Eligibility

AGENCY: Federal Emergency Management Agency, FEMA.

ACTION: Final rule.

SUMMARY: This rule identifies communities, where the sale of flood insurance has been authorized under the National Flood Insurance Program (NFIP), that are suspended on the effective dates listed within this rule because of noncompliance with the floodplain management requirements of the program. If the Federal Emergency Management Agency (FEMA) receives documentation that the community has adopted the required floodplain management measures prior to the effective suspension date given in this rule, the suspension will be withdrawn by publication in the **Federal Register**.

EFFECTIVE DATES: The effective date of each community's suspension is the third date ("Susp.") listed in the third column of the following tables.

ADDRESSES: If you wish to determine whether a particular community was suspended on the suspension date, contact the appropriate FEMA Regional Office or the NFIP servicing contractor.

FOR FURTHER INFORMATION CONTACT: Robert F. Shea, Jr., Division Director, Program Implementation Division, Mitigation Directorate, 500 C Street SW., room 417, Washington, DC 20472, (202) 646–3619.

SUPPLEMENTARY INFORMATION: The NFIP enables property owners to purchase flood insurance which is generally not otherwise available. In return, communities agree to adopt and administer local floodplain management aimed at protecting lives and new construction from future flooding. Section 1315 of the National Flood Insurance Act of 1968, as amended, 42 U.S.C. 4022, prohibits flood insurance coverage as authorized under the National Flood Insurance Program, 42 U.S.C. 4001 et seq., unless an appropriate public body adopts adequate floodplain management measures with effective enforcement measures. The communities listed in this document no longer meet that statutory requirement for compliance with program regulations, 44 CFR part 59 et seq. Accordingly, the communities will be suspended on the effective date in the third column. As of that date, flood insurance will no longer be available in the community. However, some of these communities may adopt and submit the required documentation of legally enforceable floodplain management measures after this rule is published but prior to the actual suspension date. These communities will not be suspended and will continue their eligibility for the sale of insurance. A notice withdrawing the suspension of the communities will be published in the **Federal Register**.

In addition, the Federal Emergency Management Agency has identified the special flood hazard areas in these communities by publishing a Flood Insurance Rate Map (FIRM). The date of the FIRM, if one has been published, is indicated in the fourth column of the table. No direct Federal financial assistance (except assistance pursuant to the Robert T. Stafford Disaster Relief and Emergency Assistance Act not in connection with a flood) may legally be provided for construction or acquisition of buildings in the identified special flood hazard area of communities not participating in the NFIP and identified for more than a year, on the Federal Emergency Management Agency's initial flood insurance map of the community as having flood-prone areas (section 202(a) of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4106(a), as amended). This prohibition against certain types of Federal assistance becomes effective for the communities listed on the date shown in the last column.

The Deputy Associate Director finds that notice and public comment under 5 U.S.C. 553(b) are impracticable and unnecessary because communities listed in this final rule have been adequately notified.

Each community receives a 6-month, 90-day, and 30-day notification addressed to the Chief Executive Officer that the community will be suspended unless the required floodplain management measures are met prior to the effective suspension date. Since these notifications have been made, this final rule may take effect within less than 30 days.

National Environmental Policy Act. This rule is categorically excluded from the requirements of 44 CFR part 10, Environmental Considerations. No environmental impact assessment has been prepared.

Regulatory Flexibility Act. The Deputy Associate Director has determined that this rule is exempt from the requirements of the Regulatory Flexibility Act because the National Flood Insurance Act of 1968, as amended, 42 U.S.C. 4022, prohibits flood insurance coverage unless an

appropriate public body adopts adequate floodplain management measures with effective enforcement measures. The communities listed no longer comply with the statutory requirements, and after the effective date, flood insurance will no longer be available in the communities unless they take remedial action.

Regulatory Classification. This final rule is not a significant regulatory action under the criteria of section 3(f) of Executive Order 12866 of September 30, 1993, Regulatory Planning and Review, 58 FR 51735.

Paperwork Reduction Act. This rule does not involve any collection of information for purposes of the Paperwork Reduction Act, 44 U.S.C. 3501 et seq.

Executive Order 12612, Federalism. This rule involves no policies that have federalism implications under Executive Order 12612, Federalism, October 26, 1987, 3 CFR, 1987 Comp., p. 252.

Executive Order 12778, Civil Justice Reform. This rule meets the applicable standards of section 2(b)(2) of Executive Order 12778, October 25, 1991, 56 FR 55195, 3 CFR, 1991 Comp., p. 309.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Administration for Children and Families

45 CFR Parts 95 and 205

Elimination of Enhanced Funding for Family Assistance Management Information Systems

AGENCY: Administration for Children and Families, HHS.

ACTION: Final rule.

SUMMARY: This final rule implements provisions of the Omnibus Budget Reconciliation Act of 1993 (OBRA–93), which eliminate enhanced Federal funding for Family Assistance Management Information Systems (FAMIS). Technical changes are also made to update the list of automated systems subject to enhanced funding and to provide the current title of the agency.

DATES: *Effective Date:* April 1, 1994. For States whose legislatures meet biennially and do not have a regular session scheduled in calendar year 1994, this final rule applies no later than the first day of the first calendar quarter beginning after the close of the first regular session of the State legislature convening after August 10, 1993.

FOR FURTHER INFORMATION CONTACT: Bill Davis, State Data Systems Staff, 370 L'Enfant Promenade SW., Washington, DC 20447, telephone (202) 401–6404.

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Act

This final rule does not contain any information collection activities and, therefore, no approvals are necessary under section 3504(h) of the Paperwork Reduction Act of 1980 (Pub. L. 96–511).

Statutory Authority

These regulations are published under the general authority of section 1102 of the Social Security Act (the Act) which requires the Secretary to publish such rules and regulations as may be necessary for the efficient administration of the functions for which she is responsible under the Act.

Justification for Dispensing With Notice of Proposed Rulemaking and 30-Day Delayed Effective Date Requirement

The amendments to these regulations are being published in final form. The Administrative Procedure Act (APA), 5 U.S.C. 553(b)(B), provides that if the Department has good cause for finding that a Notice of Proposed Rulemaking is unnecessary, impracticable or contrary to the public interest, it may dispense with such notice if it incorporates a brief statement in the final regulation of the reasons for doing so. Section 553(d)(3) of the APA permits the Department to bypass a 30-day waiting period prior to a rule's effective date for similar reasons.

The Department finds that there is good case to dispense with Notice of Proposed Rulemaking and a 30-day waiting period with respect to the current regulatory changes. A notice and comment period and a 30-day waiting period are unnecessary as the amendments simply implement statutory provisions and do not involve administrative discretion. Moreover, the States have previously been notified by the Department (via ACF–AT–93–16 issued November 1, 1993) that OBRA–93 has eliminated enhanced Federal funding for FAMIS, and that the lower Federal funding rate is effective, in most cases, on April 1, 1994.

Background and Description of Regulatory Provisions

Section 13741 of OBRA–93 amended section 403 of the Social Security Act by eliminating enhanced Federal financial funding for certain categories of AFDC expenditures, including AFDC program expenditures pertaining to the planning, design, and development or installation of an approved Family Assistance Management Information System (FAMIS).

The current enhanced Federal matching rate for FAMIS is 90 percent. This rate is reduced to 50 percent under OBRA–93. Accordingly, the funding provisions at 45 CFR 205.38(a) are revised to stipulate that the availability of 90 percent funding is terminated effective March 31, 1994, after which time the rate is reduced to 50 percent.

While 50 percent is the only Federal financial participation rate available for FAMIS activities beginning April 1, 1994, those system developments efforts

already in progress and approved at the enhanced rate continue to be subject to the requirements of § 205.35 through § 205.38 until the system is completed and certified by the Administration for Children and Families. The Department will continue to recover pursuant to section 402(e)(2)(C) of the Social Security Act the 40 percent incentive portion of Federal financial participation expended should the state fail to meet the statewide implementation date specified in its approved Advance Planning Document.

We have also made technical changes to reflect a 1991 agency reorganization by replacing references to the "Family Support Administration (FSA)" with "the Administration for Children and Families (ACF)" each time they appear in § 205.35 through § 205.38.

Conforming changes have also been made to 45 CFR part 95, subpart F, Automatic Data Processing Equipment and Services—Conditions for Federal Financial Participation, § 95.605 (pertaining to definitions) and §§ 95.611 and 95.625 (pertaining to FFP) to remove references to the availability of enhanced funding under title IV–A. At the same time, we are adding references in §§ 95.611 and 95.625 to title IV–E relevant to the availability of enhanced funding since section 13713 of OBRA–93 made such funding available for Statewide Automated Child Welfare Information Systems from October 1, 1993 through September 30, 1996 (see 58 FR 67939, December 22, 1993).

Technical changes have also been made to this section to reflect the current agency designation as explained above and to correct a typographical error. The reference at 45 CFR 96.625(b), with respect to regulations governing title XIX should be 42 CFR part 433, subpart C, rather than 45 CFR part 433, subpart C.

Regulatory Impact Analysis

Executive Order 12866 requires that regulations be reviewed to ensure that they are consistent with the priorities and principles set forth in the Executive Order. The Department has determined that this rule is consistent with these priorities and principles. No costs are associated with this rule as it merely ensures consistency between the statute and regulations.

Regulatory Flexibility Act

Consistent with the Regulatory Flexibility Act (Pub. L. 96–354) which requires the Federal government to anticipate and reduce the impact of rules and paperwork requirements on small businesses and other small entities, the Secretary certifies that this rule has no significant effect on a substantial number of small entities. Therefore, a regulatory flexibility analysis is not required.

List of Subjects

Approved: June 5, 1994.

Donna E. Shalala,

Secretary.

PART 95—GENERAL ADMINISTRATION—GRANT PROGRAMS (PUBLIC ASSISTANCE AND MEDICAL ASSISTANCE)

1. The authority citation for part 95 continues to read as follows:

Authority: Secs. 402(a)(5), 452(a)(1), 1102, and 1902(a)(4) of the Social Security Act, 42 U.S.C. 602(a)(5), 652(a)(1), 1302, 1396a(a)(4); 5 U.S.C. 301 and 8 U.S.C. 1521.

2. Section 95.605 is amended by revising the definition of "Enhanced matching rate" to read as follows:

§ 95.605 Definitions.

* * * * *

Enhanced matching rate means the higher than regular rate of FFP authorized by Title IV–D, IV–E, and XIX of the Social Security Act for acquisition of services and equipment that conform to specific requirements designed to improve administration of the Child Support Enforcement, Foster Care and Adoption Assistance, and Medicaid programs.

* * * * *

3. Section 95.611 is amended by revising paragraphs (a)(2) and (a)(5) to read as follows:

§ 95.611 Prior approval conditions.

(a) * * *

(2) A State shall obtain prior written approval from the Department as specified in paragraph (b) of this section, when the State plans to acquire ADP equipment or services with proposed FFP at the enhanced matching rate authorized by 45 CFR part 307, 45 CFR 1355.55 or 42 CFR part 433, subpart C, regardless of the acquisition cost, except as specified in paragraph (a)(3) of this section.

* * * * *

(5) Except as provided for in paragraph (a)(6) of this section, the State shall submit requests for Department approval, signed by the appropriate State official, to the Director, Administration for Children and Families, Office of Information Management Systems. The State shall send to ACF one copy of the request for each HHS component, from which the State is requesting funding, and one for the State Data Systems Staff, the coordinating staff for these requests. The State must also send one copy of the request directly to each Regional program component and one copy to the Regional Director.

* * * * *

4. Section 95.625 is revised to read as follows:

§ 95.625 Increased FFP for certain ADP systems.

(a) *General.* FFP is available at enhanced matching rates for the development of individual or integrated systems and the associated computer that support the administration of State plans for Titles IV–D, IV–E and/or XIX provided the systems meet the specifically applicable provisions referenced in paragraph (b) of this section.

(b) *Specific reference to other regulations.* The applicable regulations for the Title IV–D program are contained in 45 CFR part 307. The applicable regulations for the Title IV–E program are contained in 45 CFR 1355.55. The applicable regulations for the Title XIX program are contained in 42 CFR part 433, subpart C.

PART 205—GENERAL ADMINISTRATION—PUBLIC ASSISTANCE PROGRAMS

1. The authority citation for part 205 continues to read as follows:

Authority: 42 U.S.C. 602, 603, 606, 607, 611, 1302, 1306(a), 1320b–7.

§ 205.35 [Amended]

2. Section 205.35 is amended by removing in the introductory text "Family Support Administration (FSA)." and adding, in its place "Administration for Children and Families (ACF)."

§ 205.37 [Amended]

3. Section 205.37 is amended by revising the heading of the section to read: "Responsibilities of the Administration for Children and Families (ACF).", and by removing the initials "OFA" in the third sentence of paragraph (a)(5) and adding in its place, the initials "ACF".

4. Section 205.38 is amended by revising paragraph (a) to read as follows:

§ 205.38 Federal financial participation (FFP) for establishing a statewide mechanized system.

(a) Effective July 1, 1981 through March 31, 1994, FFP is available at 90 percent of expenditures incurred for planning, design, development or installation of a statewide automated application processing and information retrieval system which are consistent with an approved APD. (Beginning April 1, 1994 the match rate available for development of Title IV–A automated systems is 50 percent.) The 90 percent FFP includes the purchase or rental of computer equipment and software directly required for and used in the operation of this system.

BILLING CODE 4110–60–M

CORPORATION FOR NATIONAL AND COMMUNITY SERVICE

45 CFR Parts 2525, 2526, 2527, 2528, and 2529

National Service Trust

AGENCY: Corporation for National and Community Service.

ACTION: Interim final rule.

SUMMARY: The Corporation for National and Community Service (the Corporation) is issuing this interim final rule implementing requirements of subtitle D of the National and Community Service Act of 1990 (the Act). This rule describes the following: the National Service Trust (the Trust); who is eligible to receive education awards from the Trust; how the amount of the education awards is determined; the purposes for which the education awards may be used; and the circumstances under which AmeriCorps participants will receive forbearance and payment of interest expenses on qualified student loans. This rule is intended to allow for the provision of educational benefits to AmeriCorps participants.

DATES: Interim rule effective June 15, 1994; comments must be received on or before August 1, 1994.

ADDRESSES: Comments must be mailed to the Corporation for National and Community Service, P.O. Box 34680, Washington, DC 20034–4680 or hand delivered to the Office of the General Counsel, room 9200, 1100 Vermont Avenue, Washington, DC 20525. Comments received may be inspected at the Corporation for National and Community Service, Office of the General Counsel, room 9200, 1100 Vermont Avenue NW., Washington, DC 20525, between 9 a.m. and 5 p.m. Eastern daylight savings time.

FOR FURTHER INFORMATION CONTACT: Terry Russell, (202) 606–4949 (Voice) or (202) 606–5256 (TDD), between the hours of 9 a.m. and 6 p.m. Eastern daylight savings time. For individuals with disabilities, information will be made available in alternative formats upon request.

SUPPLEMENTARY INFORMATION: The Corporation has published this rule as an interim final rule rather than as a proposed rule pursuant to 44 U.S.C. 553(b)(3)(B). The Corporation is making grants to AmeriCorps programs that will operate over the summer of 1994 and whose participants will need to receive education awards under the terms and conditions of this rule. Since it would be contrary to the public interest to publish this rule as a proposed rule, it is published as an interim final rule to take effect immediately.

On March 23, 1994, the Corporation published final regulations governing the Corporation's grantmaking programs and various support and investment activities authorized by the Act (59 FR 13772). This rule establishes regulations to implement sections 145 through 148 of subtitle D of the Act, which requires the Corporation to make payments from the National Service Trust for education awards for AmeriCorps participants and for interest expenses that accrue on qualified student loans for which participants have obtained forbearance during a term of service in an AmeriCorps program.

Overview of This Interim Final Rule and Discussion of Policy Decisions

In general, this rule incorporates, without substantive change, the statutory requirements regarding the eligibility of AmeriCorps participants to receive and use education awards, the standards for determining the amount of the education award, the possible uses of and procedures for using education awards, the procedures for obtaining forbearance in repaying qualified student loans while serving in an AmeriCorps program, and the procedures for making interest payments from the National Service Trust.

Some sections of the regulations interpret and elaborate on provisions in the statute. Those sections are discussed below.

AmeriCorps participants who are released for cause are not eligible to receive any portion of the education award. However, participants who are released for compelling personal circumstances, at the discretion of their respective programs, either may have their service suspended and return at a later date to complete their terms or may receive a pro-rated education award. Sections 2526.20 and 2527.10 of this rule set some guidelines for programs to make these determinations.

First, the corporation encourages programs—whenever possible and appropriate—to suspend a participant's term of service rather than offer a pro-rated education award. The intent is to always encourage participants to complete their terms of service if at all possible. Second, the regulations further clarify that participants who are released for compelling personal circumstances only may receive a pro-rated education award if they have completed at least 15% of their terms of service. There are a number of reasons for this policy. From a logistical standpoint, 15% of a full-time term of service equates to approximately six weeks; similarly, programs are allowed to fill an approved AmeriCorps position left vacant due to attrition only within the first six weeks of a term of service. Programs that offered pro-rated education awards within this first six weeks would forfeit those AmeriCorps positions—an outcome that is desirable neither for the programs nor for the Corporation. From an economic standpoint, the value of a pro-rated education award for significantly less than 15% of a term of service would be insufficient to pay for most educational expenses and, in many cases, would be less than the administrative costs of providing that award. Finally, the Corporation did not set the limit at a higher percentage because it recognizes that there may be compelling cases in which participants legitimately would be unable to continue service even after

a period of suspension but would benefit from and should receive a relatively small, pro-rated education award.

Section 2526.50 clarifies that the suspension of an individual's eligibility to use an education award as a result of the conviction of the possession or sale of a controlled substance does not constitute a valid reason for the extension of the seven-year period for using an education award.

The sections in part 2528 describe the uses of and the procedures for using education awards. The regulations in these sections are designed to ensure that the necessary documentation and verification are obtained at each stage of the process without imposing too great a burden on holders of qualified student loans, institutions of higher education, participants, or the Corporation.

Part 2529 describes the procedures for participants to obtain forbearance in the repayment of qualified student loans and for the Corporation to pay interest expenses that accrue during such periods of forbearance. Similar to the regulations in part 2528, the regulations in this part are designed to ensure that the necessary documentation and verification is obtained while minimizing administrative burdens. Section 2529.20 clarifies that individuals who are eligible for a pro-rated education awards or for pro-rated Stafford Loan Forgiveness also are eligible for pro-rated payments of interest expenses based on the portion of the term of service that was completed. The Corporation will not, however, pay interest expenses that accrue during a period of suspension of a term of service. Section 2529.30 clarifies that different repayment requirements apply to VISTA volunteers.

Invitation to Comment

The Corporation invites written comments on the text of this interim final rule and requests that the comments identify the specific sections of the regulations to which they relate and provide reasons for any suggested changes.

Miscellaneous Requirements

Interested parties should be advised that because the assistance provided under the authority of this rule constitutes Federal financial assistance for the purposes of title VI of the Civil Rights Act of 1964 (which bars discrimination based on race, color, or national origin), title IX of the Education Amendments of 1972 (which bars discrimination on the basis of gender), the Rehabilitation Act of 1973 (which bars discrimination on the basis of disability), and the Age Discrimination Act of 1975 (which bars discrimination on the basis of age), grantees will be required to comply with the aforementioned provisions of Federal law.

Grant recipients will be expected to expend Corporation grants in a judicious and reasonable manner, consistent with pertinent provisions of Federal law and regulations. Grantees must keep records according to Corporation guidelines, including records that fully disclose the amount and disposition of the proceeds of a Corporation grant. The Inspector General of the Corporation (or other authorized official) shall have access, for the purpose of audit and examination, to the books and records of grantees that may be related or pertinent to the Corporation grant.

Grantees should further be advised that Uniform Administrative Requirements for Grants and Cooperative Agreements to State and Local Governments, and Administrative Requirements for Grants and Cooperative Agreements to other than State and Local Governments, as well as regulations for the Privacy Act, freedom of Information Act, Sunshine Act, Government-wide Debarment and Suspension, and Government-wide Requirements for Drug-Free Workplace will also be published.

As required by the Regulatory Flexibility Act, it is hereby certified that this rule will not have a significant impact on small business entities.

As required by the Paperwork Reduction Act of 1980, the Corporation will submit the information collection requirements contained in this rule to the Office of Management and Budget for its review (44 U.S.C. 3504(h)). The information collection requirements are needed in order to provide assistance to parties affected by these regulations, in accordance with statutory mandates.

Terry Russell,

General Counsel.

Accordingly, the Corporation amends title 45, chapter XXV of the Code of Federal Regulations by adding parts 2525 through 2529 to read as follows:

PART 2525—NATIONAL SERVICE TRUST: PURPOSE AND DEFINITIONS

Sec.

2525.10 What is the National Service Trust?
2525.20 Definitions.

Authority: 42 U.S.C. 12601–12604

§ 2525.10 What is the National Service Trust?

The National Service Trust is an account in the Treasury of the United States from which the Corporation makes payments of education awards, Stafford loan forgiveness awards, and pays interest that accrue on qualified student loans for AmeriCorps participants during terms of service in approved AmeriCorps positions.

§ 2525.20 Definitions.

In addition to the definitions in § 2510.20 of this chapter, the following definitions apply to terms used in parts 2525 through 2529 of this chapter:

Approved school-to-work program. The term *approved school-to-work program* means a school-to-work program officially approved by the Secretaries of the Departments of Education and Labor.

Cost of attendance. The term *cost of attendance* has the same meaning as in title IV of the Higher Education Act of 1965, as amended (20 U.S.C. 1070 et. seq.).

Education award. The term *education award* means the financial assistance available under parts 2526 through 2528 of this chapter for which an individual in an approved AmeriCorps position—except for an individual in a Stafford Loan Forgiveness program (SLF program)—may be eligible.

Holder. The term *holder* means—

(1) The original lender; or

(2) Any other entity to whom a loan is subsequently sold, transferred, or assigned if such entity acquires a legally

enforceable right to receive payments from the borrower.

Institution of higher education. For the purposes of parts 2525 through 2529 of this chapter, the term *institution of higher education* has the same meaning given the term in section 481(a) of the Higher Education Act of 1965, as amended (20 U.S.C. 1088(a)).

Qualified student loan. The term *qualified student loan* means any loan made, insured, or guaranteed pursuant to title IV of the Higher Education Act of 1965 (20 U.S.C. 1070 et. seq.), other than a loan to a parent of a student pursuant to section 428B of such Act (20 U.S.C. 1078–2), and any loan made pursuant to title VII or VIII of the Public Service Health Act (42 U.S.C. 292a et. seq.).

Term of service. The term *term of service* means—

(1) For AmeriCorps participants other than VISTA volunteers, any of the terms of service specified in § 2522.220 of this chapter; and

(2) For VISTA volunteers, not less than a full year of service as a VISTA volunteer.

PART 2526—ELIGIBILITY TO RECEIVE AND USE EDUCATIONAL BENEFITS

Sec.

2526.10 What types of AmeriCorps educational benefits are available?
2526.20 Who is eligible to receive a full education award from the National Service Trust?
2526.30 Who is eligible to receive a full Stafford loan forgiveness award from the National Service Trust?
2526.40 Is an AmeriCorps participant who does not complete a term of service eligible to receive a pro-rated education or Stafford loan forgiveness award?
2526.50 What conditions must an AmeriCorps participant who has received an education award meet in order to use that education award?
2526.60 How do convictions for the possession or sale of controlled substances affect an education award recipient's ability to use that award?
2526.70 What is the time period during which an individual must use an education award?
2526.80 How many education or Stafford loan forgiveness awards may an individual receive?
2526.90 May an individual receive an education or Stafford loan forgiveness award and loan cancellations for the same service?
2526.100 How are education and Stafford loan forgiveness awards treated in determining eligibility for financial assistance under the Higher Education Act of 1965, as amended?

Authority: 42 U.S.C. 12601–12604.

§ 2526.10 What types of AmeriCorps educational benefits are available?

Individuals serving in approved AmeriCorps positions may be eligible to receive either AmeriCorps education awards or Stafford loan forgiveness awards, but may not receive both awards for the same term of service.

§ 2526.20 Who is eligible to receive a full education award from the National Service Trust?

(a) *General.* To receive a full education award from the National Service Trust, an AmeriCorps participant must meet the eligibility requirements for, and successfully complete the required term of service in, an approved AmeriCorps position, including approved AmeriCorps positions in the VISTA program established by the Domestic Volunteer Service Act of 1973 (42 U.S.C. 4950 et. seq.) and the National Civilian Community Corps program established by the National and Community Service Act of 1990.

(b) *Conditions.* (1) For any term of service, a VISTA Volunteer who successfully completes his or her required term of service is only eligible to receive an education award from the National Service Trust if he or she does not accept the postservice stipend authorized under section 105(a)(1) of the Domestic Volunteer Service Act of 1973.

(2) For any term of service, a National Civilian Community Corps participant who successfully completes his or her required term of service is only eligible to receive an education award from the National Service Trust if he or she does not accept the alternative benefit described in section 158(g) of the National and Community Service Act of 1990.

§ 2526.30 Who is eligible to receive a full Stafford loan forgiveness award from the National Service Trust?

An individual who successfully completes a term of service in an approved AmeriCorps position in a Stafford Loan Forgiveness program is eligible to receive a full Stafford loan forgiveness award.

§ 2526.40 Is an AmeriCorps participant who does not complete a term of service eligible to receive a pro-rated education or Stafford loan forgiveness award?

(a) An individual who is released from a term of service for compelling personal circumstances, in accordance with § 2522.230(a) of this chapter, is eligible to receive a pro-rated education or Stafford loan forgiveness award as determined according to § 2527.10(d)(1) of this chapter if—

(1) The individual completed at least fifteen percent of his or her required term of service prior to the release; and

(2) The program chooses to provide the individual with a pro-rated education or Stafford loan forgiveness award pursuant to § 2522.230(a)(1) of this chapter rather than permitting the individual to complete the remainder of the term of service after a temporary suspension of service pursuant to § 2522.230(a)(2) of this chapter.

(b) Programs are encouraged, when appropriate, to suspend service rather than offer prorated educational benefits.

(c) An individual who is released from a term of service for cause in accordance with § 2522.230(b) of this chapter is not eligible for any portion of an education or Stafford loan forgiveness award.

(d) A VISTA volunteer who does not complete a term of service as a result of the early closure of the project in which he or she is serving is eligible to receive a pro-rated education award as determined according to § 2527.10(d)(1) of this chapter.

§ 2526.50 What conditions must an individual who has received an education award meet in order to use that education award?

An individual who receives an education award is eligible to use the award if the individual—

(a) Has received a high school diploma or its equivalent, is enrolled at an institution of higher education, or has received a waiver based on an individual education assessment conducted by the AmeriCorps program in which the individual participated;

(b) Is a citizen, national, or permanent resident alien of the United States; and

(c) Is not eligible to use the education award under § 2526.40 as a result of a conviction of the possession or sale of a controlled substance.

§ 2526.60 How do convictions for the possession or sale of controlled substances affect an education award recipient's ability to use that award?

(a) Except as provided in paragraph (b) of this section, a recipient of an education award who is convicted under pertinent Federal or State law of the possession or sale of a controlled substance is not eligible to use his or her education award from the date of the conviction until the end of a specified time period, which is determined based on the type of conviction as follows:

(1) For conviction of the possession of a controlled substance, the ineligibility periods are—

(i) One year for a first conviction;

(ii) Two years for a second conviction; and

(iii) For a third or subsequent conviction, indefinitely, as determined by the Corporation according to the following factors—

(A) Type of controlled substance;

(B) Amount of controlled substance;

(C) Whether firearms or other dangerous weapons were involved in the offense;

(D) Nature and extent of any other criminal record;

(E) Nature and extent of any involvement in trafficking of controlled substances;

(F) Length of time between offenses;

(G) Employment history;

(H) Service to the community;

(I) Recommendations from community members and local officials, including experts in substance abuse and treatment; and

(J) Any other relevant aggravating or ameliorating circumstances.

(2) For conviction of the sale of a controlled substance, the ineligibility periods are—

(i) Two years for a first conviction; and

(ii) Two years plus such additional time as the Corporation determines as appropriate for second and subsequent convictions, based on the factors set forth in paragraphs (a)(1)(iii) (A) through (J) of this section.

(b) (1) If the Corporation determines that an individual who has had his or her eligibility to use the education award suspended pursuant to paragraph (a) of this section has successfully completed a legitimate drug rehabilitation program, or in the case of a first conviction that the individual has enrolled in a legitimate drug rehabilitation program, the individual's eligibility to use the education award will be restored.

(2) In order for the Corporation to determine that the requirements of paragraph (b)(1) of this section have been met—

(i) The drug rehabilitation program must be recognized as legitimate by appropriate Federal, State or local authorities; and

(ii) The individual's enrollment in or successful completion of the legitimate drug rehabilitation program must be certified by an appropriate official of that program.

§ 2526.70 What is the time period during which an individual must use an education award?

(a) *General requirement.* An individual must use an education award within seven years of the date on which the individual successfully completes a term of service, unless the individual applies for and receives an extension in accordance with the requirements of paragraph (b) of this section.

(b) *Extensions.* In order to receive an extension of the seven-year time period for using an education award, an individual must apply to the Corporation for an extension prior to the end of that time period. The Corporation will grant an application for an extension under the following circumstances:

(1) If the Corporation determines that an individual was performing another term of service in an approved AmeriCorps position during the seven-year period, the Corporation will grant an extension for a time period that is equivalent to the time period during which the individual was performing the other term of service.

(2) If the Corporation determines that an individual was unavoidably prevented from using the education award during the seven-year period, the Corporation will grant an extension for a period of time that the Corporation deems appropriate. An individual who is ineligible to use an education award as a result of the individual's conviction of the possession or sale of a controlled substance under § 2526.40 is not considered to be unavoidably prevented from using the education award for the purposes of this paragraph.

§ 2526.80 How many education or Stafford loan forgiveness awards may an individual receive?

An individual may receive an education or Stafford loan forgiveness award for each of up to two terms of service. For the purposes of this section, full-time, part-time and reduced part-time terms of service described in § 2522.220 of this chapter are each considered terms of service.

§ 2526.90 May an individual receive an education or Stafford loan forgiveness award and loan cancellations for the same service?

No. Although an education award may be used to repay qualified student loans pursuant to § 2528.20 of this chapter, an individual may not receive an education or Stafford loan forgiveness award for a term of service and have that same service credited toward repayment of other student loans.

§ 2526.100 How are education and Stafford loan forgiveness awards treated in determining eligibility for financial assistance under the Higher Education Act of 1965, as amended?

Institutions of higher education shall consider education and Stafford loan forgiveness awards neither as income in calculating expected family contributions nor as estimated financial assistance in packaging assistance under the Higher Education Act of 1965, as amended (20 U.S.C. 1070 et seq.).

PART 2527—AMOUNT OF AMERICORPS EDUCATIONAL BENEFITS

Sec.

2527.10 How are the amounts of the education and Stafford loan forgiveness awards determined?

Authority: 42 U.S.C. 12601–12604

§ 2527.10 How are the amounts of the education and Stafford loan forgiveness awards determined?

(a) *Education awards for full-time service.* The education award for full-time service is equal to 90 percent of—

(1) One-half of an amount equal to the aggregate basic educational assistance allowance provided in 38 U.S.C. 3015(b)(1) (as in effect on July 28, 1993), for the period referred to in 38 U.S.C. 3013(a)(1) (as in effect on July 28, 1993), for a member of the Armed forces who is entitled to such an allowance under 38 U.S.C. 3011 and whose initial obligated period of active duty is two years; less

(2) One-half of the aggregate basic contribution required to be made by the member in 38 U.S.C. 3011(b) (as in effect on July 28, 1993).

(b) *Stafford loan forgiveness awards for full-time service.* The Stafford loan forgiveness award for a full-time participant in a Stafford Loan Forgiveness program is equal to 15 percent of that greater of—

(1) That participant's current Stafford loan obligations that were incurred during the final two years of that participant's undergraduate education; or

(2) That participant's current Stafford loan obligations that were incurred during the most recent two years of that participant's graduate education in a teaching program.

(c) *Part-time service.* The education and Stafford loan forgiveness awards for part-time terms of service are equal to one-half of the corresponding full-time education and Stafford loan forgiveness awards described in paragraphs (a) and (b) of this section.

(d) *Incomplete or reduced terms of service.* (1) The education or Stafford loan forgiveness awards for individuals who are released from a term of service for compelling personal circumstances and are eligible for a pro-rated full- or part-time education or Stafford loan forgiveness award in accordance with the requirements in § 2526.40 of this chapter, or for VISTA volunteers who

are released due to the early of a project, are equal to the product of—

(i) The ratio of the portion of the term of service completed to the required term of service; and

(ii) The amount of the full- or part-time education award available for that term of service as determined pursuant to paragraph (a), (b) or (c) of this section.

(2) The education award for individuals serving in a reduced part-time term of service described in § 2522.220 of this chapter is equal to the product of—

(i) The ratio of the number of hours of service required for the reduced part-time term of service to 900; and

(ii) The amount of the part-time education or Stafford loan forgiveness award as determined pursuant to paragraph (c) of this section.

(e) *Authority to aggregate awards.* An individual who serves two terms of service in a Stafford loan forgiveness program(s) may elect (prior to the end of the first such term of service) to aggregate the two Stafford loan forgiveness awards that the individual receives such that the individual receives a single Stafford loan forgiveness award at the end of the second term of service that is equal to the sum of the awards for each of the terms. An individual who wishes to aggregate his or her Stafford loan forgiveness awards must comply with the procedural requirements of § 2528.60 of this chapter.

PART 2528—USES OF AND PROCEDURES FOR USING EDUCATIONAL BENEFITS

Sec.

2528.10 For what purposes may education awards be used?
2528.20 What are the procedural requirements for using education awards to repay qualified student loans?
2528.30 What are the procedural requirements for using education awards to pay for all or part of the cost of attendance at an institution of higher education or to pay for expenses incurred in participating in an approved school-to-work program?
2528.40 Is there a limit on the amount of an individual's education award that the Corporation will disburse to an institution of higher education for a given period of enrollment?
2528.50 What happens if an individual withdraws or fails to complete the period of enrollment in an institution of higher education or school-to-work program for which the Corporation has disbursed all or part of that individual's education award?
2528.60 What are the procedural requirements for using a Stafford loan forgiveness award to repay Stafford loans?

Authority: 42 U.S.C. 12601–12604.

§ 2528.10 For what purposes may education awards be used?

(a) Education awards may be used—

(1) To repay qualified student loans or portions thereof in accordance with § 2528.20;

(2) To pay all or part of the cost of attendance at an institution of higher education in accordance with §§ 2528.30 through 2528.50; and

(3) To pay expenses incurred in participating in approved school-to-work programs in accordance with § 2528.60.

(b) Education awards are divisible and may be applied to any combination of those loans, costs and expenses described in paragraph (a) of this section.

§ 2528.20 What are the procedural requirements for using education awards to repay qualified student loans?

(a) In order to use an education award to repay qualified student loans, the recipient of the award must submit an application to the Corporation, in a manner prescribed by the corporation that:

(1) Identifies, or permits the Corporation to identify, the holder or holders of the loans;

(2) Indicates, or permits the Corporation to determine, the amounts of principal and interest outstanding on the loans;

(3) Specifies, if the outstanding balance of the principal on the loans is greater than the amount to be disbursed by the Corporation, which of the loans the individual prefers to have paid; and

(4) Contains whatever other information the Corporation may require.

(b) Upon receipt of an application under paragraph (a) of this section, the Corporation will notify each holder of a loan that has been designated for payment in the individual's application and will identify any information or documentation that the holder must provide to the corporation before the Corporation will make payment.

(c) When the Corporation receives all required information from the holder of the loan, the Corporation will pay the holder of the loan in accordance with the instructions in the application of the education award recipient and will notify the recipient of the payment.

(d) The Corporation may establish procedures to aggregate payments to holders of loans for more than a single individual.

§ 2528.30 What are the procedural requirements for using education awards to pay for all or part of the cost of attendance at an institution of higher education or to pay for expenses incurred in participating in an approved school-to-work program?

(a) In order to use an education award to pay for the cost of full-time or part-time attendance at an institution of higher education or to pay for expenses incurred in participating in an approved school-to-work program, the recipient of an award must submit an application to the institution of higher education or school-to-work program in which the individual is or will be enrolled, on a form prescribed by the Corporation, that contains such information as the Corporation may require to verify that the individual is a recipient of and eligible to use an education award.

(b) An institution of higher education or approved school-to-work program that receives one or more applications submitted in accordance with the requirements of paragraph (a) of this section shall submit to the Corporation, in a manner prescribed by the Corporation, a statement that—

(1) Identifies each eligible individual filing an application;

(2) Specifies the amounts for which such eligible individuals are qualified;

(3)(i) For institutions of higher education, certifies that—

(A) The institution of higher education has in effect a program participation agreement under section 487 of the Higher Education Act of 1965;

(B) The institution's eligibility to participate in any of the programs under title IV of such Act has not been limited, suspended, or terminated; and

(C) Individuals using education awards to pay for the cost of attendance at that institution do not comprise more than 15 percent of the total student population of the institution;

(ii) For school-to-work programs, certifies that the program has been approved by the Departments of Education and Labor;

(4) Indicates the costs of attendance or participation for any period(s) of enrollment for which the individual(s) are applying the education award(s); and

(5) Contains such provisions concerning financial compliance as the Corporation may require in the application.

(c) When the Corporation receives a statement from an institution of higher education or a school-to-work program in accordance with the requirements of paragraph (b) of this section, the Corporation will pay a first installment for the first period of enrollment, which

shall be not more than half of the total monetary value of the education awards that the individuals identified on the institution's statement are scheduled to receive. The Corporation will pay installments for each subsequent period of enrollment upon receipt of statements updating the information required under paragraph (b) of this section for the relevant period of enrollment.

§ 2528.40 Is there a limit on the amount of an individual's education award that the Corporation will disburse to an institution of higher education for a given period of enrollment?

Yes. The Corporation's disbursement from an individual's education award for any period of enrollment may not exceed the difference between—

(a) The individual's cost of attendance for that period of enrollment, determined in accordance with section 472 of the Higher Education Act of 1965; and

(b) The sum of—

(1) The student's estimated financial assistance for that period under part A of title IV of such Act; and

(2) The student's veterans' education benefits, determined in accordance with section 480(c) of such Act.

§ 2528.50 What happens if an individual withdraws or fails to complete the period of enrollment in an institution of higher education or school-to-work program for which the Corporation has disbursed all or part of that individual's education award?

(a) (1) An institution of higher education or school-to-work program that receives a disbursement of education award funds from the Corporation must have in effect a fair and equitable refund policy that includes procedures for providing a refund to the Corporation if an individual for whom the Corporation has disbursed education award funds withdraws or otherwise fails to complete the period of enrollment at that institution or program for which the assistance was provided.

(2) (i) For purposes of this section, an institution of higher education's refund policy is deemed "fair and equitable" if it is consistent with the requirements of paragraphs (b) and (c) of section 484B of the Higher Education Act of 1965, as amended.

(ii) For the purposes of this section, a school-to-work program's refund policy is deemed "fair and equitable" if it complies with any standards that may be developed by the Departments of Education and Labor.

(b) The Corporation credits to the individual's education award allocation in the National Service Trust the amount of any refund received for that individual under paragraph (a) of this section.

§ 2528.60 What are the procedural requirements for using a Stafford loan forgiveness award to repay Stafford loans?

(a) In order to apply a Stafford loan forgiveness award to the repayment of a Stafford loan(s), a participant in an AmeriCorps Stafford Loan Forgiveness program must submit an application to the Corporation that—

(1) Identifies the holder or holders of the participant's Stafford loans as described in § 2527.10(b) of this chapter;

(2) Indicates the amounts of outstanding principal and the rates of interest on those loans;

(3) Indicates, where appropriate, to which of the loans the individual would prefer to apply the Stafford loan forgiveness award;

(4) If the participant serves two terms of service in a Stafford Loan Forgiveness program, indicates whether the participant wishes to aggregate the Stafford loan forgiveness awards pursuant to § 2527.10(e) of this chapter; and

(5) Contains whatever other information the Corporation may require.

(b) When a participant receives a Stafford loan forgiveness award, the Corporation will notify each holder of a Stafford loan identified in the participant's application of the portion of the loan that the Corporation will repay and will identify any information or documentation that the holder must provide to the Corporation.

(c) When the Corporation receives all required information from the holder of the loan(s) pursuant to paragraph (b) of this section, the Corporation will pay the holder(s) an amount determined according to § 2527.10 of this chapter and will notify the participant of the payment.

(d) The Corporation may establish procedures to aggregate payments to holders of Stafford loans for more than one individual.

PART 2529—FORBEARANCE AND INTEREST PAYMENT PROCEDURES

Sec.

2529.10 What are the procedural requirements for obtaining forbearance in the repayment of a qualified student loan during an individual's term of service in an approved AmeriCorps position?
2529.20 What are the procedural requirements for using National Service Trust funds to pay interest that accrues on a qualified student loan for which an individual has obtained forbearance?
2529.30 What additional student loan forbearance benefits are available for VISTA volunteers?

Authority: 42 U.S.C. 12601–12604.

§ 2529.10 What are the procedural requirements for obtaining forbearance in the repayment of a qualified student loan during an individual's term of service in an approved AmeriCorps position?

(a) In order to obtain forbearance in the repayment of a qualified student loan during a term of service in an approved AmeriCorps position, an individual, other than a VISTA volunteer, must submit a written request to the holder of the loan.

(b) Upon receipt of a request under paragraph (a) of this section, the holder of a qualified student loan must contact the Corporation to verify that the individual is serving in an approved AmeriCorps position and to determine the period for which the holder must grant forbearance.

(c) The holder shall grant forbearance in the repayment of a qualified student loan for the period of an individual's required term of service after obtaining the verification required under paragraph (b) of this section.

(d) The holder shall promptly report to the Corporation each individual and loan for which it grants forbearance, the period for which it has granted forbearance, and the projected amount of interest that will accrue on the loan during the period of forbearance.

(e) If an individual who has obtained forbearance on a qualified student loan(s) does not complete his or her term of service, or if that individual's term of service is suspended, the Corporation will promptly notify the holder(s) of that loan(s).

(f) The holder is not required to grant forbearance in the repayment of qualified student loans for any period during which an individual's service in an approved AmeriCorps position has been suspended.

§ 2529.20 What are the procedural requirements for using National Service Trust funds to pay interest that accrues on a qualified student loan for which an individual has obtained forbearance?

The Corporation will make payments from the National Service Trust for interest that accrues on qualified student loans for which an individual, other than a VISTA volunteer, has obtained forbearance under § 2529.10 in accordance with the following requirements:

(a) *Completed terms of service.* (1) If an individual successfully completes a term of service, the Corporation will notify the holder of the individual's loan of the date of completion; the holder shall document the accrued interest expense to the Corporation; and the Corporation will pay all or a portion of the accrued interest and notify the individual and the holder of the loan of the payment.

(2) The percentage of the accrued interest that the Corporation will pay pursuant to paragraph (a)(1) of this section is equal to the lesser of—

(i) The product of—

(A) The required number of hours for the term of service divided by the total number of days for which forbearance was granted; and

(B) 365 divided by 17; and

(ii) 100.

(b) *Incomplete terms of service.* (1) If an individual does not successfully complete a term of service, but is eligible for a pro-rated educational benefits under § 2527.10(c) of this chapter or pro-rated Stafford Loan Forgiveness under § 2522.650(c) of this chapter, the Corporation will notify the holder of the loan if the date of the individual's release, the holder of the loan shall document to the Corporation the amount of accrued interest as of the date of the release, and the Corporation will pay all or a portion of such interest and notify the individual and the holder of the loan of the payment.

(2) The percentage of the accrued interest that the Corporation will pay pursuant to paragraph (b)(1) of this section is equal to lesser of—

(i) The product of—

(A) The number of hours of service completed divided by the number of days for which forbearance was granted; and

(B) 365 divided by 17; and

(ii) 100.

(3) The individual is responsible for the repayment of any accrued interest that is not paid by the Corporation pursuant to paragraph (b)(2) of this section.

(4) If the individual does not successfully complete the required term of service and is not eligible for a pro-rated education award under § 2527.10(c) of this chapter or pro-rated Stafford Loan Forgiveness under § 2522.605(c) of this chapter, the Corporation will notify the holder of the loan of the circumstances and date of the individual's release but will pay no portion of the accrued interest.

(c) *Suspended service.* The Corporation will not pay any interest expenses that accrue on an individual's qualified student loan(s) during a period of suspended service.

§ 2529.30 What additional student loan forbearance benefits are available for VISTA volunteers?

(a) VISTA volunteers may be eligible to have periodic installment payments of principal deferred for up to three years during periods of economic hardship, in accordance with the Higher Education Act of 1965, as amended.

(b) VISTA volunteers also may qualify for interest benefits on Stafford loans from the Department of Education under 34 CFR 682.301.

BILLING CODE 6820–BA–M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 226

[Docket No. 940663–4163; I.D. 040694A]

Designated Critical Habitat; Steller Sea Lion

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Final rule; technical amendment.

SUMMARY: NMFS announces a technical amendment to the final rule that designated Steller sea lion critical habitat under the Endangered Species Act (ESA). The technical amendment revises regulations by changing the name of one designated haulout site from Ledge Point to Gran Point and by correcting the longitude and latitude of 12 haulout sites, including Gran Point. The purpose of this action is to correct errors in the published regulations. These corrections are consistent with the goals and objectives of the ESA.

EFFECTIVE DATE: June 14, 1994.

FOR FURTHER INFORMATION CONTACT: Susan Mello, Protected Resources Management Division, Alaska Region, NMFS; (907) 586–7235.

SUPPLEMENTARY INFORMATION:

Background

In late 1990, NMFS listed Steller sea lions as a threatened species under the ESA because of a drastic population decline (55 FR 49204, November 26, 1990). Coincident with, and subsequent to, the listing, NMFS implemented protective regulations under the ESA and the Magnuson Fishery Conservation and Management Act to aid recovery of the species. On August 27, 1993, NMFS designated critical habitat for Steller sea lions, which includes all rookeries within U.S. borders, major haulouts in Alaska, aquatic areas associated with these terrestrial habitats, and aquatic foraging habitats in waters off Alaska (58 FR 53138).

The purpose of this technical amendment is to correct earlier transcription errors in the regulations, and to incorporate improved locational data from NMFS and Alaska Department of Fish and Game surveys.

Revisions to 50 CFR part 226 regulations include:

1. Changing the name of one designated haulout site from Ledge Point to Gran Point.

2. Correcting the latitude and longitude of Seguam Island-South, Bird Island, Ushagat Island, Cape Fairweather, Graves Rock, Biorka Island, Cape Addington, Cape Cross, Cape Ommaney, Coronation Island, Gran Point, and Lull Point haulout sites.

Classification

This technical amendment makes minor corrections to existing rules. Therefore, notice and public comment thereon and a delay in making these corrections effective would serve no purpose. Accordingly, under 5 U.S.C. 553(b)(3)(B), notice and public comment thereon are unnecessary. In addition, under 5 U.S.C.(d), good cause exists to waive a delay in the effective date

This technical amendment is being issued without prior comment. It is not subject, therefore, to the Regulatory Flexibility Act requirement for a regulatory flexibility analysis and none has been prepared.

This technical amendment makes minor corrections to a rule that has been determined to be "not significant" for purposes of E.O. 12866.

BILLING CODE 3510–22–P

Proposed Rules

Federal Register
Vol. 59, No. 114
Wednesday, June 15, 1994

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

OFFICE OF PERSONNEL MANAGEMENT

5 CFR Part 300

RIN 3206–AG06

Time-In-Grade Rule Eliminated

AGENCY: Office of Personnel Management.

ACTION: Proposed rulemaking.

SUMMARY: The Office of Personnel Management (OPM) is proposing to abolish the time-in-grade restriction on advancement to positions in the General Schedule. This proposal would implement recommendations of the President's National Performance Review and National Partnership Council. Abolishment of the restriction would eliminate the 1-year service requirement for promotions (but employees would have to meet qualification requirements).

DATES: Written comments will be considered if received no later than July 15, 1994.

ADDRESSES: Send or deliver written comments to Leonard R. Klein, Associate Director for Career Entry, Office of Personnel Management, room 6F08, 1900 E Street, NW., Washington, DC 20415.

FOR FURTHER INFORMATION CONTACT: Leota Shelkey Edwards on 202–606–0830 (FAX 202–606–2329).

SUPPLEMENTARY INFORMATION: Since the early 1950's, Federal employees in General Schedule positions at GS–5 and above have been required to serve at least 1 year in grade before being promoted. The restriction originated in statute with the "Whitten Amendment," a series of controls on expansion of the Federal work force during the Korean conflict. The intent of the restriction was to prevent excessively rapid promotions. Since expiration of the Whitten Amendment in 1978, OPM has continued the time-in-grade restriction in regulation but limited its application to General Schedule positions in the competitive service.

In its report *From Red Tape to Results: Creating a Government That Works Better & Costs Less*, the National Performance Review (NPR) recommended abolishing the time-in-grade restriction. The restriction can limit open competition by eliminating candidates who have the proven ability to perform the duties of higher grade positions, but have not served at least one year in lower graded Government positions.

The National Partnership Council, established by Executive Order 12871 of October 1, 1993, was responsible for developing legislative proposals for the President to implement the NPR recommendations. The Council, too, recommended abolishing the time-in-grade restriction (see *A Report to the President on Implementing Recommendations of the National Performance Review by the National Partnership Council, January 1994*). The Council further recommended that, as a condition of employment, the current time-in-grade requirement remain in effect for bargaining unit employees until the parties agree to modify it through either consensus or collective bargaining.

This document proposes to implement the NPR and Council recommendations and abolish the time-in-grade restriction. Eliminating the restriction would mean that employees' promotion eligibility will be based on their meeting qualification requirements. Also, agencies no longer would need OPM approval of training agreements that provide for consecutive accelerated promotions, as discussed in former Federal Personnel Manual subchapter 7, chapter 338 (provisionally retained through December 31, 1994, in the FPM Sunset Document.)

Regulatory Flexibility Act

I certify that this regulation will not have a significant economic impact on a substantial number of small entities because if affects only certain Federal employees.

List of Subjects in 5 CFR Part 300

Government employees, Personnel Management Office.

Office of Personnel Management.

James B. King,

Director.

Accordingly, OPM proposes to amend 5 CFR Part 300, as follows:

PART 300—EMPLOYMENT (GENERAL)

The authority citation for part 300 is revised to read as follows:

Authority: 5 U.S.C. secs. 552, 3301, 3302; E.O. 10577, 3 CFR, 1954–1958 Comp., page 218, unless otherwise noted.

Secs. 300.101 through 300.104 also issued under 5 U.S.C. secs. 7201, 7204, 7701; E.O. 11478, 3 CFR, 1966–1970 Comp., page 803.

Secs. 300.401 through 300.408 also issued under 5 U.S.C. secs. 1302(c), 2301, and 2302.

Secs. 300.501 through 300.507 also issued under 5 U.S.C. 1103(a)(5).

Subpart F—[Removal and Reserved]

2. In Part 300, Subpart F, consisting of §§ 300.601 through 300.606, is removed and reserved.

BILLING CODE 6325–01–M

DEPARTMENT OF AGRICULTURE

Farmers Home Administration

7 CFR Parts 1942, 1948, 1951, and 1980

RIN 0575–AB77

Loans and Grants to Rural Associations and Public Bodies

AGENCY: Farmers Home Administration, USDA.

ACTION: Proposed rule.

SUMMARY: The Farmers Home Administration (FmHA) proposes to amend its regulations to increase the loan size threshold for requiring interim financing, clarify instructions governing the preparation of Community Program notes and bonds, modify the procedures for monitoring graduation of existing borrowers to other credit, clarify procedures for servicing loans to borrowers whose loans were sold in the 1987 Community Program Asset Sale, implement use of an applicant's Internal Revenue Service (IRS) Taxpayer Identification Number (TIN), and provide consistency in docket preparation through the use of a checklist. This action is necessary to reduce the burden on the public, comply with the OMB Circular A–129 and simplify procedures for the agency's field staff.

The intended effect of this change is to bring the agency in compliance with OMB Circular A–129, and to clarify and

simplify the agency regulations to provide better service to the public.

In the Food, Agriculture, Conservation and Trade Act of 1990, Congress transferred certain community and business programs administered by FmHA to the newly created Rural Development Administration (RDA). Until further notice, RDA programs continue to be administered under FmHA programs regulations.

DATES: Comments must be submitted on or before August 15, 1994.

ADDRESSES: Submit written comments in duplicate to the Office of the Chief, Regulations Analysis and Control Branch, Farmers Home Administration, U.S. Department of Agriculture, room 6348, South Agriculture Building, 14th Street and Independence Avenue SW., Washington, DC 20250–0700. All written comments made pursuant to this notice will be available for public inspection during regular working hours at the above address.

FOR FURTHER INFORMATION CONTACT: Bill Barrett, Senior Loan Specialist, Community Facilities Division, Rural Development Administration, U.S. Department of Agriculture, room 6310, South Agriculture Building, 14th Street and Independence Avenue SW., Washington DC 20250–0700, telephone (202) 720–1498.

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Act

The reporting and recordkeeping requirements contained in these regulations have been submitted to the Office of Management and Budget for review under section 350(h) of the Paperwork Reduction Act of 1980. The public reporting burden for this collection of information is estimated to vary from 10 minutes to 15 hours per response, with an average of 2.47 hours per response including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to Department of Agriculture, Clearance Officer, OIRM, room 404–W, Attention: Desk Officer for Farmers Home Administration, Washington, DC, 20503.

Classification

We are issuing this proposed rule in conformance with Executive Order 12866, and we have determined that it is not a "significant regulatory action." Based on information compiled by the Department, we have determined that this proposed rule: (1) Would have an effect on the economy of less than $100 million; (2) would not adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or tribal governments or communities; (3) would not create a serious inconsistency or otherwise interfere with an action taken or planned by another agency; (4) would not alter the budgetary impact of entitlements, grants, user fees, or loan programs or rights and obligations of recipients thereof; and (5) would not raise novel legal or policy issues arising out of legal mandates, the President's priorities, or principles set forth in Executive Order 12866.

Intergovernmental Review

The programs/activities are listed in the Catalog of Federal Domestic Assistance under numbers 10.764, Resource Conservation and Development Loans; 10.760, Water and Waste Disposal Systems for Rural Communities; 10.770, Water and Waste Disposal Loans and Grants (Section 306C); 10.766, Community Facilities Loans; and 10.434, Nonprofit National Corporation Loan and Grant Program. The Section 601—Energy Impacted Area Development Assistance Program is not in the Catalog of Federal Domestic Assistance because it is not funded. All programs listed are subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with State and local officials. FmHA conducts intergovernmental consultation in the manner delineated in FmHA Instructions 1901–H and 1940–J.

Environmental Impact Statement

This document has been reviewed in accordance with 7 CFR Part 1940, Subpart G, "Environmental Program." FmHA has determined this action does not constitute a major Federal action significantly affecting the quality of human environment, and in accordance with the National Environmental Policy Act of 1969, Public Law 91–190, an Environmental Impact Statement is not required.

Compliance with Executive Order 12778

The regulation has been reviewed in light of Executive Order 12778 and meets the applicable standards provided in sections 2(a) and 2(b)(2) of that Order. Provisions within this part which are inconsistent with state law are controlling. All administrative remedies pursuant to 7 CFR Part 1900 Subpart B must be exhausted prior to filing suit.

The Agency regulations require the use of interim construction financing for all Community Program loans of $50,000 or more to encourage the participation of local lenders and to reduce the need for multiple draws of FmHA loan funds. Interim financing is not cost effective for very small loans and for those projects that have a short construction period due to the duplication of much of the financing costs for the two issues. The Agency proposes to raise the loan size threshold from $50,000 to $100,000 to reduce the burden on smaller issues, and give the State Director additional authority to waive the interim financing requirement for larger issues, projects with a construction period of 6 months or less, and under other circumstances when the cost is considered prohibitive.

1. The proposed changes will assist FmHA field employees, attorneys, and bond counsel in preparing promissory notes and bonds for Community Programs loans. The section of the regulations used by bond counsels and others in drafting debt instruments for Community Programs loans has been found to be incomplete, vague, or poorly organized.

2. FmHA proposes to amend its regulations to incorporate and require the use of Guide 28, "Community Programs Lender Contact Worksheet," of subpart A of part 1942, and exhibit D, "Community Programs Thorough Review Worksheet," of subpart F of part 1951 to strengthen the documentation on which loanmaking and graduation review decisions are made. FmHA regulations require that applicants who may be able to finance projects through commercial sources be referred to those sources. In addition, when it appears that a borrower can refinance its loan(s) (graduate), the borrower will be required to seek other financing. Exhibit D will provide a systematic method to evaluate each thorough review conducted during the graduation review process regarding the borrower's ability to refinance its loan(s). This action is needed to encourage stronger documentation on which decisions are made by FmHA during loanmaking and graduation reviews.

The proposed changes will provide a system for collecting and evaluating lending, applicant, and borrower data, and a basis for referring applicants and borrowers to other lending sources. The new Guides 28 and 29 of subpart A of part 1942 and Exhibit D of subpart F of part 1951 are available in any FmHA Office but are not published in the Federal Register.

The Office of Inspector General (OIG) Review of FmHA Graduation of Community Programs Loans to Commercial Lenders, dated June 22, 1989, found, in part, that State and District Office surveys of lender refinancing criteria were not always adequate. (Guide 28 will be used to record the lending criteria of commercial lenders and serve as a basis for applicant referrals to other sources of credit, as well as resource material for requesting a borrower to refinance.) The OIG report also found that inadequate or poorly documented graduation reviews were performed and recommended that a guide be developed to serve as a basis for making decisions.

3. OMB Circular A–129 requires Federal agencies to obtain the IRS TIN from all applicants to assist in debt collection. The Agency proposes to amend its regulations to require the use of the applicant's TIN as part of its case number.

4. In accordance with the loan sale agreements for the 1987 Community Programs Asset Sale, applicants whose loans were sold are required to obtain consent from the purchaser of the loans whenever additional financing is requested. The Agency proposes to incorporate the purchaser's requirements into its regulations to assist applicants and FmHA field offices in the orderly processing of such requests for consent. The proposed Guide 29 of subpart A of part 1942 will provide detailed and complete instructions to loan applicants and FmHA field offices to ensure the orderly processing of requests for consent.

5. Community Programs regulations currently include the use of Forms FmHA 1942–39, FmHA 1942–40, and Guide 15 of subpart A of part 1942 to assist in orderly project development, which have been found to be ineffective. FmHA proposes to replace Forms FmHA 1942–39, FmHA 1942–40, and Guide 15 with a comprehensive loan processing checklist. A general lack of consistency in docket preparation has been observed. The checklist will provide additional guidance to field offices and loan/grant applicants in orderly docket preparation and improve the consistency and quality of Community Programs loans. The revised Guide 15 of subpart A of part 1942 is not published in the Federal Register, but is available in any State and District Office.

List of Subjects

7 CFR Part 1942

Business and industry, Community facilities, Fire prevention, Loan programs—housing and community development, Loan programs—natural resources, Reporting and recordkeeping requirements, Rural areas, Soil conservation, Waste treatment and disposal, Water supply.

7 CFR Part 1948

Coal, Community facilities, Loan programs—housing and community development, Reporting and recordkeeping requirements, Rural areas.

7 CFR Part 1951

Accounting, Agriculture, Community facilities, Credit, Housing, Loan programs—housing and community development, Low and moderate income housing, Reporting and recordkeeping requirements, Rural areas.

7 CFR Part 1980

Administrative practice and procedure, Business and industry, Community facilities, Credit, Loan programs—agriculture, loan programs—business, Loan programs—housing and community development, Low and moderate income housing, Reporting and recordkeeping requirements, Rural areas.

Therefore, Chapter XVIII, Title 7, Code of Federal Regulations is proposed to be amended as follows:

PART 1942—ASSOCIATIONS

1. The authority citation for part 1942 is revised to read as follows:

Authority: 5 U.S.C. 301; 7 U.S.C. 1989; 16 U.S.C. 1005; 7 CFR 2.23 and 2.70.

Subpart A—Community Facility Loans

2. Section 1942.2 is amended by revising paragraphs (a)(2)(i) and (c)(3) to read as follows:

§ 1942.2 Processing applications.

(a) * * *

(2) * * *

(i) State Directors should maintain files containing criteria from commercial lenders to be used in determining the preapplications which should be referred to those lenders. In order to provide a basis for such referrals, State and District Directors should maintain liaison with representatives of banks, bond dealers, financial consultants, and other lender representatives who are interested in financing Water and Waste and Community Facility projects. State Directors will contact lenders having potential statewide or multidistrict interest in Community Programs lending. District Directors will contact lenders having a potential interest in Community Programs lending primarily within their District. Guide 28 (available in any State and District Office), or other locally developed worksheet containing similar information, will be used to document the contacts with commercial lenders. The State and District Directors will keep each other informed of lender criteria by forwarding copies of completed Guide 28 and/or worksheets to each other.

* * * * *

(c) * * *

(3) When an applicant is notified to proceed with an application, the District Director should arrange for a conference with the applicant to provide copies of appropriate appendices and forms; furnish guidance necessary for orderly application processing; and to initiate a processing checklist for establishing a time schedule for completing items. Guide 15 (available in any State or District Office) will be used by the State Director to develop a processing checklist that includes all applicable items in the guide and any other items that may be unique to the individual State. The checklist will be updated during the application conference based upon decisions reached with the applicant. The District Director will give the applicant a copy and explain the updating process. The original will be retained in the District Office official file and will be updated as the application is processed and the project develops to completion. A copy will be sent to the State Program Chief who is responsible for keeping the copy current. The District Director will arrange for additional conferences with the applicant as needs arise. The applicant's copy of the processing checklist should be updated during these meetings.

* * * * *

3. Section 1942.5 is amended by adding paragraph (d)(8) to read as follows:

§ 1942.5 Application review and approval.

* * * * *

(d) * * *

(8) The case number will be the applicant's or transferee's Internal Revenue Service TIN, preceded by State and county code numbers. Only one case number will be assigned to each applicant regardless of the number of loans or grants or number of separate facilities, unless an exception is authorized by the National Office. When an applicant has not received a TIN, the State Office will assign a temporary identification number. See the Forms Manual Insert for Form FmHA 1940–1

for specific instructions. Any temporary number assigned must be replaced with the TIN prior to loan or grant closing unless prior approval of the National Office is received.

4. Section 1942.17 is amended by adding paragraph (m)(8) and by amending the introductory text in paragraph (n)(3) by revising "$50,000 to "$100,000" in the first sentence, by adding the words "(available in any State or District Office)" between the words "Guide 1a" and the comma in the second sentence, and by adding a new sentence after the first sentence, to read as follows:

§ 1942.17 Community facilities.

* * * * *

(m) * * *

(8) *Applicants indebted to the Community Programs Loan Trust 1987–A (Trust).* Applicants indebted to the Trust must obtain consent from the Trust prior to incurring additional debt. Guide 29 (available in any State or District Office) outlines the information normally required by the Trust.

* * * * *

(n) * * *

(3)

(3) * * * However, the State Director may authorize exceptions when the cost of issuance of both temporary and permanent debt instruments is considered prohibitive, or the planned construction period does not exceed 6 months. * * *

* * * * *

5. Section 1942.19 is revised to read as follows:

§ 1942.19 Information pertaining to preparation of notes or bonds and bond transcript documents for public body applicants.

(a) *General.* This section includes information for use by public body applicants in the preparation and issuances of evidence of debt (bonds, notes, or debt instruments, herein referred to as bonds) and other necessary loan documents.

(b) *Policies related to use of bond counsel.* The applicant is responsible for preparation of bonds and bond transcript documents. The applicant will obtain the services and opinion of recognized bond counsel experienced in municipal financing with respect to the validity of a bond issue, except as provided in paragraphs (b)(1) through (3) of this section. Bond counsel services may be obtained either directly or through the applicant's local counsel.

(1) *Issues of $50,000 or less.* With prior approval of the FmHA State Director, the applicant may elect not to use bond counsel. Such issues will be closed in accordance with the following:

(i) The applicant must recognize and accept the fact that application processing may require additional legal and administrative time;

(ii) It must be established that not using bond counsel will produce significant savings in total legal costs;

(iii) The local attorney most be able and experienced in handling this type of legal work;

(iv) The applicant must understand that it will likely have to obtain an opinion from bond counsel at its expenses if FmHA requires refinancing of its loan pursuant to statutory refinancing requirements;

(v) Bonds will be prepared in accordance with this regulation and conform as closely as possible to the preferred methods of preparation stated in paragraph (e) of this section; and

(vi) Specific closing instructions must be issued by OGC.

(2) *Issues of over $50,000 to $250,000.* The applicant may elect to use bond counsel only to issue a final opinion, and not to prepare the bond transcript and other documents, when the applicant, FmHA, and bond counsel agree in advance on the method of preparing the bond transcript documents. In such circumstances, the applicant will be responsible for preparation of the bond transcript.

(3) *Issues of over $250,000 to $500,000.* The applicant may elect not to use bond counsel in a straight note and mortgage situation if competitive bidding is not required for the sale unless a complicated financial situation exists. If there is a known backlog in the OGC Regional Office, FmHA will advise the applicant and suggest that using bond counsel may be more expeditious. If bond counsel is not used, the applicant must comply with paragraphs (b)(1)(iii) through (vi) of this section.

(c) *Bond transcript documents.* Any questions relating to FmHA requirements should be discussed with FmHA representatives. Bond counsel or local counsel, as appropriate, must furnish at least two complete sets of the following to the applicant, who will furnish one complete set to FmHA:

(1) Copies of all organization documents;

(2) Copies of general incumbency certificate;

(3) Certified copies of minutes or excerpts from all meetings of the governing body at which action was taken in connection with authorizing and issuing the bonds;

(4) Certified copies of documents evidencing that the applicant has complied fully with all statutory requirements incident to calling and holding a bond election, if one is necessary.

(5) Certified copies of resolutions, ordinances, or other documents such as bond authorizing resolutions or ordinance and any resolution establishing rates and regulating use of the facility, if such documents are not included in the minutes furnished;

(6) Copies of the official Notice of Sale and the affidavit of publication of the Notice of Sale when State statute requires a public sale;

(7) Specimen bond, with any attached coupons;

(8) Attorney's no-litigation certificate;

(9) Certified copies of resolutions or other documents pertaining to the bond award;

(10) Any additional or supporting documents required by bond counsel;

(11) For loans involving multiple advances of FmHA loan funds, a preliminary approving opinion of bond counsel, or local counsel if no bond counsel is involved, if a final unqualified opinion cannot be obtained until all funds are advanced. The preliminary opinion for the entire issue shall be delivered at or before the time of the first advance of funds. It will state that the applicant has the legal authority to issue the bonds, construct, operate and maintain the facility, and repay the loan, subject only to changes during the advance of funds, such as litigation resulting from the failure to advance loan funds, and receipt of closing certificates; and

(12) Preliminary approving opinion, if any, and final unqualified approving opinion of bond counsel, or local counsel if no bond counsel is involved, including an opinion as to whether interest on bonds will be exempt from Federal and State income taxes. With approval of the Administrator, a final opinion may be qualified to the extent that litigation is pending relating to Indian claims that may affect title to land or validity of the obligation. It is permissible for such options to contain:

(i) Language referring to the last sentence of section 306(a)(1) or to section 309A(h) of the Consolidated Farm and Rural Development Act (7 U.S.C. 1926(a)(1) or 1929a(h)); or

(ii) Language providing that, if the bonds are acquired by the Federal Government and sold on an insured basis from the Agriculture Credit Insurance Fund or the Rural Development Insurance Fund, interest on such bonds will be included in gross income for the purpose of Federal income tax statutes.

(d) *Interim construction financing from commercial sources for loans of*

$100,000 or more. When funds can be borrowed from commercial sources on an interim basis at reasonable interest rates, such interim financing will be obtained so as to preclude the necessity for multiple advances of FmHA funds. The State Director may authorize exceptions when:

(1) The cost of issuance of both temporary and permanent debt instruments is considered prohibitive; or

(2) The planned construction period does not exceed 6 months.

(e) *Permanent instruments for FmHA loans.* FmHA loans will be evidenced by an instrument determined legally permissible and in accordance with the following order of preference:

(1) *First preference—Form FmHA 440–22.* Refer to paragraph (e)(2) of this section for methods of various frequency payment calculations.

(2) *Second preference—single instruments with amortized installments.* A single instrument providing for amortized installments which follows Form FmHA 440–22 as closely as possible. The full amount of the loan must show on the face of the instrument, and there must be provisions for entering the date and amount of each advance on the reverse or an attachment. When principal payments are deferred, the instrument will show that "interest only" is due on interest-only installment dates, rather than specific dollar amounts. The payment period including the "interest only" installment cannot exceed 40 years, the useful life of the facility, or State statute of limitations, whichever occurs first. The amortized installment, computed as follows, will be shown as due on installment dates thereafter.

(i) *Monthly payments.* Multiply by twelve the number of years between the due date of the last interest-only installment and the final installment to determine the number of monthly payments. When there are no interest-only installments, multiply by twelve the number of years over which the loan is amortized. Then multiply the loan amount by the amortization factor and round to the next higher dollar:

Example of Computation of Monthly Payment:
Date of Loan Closing.....7–5–1986
Loan Amount.....$100,000.00
Interest Rate.....5%
Amortization Period.....40 years
Interest Only.....7–5–1987 and 7–5–1988 Installments
First Regular Installment.....7–5–1989
Final Installment.....7–5–2026
Computation: 2026–1988 *38 × 12 = 456* monthly payments
$100,000.00 × .00491 = $491.00 monthly payment due

(ii) *Semiannual payments.* Multiply by two the number of years between the due date of the last interest-only installment and the due date of the final installment to determine the correct number of semiannual periods. When there are no interest only installments, multiply by two the number of years over which the loan is amortized. Then multiply the loan amount by the applicable amortization factor:

Example:
Date of Loan Closing.....7–5–1986
Loan Amount.....$100.000.00
Interest Rate.....5%
Amortization Period.....40 years
Interest Only Installments.....7–5–1987 and 7–5–1988
First Regular Installment.....7–5–1989
Final Installment.....7–5–2026
Computation: 2026–1988=38 × 2 = 76 semiannual periods
$100,000.00 × .02952 = $2,950.00 semiannual payment due

(iii) *Annual payments.* Subtract the due date of the last interest-only installment from the due date of the final installment to determine the number of annual payments. When there are no interest-only installments, the number of annual payments will equal the number of years over which the loan is amortized. Then multiply the loan amount by the applicable amortization factor and round to the next higher dollar:

Example:
Date of Loan Closing.....7–5–1986
Loan Amount.....$100,000.00
Interest Rate.....5%
Amortization Period.....40 years
Interest Only Installments.....7–5–1987 and 7–5–1988
First Regular Installment.....7–5–1989
Final Installment.....7–5–2026
Computation: 2026–1988=38 annual payments
$100,000.00 × .05929 = $5,929.00 annual payment due

(3) *Third preference-single instrument with installments of principal plus interest.* If a single instrument with amortized installments is not legally permissible, use a single instrument providing for installments of principal plus interest accrued on the principal balance. For bonds with semiannual interest and annual principal, the interest is calculated by multiplying the principal balance times the interest rate and dividing this figure by two. Principal installments are to be scheduled so that total combined interest and principal payments closely approximate amortized payments.

(i) The repayment terms concerning interest-only installments described in paragraph (e)(2) of this section apply.

(ii) The instrument shall contain in substance provisions indicating:

(A) Principal maturities and due dates;

(B) Regular payments shall be applied first to interest due through the next principal and interest installment due date and then to principal due in chronological order stipulated in the bond; and

(C) Payments on delinquent accounts will be applied in the following sequence:

(*1*) Billed delinquent interest;

(*2*) Past due interest installments;

(*3*) Past due principal installments;

(*4*) Interest installment due; and

(*5*) Principal installment due.

(4) *Fourth preference—serial bonds with installments of principal plus interest.* If instruments described under the first, second, and third preferences are not legally premissible, use serial bonds with a bond or bonds delivered in the amount of each advance. Bonds will be numbered consecutively and delivered in chronological order. Such bonds will conform to the minimum requirements of paragraph (h) of this section. Provisions for application of payments will be the same as those set forth in paragraph (e)(3)(ii) (B) and (C) of this section.

(5) *Coupon bonds.* Coupon bonds will not be used unless required by State statute. Such bonds will conform to the minimum requirements of paragraph (h) of this section. Provisions for application of payments will be the same as those set forth in paragraph (e)(3)(ii) (B) and (C) of this section.

(i) To compute the value of each coupon when the bond denomination is consistent:

(A) Multiply the amount of the loan or advance by the interest rate and divide the product by 365 days to determine the daily accrual factor;

(B) Multiply the daily accrual factor by the number of days from the date of advance or last installment date to the next installment date; and

(C) Divide the interest computed in paragraph (e)(5)(i)(B) of this section by the number of bonds securing the advance to determine the individual coupon amount.

(ii) To compute the value of each coupon when the bond denomination varies:

(A) Multiply the denomination of the bond by the interest rate and divide the product by 365 days; and

(B) Multiply the daily accrual factor by the number of days from the date of advance or last installment date to the next installment due date; to determine the individual coupon amount.

(f) *Multiple advances of FmHA funds using permanent instruments.* Where interim financing from commercial

sources is not used, FmHA loan proceeds will be disbursed on an "as needed by borrower" basis in amounts not to exceed the amount needed during the 30-day periods.

(g) *Multiple advances of FmHA funds using temporary debt instruments.* When none of the instruments described in paragraph (e) of this section are legally permissible or practical, a bond anticipation note or similar temporary debt instrument may be used. The debt instrument will provide for multiple advances of FmHA loan funds and will be for the full amount of the FmHA loan. The instrument will be prepared by bond counsel, or local counsel if bond counsel is not involved, and approved by the State Director and OGC. At the same time FmHA delivers the last advance, the borrower will deliver the permanent bond instrument and the canceled temporary instrument will be returned to the borrower. The approved debt instrument will show at least the following:

(1) The date from which each advance will bear interest;

(2) The interest rate as determined by § 1942.17(f)(1) of this subpart;

(3) A payment schedule providing for interest on outstanding principal at least annually; and

(4) A maturity date which shall be no earlier than the anticipated issuance date of the permanent instrument(s) and no longer than the 40-year statutory limit.

(h) *Minimum bond specifications.* The provisions of this paragraph are minimum specifications only and must be followed to the extent legally permissible.

(1) *Type and denominations.* Bond resolutions or ordinances will provide that the instrument(s) be either a bond representing the total amount of the indebtedness or serial bonds in denominations customarily accepted in municipal financing (ordinarily in multiples of not less than $1,000). Single bonds may provide for repayment of principal plus interest or amortized installments. Amortized installments are preferred by FmHA.

(2) *Bond registration.* Bonds will contain provisions permitting registration for both principal and interest. Bonds purchased by FmHA will be registered in the name of "United States of America, Farmers Home Administration," and will remain so registered at all times while the bonds are held or insured by the Government. The FmHA address for registration purposes will be that of the Finance Office.

(3) *Size and quality.* Size of bonds and coupons should conform to standard practice. Paper must be of sufficient quality to prevent deterioration through ordinary handling over the life of the loan.

(4) *Date of bond.* Bonds will normally be dated as of the day of delivery. However, the borrower may use another date if approved by FmHA. Bonds may or may not be delivered at the same time funds are delivered; however, loan closing is the date of delivery of the bonds or the date of delivery of the first fond when utilizing serial bonds, regardless of the date of delivery of the funds. The date of delivery will be stated in the bond if different from the date of the bond. In all cases, interest will accrue from the date of delivery of the funds.

(5) *Payment date.* Loan payments will be scheduled to coincide with income availability and be in accordance with State law.

(i) If income is available monthly, monthly payments will be required unless precluded by State law. If income is available quarterly or otherwise more frequently than annually, payments must be scheduled on such basis. However, if State law only permits principal plus interest (P&I) type bonds, annual or semiannual payments will be used.

(ii) The payment schedule will be enumerated in the evidence of debt, or if that is not feasible, in a supplemental agreement.

(iii) Unless infeasible, the first payment will be scheduled one full month, or other period as appropriate, from the date of loan closing or any deferment period. Due dates falling on the 29th, 30th, or 31st day of the month will be avoided. When principal payments are deferred, interest-only payments will be scheduled at least annually.

(6) *Extra payments.* Extra payments are derived from the sale of basic chattel or real estate security, refund of unused loan funds, cash proceeds of property insurance as provided in § 1806.5(b) of this chapter (paragraph V.B. of FmHA Instruction 426.1), and similar actions which reduce the value of basic security. At the option of the borrower, regularly facility revenue may also be used as extra payments when regular payments are current. Unless otherwise established in the note or bond, extra payments will be applied as follows:

(i) For loans with amortized debt instruments, extra payments will be applied first to interest accrued through the date of receipt of the payment and second to principal last to become due.

(ii) For loans with debt instruments with P&I installments, the extra payment will be applied to the final unpaid principal installment.

(iii) For borrowers with more than one loan, the extra payment will be applied to the account secured by the lowest priority of lien on the property from which the extra payment was obtained. Any balance will be applied to other FmHA loans secured by the property from which the extra payment was obtained.

(iv) For assessment bonds, see paragraph (h)(13) of this section.

(7) *Place of payment.* Payments on bonds purchased by FmHA are to be submitted to the FmHA District Office. The District Office will process payments in accordance with part 1951, subpart B, of this chapter.

(8) *Redemptions.* Bonds will normally contain customary redemption provisions. However, no premium will be charged for early redemption on any bonds held by the Government.

(9) *Additional revenue bonds.* Parity bonds may be issued to complete the project. Otherwise, parity bonds may not be issued unless acceptable documentation is provided establishing that net revenues for the fiscal year following the year in which such bonds are to be issued will be at least 120 percent of the average annual debt service requirements on all bonds outstanding, including the newly-issued bonds. For purposes of this section, net revenues are, unless otherwise defined by State statute, gross revenues less essential operation and maintenance expenses. This limitation may be waived or modified by the written consent of bondholders representing 75 percent of the then-outstanding principal indebtedness. Junior and subordinate bonds may be issued in accordance with the loan agreement.

(10) *Scheduling of FmHA payments when joint financing is involved.* When FmHA participates with another lender in joint financing of the project, the FmHA principal and interest payments should approximate amortized installments.

(11) *Precautions.* The following types of provisions in debt instruments should be avoided:

(i) Provisions for the holder to manually post each payment to the instrument;

(ii) Provisions for returning the permanent or temporary debt instrument to the borrower in order that it, rather than FmHA, may post the date and amount of each advance or repayment on the instrument; or

(iii) Provisions that amend covenants contained in Forms FmHA 1942–47 or FmHA 1942–9.

(12) *Defeasance provisions in loan or bond resolutions.* When a bond issue is defeased, a new issue is sold which supersedes the contractual provisions of the prior issue, including the refinancing requirement and any lien on revenues. Since defeasance in effect precludes FmHA from requiring graduation before the final maturity date, it represents a violation of the statutory refinancing requirement; therefore, it is disallowed. No loan shall include a provision of defeasance.

(13) *Assessment bonds.* When security includes special assessment to be collected over the life of the loan, the instrument should address the method of applying any payments made before they are due. It may be desirable for such payments to be distributed over remaining payments due, rather than to be applied in accordance with normal procedures governing extra payments, so that the account does not become delinquent.

(14) *Multiple debt instruments.* The following will be adhered to when preparing debt instruments:

(i) When more than one loan type is used in financing a project, each type of loan will be evidenced by a separate debt instrument or series of debt instruments;

(ii) Loans obligated in different fiscal years and those obligated with different terms in the same fiscal year will be evidenced by separate debt instruments;

(iii) Loans obligated in for the same loan type in the same fiscal year with the same terms may be combined in the same debt instrument;

(iv) Loans obligated in the same fiscal year with different interest rates that can be closed at the same interest rate may be combined in the same debt instrument.

(i) *Bidding by FmHA.* Bonds offered for public sale shall be offered in accordance with State law and in such a manner to encourage public bidding. FmHA will not submit a bid at the advertised sale unless required by state law nor will reference to FmHA's rates and terms be included. If no acceptable bid is received, FmHA will negotiate the purchase of the bonds.

Subpart C—Fire and Rescue Loans

6. Section 1942.111 is amended by revising paragraph (b) to read as follows:

§ 1942.111 Applicant eligibility.

* * * * *

(b) *Credit elsewhere determination.* District Directors should maintain files with criteria from commercial lenders to be used in determining the preapplications which should be referred to those lenders. If credit elsewhere is indicated, the District Director should inform the applicant and recommend that they apply to commercial sources for financing. In order to provide a basis for such referrals, District Directors should maintain liaison with representatives of banks, bond dealers, financial consultants, and other lender representatives who are interested in receiving applicant referrals. State Directors will contact lenders having a potential statewide or multidistrict interest in Community Programs lending. District Directors will contact lenders having a potential interest in Community Programs lending primarily within their District. Guide 28 (available in any State or District Office) or locally developed worksheet containing similar information will be used to document the contacts with commercial lenders. The State Director and District Director will keep each other informed of lender criteria by forwarding copies of completed Guide 28 and/or worksheets to each other.

* * * * *

Subpart I—Resource Conservation and Development (RCD) Loans and Watershed (WS) Loans and Watershed Advances

7. Section 1942.419 is amended by revising the introductory text of paragraph (a) to read as follows:

§ 1942.419 Approval, closing, and cancellation.

(a) Approval and closing actions will be taken in accordance with the applicable provisions of FmHA regulations including part 1901, subpart A, of this chapter and §§ 1942.5, 1942.6, 1942.7, 1942.8, and 1942.12, of subpart A of this part, and the following:

* * * * *

PART 1948—RURAL DEVELOPMENT

8. The authority citation for part 1948 is revised to read as follows:

Authority: 7 U.S.C. 1989; 7 CFR 2.23 and 2.70.

Subpart B—Section 601 Energy Impacted Area Development Assistance Program

9. Section 1948.92 is amended by removing paragraphs (d) through (g) and revising paragraph (c) to read as follows:

§ 1948.92 Grant approval and fund obligation.

* * * * *

(c) Grants must be approved and obligated in accordance with § 1942.5(d) of this chapter.

§ 1948.94 [Amended]

10. Section 1948.94 (b) is amended in the second sentence by revising the reference "FmHA Instruction 402.1 (available in any FmHA Office)" to part 1902, subpart A, of this chapter".

PART 1951—SERVICING AND COLLECTIONS

11. The authority citation for part 1951 is revised to read as follows:

Authority: 5 U.S.C. 301; 42 U.S.C. 1480; 7 CFR 2.23 and 2.70.

Subpart E—Servicing of Community and Insured Business Programs Loans and Grants

12. Subsection 1951.230 (c)(3) is amended by revising the last sentence to read as follows:

§ 1951.230 Transfer of security and assumption of loans.

* * * * *

(c) * * *

(3) * * * If applicable, 1942.19 (h)(14) of this chapter will govern the preparation of any new debt instruments required.

* * * * *

Subpart F—Analyzing Credit Needs and Graduation of Borrowers

13. Section 1951.261 is amended by revising the fourth and fifth sentences of the introductory text of paragraph (c), and by adding two new sentences at the end of paragraph (e)(5) to read as follows:

§ 1951.261 Graduation of FmHA borrowers to other sources of credit.

* * * * *

(c) * * * (The servicing official, in lieu of writing a narrative for all programs, may use Exhibit A for Farmer Program loans, Exhibit B for Rural Housing loans, and Guide 28 (available in any State or District Office) for Community Programs loans.) For Community Programs, the servicing official will request the assistance of the State Director pursuant to § 1942.2(a)(2)(i) of this chapter. * * *

* * * * *

(e) * * *

(5) * * * Exhibit D "Community Programs Thorough Review Worksheet" (available in any State or District Office) will be completed for each Community Programs borrower for whom a thorough review is conducted. The original will be placed in the borrower's file and a copy will be forwarded to the State Director for each borrower recommended for graduation.

* * * * *

PART 1980—GENERAL

14. The authority citation for part 1980 is revised to read as follows:

Authority: 5 U.S.C. 301; 7 U.S.C. 1989; 42 U.S.C. 1480; Pub. L. 100–387, 102 Stat 924; Pub. L. 101–82, 103 Stat 564 (7 U.S.C. 1421 Note); 7 CFR 2.23 and 2.70.

Subpart A—General

15. Section 1890.12 is revised to read as follows:

§ 1980.12 Case and identification (ID) numbers.

(a) *Case number.* The case number will be the proposed borrower's or transferee's Social Security or Internal Revenue Service (IRS) Taxpayer Identification Number (TIN), whichever is appropriate, preceded by State and County code numbers. The County Supervisor will provide the lender with these numbers, except for Business and Industry and Community Programs cases where the State Director or District Director, respectively, will provide them. Only one case number will be assigned to each borrower regardless of the number of loans or grants or number of separate facilities, unless an exception is authorized by the National Office.

(1) If such party is an individual, his or her Social Security number will be used. If such party is husband and wife, the Social Security number of either one, as designated by the spouses, will be used.

(2) If such party is a legal entity, its TIN will be used.

(b) *Temporary ID numbers.* When a proposed borrower has not received a TIN, the State Office will assign a temporary ID number. See the Forms Manual Insert for Form FmHA 1940–3, "Request for Obligation of Funds," for specific instructions. Any temporary ID number assigned must be replaced with the TIN prior to issuing the Loan Note Guarantee unless prior approval of the National Office is received.

(c) *ID number of lender and holder.* The lender's and holder's IRS TIN will be used as its ID number in correspondence and FmHA forms relating to the guarantee.

Subpart I—Community Programs Guaranteed Loans

16. Section 1980.856 is amended by adding paragraph (i) to read as follows:

§ 1980.856 Conditions precedent to issuance of the Loan Note Guarantee (Form FmHA 449–34).

* * * * *

(i) *Proposed borrowers indebted to the Community Program Loan Trust 1987–A (Trust).* Proposed borrowers indebted to the Trust must obtain consent from the Trust prior to incurring additional debt. Guide 29 (available in any State or District Office) outlines the information normally required by the Trust.

Dated: December 9, 1993.

Bob J. Nash,

Under Secretary, Small Community and Rural Development.

BILLING CODE 3410–07–M

NUCLEAR REGULATORY COMMISSION

10 CFR Parts 20 and 35

RIN 3150–AE41

Criteria for the Release of Patients Administered Radioactive Material

AGENCY: Nuclear Regulatory Commission.

ACTION: Proposed rule.

SUMMARY: The Nuclear Regulatory Commission (NRC) is proposing to amend its regulations concerning the criteria for the release of patients administered radioactive material. The new criteria for patient release would be dose-based rather than activity-based and would be consistent with the recommendations of the International Commission on Radiological Protection (ICRP). The proposed rule would require the licensee to maintain a record for 3 years if the quantity of radioactive material is likely to result in an annual total effective dose equivalent to an individual exposed to the patient that exceeds 1 millisievert (0.1 rem) from a single administration. The proposed rule responds to two petitions for rulemaking regarding the criteria for release of patients administered radioactive material.

DATES: The comment period expires August 29, 1994. Comments received after this date will be considered if it is practicable to do so, but the Commission is able to assure consideration only for comments received on or before this date.

ADDRESSES: Send comments to: Secretary, U.S. Nuclear Regulatory Commission, Washington, DC 20555. Attn: Docketing and Service Branch.

Hand deliver comments to 11555 Rockville Pike, Rockville, Maryland between 7:45 a.m. and 4:15 p.m. Federal workdays.

Examine comments received, the environmental assessment and finding of no significant impact, and the regulatory analysis at: The NRC Public Document Room, 2120 L Street NW. (Lower Level), Washington, DC.

Obtain single copies of the environmental assessment and finding of no significant impact and the regulatory analysis (NUREG–1492) from: Jayne McCausland, Office of Nuclear Regulatory Research, U.S. Nuclear Regulatory Commission, Washington, DC 20555, telephone: (301) 415–6219.

Obtain single copies of the draft regulatory guide, "Release of Patients Administered Radioactive Material," which is related to this rulemaking, by writing to: Distribution and Mail Services Section, Office of Administration, U. S. Nuclear Regulatory Commission, Washington, DC 20555.

FOR FURTHER INFORMATION CONTACT: Stewart Schneider, Office of Nuclear Regulatory Research, U.S. Nuclear Regulatory Commission, Washington, DC 20555, telephone (301) 415–6225.

I. Background

Each year in the United States, radioactive pharmaceuticals or radioactive implants are administered to approximately 8 to 9 million patients for the diagnosis or treatment of disease (hereinafter this group will be referred to as patient(s)). These patients can expose others around them to radiation until the radioactive material has been excreted from their bodies or has decayed away. As discussed below, most of these exposures would be much less than 1 millisievert (0.1 rem) total effective dose equivalent per year.

NRC's current patient release criteria in 10 CFR 35.75, "Release of patients containing radiopharmaceuticals or permanent implants," are as follows: "(a) A licensee may not authorize release from confinement for medical care any patient administered a radiopharmaceutical until either: (1)

The measured dose rate from the patient is less than 5 millirems per hour at a distance of one meter; or (2) The activity in the patient is less than 30 millicuries; (b) A licensee may not authorize release from confinement for medical care of any patient administered a permanent implant until the measured dose rate is less than 5 millirems per hour at a distance of one meter."

On May 21, 1991 (56 FR 23360), the NRC published a final rule that amended 10 CFR part 20, "Standards for Protection Against Radiation." The rule contained limits on the radiation dose for members of the public in 10 CFR 20.1301. However, when 10 CFR part 20 was issued, there was no discussion in the supplementary information on whether or how the provisions of 10 CFR 20.1301 were intended to apply to the release of patients, thereby creating the need to address this issue.

To determine the potential number of patients that could be affected by this issue, the NRC performed a screening analysis to determine how many patients administered radioactive materials could cause the exposure of an individual to a dose exceeding 1 millisievert (0.1 rem) total effective dose equivalent in a year if there were no restrictions on patient release. The screening analysis indicated that none of the diagnostic administrations were likely to result in a dose to an individual exposed to the patient exceeding 1 millisievert (0.1 rem), except for a few diagnostic procedures using iodine-131. The therapeutic administrations that the screening analysis indicated needed consideration were: (1) The treatment of hyperthyroidism with iodine-131 (50,000 per year); (2) the treatment of thyroid cancer with iodine-131 (10,000 per year); and (3) the treatment of a variety of cancers (e.g., prostate cancer) with the permanent implantation of iodine-125 seeds (2,000 per year). Other radionuclides may also warrant consideration. For example, doses to individuals exposed to a patient administered ytterbium-169 and gold-198 for therapy might result in radiation exposures exceeding 1 millisievert (0.1 rem) to individuals exposed to the patient. However, these radionuclides are seldom used. In addition, procedures involving radiolabeled antibodies might result in doses exceeding 1 millisievert (0.1 rem), although no such procedures using byproduct material are yet approved for routine use. (For further information see the regulatory analysis for the proposed rule. Single copies of the draft regulatory analysis are available as indicated in the **ADDRESSES** heading.)

II. Petitions for Rulemaking

Because some licensees were uncertain about what effect the revised 10 CFR part 20 would have on patient release criteria, two petitions were received on the issue.

On June 12, 1991 (56 FR 26945), the NRC published in the **Federal Register** a notice of receipt of, and request for comment on, a petition for rulemaking (PRM–20–20) from Dr. Carol S. Marcus. In addition, Dr. Marcus submitted a letter dated June 12, 1992, further characterizing her position. Dr. Marcus requested that the NRC amend the revised 10 CFR part 20 and 10 CFR part 35 to—

(1) Raise the annual radiation dose limit in 10 CFR 20.1301(a) for individuals exposed to radiation from patients receiving radiopharmaceuticals for diagnosis or therapy from 1 millisievert (0.1 rem) to 5 millisieverts (0.5 rem).

(2) Amend 10 CFR 35.75(a)(2) to retain the 1,110-megabecquerel (30-millicurie) limit for iodine-131, but provide an activity limit for other radionuclides consistent with the calculational methodology employed in the National Council on Radiation Protection and Measurements (NCRP) Report No. 37, "Precautions in the Management of Patients Who Have Received Therapeutic Amounts of Radionuclides." [1]

(3) Delete 10 CFR 20.1301(d) which requires licensees to comply with provisions of Environmental Protection Agency's environmental regulations in 40 CFR part 190 in addition to complying with the requirements of 10 CFR part 20.

On March 9, 1992 (57 FR 8282), the NRC published a notice of receipt and request for comment in the **Federal Register** on another petition for rulemaking (PRM–35–10) on patient release criteria from the American College of Nuclear Medicine (ACNM). On May 18, 1992 (57 FR 21043), the NRC published in the **Federal Register** notice of an amendment submitted by the ACNM to its original petition (PRM–35–10A). In addition, the ACNM submitted two letters dated September 24, 1991, and October 8, 1991, on the issues in their petition. The ACNM requested (considering the contents of all four letters) that the NRC revise 10 CFR part 35 to—

[1] National Council on Radiation Protection and Measurements (NCRP), "Precautions in the Management of Patients Who Have Received Therapeutic Amounts of Radionuclides," NCRP Report No. 37 (October 1, 1970). (Available for sale from the NCRP, 7910 Woodmont Avenue, suite 800, Bethesda, MD 20814–3095.)

(1) Adopt a dose limit of 5 millisieverts (0.5 rem) for individuals exposed to patients who have been administered radiopharmaceuticals.

(2) Permit licensees to authorize release from hospitalization any patient administered a radiopharmaceutical regardless of the activity in the patient by defining "confinement" to include not only confinement in a hospital, but also confinement in a private residence.

Because the petitions submitted by Dr. Marcus and the ACNM both address the patient release criteria set forth in 10 CFR 35.75, the NRC has decided to resolve both petitions with this single rulemaking. The proposed actions, if adopted in final form, would constitute the partial granting of these petitions as set forth in this notice. All other portions of petitions PRM–20–20 and PRM–35–10 would be denied.

III. Public Comments Received on the Petitions

There were 140 comment letters received on PRM–20–20 and 88 comment letters on PRM–35–10 and PRM–35–10A. Commenters represented hospitals and clinics, professional associations, citizens' groups, Agreement States and Government agencies, State radiation advisory boards, universities, consulting firms, public utilities, a utility association, and a labor union. The majority of the commenters were physicians who expressed concerns primarily related to the cost of hospitalization. Other commenters included health and medical physicists, pharmacists, nuclear medicine technicians, professors, and one former nuclear medicine patient. Overall, the majority of all comments supported a dose limit of 5 millisieverts (0.5 rem) for individuals exposed to patients released with radioactive material.

IV. Coordination with NRC Agreement States

The NRC conducted a public workshop with representatives of the Agreement States on July 15 and 16, 1992, to discuss a variety of medical issues, including the proposals for amending 10 CFR parts 20 and 35. The workshop was held in Atlanta, Georgia. Twenty-one of the Agreement States were represented, as well as a representative from the City of New York. The major recommendations on the rule provided by the representatives may be summarized as follows:

(1) Revise 10 CFR part 20 to exclude doses to individuals exposed to patients released under 10 CFR 35.75.

(2) In 10 CFR 35.75, retain the dose rate limit of 0.05 millisievert (5

millirems) per hour at a distance of 1 meter and add a dose limit of 5 millisieverts (0.5 rem) in 1 year for individuals exposed to patients.

(3) Retain the current 1,110-megabecquerel (30-millicurie) activity limit for iodine-131 but provide activity limits for other radionuclides based on the recommendations of NCRP Report No. 37, "Precautions in the Management of Patients Who Have Received Therapeutic Amounts of Radionuclides."

(4) Do not define "confinement" in 10 CFR part 35 because the present wording gives regulatory agencies the prerogative to confine patients by means other than hospitalization.

(5) Require that written instructions on how to maintain doses to other individuals as low as reasonably achievable be given to the released patient and any individual likely to spend significant time in close proximity with the patient.

The NRC staff presented a status report on the requirements of the proposed rule to the Agreement States at another public meeting in October 1993, in Tempe, Arizona. The Agreement States were generally supportive of the approach in this proposed rule. Transcripts of both meetings have been placed in and are available for examination at the NRC Public Document Room, 2120 L Street NW. (Lower Level), Washington, DC.

In addition, in July 1993, the NRC requested the Agreement States to provide comments on a previous version of the proposed rule. Of those responding, 14 Agreement States were generally supportive of the approach in this proposed rule, one was in opposition, and one was uncertain of its support without further study. The Agreement State that opposed the annual dose limit of 5 millisieverts (0.5 rem) (total effective dose equivalent) believed that instructions on how to maintain doses as low as reasonably achievable to household members and other individuals would not be followed, radioactive contamination would be a problem, and permanent implants could dislodge.

V. Coordination With the Advisory Committee on Medical Uses of Isotopes

The NRC staff presented their suggestions for a proposed rule to the Advisory Committee on Medical Uses of Isotopes (ACMUI) during a public meeting held in Rockville, Maryland, on October 22 and 23, 1992. The ACMUI is an advisory body established to advise the NRC staff on matters that involve the administration of radioactive material and radiation from radioactive material. The major ACMUI recommendations on the proposed rule were to—

(1) Add a dose limit of 5 millisieverts (0.5 rem) in 1 year for individuals exposed to a patient released with radionuclides.

(2) Retain both the 1,110-megabecquerel (30-millicurie) activity limit and the maximum dose rate of 0.05 millisieverts (5 millirems) per hour for patient release in 10 CFR 35.75 because they are a simple means to show compliance without assumptions or calculations.

(3) Develop a regulatory guide that includes a set of standardized calculations with factors (e.g., occupancy factor) for licensees to determine compliance with patient release criteria on an individual basis. Provide tables of acceptable release activities that are radionuclide specific, based on exposure at 1 meter for routine patient releases, with built-in safety factors to avoid doses to individuals near the 5-millisievert (0.5-rem) limit.

(4) Require that written instructions on how to maintain doses to other individuals as low as reasonably achievable be provided to the patient upon release from confinement.

The NRC staff presented status reports on the requirements of the proposed rule to the ACMUI at two other public meetings in May 1993, in Bethesda, Maryland, and in November 1993, in Reston, Virginia. The ACMUI was generally supportive of the approach in this proposed rule. Transcripts of all meetings have been placed in and are available for examination at the NRC Public Document Room, 2120 L Street NW. (Lower Level), Washington, DC.

VI. Issues and Their Resolution

There are seven issues that arise in responding to the two petitions. These issues and their resolution are discussed below.

Issue 1: Should the limits in 10 CFR 35.75 or in 20.1301(a) govern patient release? The petitioners requested an annual dose limit of 5 millisieverts (0.5 rem) for individuals exposed to radiation from a released patient.

Supporting Comments

The majority of commenters favored a dose limit of 5 millisieverts (0.5 rem) per year for individuals exposed to released patients rather than the 1 millisievert (0.1 rem) in 10 CFR 20.1301(a). The representatives from Agreement States who attended the public meeting held in Atlanta, Georgia, on July 15 and 16, 1992, and the ACMUI public workshop held in October 1992 in Rockville, Maryland, also favored the 5-millisievert (0.5-rem) limit. Some commenters stated that a dose limit of 5 millisieverts (0.5 rem) per year for individuals exposed to a patient is in line with the recommendations of the ICRP and the NCRP.

Some commenters believed that the 5-millisievert (0.5-rem) limit is beneficial to both the patient and the family because patients are able to return home earlier than would be permitted if a 1-millisievert (0.1-rem) limit were used. One commenter believed that the case could be made that no limit should be applied to the patient's family, just maintain doses as low as reasonably achievable, because there is a benefit to the family from the patient's being home. A physician commented that many patients come from homes in which no member of the family is under the age of 30, and therefore, contended that there was less risk from radiation exposure. Other comments in favor included: (1) Hospitalization can be a distressing experience for many cancer patients; (2) patients can develop hospital acquired infections if kept in the hospital too long; and (3) confining patients in a hospital until the release criteria are met increases the dose to hospital personnel and other patients.

Controlling the cost of medical care was one of the most cited reasons in favor of the 5-millisievert (0.5-rem) limit. Concern was expressed that the costs to all parties involved (i.e., patients, hospitals, insurance companies, etc.) would dramatically rise if a 1-millisievert (0.1-rem) limit were used. Commenters said a 1-millisievert (0.1-rem) limit would require longer periods of hospitalization, that many outpatients would become inpatients, and that this would be extremely expensive.

Comments from nuclear power utilities supported the 5-millisievert (0.5-rem) limit requested by PRM–20–20. These commenters stated further that if the limit for annual dose to the public exposed to patients were 5 millisieverts (0.5 rem), then the dose limit should be 5 millisieverts (0.5 rem) for all exposures to the public, including those from nuclear power plants, because no demonstrable health effects have been observed at chronic exposure levels of 5 millisieverts (0.5 rem).

Opposing Comments

A citizens' group commented that any amount of radiation, no matter how small, carries a risk to the recipient. Thus, decisions that affect the public health should be made strictly on the basis of health, not economic considerations. A second citizens' group expressed similar concerns.

A few commenters stated that the licensee already has the requested relief because the Commission has made provision in 10 CFR 20.1301(c) for approval of a licensee's request to increase the annual dose limit to 5 millisieverts (0.5 rem) for individuals exposed to a patient.

Response

The NRC has determined that patient release should be governed by 10 CFR 35.75, not 10 CFR 20.1301(a). 10 CFR 35.75 of the NRC's regulations adopted in 1986 (51 FR 36932; October 16, 1986) prohibits an NRC licensee from authorizing patient release until the measured dose rate from the patient is less than 0.05 millisievert (5 millirems) per hour at 1 meter or the activity in the patient is less than 1,110 megabecquerels (30 millicuries). 10 CFR 20.1301(a) of the revised standards for protection against radiation, adopted in 1991 (56 FR 23360; May 21, 1991), requires a licensee to limit the radiation dose of any individual member of the public from licensed activities to less than 0.1 rem (1 millisievert) (total effective dose equivalent) in a year.

The NRC's view that 10 CFR 35.75 governs patient release represents a reasonable interpretation of the Commission's regulations on this subject. As a general rule, requirements in 10 CFR part 35 are "in addition to," rather than "in substitution for," compliance with other NRC requirements including 10 CFR part 20. However, in this case, the dose limit of 10 CFR 20.1301(a), if it were interpreted to apply to patient release, could require a license to continue confinement of a patient whose release would be permitted under 10 CFR 35.75. The NRC will not adopt this interpretation because that would make 10 CFR 35.75 essentially meaningless.

When the NRC proposed 10 CFR 35.75 (50 FR 30627; July 25, 1985), it said, "The Commission believes that either limit (i.e., 30 millicuries of activity or the 6 milliroentgen per hour exposure rate at 1 meter) provides an adequate measure of safety for the general public and that further reductions in public exposure are not reasonably achievable considering the cost and potential for detrimental effect from an unnecessarily long hospital confinement." Further, when it approved 10 CFR 35.75 in final form, the NRC again said, "The NRC believes that a 30-millicurie release limit provides an adequate measure of public health and safety." See 51 FR 36932. The NRC's conclusion was based on an independent NRC public health and safety judgement that is specific to patient release. This conclusion was neither tied to nor designed to implement the more general considerations in the 10 CFR part 20 dose limits that had already been proposed when the conclusion of adequacy was reached.

The NRC maintains that the public health and safety judgement specific to patient release in 10 CFR part 35 should prevail over the more general 10 CFR part 20. The criterion in the proposed 10 CFR part 35, 5 millisieverts (0.5 rem) total effective dose equivalent per year, excluding background or any occupational exposure, is consistent with: The Commission's provision in 10 CFR 20.1301(c) for authorizing a licensee to operate up to this limit for limited periods of time; the recommendations of the International Commission on Radiological Protection (ICRP) in ICRP Publication 60,[2] "1990 Recommendations of the International Commission on Radiological Protection;" and the recommendations of the National Council on Radiation Protection and Measurements (NCRP) in NCRP Report No. 116,[3] "Limitation of Exposure to Ionizing Radiation." Each of these provides a basis for allowing individuals to receive annual doses up to 5 millisieverts (0.5 rem) under certain circumstances. Both the ICRP and NCRP recommend that an individual be allowed to receive a dose up to 5 millisieverts (0.5 rem) in a given year in situations where exposure to radiation is not expected to result in doses above 1 millisievert (0.1 rem) per year for long periods of time, as would be the case for doses from released patients. The recommendations of the ICRP and NCRP are based on their findings that annual exposures in excess of 1 millisievert (0.1 rem) to a small group of people, provided that they do not occur often to the same group, need not be regarded as especially hazardous. Therapeutic treatments with radioactive materials are limited to a relatively small proportion of the population and are not often repeated for the same patient.

Although the NRC adopted 10 CFR 20.1301(a) after 10 CFR 35.75, it did not intend to supersede 10 CFR 35.75. There is no indication in the associated statements of consideration or response to comments that NRC intended to supersede 10 CFR 35.75 criteria when 10 CFR part 20 was amended. Because the NRC finalized 10 CFR 35.75 after proposing revisions to 10 CFR part 20 in 1986, the NRC's silence should indicate that it did not intend the revised standards for protection against radiation to supersede either 10 CFR 35.75 or the NRC's underlying adequacy judgement.

As reflected in the above discussion, the NRC's finding of adequacy with respect to patient release criteria does not apply to or set a precedent for the operations of nuclear power plants. The basis for the limit for patient release is justified by the considerations that specifically apply to patient release.

To codify the policy regarding the issue of the applicability of 10 CFR 20.1301 to patient release, the NRC is proposing to amend 10 CFR 20.1301(a)(1) to explicitly exclude doses to individuals exposed to released patients. In addition, 10 CFR 20.1301(a)(2) would be amended by adding the words "exclusive of the dose contributions from patients administered radioactive material and released in accordance with § 35.75" to make it clear that the limit on dose in unrestricted areas does not include dose contributions from patients administered radioactive material and released in accordance with 10 CFR 35.75.

Issue 2: Should the patient release criteria in 10 CFR 35.75 be expressed as a dose-based limit instead of being expressed in terms of activity retained in the patient and dose rate at 1 meter from the patient?

Supporting Comments

While the choice of a dose-based vs. an activity-based limit was not presented as an issue in the petitions, many commenters supported a dose-based limit of 5 millisieverts (0.5 rem), although those same commenters also generally supported retaining an activity limit.

Some commenters and the ACNM discussed the inadequacy of the current activity-based limit in 10 CFR part 35 to deal with new techniques such as the use of radiolabeled antibodies.

Supporting Comments

PRM–20–20 requested that patients given 1,110 megabecquerels (30 millicuries) of iodine–131, or more, be hospitalized and released in accordance with the guidelines of NCRP Report No. 37, and that the maximum activity that a patient can be released with for a specific nuclide be consistent with the calculations methodology of NCRP Report No. 37. Many commenters and

representatives from the Agreement States that attended the public workshop held in Atlanta, Georgia, on July 15 and 16, 1992, also agreed with this request.

Opposing Comments

No comments opposing the methodology in NCRP Report No. 37 were received.

Response

The NRC agrees that the calculational methodology of NCRP Report No. 37 can be used to calculate external doses from patients. Although NCRP Report No. 37 is dated, it still contains an appropriate method to calculate the integrated dose at 1 meter from a patient following administration of certain radionuclides. This methodology is modified in the draft regulatory guide to calculate activities to meet the 5-millisievert (0.5-rem) (total effective dose equivalent) limit.

Opposing Comments

Several commenters, as well as representatives from the Agreement States and the ACMUI, noted that the 1,110-megabecquerel (30-millicurie) activity limit is a simple method to demonstrate compliance with NRC regulations and should be retained.

PRM–20–20 requested that the NRC specify an activity for each specific radionuclide consistent with the calculational methodology of NCRP Report No. 37, "Precautions in the Management of Patients Who Have Received Therapeutic Amounts of Radionuclides."

Response

The NRC's primary concern is the public's health and safety. Doses are a measure of degree of protection, whereas activity of different radionuclides is not related in any consistent way to the level of protection. For this reason, the NRC proposes to establish a dose limit as the only patient release criterion in 10 CFR 35.75. The proposed dose limit is 5 millisieverts (0.5 rem) total effective dose equivalent in a year. This dose limit is consistent with the underlying risk basis of the current 10 CFR 35.75 (50 FR 30627), the recommendations of the ICRP, and the provisions in 10 CFR 20.1301(c), pertaining to temporary situations in which there is requisite justification for a dose limit higher than 1 millisievert (0.1 rem).

Unlike the current 10 CFR 35.75, the proposed 10 CFR 35.75 does not specify an activity or dose rate for authorizing patient release. The 1,110-megabecquerel (30-millicurie) requirement was not retained because the doses from a released patient are different for different radionuclides that have the same activity. Likewise, a release criterion based on dose rate from the patient is not a uniform indicator of dose because the total dose depends on the effective half-life of the radioactive material in the body of the patient and other factors, which will differ for different materials.

In most cases, the dose received by an individual exposed to the patient will be from external exposure. However, in the case of a breast-feeding mother, the infant could be exposed following ingestion of breast milk. In this case, the 5-millisievert (0.5-rem) limit applies to the infant as the individual likely to receive the highest exposure.

To help licensees easily determine if they may authorize the release of a patient, a draft regulatory guide, published concurrently with this proposed rule, contains a table that specifies the activity of commonly used radionuclides with which a patient can be released in compliance with the proposed dose limit. The table in the draft guide provides a simple method to demonstrate compliance that assumes no biological elimination of the radioactive material. For example, in the case of iodine-131, the value specified is 1,200 megabecquerels (33 millicuries). The draft regulatory guide also offers guidance for the licensee who chooses to calculate activities at which patient release may be authorized based upon case specific information. Single copies of the draft regulatory guide are available as indicated in the **ADDRESSES** heading.

The 0.05 millisievert (5 millirems) per hour at 1 meter dose rate limit was not retained in the regulation because, in essence, consideration of the dose rate is included in calculating the activity for each of the radionuclides specified in the draft regulatory guide. In addition, the draft regulatory guide now relates the dose rate with the release criteria in the proposed 10 CFR 35.75.

Newer techniques, such as the therapeutic use of radiolabeled antibodies, involve the administration of perhaps as much as several gigabecquerels (hundreds of millicuries). These newer techniques require that a patient remain under the control of the licensee for a much longer period of time before the current release criteria can be met. By changing the basis for the release of patients in the proposed rule to an annual dose limit, the activity or resulting dose rate are no longer the only limiting factors upon which a patient release is based. Under the proposed rule, the dose would be the determining criteria, irrespective of the amount of radioactive material administered or the potential pathways of exposure of individuals as a result of contact with the patient. This is particularly important for proper control of some types of materials, such as strong beta emitters, which do not pose a large external dose hazard. In these cases, dose through inhalation or ingestion of contamination could be significant pathways and must be accounted for in a calculation for compliance. To demonstrate compliance with the proposed rule in this situation, the optional calculational method described in the draft regulatory guide could be used, potentially resulting in an earlier patient release than would otherwise have been allowed, while still providing the specified level of protection.

Issue 3. Should the calculational methodology in NCRP Report No. 37, "Precautions in the Management of Patients Who Have Received Therapeutic Amounts of Radionuclides," be an acceptable means to demonstrate compliance with the proposed rule?

Issue 4. Should, as the ACNM requested, the word "confinement" be defined to include confinement in a private residence?

Supporting Comments

The ACNM petitions stated that 10 CFR 35.75 seems to mandate hospitalization as the only place of confinement for patients receiving radiopharmaceutical therapy for compliance with 10 CFR 35.75. The ACNM petitions also stated that 10 CFR 35.75 overlooks the merits of a necessary option, temporary home confinement, for outpatient radiopharmaceutical therapy at levels exceeding 1,110 megabecquerels (30 millicuries). This petition further stated that patients containing quantities up to 14,800 megabecquerels (400 millicuries) of iodine-131 could be confined in a private residence, as justified by published scientific papers that contend that home confinement of such patients would not adversely affect public health and safety.

Another commenter supported home confinement because it would greatly improve patient comfort while reducing medical expenditures by a considerable amount, and that this can be accomplished without any significant risk to the public. Some commenters believed that patients confined at home with as much as 14,800 megabecquerels (400 millicuries) of iodine-131 would not create a safety hazard to the public if simple precautions were followed.

Several commenters believed that they had been told by the NRC that the use of the term confinement in 10 CFR 35.75 provided for a nonhospital option.

A couple of commenters suggested that if a patient is medically capable of self-care, informed and cooperative, release in amounts greater than 1,110 megabecquerels (30 millicuries) is sensible.

Opposing Comments

The Conference of Radiation Control Program Directors (CRCPD) commented that confinement should not be defined in 10 CFR part 35 because the present wording already provides the option to confine patients by means other than hospitalization.

An Agreement State representative remarked that it is not realistic to believe that a person will go home and lock themselves in a room for two to three days with limited contact with family and friends. Another Agreement State representative maintained it is difficult to control actions of an ambulatory patient and difficult to ensure that the patient has remained in confinement. This commenter also noted that the ACNM definition does not address transportation to a confined area in a private residence that would prohibit a patient from using public transportation.

A former radiopharmaceutical therapy patient opposed the changing of the existing requirements. He said that cutting hospital costs by releasing highly radioactive patients may afford short-term economic benefits for health care providers but it carries serious health and safety risks to the family and the public. He also indicated that some people would have a difficult time following the extensive advice that is given as to the precautions to be taken on returning home.

Some commenters expressed the belief that release from a hospital with activities as high as 14,800 megabecquerels (400 millicuries) of iodine-131 is dangerous to public health and safety

Response

The NRC has decided that the term "confinement" should be deleted from the proposed revision to 10 CFR 35.75. Instead, the proposed rule language now uses the phrase "licensee control." The NRC believes that the phrase "licensee control" more clearly reflects the NRC's intent.

The phrase "licensee control" refers to the ability of the licensee to demonstrate that it can control doses to other individuals from the patient, as well as the spread of radioactive material. The licensee maintains control both from the location of patients and by the actions the licensee takes to control doses. Although licensee control does not necessarily restrict a patient to a hospital, the location of the patient must be listed as a place of use on the license or a license amendment must be issued pursuant to 10 CFR 35.13(e). Additional choices would be available (e.g., hospices or nursing homes) as long as the licensee can demonstrate that it can control doses to other individuals as well as the spread of radioactive material.

The NRC believes that there is a distinct difference between a patient being "confined" in a hospital and "confined" in a home. In hospital confinement, the licensee has control over access to the patient as well as having trained personnel and instrumentation available for making radiation measurements not typically available at the patient's home. In addition, while under licensee control, a licensee has control over the dose by limiting the amount of time that individuals are in close proximity to the patient. Therefore, as a general practice, the NRC does not want licensees to use a patient's home for the purpose of confining the patient.

Issue 5. Should 10 CFR 20.1301(d) require compliance with Environmental Protection Agency (EPA) regulations? PRM–20–20 stated that compliance with the EPA's Clean Air Act air effluent standards would cost medical facilities $100,000,000 per year, which would be added to national health care costs.

Supporting Comments

Most comments from physicians and medical associations expressed concern over redundant NRC and EPA regulations contained in 40 CFR 61 resulting from the EPA's limitation on air effluent from NRC-licensed facilities.

Opposing Comments

No opposing comments were received.

Response

The EPA regulations referenced in 10 CFR 20.1301(d) are contained in 40 CFR part 190, which deals only with doses and airborne emissions from uranium fuel cycle facilities. 40 CFR part 190 does not apply to hospitals or to the release of patients. Furthermore, 10 CFR 20.1301(d) does not incorporate the EPA's Clean Air Act standards in 40 CFR part 61 that apply to hospitals. The NRC is separately pursuing actions with the EPA to minimize the impact of dual regulation under the Clean Air Act.

Because the reference to EPA regulations in 10 CFR 20.1301(d) has nothing to do with the patient release issue and has no impact on the petitioner, the NRC will not grant this request of the petitioner.

Issue 6. Should the regulations require that patients, upon release, receive written instructions on how to maintain doses to other individuals as low as reasonably achievable?

Supporting Comments

PRM–20–20 recommended education of the patient and the care provider. Some commenters supported written instructions for the patient upon release. Representatives from the Agreement States who attended the public workshop held in Atlanta, Georgia, on July 15 and 16, 1992, and the ACMUI public workshop held in October 1992 in Rockville, Maryland, also agreed with this concept.

Opposing Comments

A physician stated that instructions regarding patient activities significantly increase apprehension needlessly.

Response

The NRC agrees that written instructions on how to maintain doses as low as reasonably achievable to people exposed to released patients should be provided. These written instructions would specify what actions should or should not be taken by the released patients and by the individuals potentially exposed. In fact, written instructions are already required under 10 CFR 35.315(a)(6) and 35.415(a)(5). Under the proposed 10 CFR 35.75(b), when the total effective dose equivalent to any individual other than the released patient is likely to exceed 1 millisievert (0.1 rem) from a single administration, the licensee would be required to provide written instructions to the patient on how to maintain doses as low as reasonably achievable to household members and other individuals. If the dose to any individual exposed to the patient is not likely to exceed 1 millisievert (0.1 rem), instructions are not required but the physician could give any instructions that he or she considers desirable.

Written instructions provide an available reference after the patient's release, if questions regarding patient care arise. Written instructions reduce the chance of misunderstanding the licensee's instructions as verbal instructions may not be properly conveyed to persons not present at the time of release. The NRC also believes that providing written instructions will

VOL
59
ISS
1
1
4
JE
15
994
UMI

help relieve apprehensions of the patient, primary care-giver, and family.

The draft regulatory guide published concurrently with this proposed rule includes recommended contents of the written instructions. The instructions should be specific to the type of treatment given, such as radioiodine for hyperthyroidism or thyroid carcinoma, or permanent implants; and may include additional information regarding individual situations. The instructions should include a contact and phone number in case the patient has any questions. Written instructions should include, as appropriate: (1) maintaining distance from individuals, including sleeping arrangements and the need to avoid public transportation; (2) the need to stop breast-feeding if appropriate; (3) avoidance of public places (such as grocery stores, shopping centers, theaters, restaurants, and sporting events); (4) hygiene; and (5) the length of time precautions should be taken. Not all of these precautions are necessary for every patient; therefore, patients should be given specific instructions that are applicable to their situation.

Issue 7. Should records of patients released containing radioactive materials be required?

Although the issue of records did not arise in the petitions or the comments on the petitions, proposed 10 CFR 35.75(b) would require the licensee to maintain a record of the basis for the patient's release and the calculations performed to determine the total effective dose equivalent if an individual is likely to receive a dose in excess of 1 millisievert (0.1 rem) in a year from a single administration. It is anticipated that this requirement will be met by either a notation, such as a reference to the Regulatory Guide, or calculation(s) to be retained in the patient's file. This record would provide a basis for assuring that the maximum dose to an individual exposed to the patient is below 5 millisieverts (0.5 rem) for any single administration. This record also provides the basis for ensuring that doses from multiple administrations greater than 1 millisievert (0.1 rem) each do not total more than 5 millisieverts (0.5 rem) in any year.

The 1-millisievert (0.1-rem) threshold for recordkeeping is based on the public dose limit of 1 millisievert (0.1 rem) specified in 10 CFR part 20. This threshold would not result in an undue recordkeeping burden for the majority of diagnostic administrations because these administrations are well below 1-millisievert (0.1-rem). Based on the regulatory analysis, the majority of administrations requiring records involve iodine-131 therapeutic administrations and a few diagnostic procedures using iodine-131. Recordkeeping would affect less than one percent of all administrations. (For further information, see the regulatory analysis for the proposed rule. Single copies of the draft regulatory analysis are available as indicated in the **ADDRESSES** heading.)

The proposed record retention period of 3 years is consistent with similar recordkeeping requirements in 10 CFR parts 20 and 35.

VII. Summary of the Proposed Changes

This section summarizes the regulation changes that are being proposed. The NRC proposes to amend 10 CFR 20.1301(a)(1) to specifically state that the dose to individual members of the public from a licensed operation does not include doses received by individuals exposed to patients who were released by the licensed operation under the provisions of 10 CFR 35.75. This is not a substantive change but clarifies the NRC policy that patient release is governed by 10 CFR 35.75, not 10 CFR 20.1301, as discussed above under Issue 1.

The NRC proposes to amend 10 CFR 20.1301(a)(2) to specifically state that the limit on dose in unrestricted areas does not include dose contributions from patients administered radioactive material and released in accordance with 10 CFR 35.75. The purpose of this change is to clarify that licensees are not required to control areas, such as a waiting room, simply because of the presence of a patient released pursuant to 10 CFR 35.75. If a patient is not required to be confined pursuant to 10 CFR 35.75, licensees are not required to limit the radiation dose to members of the public (e.g., visitor in a waiting room) from a patient to 0.02 millisievert (2 millirems) in any one hour. Patient waiting rooms or hospital rooms need only be controlled for those patients not meeting the release criteria in 10 CFR 35.75.

The NRC proposes to adopt a new 10 CFR 35.75(a) to change the patient release criteria from 30 millicuries of activity in a patient or a dose rate of 5 millirems per hour at 1 meter from a patient to a dose limit of 5 millisieverts (0.5 rem) in any one year, excluding background or any occupational exposure, to an individual from exposure to a released patient. The reasons for this change were discussed above under Issue 2. In brief, a dose-based limit provides a single limit that can be used to provide an equivalent level of risks from all radionuclides. Also, the proposed changes are supported by the recommendations of the ICRP and NCRP that an individual can be allowed to receive an annual dose up to 5 millisieverts (0.5 rem) in temporary situations where exposure to radiation is not expected to result in doses above 1 millisievert (0.1 rem) for long periods of time.

Doses among individuals who may come in contact with a released patient are highly variable and reflect the crucial, but difficult to define, parameters of time, distance, and shielding. Although all members of society have the potential for exposure to a released patient, based on time and distance considerations, it is reasonable to conclude that for the overwhelming majority of released patients, the maximally exposed individual is likely to be one who is aware of the patient's condition such as the primary care-giver, a family member, or any other individual who spends significant time close to the patient.

The NRC proposes to adopt a new 10 CFR 35.75(b)(1) to require that the licensee provide released patients with written instructions on how to maintain as low as reasonably achievable doses to other individuals if the total effective dose equivalent to any individual other than the released patient is likely to exceed 1 millisievert (0.1 rem) in any one year. A requirement for written instructions for certain patients was already contained in 10 CFR 35.315(a)(6) and 35.415(a)(5). The proposed requirement would add approximately 50,000 patients per year who are administered iodine-131 for the treatment of hyperthyroidism. The purpose of the written instructions is to maintain as low as reasonably achievable doses to individuals exposed to patients, as discussed in more detail under Issue 6.

The NRC proposes to revise 10 CFR 35.75(b)(2) to require that licensees maintain a record of the basis for the patient's release for three years. These records must include the calculations performed to determine the total effective dose equivalent of the individual likely to receive the highest dose if the total effective dose equivalent to any individual other than the released patient is likely to exceed 1 millisievert (0.1 rem) in a year from a single administration. It is anticipated that this requirement will be met by either a notation, such as a reference to the applicable regulatory guide or calculation(s) to be retained in the patient's file. The major purpose of the change is to provide the basis for controlling the dose to individuals exposed to a patient who may receive more than one administration in a year, as discussed above under Issue 7.

Finally, the NRC proposes to amend its requirements on written instructions in 10 CFR 35.315(a)(6) and 35.415(a)(5). These regulations already required written instructions in certain cases, but the phrase "if required by § 35.75(b)" was added. The purpose of this change was to ensure internal consistency within 10 CFR part 35 on when written instructions must be provided.

VIII. Consistency with 1979 Medical Policy Statement

On February 9, 1979 (44 FR 8242), the NRC published a Statement of General Policy on the Regulation of the Medical Uses of Radioisotopes. The first statement of this policy states that, "The NRC will continue to regulate the medical uses of radioisotopes as necessary to provide for the radiation safety of workers and the general public." The proposed rule is consistent with this statement because its purpose is to provide for the safety of individuals exposed to patients who are administered radioactive materials.

The second statement of the policy states that, "The NRC will regulate the radiation safety of patients where justified by the risk to patients and where voluntary standards, or compliance with these standards, are inadequate." This statement is not relevant to the proposed rule because the proposed rule does not affect the safety of patients themselves but affects the safety of individuals exposed to patients.

The third statement of the policy states that, "The NRC will minimize intrusion into medical judgements affecting patients and into other areas traditionally considered to be a part of the practice of medicine." The proposed rule is consistent with this statement because it places no requirements on the administration of radioactive materials to patients and because the release of patients administered radioactive materials has long been considered a matter of regulatory concern rather than solely a matter of medical judgement.

Thus, the proposed rule is considered to be consistent with the 1979 medical policy statement.

IX. Issue of Compatibility for Agreement States

The NRC believes that the proposed modifications to 10 CFR 20.1301(a) and 10 CFR 35.75 should be Division 1 and 2 items of compatibility, respectively, because the patient release criteria required by the rule are the minimum requirements necessary to ensure adequate protection of public health and safety. However, representatives of the Agreement States who attended the public workshop held in Atlanta, Georgia, on July 15 and 16, 1992, have recommended that the proposed changes to 10 CFR part 35 should not be a matter of compatibility (i.e., Division 3) for the Agreement States. In addition, two Agreement States in their written comments on the draft rule reviewed in July 1993 addressed the issue of patient release under 10 CFR part 35 as a Division 3 matter. Under Division 2 status, the Agreement States must address the changes and may adopt more stringent requirements, but may not adopt less stringent provisions

X. Finding of No Significant Environmental Impact: Availability

The NRC has determined under the National Environmental Policy Act of 1969, as amended, and the Commission's regulations in Subpart A of 10 CFR part 51, that the proposed amendments, if adopted, would not be a major Federal action significantly affecting the quality of the human environment and therefore, an environmental impact statement is not required. The proposed amendment would clarify the pertinent regulatory language to reflect explicitly the relationship between 10 CFR part 20 and part 35 with respect to release of patients, and revise the release criteria for patients receiving radioactive material for medical use from an activity-based standard to a dose basis. Because the risk basis of the current regulation remains unchanged, it is expected that there would be no significant change in radiation dose to the public as a result of the revised regulation.

The draft environmental assessment and finding of no significant impact on which this determination is based is available for inspection at the NRC Public Document Room, 2120 L Street NW. (Lower Level), Washington, DC. Single copies of the draft environmental assessment and the finding of no significant impact are available as indicated in the **FOR FURTHER INFORMATION CONTACT** heading.

XI. Paperwork Reduction Act Statement

This proposed rule amends information collection requirements that are subject to the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*). This rule has been submitted to the Office of Management and Budget for review and approval of the information collection requirements.

The public reporting burden for this collection of information is estimated to average 0.42 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to the Information and Records Management Branch (MNBB–7714), U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001; and to the Desk Officer, Office of Information and Regulatory Affairs, NEOB–3019 (3150–0010), Office of Management and Budget, Washington, DC 20503.

XII. Regulatory Analysis

The NRC has prepared a regulatory analysis (NUREG–1492) for the proposed amendment. The analysis examines the benefits and impacts considered by the NRC. The regulatory analysis is available for inspection at the NRC Public Document Room at 2120 L Street NW. (Lower Level), Washington, DC. Single copies are available as indicated under the **FOR FURTHER INFORMATION CONTACT** heading.

XIII. Regulatory Flexibility Certification

As required by the Regulatory Flexibility Act of 1980, 5 U.S.C. 605(b), the NRC certifies that, if adopted, this proposed rule would not have a significant economic impact on a substantial number of small entities. As a result of the revised regulation, the impact would not be significant because the revised regulation basically represents a continuation of current practice.

The NRC is seeking public comment on the initial regulatory flexibility certification. The NRC is particularly seeking comment from small entities as defined under the NRC's size standards published on November 6, 1991 (56 FR 56672), as to how the regulations will affect them and how the regulations may be tiered or otherwise modified to impose less stringent requirements on small entities while still adequately protecting the public health and safety. Any small entity subject to this regulation who determines that, because of its size, it is likely to bear a disproportionate adverse economic impact should offer comments that specifically discuss the following items:

(a) The licensee's size and how the proposed regulation would result in a significant economic burden or whether the resources necessary to implement this amendment could be more effectively used in other ways to

optimize public health and safety, as compared to the economic burden on a larger licensee;

(b) How the proposed regulation could be modified to take into account the licensee's differing needs or capabilities;

(c) The benefits that would accrue, or the detriments that would be avoided, if the proposed regulation were modified as suggested by the licensee;

(d) How the proposed regulation, as modified, could more closely equalize the impact of NRC regulations or create more equal access to the benefits of Federal programs as opposed to providing special advantages to any individual or group; and

(e) How the proposed regulation, as modified, would still adequately protect the public health and safety.

The comments should be sent to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555. ATTN: Docketing and Service Branch. Hand deliver comments to 11555 Rockville Pike, Rockville, Maryland, between 7:45 a.m. and 4:15 p.m. Federal workdays.

XIV. Backfit Analysis

The NRC has determined that the backfit rule, 10 CFR 50.109, does not apply to this proposed rule and, therefore, that a backfit analysis is not required for this proposed rule, because these amendments do not involve any provisions which would impose backfits as defined in 10 CFR 50.109(a)(1).

XV. List of Subjects

10 CFR part 20

Byproduct material, Licensed material, Nuclear materials, Nuclear power plants and reactors, Occupational safety and health, Packaging and containers, Penalty, Radiation protection, Reporting and recording requirements, Special nuclear material, Source material, Waste treatment and disposal.

10 CFR part 35

Byproduct material, Criminal penalty, Drugs, Health facilities, Health professions, Incorporation by reference, Medical devices, Nuclear materials, Occupational safety and health, Penalty, Radiation protection, Reporting and recordkeeping requirements.

For the reasons set out in the preamble and under the authority of the Atomic Energy Act of 1954, as amended; the Energy Reorganization Act of 1974, as amended; and 5 U.S.C. 553; the NRC is proposing to adopt the following amendments to 10 CFR parts 20 and 35.

PART 20—STANDARDS FOR PROTECTION AGAINST RADIATION

1. The authority citation for part 20 is revised to read as follows:

Authority: Secs. 53, 63, 65, 81, 103, 104, 161, 182, 186, 68 Stat. 930, 933, 935, 936, 937, 948, 953, 955, as amended (42 U.S.C. 2073, 2093, 2095, 2111, 2133, 2134, 2201, 2232, 2236), secs. 201, as amended, 202, 206, 88 Stat. 1242, as amended, 1244, 1246 (U.S.C. 5841, 5842, 5846).

2. In § 20.1301, paragraph (a) is revised to read as follows:

§ 20.1301 Dose limits for individual members of the public.

(a) Each licensee shall conduct operations so that—

(1) The total effective dose equivalent to individual members of the public from the licensed operation does not exceed 0.1 rem (1 mSv) in a year, exclusive of the dose contributions from the licensee's disposal of radioactive material into sanitary sewerage in accordance with § 20.2003 and from patients administered radioactive material and released in accordance with § 35.75, and

(2) The dose in any unrestricted area from external sources, exclusive of the dose contributions from patients administered radioactive material and released in accordance with § 35.75, does not exceed 0.002 rem (0.02 mSv) in any one hour.

* * * * *

PART 35—MEDICAL USE OF BYPRODUCT MATERIAL

3. The authority citation for part 35 continues to read as follows:

Authority: Secs. 81, 161, 182, 183, 68 Stat 935, 948, 953, 954, as amended (42 U.S.C. 2111, 2201, 2232, 2233); sec. 201, 88 Stat 1242, as amended (42 U.S.C. 5841).

4. In § 35.8, paragraph (b) is revised to read as follows:

§ 35.8 Information collection requirements: OMB approval.

* * * * *

(b) The approved information collection requirements contained in this part appear in §§ 35.12, 35.13, 35.14, 35.21, 35.22, 35.23, 35.27, 35.29, 35.13, 35.50, 35.51, 35.53, 35.59, 35.60, 35.61, 35.70, 35.75, 35.80, 35.92, 35.204, 35.205, 35.310, 35.315, 35.404, 35.406, 35.410, 35.415, 35.606, 35.610, 35.615, 35.630, 35.632, 35.634, 35.636, 35.641, 35.643, 35.645, and 35.647.

* * * * *

5. Section 35.75 is revised to read as follows:

§ 35.75 Release of patients containing radiopharmaceuticals or permanent implants.

(a) A licensee may authorize release from licensee control any patient administered radiopharmaceuticals or permanent implants containing radioactive material if the total effective dose equivalent to an individual from exposure to the released patient is not likely to exceed 5 millisieverts (0.5 rem) in any one year.

(b) If the total effective dose equivalent to any individual other than the released patient is likely to exceed 1 millisievert (0.1 rem) in a year from a single administration, upon release the licensee shall:

(1) Provide the patient with written instructions on how to maintain doses to other individuals as low as reasonably achievable; and

(2) Maintain, for three years, a record of the released patient and the calculated total effective dose equivalent to the individual likely to receive the highest dose.

6. In § 35.315, paragraph (a)(6) is revised to read as follows:

§ 35.315 Safety precautions.

(a) * * *

(6) Provide the patient with radiation safety guidance, if required by § 35.75(b), that will help to keep radiation dose to household members and the public as low as reasonably achievable before authorizing release of the patient.

* * * * *

7. In § 35.415, paragraph (a)(5) is revised to read as follows:

§ 35.415 Safety precautions.

(a) * * *

(5) Provide the patient with radiation safety guidance, if required by § 35.75(b), that will help to keep radiation dose to household members and the public as low as reasonably achievable before releasing the patient if the patient was administered a permanent implant.

* * * * *

Dated at Rockville, MD, this 9th day of June, 1994.

For the Nuclear Regulatory Commission

John C. Hoyle,

Acting Secretary of the Commission.

[FR Doc. 94–14544 Filed 6–14–94; 8:45 am]

BILLING CODE 7590–01–P

FEDERAL TRADE COMMISSION

16 CFR Part 423

Request for Comments Concerning Trade Regulation Rule on Care Labeling of Textile Wearing Apparel and Certain Piece Goods

AGENCY: Federal Trade Commission.

ACTION: Request for public comments.

SUMMARY: The Federal Trade Commission (the "Commission") is requesting public comments on its Trade Regulation Rule on Care Labeling of Textile Wearing Apparel and Certain Piece Goods ("the Care Labeling Rule" or "the Rule"). The Commission is requesting comments about the overall costs and benefits of the Rule and its overall regulatory and economic impact as a part of its systematic review of all current Commission regulations and guides. The Commission also is requesting comment on whether the Rule should be modified so as to (1) permit the use of care symbols in lieu of words; (2) revise the requirements for care instructions in order to provide consumers with information about whether a garment can be both washed and dry cleaned; and (3) clarify the "reasonable basis" requirements of the Rule. All interested persons are hereby given notice of the opportunity to submit written data, views and arguments concerning this proposal.

DATES: Written comments will be accepted until August 15, 1994.

ADDRESSES: Comments should be directed to: Secretary, Federal Trade Commission, room H–159, Sixth and Pennsylvania Ave., NW., Washington, DC 20580. Comments about the Care Labeling Rule should be identified as "16 CFR Part 423—Comment."

FOR FURTHER INFORMATION CONTACT: Constance M. Vecellio, Attorney, Federal Trade Commission, Washington, DC 20580, (202) 326–2966.

SUPPLEMENTARY INFORMATION: The Commission has determined, as part of its oversight responsibilities, to review Rules and guides periodically. These reviews will seek information about the costs and benefits of the Commission's Rules and guides and their regulatory and economic impact. The information obtained will assist the Commission in identifying Rules and guides that warrant modification or rescission.

The Commission is also seeking comment on several issues specific to the Care Labeling Rule. The North American Free Trade Agreement (NAFTA) has created industry interest in being permitted to use symbols in lieu of words to provide care instructions, and the Commission seeks comment on the costs and benefits of such a change. In addition, there is currently interest by the Environmental Protection Agency (EPA) and others in reducing the use of dry cleaning solvents, because some evidence indicates that the solvents may be damaging to the environment. The Care Labeling Rule currently only requires either a washing instruction or a dry cleaning instruction; it does not require both. Thus, some garments that are labeled "dry clean" also may be washable, although the Commission does not know the incidence of such labeling. If the Rule required both washing and dry cleaning instructions for such garments, consumers and professional cleaners could make more informed choices. The Commission seeks comment on the desirability of such a change and, in general, on the extent to which the current Rule is consistent with the goal of reducing the use of dry cleaning solvents. The Commission also seeks comment on whether it is desirable to clarify the "reasonable basis" provision of the Rule. Finally, the Commission seeks comment on the extent to which garments are being sold with incorrect or incomplete care instructions.

A. Background

The Rule was promulgated by the Commission on December 16, 1971, 36 FR 23883 (1971), and amended on May 20, 1983, 48 FR 22733 (1983). The Rule makes it an unfair or deceptive act or practice for manufacturers and importers of textile wearing apparel and certain piece goods to sell these items without attaching care labels stating "what regular care is needed for the ordinary use of the product." (16 CFR 423.6(a) and (b)) The Rule also requires that the manufacturer or importer possess, prior to sale, a reasonable basis for the care instructions. (16 CFR 423.6(c))

B. Issues for Comment

The Care Labeling Rule currently requires that care instructions be stated in "appropriate terms," though it also states that "any appropriate symbols may be used on care labels or care instructions, *in addition to the required appropriate terms* so long as the terms fulfill the requirements of this regulation." 16 CFR 423.2(b) (emphasis added). Although the Rule does not specifically state that the instructions must be in English, they usually are in English. The goal of the North American Free Trade Agreement (NAFTA) is to establish a trade zone in which goods can flow freely between Canada, Mexico, and the United States. However, Canada requires that garments containing instructions in English also contain instructions in French, and Mexico requires that they also contain instructions in Spanish. Members of the textile industry are concerned that care labels in three languages would be too lengthy. Although manufacturers could separately label inventory destined for each of the three countries, this would increase costs and reduce the advantages to be gained from a large free trade zone.

The Commission solicits comment on whether it is desirable to allow the use of symbols in lieu of written language on care labels. However, the Commission recognizes that consumer use and acceptance of symbols may not be feasible without consumer education about the meaning of the symbols, which also would impose costs. Moreover, there are several existing systems of care symbols, and various issues arise concerning what system would be most feasible and appropriate.[1] The Commission requests comment on the costs and benefits of allowing the use of care symbols in lieu of words and of the specific systems of care symbols currently in existence.

Second, the Care Labeling Rule currently only requires either a washing instruction or a dry cleaning instruction; it does not require both. Thus, although garments that are labeled "dry clean" also may be washable, consumers and professional cleaners cannot be certain that items labeled "dry clean" can be washed without damage. If the Rule required both washing and dry cleaning instructions for such garments, consumers would be informed that they have a choice between these cleaning methods.

Perchloroethylene (PCE) is the most commonly used dry cleaning solvent.

[1] *E.g.*, a system developed by the International Association for Textile Care Labeling ("Ginetex") and adopted by the International Standards Organization as International Standard 3758, system developed by the American Society for Testing and Materials (ASTM) and designated as ASTM D5489 Guide to Care Symbols for Care Instructions on Consumer Textile Products. Some of the symbols in the Ginetex system are trademarked. One issue to be resolved is what payment, if any, United States companies would have to make if the Commission were to approve the Ginetex system for use in the United States and what payment, if any, United States companies would have to make if they exported goods with these symbols to European countries. The ASTM system uses the same basic symbols as the Ginetex system but provides more detail. (For example, the ASTM system provides a symbol for non-chlorine bleach, while the Ginetex system does not.) However, because some of the basic symbols used in the ASTM system are trademarked by Ginetex, United States companies may not be able to export goods using these symbols to certain European countries.

PCE has been designated as a hazardous air pollutant under section 112 of the Clean Air Act and under many state air toxics regulations. On September 15, 1993, the EPA set national emission standards for new and existing dry cleaning facilities using PCE. EPA's Office of Pollution Prevention and Toxics has been working with the dry cleaning industry to reduce exposure to PCE. As part of this process, EPA has published a summary of a process referred to as "Multiprocess Wet Cleaning." In this summary, EPA stated that it has "formed a partnership with the dry cleaning industry to compare the costs and performance of a potential alternative cleaning process that relies on the controlled application of heat, steam and natural soaps to clean clothes that are typically dry cleaned."[2]

Amendment of the Care Labeling Rule to require that care instructions state both whether a garment can be washed as well as whether it can be dry cleaned might enable both consumers and professional cleaners to choose options that would reduce risks to the environment. The Commission does not know the extent to which such labeling currently occurs. However, such a change might impose increased costs on manufacturers and importers. The Commission solicits comment on whether it is desirable to require that care instructions be provided for both washing and dry cleaning on garments where either method is appropriate.

Finally, the Commission solicits comment on the reasonable basis requirement of the Rule. The Rule now says that a reasonable basis can consist of "(1) Reliable evidence that the product was not harmed when cleaned reasonably often according to the instructions * * * (2) Reliable evidence that the product or a fair sample of the product was harmed when cleaned by methods warned against on the label * * *. (3) Reliable evidence, like that described in paragraph (c)(1) or (2) of this section, for each component part * * * (4) Reliable evidence that the product or a fair sample of the product was successfully tested * * *; (5) Reliable evidence of current technical literature, past experience, or the industry expertise supporting the care information on the label; or (6) Other reliable evidence." 16 CFR 423.6(c). The intent of this provision is to make clear that a variety of types of evidence, alone or in combination, might provide a reasonable basis in specific instances.[3] At the same time, however, the Statement of Basis and Purpose to the Care Labeling Rule does not indicate that this provision is meant to suggest that a seller will be deemed to possess a reasonable basis whenever it possesses evidence of any one type of basis. In some instances, testing of garments may be the only acceptable basis, for example. This must be determined case-by-case, just as the minimum "reasonable basis" in advertising substantiation cases must be determined case-by-case.[4]

Accordingly, the Commission solicits comment on whether it is desirable to change the Rule itself to clarify that the criteria used to determine the level of substantiation required under the FTC Policy Statement on Advertising Substantiation are applicable in the care labeling context as well.[5] The Commission also solicits comment on whether the definition of a "reasonable basis" in the Rule should be changed to provide members of the industry with additional guidance about the level of substantiation required in specific circumstances. In particular, the Commission solicits comment on whether the existing Rule needs to be clarified to indicate that in certain circumstances test results may be the only way to establish a reasonable basis for care instructions because of the peculiarity of some components of the garment or because reliable expert testimony states that such tests are necessary.

C. Request for Comment

At this time, the Commission solicits written public comments on the following questions:

(1) Is there a continuing need for the Rule?

(a) What benefits has the Rule provided to purchasers of the products or services affected by the Rule?

(b) Has the Rule imposed costs on purchasers?

(2) What changes, if any, should be made to the Rule to increase the benefits of the Rule to purchasers?

(a) How would these changes affect the costs the Rule imposes on firms subject to its requirements?

(3) What significant burdens or costs, including costs of compliance, has the Rule imposed on firms subject to its requirements?

(a) Has the Rule provided benefits to such firms?

(4) What changes, if any, should be made to the Rule to reduce the burdens or costs imposed on firms subject to its requirements?

(a) How would these changes affect the benefits provided by the Rule?

(5) Does the Rule overlap or conflict with other federal, state, or local laws or regulations?

(6) Since the Rule was issued, what effects, if any, have changes in relevant technology or economic conditions had on the Rule?

(7) Should the Commission amend the Rule to allow care symbols to be used in lieu of language in care instructions? If so, is there an existing set of care symbols that would provide all or most of the information required by the current Rule? What are the advantages and disadvantages of the existing systems of care symbols?

(a) In particular, what are the advantages and disadvantages of the system of care symbols developed by the International Association for Textile Care Labeling ("Ginetex") and adopted by the International Standards Organization as International Standard 3758?

(b) What are the advantages and disadvantages of the system of care symbols developed by the American Society for Testing and Materials (ASTM) and designated as ASTM D5489 Guide to Care Symbols for Care Instructions on Consumer Textile Products?

(8) Does the current Rule pose an impediment to the EPA's goal of reducing the use of dry cleaning solvents? What is the actual incidence of labeling that fails to include both washing and dry cleaning instructions? With regard to a garment that can be

---

[2] EPA Document 744–R–93–004, "Multiprocess Wet Cleaning: Cost and Performance Comparison of Conventional Dry Cleaning and an Alternative Process," Executive Summary, pp. ES–i and ES–ii.

[3] In the Statement of Basis and Purpose accompanying the publication of the amended Rule on May 20, 1983, the Commission indicated that it viewed the reasonable basis requirement for care labeling claims to be the same as the reasonable basis requirement for any claim. It described the reasonable basis requirement as "implicit but not directly stated" in the original rule. 48 FR 22736. It also stated that it believed that an explicit reasonable basis requirement "may benefit consumers to the extent that manufacturers are not already aware of their obligation to have a reasonable basis for care instructions." 48 FR 22740. The Commission also stated that the enumeration in the amended Rule of types of evidence that can constitute a reasonable basis would "enable manufacturers to adopt *efficient, as well as effective* methods of obtaining a reasonable basis for care instructions." *Id.* (Emphasis added.)

[4] In the *FTC Policy Statement Regarding Advertising Substantiation*, 104 F.T.C. 839 (1984), the Commission set forth criteria to consider in establishing the minimum required basis for objective advertising claims, where no specific basis was stated or implied: "These factors include: The type of claim, the product, the consequences of a false claim, the benefits of a truthful claim, the cost of developing substantiation for the claim, and the amount of substantiation experts in the field believe is reasonable." 104 F.T.C. at 840.

[5] See 48 FR 22733, 22737 (May 20, 1983).

either washed or dry cleaned, should the Commission amend the Rule to require that care instructions be provided for both washing and dry cleaning? What are the costs and benefits, including environmental benefits, of such an amendment?

(9) Should the Commission amend the Rule to specify under what conditions a manufacturer or importer must possess a particular type of basis among those listed in § 423.6(c) of the Rule, such as test results? Should the "reasonable basis" requirements of the Rule be modified in any other way?

(10) Are there garments in the marketplace that contain inaccurate or incomplete care instructions?

(a) To what extent is this a problem with respect to washing instructions?

(b) To what extent is this a problem with respect to dry cleaning instructions?

(c) To what extent are there problems with respect to shrinkage?

(d) To what extent are there problems with respect to colorfastness?

(e) Are there any other significant problems that occur because of inaccurate or incomplete care label instructions?

BILLING CODE 6750–01–P

CONSUMER PRODUCT SAFETY COMMISSION

16 CFR Part 1640

Upholstered Furniture; Advance Notice of Proposed Rulemaking; Request for Comments and Information

AGENCY: Consumer Product Safety Commission.

ACTION: Advance notice of proposed rulemaking.

SUMMARY: Based on currently available information, the Commission finds that a new flammability standard or other regulation may be needed for products of upholstered furniture and for fabrics and related materials used in, or intended for use in, upholstered furniture, to protect the public against the unreasonable risk of fire leading to death, personal injury, or significant property damage. The specific risk of fire is from the ignition of upholstered furniture from small open-flame sources.

This advance notice of proposed rulemaking ("ANPR") initiates a rulemaking proceeding under the authority of the Flammable Fabrics Act ("FFA"). One result of the proceeding could be the promulgation of a standard or other regulation mandating performance and/or labeling requirements for these products. Another possible outcome could be a voluntary standard that adequately addresses the identified risk of injury.

The Commission solicits written comments from interested persons concerning the risk of injury and death associated with the ignition of upholstered furniture from small open flames, data on small open-flame testing of upholstered furniture, the regulatory alternatives discussed in this notice, other possible means to address these risks, and the economic impacts of the various regulatory alternatives. The Commission also invites interested persons to submit an existing standard, or a statement of intent to modify or develop a voluntary standard, to address the risk of injury described in this notice.

DATES: Written comments and submissions in response to this notice must be received by the Commission by August 15, 1994.

ADDRESSES: Comments should be mailed, preferably in five (5) copies, to the Office of the Secretary, Consumer Product Safety Commission, Washington, DC 20207–0001, or delivered to the Office of the Secretary, Consumer Product Safety Commission, room 502, 4330 East West Highway, Bethesda, Maryland 20814; telephone (301) 504–0800.

FOR FURTHER INFORMATION CONTACT: Dale R. Ray, Directorate for Economic Analysis, Consumer Product Safety Commission, Washington, DC 20207; telephone (301) 504–0962, ext. 1323.

SUPPLEMENTARY INFORMATION:

A. Background

1. *The Petition.* In 1993, the National Association of State Fire Marshals ("NASFM") petitioned the Commission (Petition FP 93–1) to issue a flammability standard for upholstered furniture incorporating the requirements of three standards now in effect in the State of California. Specifically, the petition urged the Commission to issue a flammability standard incorporating the requirements of Technical Bulletins 116, 117, and 133, issued by the Bureau of Home Furnishings and Thermal Insulation of the State of California.

These standards specify tests to measure the (a) resistance of components of upholstered furniture to ignition by small open-flame sources and cigarettes; (b) resistance of finished items of upholstered furniture to ignition by cigarettes; and (c) resistance of finished items of furniture to ignition from large open-flame sources. The California standards also contain labeling requirements.

In support of the petition, NASFM provided information about deaths and injuries from fires involving upholstered furniture in California and in the rest of the United States. The petition asserted that although deaths and injuries from fires involving upholstered furniture in the United States declined appreciably from 1980 through 1989, during the same period the numbers of deaths and injuries from upholstered furniture fires declined at a much faster rate in California.

The petitioner provided data showing that the rate of fire deaths associated with upholstered furniture in the United States, excluding California, decreased from 4.97 per million people in 1980 to 3.04 per million in 1989, a decline of 39 percent. By comparison, in 1980 the rate of fire deaths associated with upholstered furniture in California was 1.14 per million people and in 1989 it was 0.41 per million, a decline of 64 percent.

The Commission published a notice in the **Federal Register** on August 9, 1993 (58 FR 42301), announcing that the submission from NASFM had been docketed as a petition and soliciting written comments on the petition from all interested parties. Seventy-two comments were received in response to that notice. The Commission staff prepared a briefing package on the petition discussing information relevant to the decision to grant or deny the petition. The briefing package, dated April 8, 1994, contains a discussion of the comments received and other relevant information. It is available upon request from the Office of the Secretary of the Commission. The staff presented an oral briefing to the Commission on the petition on May 3, 1994.

2. *Commission Action.* At a decision meeting on May 12, 1994, the Commission voted 2–1 to grant that part of the petition requesting development of a flammability standard to address risks of death, injury, and property damage from small open-flame ignition of upholstered furniture.[1] The Commission also voted (unanimously) (i) to defer action on that part of the

[1] Commissioner Gall dissented from this vote.

petition requesting development of a flammability standard addressing risks of death, injury, and property damage from cigarette ignition of upholstered furniture, and (ii) to direct the staff to conduct an additional, limited investigation of the cigarette ignition issue. Finally, the Commission voted 2–1 to deny that portion of the petition requesting development of a flammability standard to address risks of death, injury, and property damage from large open-flame ignition of upholstered furniture.[2]

The information presently available to the Commission demonstrates that in 1991 approximately 150 deaths, 580 injuries, and $66 million in property losses resulted from the ignition of upholstered furniture by small open flames. Although the upholstered furniture industry has implemented a voluntary program to improve the resistance of upholstered furniture to ignition by cigarettes, that program has no provisions to address risks of small open-flame ignition.

The State of California enforces mandatory requirements for upholstered furniture components. These requirements are intended to improve resistance of upholstered furniture to ignition by small open-flame sources. Information available to the Commission indicates that almost all of the furniture produced for sale in California meets that State's mandatory requirements to address risks of small open-flame ignition of upholstered furniture. This information suggests that a Federal standard to address those risks may be effective and technologically and economically practicable.

As noted, the Commission unanimously voted to defer a decision on the part of the petition dealing with cigarette ignition of upholstered furniture. Despite a significant number of reported incidents, since 1980, deaths associated with upholstered furniture fires ignited by cigarettes have declined by almost 60 per cent. As noted above, the upholstered furniture industry has implemented a voluntary plan to improve resistance of upholstered furniture to cigarette ignition. However, the Commission has not assessed the resistance of currently-produced upholstered furniture to cigarette ignition or determined the extent to which upholstered furniture conforms to the industry voluntary program.

If most currently manufactured upholstered furniture resists cigarette ignition, the benefits to be derived from issuing mandatory requirements to address that risk may be small. However, if a large proportion of currently manufactured upholstered furniture can be ignited by a smoldering cigarette, a mandatory standard to address that risk may be needed.

For these reasons, the Commission decided to defer a decision on that portion of the petition requesting development of a mandatory standard to address risks of death, injury, and property damage associated with upholstered furniture ignited by cigarettes until the staff obtains certain additional information. This may include the extent to which currently manufactured upholstered furniture resists cigarette ignition and conforms to the industry's voluntary plan.

After examining all available information about deaths, injuries, and property losses associated with fires resulting from ignition of upholstered furniture, the Commission voted to deny that portion of the petition requesting development of a flammability standard to address risks of death, injury, and property damage associated with ignition of upholstered furniture by large open-flame sources. The State of California enforces a flammability standard to address risks of large open-flame ignition of upholstered furniture used in public occupancies without automatic sprinkler systems. However, that standard does not apply to furniture intended for residential use. Therefore, the Commission has no specific information about the extent to which a Federal flammability standard similar to the California large open-flame requirements could be expected to reduce deaths, injuries, or property damage from residential fires originating with ignition of upholstered furniture by a large open-flame source.

The Commission also considered information indicating that if the California requirements intended to address large open-flame ignition of upholstered furniture were applicable to all residential furniture sold in the United States, the total annual cost of compliance could exceed $2 billion, and could add an estimated $75 to the average price of items of upholstered furniture.

In view of the absence of information indicating the likelihood of a substantial reduction in deaths, injury, and property damage from large open-flame ignition of upholstered furniture, and estimates of substantial costs resulting from the imposition of requirements to address risks from upholstered furniture fires ignited by large open-flame sources, the Commission decided to deny that portion of the petition requesting issuance of a standard to address those risks.

B. Statutory Authority

This proceeding is conducted under provisions of the FFA, 15 U.S.C. 1191–1204. An item of upholstered furniture is a "product" of "interior furnishing" as those terms are defined in sections 2(e) and (h) of the FFA. 15 U.S.C. 1191(e) and (h). The Commission has authority under section 4(a) of the FFA to issue a "flammability standard or other regulation, including labeling," for a product of interior furnishing if the Commission determines that such a standard "is needed to adequately protect the public against unreasonable risk of the occurrence of fire leading to death or personal injury, or significant property damage." 15 U.S.C. 1193(a).

A proceeding to promulgate a regulation establishing a flammability standard for upholstered furniture begins by publication of this advance notice of proposed rulemaking as provided in section 4(g) of the FFA. 15 U.S.C 1193(g). If the Commission decides to continue the rulemaking proceeding after considering responses to the ANPR, the Commission must publish the text of the proposed rule, along with a preliminary regulatory analysis, in accordance with section 4(i) of the FFA. 15 U.S.C. 1193(i).

If the Commission then wishes to issue a final rule, it must publish the text of the final rule and a final regulatory analysis that includes the elements stated in section 4(j)(1) of the FFA. 15 U.S.C. 1193(j)(1). Before the Commission may issue a final regulation, it must make findings concerning voluntary standards, the relationship of the costs and benefits of the rule, and the burden imposed by the regulation. FFA section 4(j)(2), 15 U.S.C. 1193(j)(2).

C. The Product

The items within the scope of this ANPR include: (1) Products of interior furnishing that are used in homes, offices, and other places of assembly and public accommodation that consist in whole or in part of resilient materials (such as polyurethane foam, cotton batting, or related materials) enclosed within a covering consisting of fabric or related materials, and (2) fabric or related materials used or intended for use in the production of upholstered furniture.

D. The Upholstered Furniture Industry

The Commission estimates that there are over 1,000 manufacturers, and a small number of importers, of upholstered furniture in the United States, accounting for an estimated 25–30 million pieces shipped annually.

[2] Chairman Brown dissented from this vote.

Shipments are concentrated among the major producers; the 50 largest firms reportedly account for over half of all upholstered furniture sales. Most of the remaining manufacturers are small firms, none of which accounts for a significant proportion of sales.

E. Risks of Injury and Death

In 1991, about 16,600 residential fires involving ignition of upholstered furniture resulted in 700 deaths, over 2,000 injuries and nearly $300 million in property damage in the United States. Two-thirds (470) of the deaths and more than half (1,160) of the injuries resulted from smoldering-ignition smoking fires; about one-fifth (150) of the deaths and one-fourth (580) of the injuries resulted from open-flame-ignition fires (often identified as involving matches and lighters). Nearly half ($137 million) of the property damage was from smoking fires; about one-fifth ($66 million) was from open-flame fires. The total annual societal cost of upholstered furniture fire losses is estimated at about $2 billion, including about $1.25 billion from smoking fires and nearly $0.5 billion from open-flame fires.

Since 1980, total furniture fire deaths in the United States declined by slightly over half. Smoking fire deaths declined by 59 percent, while open-flame fire deaths declined by 25 percent. Injuries and property damage also declined by 34 and 28 percent, respectively.

A number of factors probably contributed to the decrease in furniture fire losses over time. These factors may include the use of more ignition-resistant fabrics and filling materials (due in part to or accelerated by the adoption of voluntary and mandatory safety standards); reductions in smoking, and accompanying reductions in the use of small open-flame sources (e.g., lighters and matches); improvements in fire fighting methods, response times, and equipment; and increases in the use of smoke detectors and sprinklers.

The above data indicate that the injury, death, and property losses attributable to both cigarette-ignition and open-flame-ignition of upholstered furniture remain very large. Although significant reductions in fire losses associated with ignition of upholstered furniture have occurred in recent years, particularly in the area of cigarette-ignition, the opportunity to achieve substantial, further reductions remains. While this proceeding is limited to risks from open-flame ignitions, the Commission can reassess the scope of its inquiry if it determines that further action may be warranted.

F. Existing Standards

The Commission is aware of some existing standards that may be relevant to this proceeding. These standards are described below.

1. *California standards.* The Bureau of Home Furnishings & Thermal Insulation in California's Department of Consumer Affairs began developing upholstered furniture and mattress flammability standards in the early 1970's, at approximately the same time as federal government efforts were initiated. Three standards—Technical Bulletins 116, 117, and 133—apply to upholstered furniture offered for sale in California. These standards contain labeling requirements and performance tests to measure the resistance to cigarette and open-flame ignition of components (TB–117) and finished items (TB–116 for cigarettes and TB–133 for open flames). TB–117 is mandatory for all upholstered furniture offered for sale in California; TB–116 is a voluntary standard routinely used for compliance screening tests; and TB–133 is mandatory only for items of upholstered furniture intended for use in public occupancies (excluding residences) not protected by automatic sprinklers.

This proceeding is limited to small open-flame ignitions. Thus, it does not cover TB–116 or TB–133, which apply respectively to cigarette ignition and large open flames. The standard relevant to this proceeding, TB–117, measures flammability performance by char length, flame spread, or weight loss, when a lit cigarette or a small open flame is applied to test surfaces of filling components. Under TB–117, upholstery fabrics must also meet the flaming ignition requirements of the CPSC's general wearing apparel regulations, which are codified at 16 CFR part 1610. (Virtually all upholstery materials comply with this provision.) Fire retardant-treated foam—so-called "California Foam"—is used to meet TB–117. There is no California standard for small open flames incorporating a composite test for finished items or full-scale mockups.

2. *Other Standards.* The Upholstered Furniture Action Council ("UFAC") adopted, in 1978, a Voluntary Action Program and voluntary test method, which incorporates cigarette ignition tests for furniture components. In addition, ASTM, Inc.—formerly the American Society for Testing & Materials—and the National Fire Protection Association ("NFPA") have adopted elements of a previously-developed draft CPSC standard and the UFAC cigarette ignition test methods. Neither organization, however, has adopted standards for small open-flame ignitions, the subject of this ANPR.

Other existing standards include those promulgated in 1988 by the British government, known as the "Furniture and Furnishings (Fire) (Safety) Regulations 1988 (Amended 1989)." These regulations supplemented a 1980 cigarette ignition regulation by adding a series of open-flame performance requirements. In addition, the regulations essentially banned all polyurethane foams—other than highly ignition-resistant "combustion-modified" foams—for use as filling materials in residential upholstered furniture. The regulations apply to most used upholstered furniture manufactured after 1950 as well as to new items.

G. Regulatory Alternatives Under Consideration

The Commission will consider the following alternatives to reduce the number of injuries and deaths and the amount of property damage from fires associated with small open-flame ignition of upholstered furniture.

1. *Flammability Standard.* If the Commission finds that a standard is needed to adequately protect the public against an unreasonable risk of the occurrence of fire leading to death, injury, or significant property damage, it may promulgate a flammability standard. Any such standard would be stated in objective terms that are reasonable, technologically practicable, and appropriate. It would also be limited to such fabrics, related materials, or products which have been determined to present the unreasonable risk found to exist.

2. *Labeling Regulation.* Either separately or as part of a flammability standard, the Commission may consider issuance of a labeling regulation as part of this proceeding.

3. *Voluntary standards.* The Commission could terminate this proceeding and rely upon a voluntary standard submitted in response to this notice if the standard would likely result in the elimination or adequate reduction of the risk of injury identified in the notice, and if there would likely be substantial compliance with such standard.

H. Solicitation of Information and Comments

Based on information currently available to the Commission from investigations, research, and other sources, the Commission, in accordance with section 4(a) of the FFA, 15 U.S.C. 1193(a), finds that a new flammability standard, or other regulation, may be

needed for products of upholstered furniture made from fabrics and related materials, and for fabrics and related materials used in, or intended for use in upholstered furniture, to protect the public against the unreasonable risk of the occurrence of fire leading to death, personal injury, or significant property damage. The specific risk of the occurrence of fire is from the ignition of upholstered furniture from small open-flame sources.

This ANPR is the first step of a proceeding which could result in a mandatory flammability standard and/or labeling regulation, or a voluntary standard, for upholstered furniture that presents an unreasonable risk of the occurrence of fire leading to death or personal injury or significant property damage. To assist the Commission in reaching an informed decision in this matter, the Commission invites all interested persons to submit to the Commission their comments on any aspect of the alternatives discussed above. Specifically, in accordance with section 4(g) of the FFA, the Commission solicits:

(1) Written comments with respect to the risk of injury identified by the Commission, the regulatory alternatives being considered (including the potential effectiveness and economic impacts of such alternatives), and other possible alternatives for addressing the risk.

(2) Any existing standard or portion of a standard which could be issued as a proposed regulation.

(3) A statement of intention to modify or develop a voluntary standard to address the risk of injury discussed in this notice, along with a description of a plan to do so.

In addition, the Commission would like to receive from interested parties data on open-flame ignition tests of upholstered furniture.

Comments should be mailed, preferably in five (5) copies, to the Office of the Secretary, Consumer Product Safety Commission, Washington, D.C. 20207–0001, or delivered to the Office of the Secretary, Consumer Product Safety Commission, Room 502, 4330 East West Highway, Bethesda, Maryland 20814–4408; telephone (301) 504–0800. All comments and submissions should be received no later than August 15, 1994.

Dated: June 9, 1994.

Sadye E. Dunn,

Secretary, Consumer Product Safety Commission.

[FR Doc. 94–14573 Filed 6–14–94; 8:45 am]

BILLING CODE 6355–01–P

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

21 CFR Part 1301

Exemption of Agents and Employees; Affiliated Practitioners

AGENCY: Drug Enforcement Administration (DEA), Justice.

ACTION: Proposed rule.

SUMMARY: DEA proposes to amend the language under title 21, Code of Federal Regulations (21 CFR) regarding the exemption of agents and employees from the requirement for individual registration when administering, dispensing, or prescribing controlled substances in the course of their official duties or business. The amendments will make the exemption granted to agents and employees of a registrant more consistent with the recent regulatory changes involving Mid-Level Practitioners (MLP) and the fee exemption for practitioners employed by Federal, state and local government hospitals or other institutions.

DATES: Written comments or objections must be received on or before August 15, 1994.

ADDRESSES: Comments and objections should be submitted in quintuplicate to the Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration, Washington, DC 20537, Attention: DEA Federal Register Representative/CCR.

FOR FURTHER INFORMATION CONTACT: G. Thomas Gitchel, Chief, Liaison and Policy Section, Office of Diversion Control, Drug Enforcement Administration, Washington, DC 20537, Telephone (202) 307–7297.

SUPPLEMENTARY INFORMATION: DEA is proposing to amend the language under 21 CFR, § 1301.24 regarding the circumstances under which agents or employees of a DEA registrant may administer, dispense, or prescribe controlled substances in the course of their official duties or business without being required to obtain an individual registration. Specifically, § 1301.24(b) is proposed to be amended to allow that an individual practitioner who acts as an agent or employee of another individual practitioner, other than a mid-level practitioner (MLP), may administer and dispense (other than by prescription) controlled substances in the normal course of his/her official duties or business under the registration of the employer or principal practitioner.

Section 1301.24(c) is proposed to be amended to allow an individual practitioner who is an agent or employee of a hospital or other institution to administer, dispense, or prescribe controlled substances under the registration of the hospital or other institution in lieu of becoming individually registered. The provisions outlined under § 1301.24(c)(1) through (c)(6) set forth the procedures under which an individual practitioner could prescribe utilizing the hospital or other institution's registration number.

These changes are being proposed to make the circumstances under which agents or employees of a DEA registrant may administer, dispense, or prescribe controlled substances more consistent with recent developments with respect to MLPs and Federal, state or local government practitioners. During and immediately following the development of regulatory revisions concerning MLPs and persons exempt from the registration or reregistration application fees, DEA received a number of comments and questions from both individual practitioners and associations regarding the exemption of agents and employees of other DEA registrants. The comments and questions made it apparent that the current language in § 1301.24 is not entirely consistent with the intent of the new developments. The proposed revisions to § 1301.24 will allow that, (1) an individual practitioner who acts as an agent or employee of another individual registered practitioner (other than an MLP) may administer or dispense controlled substances, to the extent authorized under the laws of the jurisdiction in which he or she practices, under the registration of the principal practitioner, in lieu of being registered him/himself; and (2) an individual practitioner who is an agent or employee of a hospital or other institution which is registered with DEA may administer, dispense, or prescribe controlled substances under the registration of the hospital or other institution in lieu of being registered individually, provided that the requirements regarding prescribing as set forth in § 1301.24(c)(1) through (c)(6) are complied with.

The Deputy Assistant Administrator, Office of Diversion Control, hereby certifies that this proposed rulemaking will have no significant impact upon entities whose interests must be considered under the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.* This proposed rule expands an existing regulatory provision to accommodate recent changes regarding MLPs and government practitioners. This proposed rule is not a significant regulatory action and therefore has not

been reviewed by the Office of Management and Budget pursuant to Executive Order 12866.

This action has been analyzed in accordance with the principles and criteria in Executive Order 12612, and it has been determined that the proposed rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

List of Subjects in 21 CFR Part 1301

Administrative practice and procedure, Drug Enforcement Administration, Drug Traffic Control, Security measures.

For reasons set out above, it is proposed that 21 CFR part 1301 be amended as follows:

PART 1301—[AMENDED]

1. The authority citation for part 1301 continues to read as follows:

Authority: 21 U.S.C. 821, 822, 823, 824, 871(b), 875, 877.

2. Section 1301.24 is proposed to be amended by revising paragraphs (b), (c) introductory text and (c)(5) to read as follows:

§ 1301.24 Exemption of agents and employees; affiliated practitioners.

* * * * *

(b) An individual practitioner, as defined in § 1304.02 of this chapter, who is an agent or employee of another individual practitioner (other than a mid-level practitioner) registered to dispense controlled substances may, when acting in the normal course of business or employment, administer or dispense (other than by issuance of prescription) controlled substances if and to the extent that such individual practitioner is authorized or permitted to do so by the jurisdiction in which he or she practices, under the registration of the employer or principal practitioner in lieu of being registered him/herself.

(c) An individual practitioner, as defined in Section 1304.02 of this chapter, who is an agent or employee of a hospital or other institution may, when acting in the normal course of business or employment, administer, dispense, or prescribe controlled substances under the registration of the hospital or other institution which is registered in lieu of being registered him/herself, provided that:

* * * * *

(5) The hospital or other institution authorizes the individual practitioner to dispense or prescribe under the hospital registration and designates a specific internal code number for each individual practioner so authorized. The code number shall consist of numbers, letters, or a combination thereof and shall be a suffix to the institution's DEA registration number, preceded by a hyphen (e.g., AP0123456–10 or AP0123456–A12; and

SUPPLEMENTARY INFORMATION: The Computer Matching and Privacy Protection Act of 1988 requires an agency to meet certain procedural requirements when using one or more of its Privacy Act systems of records in conducting computer matching programs. Included is the requirement that an agency Data Integrity Board review and approve certain computer matching activities of the agency. The following changes define computer matching under the Act; incorporate some of the Act's procedural requirements, including **Federal Register** publication, submission of matching proposals to the Postal Service, and execution of matching agreements; and describe the responsibilities and makeup of the USPS Data Integrity Board.

List of Subjects in 39 CFR Parts 262 and 266

Definitions, Privacy, Records and information management.

For the reasons set out in this notice, the Postal Service proposes to amend parts 262 and 266 of Title 39 of the Code of Federal Regulations as follows:

PART 262—RECORDS AND INFORMATION MANAGEMENT

1. The authority citation for part 262 continues to read as follows:

Authority: 39 U.S.C. 401; 5 U.S.C. 552a

2. Paragraphs (c) and (d) are added to § 262.5 as follows:

§ 262.5 Systems (Privacy).

* * * * *

(c) *Computer matching program.* A "matching program," as defined in the Privacy Act, 5 U.S.C. 552a(a)(8), is subject to the matching provisions of the Act, published guidance of the Office of Management and Budget, and these regulations. The term "matching program" includes any computerized comparison of:

(1) A Postal Service automated system of records with an automated system of records of another Federal agency, or with non-Federal records, for the purpose of:

(i) Establishing or verifying the eligibility of, or continuing compliance with, statutory and regulatory requirements by, applicants for, recipients or beneficiaries of, participants in, or providers of, services with respect to cash or in-kind assistance or payments under Federal benefit programs; or

(ii) Recouping payments or delinquent debts under such Federal benefit programs;

(2) A Postal Service automated personnel or payroll system of records with another automated personnel or payroll system of records of the Postal Service or other Federal Agency or with non-federal records.

(d) *Other computer matching activities.* (1) The following kinds of computer matches are specifically excluded from the term "matching program":

(i) Statistical matches whose purpose is solely to produce aggregate data stripped of personal identifiers.

(ii) Statistical matches whose purpose is in support of any research or statistical project.

(iii) Law enforcement investigative matches whose purpose is to gather evidence against a named person or persons in an existing investigation.

(iv) Tax administration matches.

(v) Routine administrative matches using Federal personnel records, provided that the purpose is not to take any adverse action against an individual.

(vi) Internal matches using only records from Postal Service systems of records: provided that the purpose is not to take any adverse action against any individual.

(vii) Matches performed for security clearance background checks or for foreign counterintelligence.

(2) While these and other matching activities that fall outside the definition of "matching program" are not subject to the matching provisions of the Privacy Act or OMB guidance, other provisions of the Act and of these regulations may be applicable. No matching program or other matching activity may be conducted without the prior approval of the Records Officer.

* * * * *

PART 266—PRIVACY OF INFORMATION

3. The authority citation for part 266 continues to read as follows:

Authority: 39 U.S.C. 401; 5 U.S.C. 552a.

§ 266.2 [Amended]

4. Section 266.2 is amended by removing "and" before "(f)" and the period at the end of the paragraph and adding ", and (g) of the establishment or revision of a computer matching program."

5. Paragraph (d) is added to § 266.3 as follows:

§ 266.3 Responsibility.

* * * * *

(d) *Data Integrity Board*—(1) *Responsibilities.* The Data Integrity Board oversees Postal Service computer matching activities. Its principal function is to review, approve, and maintain all written agreements for use of Postal Service records in matching programs to ensure compliance with the Privacy Act and all relevant statutes, regulations, and guidelines. In addition, the Board annually reviews matching programs and other matching activities in which the Postal Service has participated during the preceding year to determine compliance with applicable laws, regulations, and agreements; compiles a biennial matching report of matching activities; and performs review and advisement functions relating to records accuracy, recordkeeping and disposal practices, and other computer matching activities.

(2) *Composition.* The Privacy Act requires that the senior official responsible for implementation of agency Privacy Act policy and the Inspector General serve on the Board. The Records Officer, as administrator of Postal Service Privacy Act policy, serves as Secretary of the Board and performs the administrative functions of the Board. The Board is composed of these and other members designated by the Postmaster General, as follows:

(i) Vice President/Controller (Chairman).

(ii) Chief Postal Inspector in his or her capacity as Inspector General.

(iii) Vice President, Employee Relations.

(iv) General Counsel.

(v) Records Officer (Secretary).

6. Paragraph (b)(6) is added to § 266.4 as follows:

§ 266.4 Collection and disclosure of information about individuals.

* * * * *

(b) * * *

(6) *Computer matching purposes.* Records from a Postal Service system of records may be disclosed to another agency for the purpose of conducting a computer matching program or other matching activity as defined in paragraphs (c) and (d) of § 262.5, but only after a determination by the Data Integrity Board that the procedural requirements of the Privacy Act, the guidelines issued by the Office of Management and Budget, and these regulations as may be applicable are met. These requirements include:

(i) *Routine use.* Disclosure is made only when permitted as a routine use of the system of records. The USPS Records Officer determines the applicability of a particular routine use and the necessity for adoption of a new routine use.

(ii) *Notice.* Publication of new or revised matching programs in the **Federal Register** and advance notice to Congress and the Office of Management and Budget must be made pursuant to paragraph (f) of § 266.5.

(iii) *Computer matching agreement.* The participants in a computer matching program must enter into a written agreement specifying the terms under which the matching program is to be conducted (see § 266.10). The Records Officer may require that other matching activities be conducted in accordance with a written agreement.

(iv) *Data Integrity Board approval.* No record from a Postal Service system of records may be disclosed for use in a computer matching program unless the matching agreement has received approval by the Postal Service Data Integrity Board (§ 266.10). Other matching activities may, at the discretion of the Records Officer, be submitted for Board approval.

* * * * *

7. Paragraph (f) is added to § 266.5 as follows:

§ 266.5 Notification.

* * * * *

(f) *Notification of computer matching program.* The Postal Service publishes in the **Federal Register** and forwards to Congress and the Office of Management and Budget advance notice of its intent to establish, substantially revise, or renew a matching program, unless such notice is published by another participant agency. In those instances in which the Postal Service is the "recipient" agency, as defined in the Act, but another participant agency sponsors and derives the principal benefit from the matching program, the other agency is expected to publish the notice. The notice must be published at least 30 days, and sent to Congress and OMB 40 days, prior to (1) initiation of any matching activity under a new or substantially revised program, or (2) expiration of the existing matching agreement in the case of a renewal of a continuing program.

8. Paragraph (e) is added to § 266.8 as follows:

§ 266.8 Schedule of fees.

* * * * *

(e) The Postal Service may, at its discretion, require reimbursement of its costs as a condition of participation in a computer matching program or activity with another agency. The agency to be charged is notified in writing of the approximate costs before they are incurred. Costs are calculated in accordance with the schedule of fees at § 265.9.

* * * * *

9. Section 266.10 is added as follows:

§ 266.10 Computer matching.

(a) *General.* Any agency or Postal Service component that wishes to use records from a Postal Service automated system of records in a computerized comparison with other postal or non-postal records must submit its proposal to the USPS Records Officer. Computer matching programs as defined in paragraph (c) of § 262.5 must be conducted in accordance with the Privacy Act, implementing guidance issued by the Office of Management and Budget and these regulations. Records

may not be exchanged for a matching program until all procedural requirements of the Act and these regulations have been met. Other matching activities must be conducted in accordance with the Privacy Act and with the approval of the Records Officer. See paragraph (b)(6) of § 266.4.

(b) *Procedure for submission of matching proposals.* A proposal must include information required for the matching agreement discussed in paragraph (d)(1) of this section. The Inspection Service must submit its proposals for matching programs and other matching activities to the USPS Records Officer through:

Independent Counsel, Inspection Service, U.S. Postal Service, 475 L'Enfant Plaza SW., Rm. 3417, Washington DC 20260–2181.

All other matching proposals, whether from postal organizations or other government agencies, must be mailed directly to:

USPS Records Officer, U.S. Postal Service, 475 L'Enfant Plaza SW., Rm. 8831, Washington DC 20260–5240.

(c) *Lead time.* Proposals must be submitted to the USPS Records Officer at least 3 months in advance of the anticipated starting date to allow time to meet Privacy Act publication and review requirements.

(d) *Matching agreements.* The participants in a computer matching program must enter into a written agreement specifying the terms under which the matching program is to be conducted. The Records Officer may require similar written agreements for other matching activities.

(1) *Content.* agreements must specify:

(i) The purpose and legal authority for conducting the matching program;

(ii) The justification for the program and the anticipated results, including, when appropriate, a specific estimate of any savings in terms of expected costs and benefits, in sufficient detail for the Data Integrity Board to make an informed decision;

(iii) A description of the records that are to be matched, including the data elements to be used, the number of records, and the approximate dates of the matching program;

(iv) Procedures for providing notice to individuals who supply information that the information may be subject to verification through computer matching programs;

(v) Procedures for verifying information produced in a matching program and for providing individuals an opportunity to contest the findings in accordance with the requirement that an agency may not take adverse action against an individual as a result of information produced by a matching program until the agency has independently verified the information and provided the individual with due process;

(vi) Procedures for ensuring the administrative, technical, and physical security of the records matched; for the retention and timely destruction of records created by the matching program; and for the use and return or destruction of records used in the program;

(vii) Prohibitions concerning duplication and redisclosure of records exchanged, except where required by law or essential to the conduct of the matching program;

(viii) Assessments of the accuracy of the records to be used in the matching program; and

(ix) A statement that the Comptroller General may have access to all records of the participant agencies in order to monitor compliance with the agreement.

(2) *Approval.* Before the Postal Service may participate in a computer matching program or other computer matching activity that involves both USPS and non-USPS records, the Data Integrity Board must have evaluated the proposed match and approved the terms of the matching agreement. To be effective, the matching agreement must receive approval by each member of the Board. Votes are collected by the USPS Records Officer. Agreements are signed on behalf of the Board by the Chairman. If a matching agreement is disapproved by the Board, any party may appeal the disapproval in writing to the Director, Office of Management and Budget, Washington, DC 20503–0001, within 30 days following the Board's written disapproval.

(3) *Effective dates.* No matching agreement is effective until 40 days after the date on which a copy is sent to Congress. The agreement remains in effect only as long as necessary to accomplish the specific matching purpose, but no longer than 18 months, at which time it expires unless extended. The Data Integrity Board may extend an agreement for one additional year, without further review, if within 3 months prior to expiration of the 18-month period it finds that the matching program is to be conducted without change, and each party to the agreement certifies that the program has been conducted in compliance with the matching agreement. Renewal of a continuing matching program that has run for the full 30-month period requires a new agreement that has received Data Integrity Board approval
